3. Provide service to the university, the civil engineering profession, and the community at large.

The department provides an educational program of basic and specialized engineering knowledge necessary for its graduates to be proficient in recognized specialties of civil engineering. This preparation provides graduates with the tools needed for successful practice in the period following graduation. In addition to general and technical education, the educational program stresses professional and ethical responsibilities, an awareness of societal issues, and the need for life-long learning.

The department contributes to the advancement of knowledge through research on important engineering problems. The research results are communicated through recognized channels of knowledge dissemination.

The department serves the needs of the community by emphasizing global and societal issues. The department addresses these issues through university and professional channels and contributes to their solutions.

Program Educational Objectives

The Department of Civil and Environmental Engineering has established the following program educational objectives:

- To understand, apply and develop fundamental knowledge in science, technology, engineering and mathematics.
- To attain advanced qualification in both specialization and breadth.
- To understand and apply business sensitive criteria in meeting professional responsibilities.
- To incorporate societal sensitive criteria into professional decisions.
- To develop forward-thinking attitudes that enhance communication and exemplary practice.

Program Learning Outcomes

In addition to ensuring technical competency of all graduates in the broad discipline areas of civil engineering, the department must encourage the development of skills and abilities that will enhance the marketability of its graduates and provide them with the best possible opportunity for success in the workplace. As a result, the faculty has agreed to develop the following abilities and skills within each graduate and has approved the following Student Outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional outcomes as per ASCE criteria are:

- Breadth in civil engineering areas
- Technical specialization
- Project management
- Public policy
- Business and public administration
- Leadership
- Attitudes

REQUIREMENTS

The Department offers a program of study leading to an ABET-accredited Bachelor of Science in Civil Engineering (BSCE) degree. Each student specializes in one of three tracks: Geotechnical and Structural Engineering, Environmental and Water Resources Engineering, or Transportation Systems and Project Management. A total of 122 credit hours are required for a BSCE degree with emphasis in basic science (mathematics, chemistry, and physics), engineering science (mechanics of materials, statics, and dynamics), basic civil and environmental engineering courses; required courses in the selected track; technical electives; and a senior capstone design course. The curriculum provides a sensible blend of required courses and electives, permitting students to pursue their interests without the risk of overspecialization.

Total Credits 60

[1] ENCE466 may only be taken in the semester in which the student graduates.

Minimum Degree Requirements: 122 credits and the fulfillment of all departmental, school, and university requirements with a cumulative grade point average of at least 2.0. Additional semester credits will be involved to the extent that courses carrying more than three credits are selected.

ENCE Electives

- 3XX, 4XX or 6XX. At least two must be ENCE courses
- No more than one ENCE489
- No more than 3 total ENCE with the same first two numbers

Breadth Electives

Geotechnical & Structural Track

Include two electives from List A or List B:

List A

Course	Title	Credits
ENCE370	Introduction to Transportation Engineering and Planning	3
ENCE402	Simulation and Design of Experiments for Engineers	3

ENCE422	Project Cost Accounting and Economics	3
ENCE423	Project Planning, Estimating & Scheduling	3
ENCE470	Highway Engineering	3
ENCE472	Transportation Engineering	3

List B

Course	Title	Credits
ENCE310	Introduction to Environmental Engineering	3
ENCE411	Environmental Engineering Science	3
ENCE412	Environmental Engineering Unit Operations	3
ENCE431	Hydrologic Engineering	3
ENCE432	Ground Water Hydrology	3

Transportation/Project Management Track

Include two electives from List A or List B:

List A

Course	Title	Credits
ENCE340	Fundamentals of Geotechnical Engineering	3
ENCE353	Introduction to Structural Analysis	3
ENCE441	Foundation Design	3
ENCE444	Experimental Methods in Geotechnical Structural Engineering	3
ENCE454	Design of Concrete Structures	3

List B

Course	Title	Credits
ENCE310	Introduction to Environmental Engineering	3
ENCE411	Environmental Engineering Science	3
ENCE412	Environmental Engineering Unit Operations	3
ENCE431	Hydrologic Engineering	3
ENCE432	Ground Water Hydrology	3

Environmental/Water Resources Track

Include two electives from List A or List B:

List A

Course	Title	Credits
ENCE340	Fundamentals of Geotechnical Engineering	3
ENCE353	Introduction to Structural Analysis	3
ENCE441	Foundation Design	3
ENCE444	Experimental Methods in Geotechnical Structural Engineering	3
ENCE454	Design of Concrete Structures	3

List B

Course	Title	Credits
ENCE320	Introduction to Project Management	3
ENCE370	Introduction to Transportation Engineering and Planning	3
ENCE402	Simulation and Design of Experiments for Engineers	3
ENCE423	Project Planning, Estimating & Scheduling	3
ENCE470	Highway Engineering	3
ENCE472	Transportation Engineering	3

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Construction Project Management Minor (ENGR)

A. James Clark School of Engineering
1131 Glenn L. Martin Hall
Phone: 301-405-0234

School of Architecture, Planning and Preservation
Architecture Building
Phone: 301-405-8000

Program Director: Qingbin Cui, Ph.D.

A minor in Construction Project Management will prepare students for employment in one of the many careers related to the built environment, such as project management, architectural engineering, design and commercial construction. Students will learn how to manage multiple phases of operation and management in the construction process including building information modeling, cost estimating, project scheduling, construction financing and planning. The Construction Project Management minor is ideal for students in Architecture, Engineering and similar fields. This minor is designed to give students a competitive advantage when applying for a job in the construction industry.

Admission Requirements

This minor is only available to undergraduate students in the A. James Clark School of Engineering and the School of Architecture, Planning and Preservation who have earned at least 60 credit hours (Junior standing), and have a cumulative University of Maryland GPA of 3.0 or higher.

Application Process

Interested students must complete an application to the minor, and obtain approval from their major advisor and the CPM minor advisor for their school. Students can obtain an application from their major advisor or go to: pm.umd.edu/program/cpm-minor (http://pm.umd.edu/program/cpm-minor/) for an online copy.

For more information about this minor, please contact the advisor associated with your College/School:

- Engineering – CPM Minor Advisor- Dr. Qingbin Cui: cui@umd.edu
- Architecture – CPM Minor Advisor - Jordan Fields: jfields5@umd.edu (gweaver@umd.edu) (hbulich@umd.edu)

REQUIREMENTS

The Minor in Construction Project Management consists of 15 credit hours. Students must complete 5 of the following courses with a grade

of "C-" or better and have a minimum 2.0 GPA for the minor. Students must also complete an internship in the construction industry.

Course	Title	Credits
Required Courses		
ENCE325	Introduction to Construction Project Management [1]	3
ENCE423	Project Planning, Estimating & Scheduling [1]	3
ENCE424	Communication for Project Managers [2]	3
ENCE426	Construction Documentation and BIM Applications in Engineering and Construction [1]	3
or ARCH472	Building Information Modeling Communication and Collaboration	
Electives		
Select one of the following:		3
ENCE420	Selection and Utilization of Construction Equipment [3]	
ENCE421	Legal Aspects of Architectural and Engineering Practice [4]	
ENCE422	Project Cost Accounting and Economics [2]	
ARCH430	Measuring Sustainability in Architecture [3]	
ARCH462	Methods & Materials of Building Construction [3]	
ARCH467	Integrated Project Delivery [3]	
Total Credits		**15**

1 Course offered in Fall and Spring
2 Course offered in Fall, Spring and online in the Summer
3 Course offered in the Fall
4 Course offered in the Spring

All courses are also offered online in the summer session. Please see the Schedule of classes.

Project Management Minor

Civil and Environmental Engineering (ENCE)
1173 Engineering Classroom Building
Phone: 301-405-7768
pm.umd.edu/program/undergraduate-minor-in-project-management (http://pm.umd.edu/program/undergraduate-minor-in-project-management/)

Program Director: Qingbin Cui, Ph.D.

The Minor in Project Management is open to all students in the A.J. Clark School of Engineering or the School of Architecture, Planning & Preservation that have earned at least 60 credit hours and have a GPA of 3.0 or higher.

A basic understanding of project management is becoming increasingly important for engineers. Such knowledge enables them to contribute immediately to employers, and to advance their careers. In addition to a strong engineering background, there is significant need for engineers to understand the fundamentals of managing projects in order to effectively participate as members of project teams. Students who successfully complete minor requirements will receive a notation on their official transcript.

REQUIREMENTS

A total of 15 credits are required. All courses for the minor must be passed with a grade of "C-" or better.

Course	Title	Credits

2426 A.V. Williams Building
Phone: 301-405-3685
eceadvise@umd.edu
ece.umd.edu (http://www.ece.umd.edu)

The Department of Electrical and Computer Engineering (ECE) at the University of Maryland, College Park offers one of the strongest and most highly-ranked programs in the nation. Led by 89 full-time and affiliate faculty members and 50 research faculty and postdocs, the research programs within the department cover a wide spectrum of activities in the areas of:

- Communications and Networking
- Signal Processing
- Control, Robotics, and Dynamical Systems
- Computer Engineering
- Optics and Photonics
- Circuits and Systems
- Electronic Materials and Devices
- Bioelectronics and Systems
- Applied Electromagnetics

PROGRAMS

Majors

- Computer Engineering Major (p. 408)
- Electrical Engineering Major (p. 411)
- Embedded Systems and Internet of Things Major (p. 413)

Minor

- Computer Engineering Minor (p. 410)

ADVISING

All ECE students have mandatory advising every single semester, provided by the professional advising staff of the ECE Undergraduate Studies Office. Departmental permission is required in order for

students to register and for all courses in the major. The Department's Undergraduate Studies Office (2426 A.V. Williams Building, 301-405-3685) is the primary point of contact for undergraduates with advising questions and detailed curriculum requirements, registration information, and advising and mentoring procedures can be found on the ECE Undergraduate Advising website: ece.umd.edu/undergrad/advising (http://www.ece.umd.edu/undergrad/advising/).

OPPORTUNITIES

Undergraduate Research Experiences

The Department of Electrical and Computer Engineering is affiliated with more than 40 specialized laboratories, supporting activities including: speech and image processing, high performance systems, mobile computing and multimedia, communication networks, robotics, control systems, neural systems, systems integration, VLSI design and testing, experimental software engineering, semiconductor materials and devices, photonics, fiber optics, ion beam lithography, real-time systems, human-computer interaction, and virtual reality. Undergraduate students are encouraged to engage in research at some point during their education. Active participation in research not only allows students to apply what they have learned in class, it also gives them greater insight into a specific area within ECE and an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications. Research experience also prepares students for the demands of graduate school and the work force. Information on participating in undergraduate research can be found at ece.umd.edu/undergrad/courses/400-level/enee499 (http://www.ece.umd.edu/undergrad/courses/400-level/enee499/).

Internships

Information on internships can be found at eng.umd.edu/careers (https://eng.umd.edu/careers/). Other internships are advertised by the ECE Department's Office of External Relations and Office of Undergraduate Studies.

Co-op Programs

Participation in a Cooperative Education Program or internship with private industry or a government agency is strongly encouraged. See the A. James Clark School of Engineering catalog entry for details.

Job Opportunities

Electrical and computer engineers were primarily responsible for the recent revolutions in the music, telecommunications and medical device industries. They remain at the forefront of cutting edge developments and innovations in nanotechnology, robotics, and other technologies. Electrical engineers also have wide ranging employment opportunities in other fields including electronics, microelectronics, communications and signal processing, power systems, electrophysics, computer architecture, circuits, and control systems. Specific jobs include developing fiber optic technology, lasers for biomedical applications, software for robots, electronic weapons systems, advanced wireless networks, and neuron-like sensors for various applications.

Honors Program

The Electrical and Computer Engineering Honors Program (http://ece.umd.edu/undergrad/honors/) is intended to provide a more challenging and rewarding undergraduate experience for students pursuing the baccalaureate in Electrical or Computer Engineering. The program requirements have recently changed, so please visit the ECE Honors website for program course requirements. Students completing all program requirements with a "B" average (3.0 on a 4.0 scale) and a cumulative GPA of 3.5 for all undergraduate work will have their participation noted on their B.S. diploma. Students may opt into the program at any time, and will work with the ECE undergraduate office to ensure they have completed the appropriate requirements.

Student Societies and Professional Organizations

The ECE Department has an active student chapter of the Institute of Electrical and Electronics Engineers (IEEE). Information and instructions for joining can be found on their website: terplink.umd.edu/organization/ieee-umd (https://terplink.umd.edu/organization/ieee-umd/). Equally active is the Gamma Xi chapter of Eta Kappa Nu honor society which is dedicated to recognizing excellence in electrical and computer engineering. Information on eligibility can be obtained by visiting their website: ece.umd.edu/hkn (http://ece.umd.edu/hkn/).

The ECE Department also offers the ECE Peer Mentoring Program sponsored by Texas Instruments. ECE peer mentors provide insider knowledge about the department and college as well as share helpful resources to ensure academic and social success. The ECE Peer Mentor Program offers various programming throughout the year including workshops, guest speakers, and social events to build community within ECE. More information about the ECE Peer Mentoring Program can be found at ece.umd.edu/undergraduate/peer-mentoring (https://ece.umd.edu/undergraduate/peer-mentoring/).

Scholarships and Financial Assistance

Several scholarships are administered through the department and many others through the Clark School of Engineering. To be considered for these awards, students must submit an application by May 31st of each year for the following academic year. For more information visit: ursp.umd.edu/scholarships/index.html (http://www.ursp.umd.edu/scholarships/).

In addition, the Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://financialaid.umd.edu).

Departmental Awards

Each spring, the ECE Department recognizes its talented and committed students with departmental awards. The ECE Chair's Award is presented to graduating seniors in Electrical and Computer Engineering for outstanding academic performance. The ECE Outstanding Academic Performance Award is presented to a junior for demonstrating outstanding academic excellence. The ECE Service Award is presented to a graduating senior(s) who has demonstrated exceptional leadership and service to both their fellow students and the department.

Computer Engineering Major

Program Director: Donald Yeung, Ph.D.

The computer engineering major combines the strengths of both the Department of Electrical and Computer Engineering and the Department of Computer Science to prepare students for careers in the computer industry. The program encompasses the study of hardware, software, and systems questions that arise in the design, development, and application

of computers and embedded systems. Specifically, computer engineering students will have a knowledge of hardware systems (electrical networks, electronics, and VLSI); a knowledge of software systems (algorithms, data structures, and operating systems); and a knowledge of how these two domains interact (digital logic, signal and system theory, computer architectural and performance analysis). Computer Engineering students will learn about everything that goes into digital and computing systems, from solid state physics to CMOS VLSI design, to computer architecture to programming, and from operating systems to compiler and language theory. Courses offered by this department may be found under the following acronym: ENEE and CMSC.

The Computer Engineering undergraduate program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Program Objectives

Broadly stated, the **Program Educational Objectives (PEOs)** for the undergraduate major in computer engineering pertain to the accomplishments and performance of our students 3-5 years after graduation. These objectives are determined in consultation with the various constituencies of the computer engineering program and agreed upon and approved by a consensus of the faculty.

1. Advance to a leadership position in a reputable industry or government institution.
2. Earn a graduate degree from a top ranked graduate program in Computer Engineering or related field.
3. Have our graduates become an innovator and/or entrepreneur in a Computer Engineering or related space.

Program Learning Outcomes

A comprehensive set of Student Learning Outcomes (SLOs) has been derived from the Program Educational Objectives (PEOs). These SLOs comprise the knowledge and skills all Computer Engineering students are expected to possess by the time they graduate so the PEOs can be accomplished. The SLOs are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

As in all engineering degrees, the student starts out with a core curriculum in mathematics and basic science. Subsequent years of study involve courses covering a balanced mixture of hardware, software, hardware-software trade-offs, and basic modeling techniques used to represent the computing process. Courses covering algorithms, data structures, digital systems, computer organization and architecture, software and hardware design and testing, operating systems, and programming languages will be included. Elective courses must include electrical engineering and computer science courses and technical courses outside the departments. ***Students must earn a grade of "C-" or higher in all engineering, mathematics, and science courses as well as the prerequisites for these courses.*** A sample program is shown below.

Freshman Year

General Education[3]	3	Professional Writing Requirement	3
	15		**15**
Total Credits 128			

1 ENEE101 and ENES100 cannot be taken in the same semester. Students may take these courses consecutively within their first year in the order of choice.
2 Students may need to take CMSC131 or the computer science exemption exam before taking CMSC132.
3 Note: Please see www.4yearplans.umd.edu (http://www.4yearplans.umd.edu)
4 Some category C, D, and E courses require ENEE324 as a prerequisite.
5 Course selection will determine courses taken in Category C, D, and E courses.

Technical Elective Requirements

Computer Engineering Majors are required to complete 26 credits of computer engineering technical electives. These electives must be selected from the six following categories, each of which has minimum credit requirements.

Category	Electives	Credits
Category A	Mathematics and Basic Science Electives	minimum of 6
Category B	Computer Science Theory and Applications	minimum of 3
Category C	Electrical Engineering Theory and Applications	minimum of 6
Category D	Advanced Laboratory	minimum of 2
Category E	Capstone Design	minimum of 3
Category F	General Technical Electives	minimum of 3

Please read carefully, and make a note of the following special cases and other items:

1. General Technical Electives. They may be any upper-level course (300 level or higher) from the math, engineering, and basic science disciplines whose courses start with the following prefixes and who do not appear on the list of unacceptable courses available from the Undergraduate Studies Office: AMSC, BCHM, BIOE, BSCI, CHEM, CMSC, ENAE, ENCE, ENCH, ENEE, ENES, ENFP, ENMA, ENME, ENNU, ENRE, MATH, PHYS, and STAT. Students may use an upper level course (300 level or higher) whose prefix is not given in the list above, assuming they received approval to use such courses and the following conditions are met: (i) a student selects two or more such courses which are closely related by a theme and (ii) the student demonstrates how these courses complement their professional goals. The most up-to-date list of approved and unacceptable courses will always be available from the Undergraduate Studies Office and on the ECE website. Students have the option of taking an additional ENEE or CMSC course to fulfill this requirement (these ENEE or CMSC courses cannot be courses used to fulfill other Computer Engineering major requirements).
2. Additional Computer Engineering Technical Electives (3 Credits). In order to meet the required 26 credits of Computer Engineering Technical Electives, students may take an additional course from Categories A-F. The additional Technical Elective Course cannot be a course already used to satisfy any of the categories. Students opting to take a second Category D or E course should note the registration restrictions the ECE Department has on second advanced lab and/or capstone design courses (see your advisor for details).
3. Two credits of ENEE499 may be used to satisfy the Advanced Laboratory requirement subject to approval by the faculty supervisor and the Associate Chair. The maximum number of ENEE499/ENEE499L credits that may be applied towards EE technical elective requirements is five, except for students in the departmental honors program, who may take up to six credits.
4. Additional Capstone Design courses can be used as substitutes for the required Electrical Engineering Theory and Applications course, and/or the required Advanced Laboratory course, provided one of the following is completed: ENEE408A, ENEE408B or ENEE408C.
5. Courses may not be counted for two different Technical Elective categories.
6. Disciplinary foundation CMSC or ENEE courses (i.e. CMSC412, ENEE447, CMSC330, CMSC351, ENEE303, ENEE322, ENEE350, and ENEE446) may not be used to fulfill any Technical Elective Categories.
7. Courses listed in the prohibited course list may not be used for any technical electives category.
8. If you have any questions on how these requirements affect your current selection of technical electives, please contact an advisor.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Computer Engineering Minor

Program Director: Donald Yeung, Ph.D.

The minor in Computer Engineering is a program offered by the Department of Electrical and Computer Engineering. The minor will introduce students to core hardware concepts, such as computer architecture, digital logic design, and digital circuit design, as well as core software concepts, such as algorithms, discrete mathematics, and programming. Students will also learn how hardware and software interact at the interface, for example in embedded systems. With a minor in computer engineering, students will not only receive preparation for entry into the computer industry, but they will also become more effective at applying computing in their primary field of study.

REQUIREMENTS

The Computer Engineering minor has 18 required credits of coursework. All students in the minor will be required to satisfy the two prerequisites, ENEE150 and MATH141, with grades of "B-" or higher. Students in the Electrical Engineering major will have satisfied these prerequisites as part of their program.

In order to complete the minor, students must complete all 18 required credits of the minor with a minimum grade of "C-" in each minor course

Course	Title	Credits
ENEE244	Digital Logic Design	3
ENEE245	Digital Circuits and Systems Laboratory	2
ENEE350	Computer Organization	3
ENEE351	Algorithms and Data Structures	4
Select two of the following elective courses:		6
ENEE359	Intermediate Topics in Computer Engineering (ENEE359F Hardware FPGA Design with Verilog)	
ENEE359	Intermediate Topics in Computer Engineering (ENEE359X Introduction to System Programming)	
ENEE436	Foundations of Machine Learning	
ENEE440	Microprocessors	
ENEE446	Digital Computer Design	
ENEE459	Topics in Computer Engineering (ENEE459C Computer Security)	
ENEE459	Topics in Computer Engineering (ENEE459E Cryptology)	
ENEE459	Topics in Computer Engineering (ENEE459P Parallel Algorithms)	
ENEE459	Topics in Computer Engineering (ENEE459V Embedded Systems)	
Total Credits		**18**

Electrical Engineering Major

Program Director: Donald Yeung, Ph.D.

Electrical engineers create innovative technology solutions in a wide range of areas, from handheld communications to solar panels; from cardiac pace makers to autonomous robots; from wireless networks to bio-engineered sensors that detect dangerous pathogens; and intelligent surveillance systems that perform face and motion recognition. Employers visiting campus seek out electrical engineering students for recruitment more than any other major at the University of Maryland.

Electrical engineers have been uniquely responsible for developing many of the innovations that have brought us modern life and are urgently needed today to help solve a variety of global problems, including challenges related to energy, communications, health care, global warming, and national security. Electrical engineering underpins all other engineering disciplines, encompassing biomedical devices technology, micro- and nanoelectronics, information systems, wireless communications and signal processing, power systems, lasers and optics, electronic devices, computer software-hardware integration, and control systems. Electrical engineers led revolutions in the music and telecommunications industries, and are poised to lead the next revolutionary innovations in nanotechnology, robotics, and other advanced technologies.

The Bachelor of Science degree in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Program Objectives

Broadly stated, the **Program Educational Objectives (PEOs)** for the undergraduate major in electrical engineering pertain to the accomplishments and performance of our students 3-5 years after graduation. These objectives are determined in consultation with the various constituencies of the electrical engineering program and agreed upon and approved by a consensus of the faculty.

1. Advance to a leadership position in a reputable industry or government institution.
2. Earn a graduate degree from a top ranked graduate program in Electrical Engineering or related field.
3. Have our graduates become an innovator and/or entrepreneur in an Electrical Engineering or related space.

Program Learning Outcomes

A comprehensive set of Student Learning Outcomes (SLOs) has been derived from the Program Educational Objectives (PEOs). These SLOs comprise the knowledge and skills all Electrical Engineering students are expected to possess by the time they graduate so the PEOs can be accomplished. The SLOs are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

Requirements for the Electrical Engineering major include thorough preparation in mathematics, physics, chemistry, and engineering science. Elective courses must include both Electrical Engineering courses and technical courses outside the department. Students must earn a grade of "C-" or higher in all engineering, mathematics, and science courses, as well as the prerequisites for these courses. A sample program is shown below.

Freshman Year			
First Semester	**Credits**	**Second Semester**	**Credits**
CHEM135	3	ENES100[1]	3
ENEE101[1]	3	ENEE150[2]	3

ELECTIVE - EE Electives	8	ELECTIVE - EE Electives	6
ELECTIVE - General Technical Electives[4]	3	ELECTIVE - General Technical Electives[4]	6
MATH4xx - Advanced Elective Math[5]	3	General Education[3]	3
	14		**15**

Total Credits 126

1. ENEE101 and ENES100 cannot be taken in the same semester. Students may take these courses consecutively within their first year in the order of choice.
2. Students must complete ENEE140 or pass the exemption exam or AP CS exam before taking ENEE150.
3. Note: Please see www.4yearplans.umd.edu (http://www.4yearplans.umd.edu).
4. Must come from list of courses approved for general technical electives with at least two elective EE courses taken from the same specialty area.
5. Must come from list of approved Math courses within general technical elective list.

TECHNICAL ELECTIVE REQUIREMENTS

Effective Fall 2008, all entering BSEE students must:

1. Distribute their 13 credits of EE technical electives among the following course categories:

Category	Electives	Credits
Category A	Advanced Theory and Applications	minimum of 3 credits
Category B	Advanced Laboratory	minimum of 2 credits
Category C	Capstone Design	minimum of 3 credits

   Note: ENEE499, Senior Projects in Electrical and Computer Engineering, may be used to satisfy either the Category A or the Category B requirement subject to approval by the faculty supervisor and the Associate Chair; it cannot be used as a Category C course.
   The maximum number of ENEE499/ENEE499L credits that may be applied towards EE technical elective requirements is five, except for students in the departmental honors program, who may take up to six credits.
2. Distribute their 9 credits of general technical electives as follows:
   a. They may be any upper-level course (300 level or higher) from the math, engineering, and basic science disciplines whose courses start with the following prefixes and who do not appear on the list of unacceptable courses available from the Undergraduate Studies Office: AMSC, BCHM, BIOE, BSCI, CHEM, CMSC, ENAE, ENCE, ENCH, ENEE, ENES, ENFP, ENMA, ENME, ENNU, ENRE, MATH, PHYS, and STAT. The most up-to-date list of approved and unacceptable courses will always be available from the Undergraduate Studies Office and on the ECE website.
   b. They may be any upper-level course (300 level or higher) whose prefix is not given in the list above, assuming that the student:
      i. completes the application to allow the course to count as a general elective,
      ii. demonstrates how this course complements the student's professional goals, and
      iii. receives the signed approval of the Associate Chair for Undergraduate Education. If more than one course is taken via this option, all of those courses must have a closely-related theme.
3. Have two courses from the same ENEE specialty area. A list of courses grouped according to specialty area is available from the Undergraduate Studies Office and on the ECE website.

If you have any questions about how these requirements affect your current selection of senior EE electives, please contact an advisor.

Technical electives for students admitted Spring 2001 - Spring 2008:

The 13 credits of EE technical electives among the following course categories:

Category	Electives	Credits
Category A	Advanced Theory and Applications	minimum of 3
Category B	Advanced Laboratory	minimum of 2
Category C	Capstone Design	minimum of 3

Please read carefully, and make a note of, the following special cases and other items:

1. Two credits of ENEE499, Senior Projects in Electrical and Computer Engineering, may be used to satisfy the Advanced Laboratory requirement subject to approval by the faculty supervisor and the Associate Chair. The maximum number of ENEE499 credits that may be applied towards EE technical elective requirements is five.
2. Additional Capstone Design courses can be used as substitutes for
   - the required Advanced Theory and Applications course; and/or
   - the required Advanced Laboratory course, provided one of the following is completed:ENEE408A, ENEE408B, ENEE408C, or ENEE408F.
3. Completion of ENEE408A and ENEE459A satisfies both the Capstone Design and Advanced Laboratory requirements.

4. If you have any questions on how these requirements affect your current selection of senior EE electives, please contact an advisor.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Embedded Systems and Internet of Things Major

NOTICE OF ADDENDUM: THIS PROGRAM WAS RENAMED CYBER-PHYSICAL SYSTEMS ENGINEERING EFFECTIVE SPRING 2023. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Program Director: Romel Gomez, Ph.D.

The Bachelor of Science in Embedded Systems and Internet of Things will provide students with a solid foundation in key emerging technologies of the Internet of Things (IoT), the ability to integrate devices into complete IoT systems, and an understanding of how IoT fits within the wider context of information and communications technology, including data analytics and cloud computing. At the senior level, students will ultimately be able to specialize in one of the following tracks: Hardware, Computation, or Security track or pursue a General track option that provides a focus on courses from the other three tracks. It is expected that graduates will be in high demand in such occupational areas as hardware/software developers, computer systems analysts, network architects and administrators, information security analysts, information systems analysts and computer programs.

Admission to the Major

As an undergraduate program within the A. James Clark School of Engineering, the Embedded Systems major is a Limited Enrollment Program (LEP). Admission to this program will follow the School of Engineering's admissions criteria found on the LEP website: lep.umd.edu (http://lep.umd.edu).

Beyond the LEP gateway criteria, students will need to fulfill the following requirements to gain admission to the Embedded Systems major:

- Completion of all first and second year required major courses with a minimum grade of a "C-."
- Completion of all lower-level University General Education requirements.
- Completion of 60 credits.

A minimum grade point average of 3.0 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Due to the similarity in curriculum content and the physical location of course offerings, students in the Electrical Engineering, Computer Engineering, and Computer Science programs at UMD will not be eligible to add Embedded Systems as a second major or degree.

This program is mainly intended for students transferring from a Maryland public community college. While students at the College Park campus can pursue the program, they will not be able to seek admission into the School of Engineering and the Embedded Systems major until they have completed the Engineering LEP gateway courses, required first and and second year major courses, lower-level General Education requirements, and have earned at least 60 credits. The junior and senior years would take place at the Shady Grove campus.

Program Objectives

The program education objective of this program is to produce a well-trained workforce in the emerging technologies of internet of things. The Bachelor of Science in Embedded Systems and Internet of Things will produce engineering graduates who:

- Use their hardware and software engineering design training and problem-solving skills to contribute professionally in an industrial, research and applications environment;
- Demonstrate initiative, leadership, teamwork, and continued professional development;
- Demonstrate understanding of the impact of their professional activities on society.

Program Learning Outcomes

1. An ability to apply knowledge of computing, engineering, science, and mathematics to identify, analyze and solve complex engineering problems.
2. An ability to design, implement, and evaluate a computer#based system, process, component, or program that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An understanding of professional, ethical, legal, security, and social issues and responsibilities.
5. An ability to analyze the local and global impact of computing on individuals, organizations, and society.
6. An ability to function effectively on teams to accomplish a common goal.
7. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
8. An ability to acquire and apply new knowledge, using appropriate learning strategies.

REQUIREMENTS

NOTICE OF ADDENDUM: THIS PROGRAM WAS RENAMED CYBER-PHYSICAL SYSTEMS ENGINEERING EFFECTIVE SPRING 2023. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

FIRST & SECOND YEAR

Prior to being admitted to the Embedded Systems and Internet of Things major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level General Education requirements, and at least 60 credits.

Course	Title	Credits
MATH140	Calculus I	4
MATH141	Calculus II	4
ENGL101	Academic Writing	3
CHEM135	General Chemistry for Engineers	3
PHYS161	General Physics: Mechanics and Particle Dynamics	3
PHYS260	General Physics: Vibration, Waves, Heat, Electricity and Magnetism	3
PHYS261	General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	1
Programming Requirement [1]		2-4
ENES100	Introduction to Engineering Design	3
One of the following MATH2xx courses:		3-4
MATH246	Differential Equations for Scientists and Engineers	
MATH241	Calculus III	
MATH240	Introduction to Linear Algebra	
General Education Requirements/Additional Electives		28-31

[1] Any of the following programming courses or their equivalents will be accepted:

- ENEE140
- CMSC131
- CMSC106
- Any introductory course in C, C++, Java, or Python (student must submit the course to ECE Department for Evaluation)

Total Credits		**12**

GENERAL TRACK

The General Track offers a general focus of course content with classes from each of the three tracks. While there are no specific required or elective courses for this track, the General Track requires 12 credits, which is the same as the other three tracks. Consult with an advisor for details.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Fire Protection Engineering

A. James Clark School of Engineering
3106 JM Patterson Building
Phone: 301-405-3992
fpe.umd.edu (http://www.fpe.umd.edu)

Students interested in protecting people and the environment, conducting computer simulations, designing systems, creating products, and developing fire-safe materials can all pursue their interests by earning a B.S. and working in fire protection engineering.

Our students begin their undergraduate career with a strong engineering education grounded in the fundamental concepts of physics, mechanics, dynamics, fluid mechanics, thermodynamics and heat transfer. Combine these skills with the application and design of engineering systems, and the fire protection engineer will learn how to protect people, homes, workplaces, the environment and the economy from the devastating effects of fires. In their junior and senior years, students will focus on:

- Suppression and detection
- Fire-resistant materials
- Fire dynamics and behavior
- Smoke, soot and gases
- Human behavior and life safety
- Computer modeling of fire, smoke, suppression and evacuation

PROGRAMS

Major

- Fire Protection Engineering Major (p. 416)

ADVISING

Advising is required for all undergraduate students each semester prior to registering for classes. Please refer to the academic advising section of our website for more information, available at: fpe.umd.edu/undergraduate/current-students/advising-support (https://fpe.umd.edu/undergraduate/current-students/advising-support/).

OPPORTUNITIES

Undergraduate Research Experiences

Many FPE undergraduates perform original research under the direction of a faculty member. These include analytical, experimental, and computational studies. The topics are chosen in discussions between the student and a faculty member. Students can perform research as a volunteer, for pay, or for credit (e.g., ENFP429 or ENFP489).

Fieldwork Opportunities

Information about fieldwork and summer employment is available in the department office, or visit fpe.umd.edu/careers. (https://fpe.umd.edu/careers/)

Internships

Information about internships is available in the department office, or visit fpe.umd.edu/careers (https://fpe.umd.edu/careers/).

Co-op Programs

Information about co-op employment is available in the department office, or visit fpe.umd.edu/careers. (https://fpe.umd.edu/careers/)

Honors Program

Qualified students in the department are eligible for participation in the Clark School's Engineering Honors Program (https://eng.umd.edu/engineering-honors-program/) and may be invited to the Salamander Honorary Society of the Department of Fire Protection Engineering.

Student Societies and Professional Organizations

The University of Maryland student chapter of the Society of Fire Protection Engineers is an active professional society open to all interested FPE students. The department honor society, Salamander, is open to academically eligible juniors and seniors. Student membership in the National Fire Protection Association is also available. Information on these organizations may be obtained from the department office or at fpe.umd.edu/undergraduate/current-students/student-groups. (https://fpe.umd.edu/undergraduate/current-students/student-groups/)

Scholarships and Financial Assistance

Numerous scholarships and grants are available to students in the department from organizational and corporate sponsors. Information is available on eligibility, financial terms, and retention criteria in the department office. The majority of the scholarships are for junior and senior students, but some scholarships are available for first- and second-year students. Additional information is available at fpe.umd.edu/undergraduate/current-students/scholarships. (https://fpe.umd.edu/undergraduate/current-students/scholarships/)

In addition, the Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: financialaid.umd.edu (http://financialaid.umd.edu).

Awards and Recognition

Academic achievement awards are sponsored by the department, student and professional societies along with the honor society. These awards

are presented at various Department events and also at the annual A. James Clark School of Engineering Honors and Awards ceremony. Eligibility criteria for these awards are available in the department office.

Academic Programs and Departmental Facilities

Our laboratories provide hands-on experience with standardized ASTM test procedures, more fundamental experiments, and large scale burn tests. Our computer laboratory has workstations enabled with the latest software for modeling fires, structures, and human behavior. Our student lounge is frequently used for student meetings and study sessions.

Fire Protection Engineering Major

Program Director: Peter Sunderland, Ph.D.

Fire Protection Engineering is concerned with the applications of scientific and technical principles to the dynamics, mitigation, and suppression of fire. This includes the effects of fire on people, on structures, on commodities, and on operations. The identification of fire hazards and their risk, relative to the cost of protection, is an important aspect of fire safety design.

The fire protection engineering student receives a fundamental engineering education involving the subjects of mathematics, physics, and chemistry. The program builds on other core engineering subjects of materials, fluid mechanics, thermodynamics and heat transfer with emphasis on principles and phenomena related to fire. Fluid mechanics includes applications to sprinkler design, suppression systems, and smoke movement. Heat transfer introduces the student to principles of evaporation for liquid fuels. The subject of combustion is introduced involving premixed and diffusion flames, ignition and flame spread, and burning processes. Laboratory experience is gained by being exposed to standard fire tests and measurements. Design procedures are emphasized for systems involving suppression, detection, alarm, and building safety requirements. The background and application of codes and standards are studied to prepare the student for practice in the field. System concepts of fire safety and methods of analysis are presented. A senior design or research project is required which gives the student an opportunity to explore issues beyond the normal classroom environment.

The Bachelor of Science in Fire Protection Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Program Objectives

The educational objectives of the undergraduate program in Fire Protection Engineering are to produce graduates who:

1. Practice fire protection engineering regionally, nationally and internationally in a broad range of modern professional settings;
2. Pursue advanced studies in fire protection engineering or related fields;
3. Actively participate in the development of engineering decisions on societal, environmental, economic and safety issues at the local or global levels;
4. Achieve professional certification and licensure; and
5. Maintain continual professional competency and practice ethically.

The practice of fire protection engineering has developed from the implementation and interpretation of codes and standards directed at fire safety. These safety codes contain technical information and prescriptions derived from experience and research. Research has also led to quantitative methods to assess aspects of fire and fire safety. Thus, fire protection engineers need to be versed in the current technical requirements for fire safety and in the scientific principles that underlie fire and its interactions.

Program Learning Outcomes

Students graduating from the Department of Fire Protection Engineering will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

In general, the curriculum is designed to give the student a grounding in the science and practice of fire safety. The field touches on many disciplines and its scientific basis is expanding. It is an engineering discipline that is still growing, and offers a variety of excellent career opportunities. These cover a wide spectrum involving safety assessment reviews, hazards analysis and research, loss prevention and regulatory issues.

Fischell Department of Bioengineering

A. James Clark School of Engineering
3102 A. James Clark Hall
Phone: 301-405-8268
bioe-undergrad@umd.edu
bioe.umd.edu (http://www.bioe.umd.edu)

The Fischell Department of Bioengineering at the University of Maryland is the home of an emerging academic discipline, exciting interdisciplinary degree programs, and faculty and students who want to make a difference in human health care through education, research, and invention.

Health care is changing rapidly, moving toward more technological approaches to diagnosis (such as body scanners and biosensors), treatment (including targeted therapy, minimally invasive surgery, and implantable devices), personalized and regenerative medicine, and the extensive use of information technology. Biomedical engineering is steadily becoming the world's largest industrial sector, and as a result, there is an increasing demand both for doctors who are technically competent and for engineers who are properly trained in basic medical science.

To help meet these needs, we take advantage of the A. James Clark School of Engineering's location in a metropolitan area that is home to an expansive number of health care facilities, medical schools, biomedical research centers, and federal regulatory agencies. We have established relationships with the National Institutes of Health (including the National Institute of Biomedical Imaging & Bioengineering and the National Cancer institute), the National Science Foundation, and the U.S. Food and Drug Administration, as well as educational institutions such as the University of Maryland Baltimore (UMB) Schools of Medicine, Dentistry, and Pharmacy, and other universities locally and nationally. Our growing interdisciplinary faculty is dedicated to expanding our research collaborations.

We are also dedicated to the vision of engineering entrepreneurship —getting science out of the lab and into the hands of doctors, care providers and consumers. For example, we are a founding member of the FDA-funded Maryland Center of Excellence in Regulatory Science and Innovation (http://www.bioe.umd.edu/research/fda/), which focuses on modernizing and improving the ways drugs and medical devices are reviewed and evaluated.

We have a view of the human condition that is unlike many bioengineering and biomedical engineering departments in the country. Our thoughts and ideas are grounded first in biology. Our faculty and students think about biological systems: how they work, how they function, and how they interact with their environments. They think about how nature organizes information and materials into molecules, cells, tissues, organisms and ecosystems that sense and respond to physical and chemical cues. They try to understand processes that go astray, like those involved in disease. Armed with this knowledge, they use engineering principles to develop new technologies and devices that will change lives and improve human health throughout the world.

PROGRAMS

Major

- Bioengineering Major (p. 420)

ADVISING

The Fischell Department of Bioengineering is committed to student advising and aims to provide comprehensive curricular support to all of its students towards their academic success. Students will find that at various points during their academic careers, they may need a certain kind of guidance. Students may always begin by addressing their questions to bioe-undergrad@umd.edu, and we will point you in the right

direction. Generally, advising is handled by one or a combination of the following: faculty advisor, departmental advisor, and/or college advisor.

Faculty Advising

All bioengineering and biocomputational engineering majors are assigned to a faculty advisor. Students are required to meet with their faculty advisors at least once per semester. For currently enrolled majors, the mandatory advising period occurs in the weeks prior to registration for the next semester. The advising meeting with the faculty member generally covers the following: course selection for upcoming semester, four-year planning, and career goals. Students should prepare for every advising meeting by completing and updating their major's Advising Worksheet.

Freshmen and transfers will be assigned to faculty advisors and notified during their first semesters. All other students may contact bioe-undergrad@umd.edu or biocomp@umd.edu if they are not sure who their advisor is. For faculty contact information, please see the faculty list (http://www.bioe.umd.edu/faculty/).

Departmental Advising

Current and prospective transfer students may also need to meet with a departmental (staff) advisor. Some examples of departmental advising include: Benchmarks (academic progress), planning for study abroad, C.A.R.E (academic probation), double-major/double-degree planning, graduation audit (seniors), and additional help with four-year planning.

For departmental advising, please send an email including your name, UID, and general question to bioe-undergrad@umd.edu (for the Bioengineering major) or biocomp@umd.edu (for the Biocomputational Engineering major). All students seeking advising should read and make sure that they understand the policies and requirements stated in the BIOE Undergraduate Handbook (http://www.bioe.umd.edu/undergraduate/advising/references/).

College Advising

The Clark School of Engineering's Undergraduate Advising and Academic Support Office (UA&AS) (https://eng.umd.edu/undergraduate-advising-academic-support-uaas/) also provides a broad range of services and support for engineering students. Some policies are the oversight of the College, so your faculty or departmental advisor may at times refer you to a Clark School advisor. For example, transfer admission/transfer credit, 45-credit benchmark review, and permission to enroll at another institution are handled by the College.

OPPORTUNITIES

Undergraduate Research Experiences

The Bioengineering Department offers a two-year research based **Bioengineering Undergraduate Honors Program**. Interested students should apply to the honors program in the spring of their sophomore year. Those accepted into the program will begin research in their junior year. For more information, please see: bioe.umd.edu/undergraduate/honors (http://bioe.umd.edu/undergraduate/honors/)

The Maryland Center for Undergraduate Research also assists students in finding on and off campus research opportunities, see: ugresearch.umd.edu (http://www.ugresearch.umd.edu).

Honors Program

The Fischell Department of Bioengineering Undergraduate Honors Program is a research-oriented, thesis-based enrichment experience that serves to augment the curriculum by providing practical, hands-on learning opportunities. The primary goal of the Honors program is to develop BIOE graduates who will be among the most competitive applicants for graduate and medical school programs, as well as industry jobs. Toward this end, the program provides exceptional undergraduate students with training in academic and professional pursuits while offering a formal mechanism to be recognized for scholarly achievements.

For more information, including program admission and completion requirements, see bioe.umd.edu/undergraduate/honors (http://bioe.umd.edu/undergraduate/honors/)

Student Societies and Professional Organizations

BMES-UMD is the University of Maryland, College Park chapter of the Biomedical Engineering Society (BMES). BMES-UMD's mission is to unite and promote the future of the biomedical engineering profession; and to offer rising biomedical engineers the chance to establish leadership, publish their work, and participate in a wide range of activities that will enhance their careers. For more information, visit umdbmes.weebly.com (http://umdbmes.weebly.com).

Alpha Eta Mu Beta (AEMB) is the National Biomedical Engineering Honor Society, and the University of Maryland Fischell Department of Bioengineering established its chapter in spring 2015. For more information, visit umdaemb.weebly.com (http://umdaemb.weebly.com).

The UMD chapter of the Society for Biomaterials was established in 2018. The Society for Biomaterials is a national organization that seeks to unite professionals from different disciplines under the common goal of advancing biomaterials research.

The Engineering World Health Chapter at the University of Maryland seeks to inspire and mobilize the biomedical engineering community to improve the quality of healthcare in vulnerable communities. For more information, visit ewhatumd.wixsite.com/ewh-umd (https://ewhatumd.wixsite.com/ewh-umd/).

Scholarships and Financial Assistance

The University and the A. James Clark School of Engineering offer a range of financial support to talented undergraduate students enrolled at the School. Offerings include the A. James Clark Endowed Scholarship fund and the Benjamin T. Rome Scholarship. Our program is competitive, with awards made on the basis of merit, financial need, and other factors. For more information on a variety of scholarships, please visit the Clark School of Engineering (https://eng.umd.edu/scholarships/)'s website.

In addition, the Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, please visit financialaid.umd.edu (http://www.financialaid.umd.edu)

We also have several departmental annual awards and scholarships for which students may apply and be selected based on their scholastic achievements, service to the department and the profession. These awards are open to juniors and seniors in the program. Information on

these annual awards and scholarships may be obtained from the faculty advisors in the department.

Awards and Recognition

- Fischell Dept of Bioengineering Outstanding Junior Award
- Fischell Dept of Bioengineering Outstanding Senior Award
- Fischell Dept of Bioengineering Outstanding Research Award
- Fischell Dept of Bioengineering Outstanding Leadership Award
- Fischell Dept of Bioengineering Outstanding Citizen Award
- Seymour & Faye Wolfe Scholarship: Bioengineering student
- Jeffrey C. and Sandra W. Huskamp Scholarship: Bioengineering student

B.S./M.S. Program

The Fischell Department of Bioengineering's combined B.S./M.S. program provides undergraduate students the opportunity to complete the Bachelor of Science (B.S.) and Master of Science (M.S.) degrees in approximately five and a half years by double counting graduate coursework toward the B.S. and M.S. degrees. Ideal candidates for this program are high achieving, research-oriented undergraduate students interested in pursuing and developing research projects that will translate to the graduate level and, ultimately, into a master's thesis. For more information, visit bioe.umd.edu/undergraduate/bs-ms-program (http://www.bioe.umd.edu/undergraduate/bs-ms-program/).

Biocomputational Engineering Major

Program Director: Ian White, Ph.D
Assistant Program Director: Lan Ma, Ph.D

Biocomputational engineering brings together the field of bioengineering, a discipline grounded in fundamentals of physics, chemistry, and biology, with computation and data science, which enhances the value of all fields. The objective of the biocomputational engineering program is to provide a breadth of fundamentals in biology and quantitative problem solving while developing skills in computation and data science that can be applied to the modeling of complex biological systems and the analysis of complex biological data sets in order to create new knowledge from the molecular to organ to system levels, and to develop innovative processes for the prevention, diagnosis, and treatment of disease. The synthesis of bioengineering, computation, and data science gives the graduates unique capabilities to solve existing and emerging challenges of the modern medical world.

Admission to the Major

Prior to being admitted to the Biocomputational Engineering major, students must complete the UMD A. James Clark School of Engineering LEP gateway courses, prerequisite math/science courses, lower-level General Education requirements (or an associate's degree), and 60 credits. Students are welcome to apply as transfer students from community college or four-year institutions. For more information regarding admission to the Biocomputational Engineering major, visit biocomp.umd.edu/admissions (https://biocomp.umd.edu/admissions/).

Program Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

Prior Study

Prior to being admitted to the Biocomputational Engineering major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level general education requirements (or an associate's degree from a Maryland public institution), and 60 credits.

Course	Title	Credits
ENGL101	Academic Writing	3
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
MATH246	Differential Equations for Scientists and Engineers	3
PHYS161	General Physics: Mechanics and Particle Dynamics	3
PHYS260	General Physics: Vibration, Waves, Heat, Electricity and Magnetism	3
PHYS261	General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	1
ENES100	Introduction to Engineering Design	3
CHEM135	General Chemistry for Engineers	3
CHEM136	General Chemistry Laboratory for Engineers	1
BSCI170 or BIOE120	Principles of Molecular & Cellular Biology Biology for Engineers	3
MATLAB programming course -- e.g. BIOE241 or equivalent		3
Lower-level general education requirements or A.A./A.S. degree from a Maryland public institution		22
Total Credits		**60**

Required Courses

Course	Title	Credits
ENBC301	Introduction to Biocomputational Engineering	1
ENBC311	Python for Data Analysis	3
ENBC312	Object Oriented Programming in C++	3
ENBC321	Machine Learning for Data Analysis	3
ENBC322	Algorithms	3

ENBC331	Applied Linear Systems and Differential Equations	3
ENBC332	Statistics, Data Analysis, and Data Visualization	3
ENBC341	Biomolecular Engineering Thermodynamics	3
ENBC342	Computational Fluid Dynamics and Mass Transfer	3
ENBC351	Quantitative Molecular and Cellular Biology	3
ENBC352	Molecular Techniques Laboratory	2
ENBC353	Synthetic Biology	3
ENBC425	(Imaging and Image Processing)	3
ENBC431	Finite Element Analysis	3
ENBC441	(Computational Systems Biology)	3
ENBC491	(Senior Capstone Design in Biocomputational Engineering)	3
Professional Writing Requirement		3
Elective Courses		12
Total Credits		**60**

Elective Courses

Students are required to take four technical electives (12 credits). The courses must be selected from an approved list of engineering and biology courses; the list will be updated regularly by the program director. At least two of the elective courses must be from the category of engineering, mathematics, or programming, while at most two of the electives can be from the category of biology courses. The program will offer electives; at the same time, the program will arrange for opportunities for electives outside the program, including USG programs offered by other universities.

Course	Title	Credits
Possible technical electives		**12**
ENBC403	Research Methods in Biological Data Mining	
ENBC411	(Advanced Programming in Python)	
ENBC413	(Data Analysis with R)	
ENBC423	Applied Computer Vision	
ENBC435	(Numerical Methods)	
ENBC442	(Computational Molecular Dynamics)	
ENBC443	(Multiscale Simulation Methods)	
ENBC444	(Modeling Protein Folding)	
ENBC445	(Spatial Control of Biological Agents)	
ENBC455	(Bioinformatics Engineering)	

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Bioengineering Major

Program Director: Ian White, Ph.D.

Bioengineering is a field rooted in physics, chemistry, mathematics, and the life sciences. These areas are applied in quantitative and integrative ways to approach problems in the biological systems, medical research, and clinical practice. The objective is to advance fundamental concepts, create knowledge from the molecular to organ to system levels, and develop innovative processes for the prevention, diagnosis, and treatment of disease. In short, bioengineering seeks to improve the health and life of humankind on many levels.

Bioengineers specialize in those products and processes made from, used with, or applied to biological organisms. In addition to engineering science and design, bioengineers study cell biology, physiology, bioinformatics, bioimaging, and biomechanics. The synthesis of engineering and biology gives bioengineers unique capabilities in our modern world.

For more information about the Bioengineering major, please visit www.bioe.umd.edu/undergraduate (http://www.bioe.umd.edu/undergraduate/).

The Bachelor of Science degree in Bioengineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Program Objectives

The undergraduate program in the Fischell Department of Bioengineering provides students with a broad and fundamental education relating engineering with the biological sciences. The program has focuses in biomedical devices, human health, biotechnology, and ecosystems. These focuses all contain components of fundamental sciences, design, and communications skills. The students' educational achievements all contribute to enabling a wide range of career paths after graduation.

Our graduates are grounded in fundamentals that will serve them throughout their professional careers. They will have an understanding of human behavior, societal needs and forces, and the dynamics of human efforts and their effects on human health and that of our environment. With these underpinnings and abilities, we have defined several Program Educational Objectives we expect our graduates to attain in 3-5 years after graduation:

1. Produce graduates with the educational depth, technical skills, and practical experiences to be competitive for placement in bioengineering careers or post-graduate educational pursuits;
2. Produce graduates with an awareness of their field and an understanding of how they can address the biomedical and biotechnological challenges facing society in both the near and long term;
3. Produce graduates with a foundation in professional ethics who will actively seek to positively impact their profession, community, and society.

Program Learning Outcomes

Maryland bioengineers gain a broad-based education in which engineering approaches are used to understand and improve living systems and their environments. We educate students to excel in the field of bioengineering and carry out research, development, and commercialization of bioscience systems and tools that will improve the lives of people throughout the world. The specific student outcomes detailed by the Bioengineering Program are detailed below.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
8. Applying principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations), and statistics.
9. Solving bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems.
10. Analyzing, modeling, designing and realizing bio/biomedical engineering devices, systems, components, or processes.
11. Making measurements on and interpreting data from living systems.

REQUIREMENTS

Following is the list of the course requirements for the Bioengineering Undergraduate Program. Each student following the course template should be able to graduate in four years. Each student will meet with his/her Faculty Advisor every semester to plan the schedule of courses for the subsequent semester. Some of the students in the bioengineering program may elect to pursue professional degrees such as Medical, Dental, Law, etc., thus they may need certain courses that those professional schools require and should discuss their plans with their Faculty Advisor. Some of these courses may count as electives towards the major. Students interested in health professions may also view the requirements at www.prehealth.umd.edu (http://www.prehealth.umd.edu).

Freshman Year	Credits
ENES100	3
MATH140	4
CHEM135	3
CHEM136	1
BIOE120	3
BIOE121	1
ENES102	3
MATH141	4
PHYS161	3
ENGL101	3
General Education Requirement I	3
	31

Sophomore Year	Credits
CHEM231	3
CHEM232	1
MATH241	4
BIOE241	3
PHYS260	3
PHYS261	1
General Education Requirement II	3
MATH246	3
BIOE232	3
BIOE371	3
Biological Science Elective I (BSCI 2xx)	4
General Education Requirement III	3
BIOE221	1
	35

Junior Year	Credits
BIOE331	3
BIOE372	3
BSCI330	4
BIOE Foundational I	3
BIOE Elective I	3
BIOE340	4
BIOE457	4
BIOE Foundational II	3
BIOE Elective II	3
General Education Requirement IV	3
	33

BIOE485	3
BIOE Elective III	3
Breadth Elective	3
General Education Requirement V	3
General Education Requirement VI	3
BIOE486	3
Professional Writing Requirement	3
BIOE Elective IV spring	3
Biological Science Elective II	3
General Education Requirement VII[1]	3
Oral Communications Requirement	3
	33

Total Credits 132

[1] See http://bioe.umd.edu/undergraduate/electives (http://bioe.umd.edu/undergraduate/electives/) for details on courses approved for BIOE Foundational courses and for BIOE, Biological Science, and Breadth electives. Students are advised to take advantage of Gen Ed courses that double-count for more than one distributive studies requirement

Students pursuing the major should review the academic benchmarks established for this program. See: www.4yearplans.umd.edu (http://www.4yearplans.umd.edu). Students will be periodically reviewed to insure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Global Engineering Leadership Minor

A.James Clark School of Engineering (ENGR)
1131 Glenn L Martin Hall
globalengr@umd.edu
eng.umd.edu/global/coursework (https://eng.umd.edu/global/coursework/)

Program Lecturer: Darren Pierre, Ph.D.

The engineering industry requires leadership to be exercised at all layers of an organization. Today's engineers need to lead with a global vision and have the skills and knowledge to effectively manage and work in diverse teams. The Global Engineering Leadership minor will position students to be more competitive in the job market by engaging them in active learning and relevant coursework that focuses on intercultural and interpersonal communication, leadership approaches, self-awareness, global understanding, project management, and productively working with others.

The minor in Global Engineering Leadership consists of 16 credit hours. A maximum of six credits may also count toward the student's major, and no more than six credits may be taken at an institution other than the University of Maryland, College Park. All courses counted toward the minor must be completed with a "C-" or better. See the "Requirements" tab above for course requirements.

Contact the Office of Global Engineering Leadership (globalengr@umd.edu) or visit eng.umd.edu/global/coursework (https://eng.umd.edu/global/coursework/) for more information.

REQUIREMENTS

The minor in Global Engineering Leadership consists of 16 credit hours. A maximum of six credits may also count toward the student's major, and no more than six credits may be taken at an institution other than the University of Maryland, College Park. All courses counted toward the minor must be completed with a "C-" or better. The following courses are required:

Course	Title	Credits
ENES317	Introduction to Leadership in Engineering, Science, and Technology (DSSP)	3
ENES472	Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology (DVCC)	3
ENES424	Engineering Leadership Capstone: Inclusive Leadership in Addressing Organizational & Societal Challenges	3
EDHI338	Teaching and Learning about Cultural Diversity through Intergroup Dialogue	1
ELECTIVE	Global Perspectives Elective	3
ELECTIVE	Leadership Elective	3
Total Credits		**16**

Contact the minor advisor, Natasha Chapman (chapman3@umd.edu) or visit the web at eng.umd.edu/global (https://eng.umd.edu/global/) for more information.

Materials Science and Engineering

A. James Clark School of Engineering
2135 Chemical and Nuclear Engineering Building
Phone: 301-405-5240
mseundergrad@umd.edu
mse.umd.edu (http://www.mse.umd.edu)

Materials Science and Engineering (MSE, MatSci) is a multidisciplinary field focused on developing and characterizing materials and materials systems that provide the underpinnings for advancing technology and science into the future. The development of many major advances in science and technology has been predicated on advances the underlying materials systems. MSE is leading the effort in continuing this growth for the benefit of society.

PROGRAMS

Major

- Materials Science and Engineering Major (p. 423)

ADVISING

Students choosing Materials Science and Engineering as their major should contact Adaire Parker, Program Director, Room 1111, Chemical and Nuclear Engineering Building, at 301-405-5989 or mseundergrad@umd.edu. Adaire Parker can direct students to their advisor. Faculty advisors include Professors Lloyd, Al-Sheikhly, Cumings, Foecke, Martinez-Miranda, Mo, Salamanca-Riba, and Takeuchi. Any questions about the program should be directed to mseundergrad@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

The department strongly supports undergraduate students who wish to pursue research opportunities. The student should discuss their interest with their advisor or with Adaire Parker (Program Director) or Professor Isabel Lloyd (Undergraduate Program Director). See mse.umd.edu/research (http://www.mse.umd.edu/research/).

Internships

The department strongly encourages students to pursue internships as part of their undergraduate experience. They should discuss an internship with their advisor as they develop their academic plan. The department will forward information about internships to our undergraduate students. Students may also receive information on internships from the Clark School's Engineering Career Services Office. See eng.umd.edu/careers (https://eng.umd.edu/careers/).

Co-op Programs

The Materials Science and Engineering program works with the A. James Clark School of Engineering Co-op Program. For more information, students should speak with their advisor regarding their interest in a co-op experience and consult the college's web page at eng.umd.edu/careers/students/internships (https://eng.umd.edu/careers/students/internships/).

Student Societies and Professional Organizations

Undergraduate Societies

The Materials Engineering Society, or MatES, is a student society primarily for Materials Science and Engineering majors at the University of Maryland College Park. MatES is the University of Maryland's Material Advantage Student Chapter. It includes recognition by several professional societies including ASM International, The Minerals, Metals, and Materials Society (TMS), the American Ceramic Society (ACerS) and the Association for Iron and Steel (AIST). More information is available at mse.umd.edu/undergraduate/current-students/student-groups (https://mse.umd.edu/undergraduate/current-students/student-groups/).

Materials Research Society (MRS)

The Materials Research Society (MRS), a professional research society for the field, has a student chapter in the department. The chapter organizes student research presentations, invites prospective employers for discussions, and collectively provides a forum for student-faculty interactions. More information is available by contacting Professor Salamanca-Riba at riba@umd.edu.

Alpha Sigma Mu

Alpha Sigma Mu is the International Professional Honor Society for Materials Science and Engineering. Students with outstanding scholarship are nominated for membership and are eligible to be nominated for scholarships. If you have any questions, contact Professor Ray Phaneuf at phaneuf@umd.edu.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

Other scholarships are available through the A. James Clark School of Engineering's office of Undergraduate Recruitment and Scholarships Programs (https://eng.umd.edu/scholarships/). There are also research internships available for students to work with faculty in the Department.

Awards and Recognition

Each year, the department selects outstanding students for the following awards:

- Chair's Outstanding Senior Award
- Outstanding Materials Student Service and Advocacy Award
- Materials Science and Engineering Student Research Award

The professional materials oriented societies sponsor awards to recognize outstanding scholarship and undergraduate research.

- ASM International (http://www.asminternational.org)
- The Minerals, Metals, and Materials Society (TMS) (http://www.tms.org/TMSHome.html)
- American Ceramic Society (ACerS) (http://www.ceramics.org)
- Materials Research Society (MRS) (http://www.mrs.org)

All students enrolled in the Materials Science and Engineering program are encouraged to work with their advisor who in their junior and senior years will guide them towards nomination for these awards.

Academic Programs and Departmental Facilities

The department's research facilities are available to undergraduates interested in pursuing research opportunities. Interested undergraduates are encouraged to work with a faculty member and their research team. Specific information on the facilities is available on the website: mse.umd.edu/research/labs (http://www.mse.umd.edu/research/labs/).

A partial list of facilities available to the students in the department include:

- The George E. Dieter, Jr. Materials Instructional Laboratory (http://www.memil.umd.edu)
- The Keck Laboratory for Combinatorial Nanosynthesis and Multiscale Characterization (http://www.nanocenter.umd.edu/labs/Keck/)
- Advanced Imaging and Microscopy Laboratory (AIMLab) (https://www.nanocenter.umd.edu/aimlab/)
- Laboratory for Advanced Materials Processing (LAMP) (http://www.mse.umd.edu/LAMP/)
- Laboratory for Plasma Processing of Materials
- Functional Macromolecular Laboratory (http://fml.umd.edu)
- The FabLab Micro and Nano Fabrication Laboratory run by the University of Maryland NanoCenter (https://nanocenter.umd.edu/fablab/)

Materials Science and Engineering Major

NOTICE OF ADDENDUM: THE REQUIREMENTS FOR THIS PROGRAM WERE UPDATED EFFECTIVE SPRING 2023 AND HAVE BEEN PUBLISHED ON THE SPRING 2023 ADDENDUM (p. 425) TAB. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Undergraduate Program Director: Isabel K. Lloyd, Ph.D.

The development, production and use of novel materials has become a major issue in all fields of engineering. Materials which are strong and light at the same time are needed for space structures; faster electro-optical switching materials will result in improved mass communications; and stronger high temperature plastics would improve the efficiency of transportation systems. Students will have the opportunity to work with faculty and industry on complex problems through projects, internships, and research and co-op experiences. A wide variety of careers are open to graduates of this program ranging from production and quality control in the traditional materials industries to the molecular construction of electronic materials in ultra-clean environments, and to the applications

of materials in electronic packages. The application of materials to solve environmental, biomedical, energy, and reliability problems are also career options.

Students majoring in Materials Science and Engineering will receive a Bachelor of Science upon successful completion of the program. Courses offered by this department may be found under the acronym ENMA.

The Bachelor of Science in Materials Science and Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Program Objectives

The mission of the Materials Science and Engineering Department at the University of Maryland is to provide a quality engineering education, research at the forefront of the field, and leadership to the Materials and Engineering communities. Our educational programs will have the following objectives:

- Produce high quality alumni who will be successful in their chosen careers in industry, government or academia, in the State of Maryland, the nation and the world.
- Produce alumni who demonstrate the ability to define and solve engineering and science problems in the field of Materials Science and Engineering throughout their careers.
- Produce alumni who demonstrate the ability to relate basic physics, math, chemistry and engineering principles to the field of Materials Science and Engineering so they can function professionally as materials engineers and scientists.
- Produce alumni who design and engineer materials and materials systems for future generations of products and demonstrate a continuous upgrading of their knowledge to address and impact the rapid pace of technological advances.

The department will support our students with an educational program that has sufficient breadth in both fundamental and specialized engineering topics to insure our graduates meet the current and future needs of society. In the area of research, the department conducts a range of scientific research programs and establishes partnerships with government and industry, both in Maryland and elsewhere, to accomplish this goal.

Program Learning Outcomes

The overall educational outcomes of the Materials Science and Engineering Program are to provide undergraduate engineering students:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

NOTICE OF ADDENDUM: THE REQUIREMENTS FOR THIS PROGRAM WERE UPDATED EFFECTIVE SPRING 2023 AND HAVE BEEN PUBLISHED ON THE SPRING 2023 ADDENDUM (p. 425) TAB. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Requirements for the Materials Science and Engineering major include thorough preparation in mathematics, chemistry, physics, and engineering science as well as the required university general education requirements. All students will be required to select an area of specialization, an upper-class science elective, and two technical electives. A minimum of 122 credits is required for a bachelor's degree. A sample program follows:

Freshman Year

First Semester	Credits	Second Semester	Credits
CHEM135	3	MATH141	4
ENES100	3	ENMA165	3
MATH140	4	PHYS161	3
ENGL101	3	GenEd	3
CHEM136	1	GenEd	3
ENMA180	1		
	15		**16**

Sophomore Year

First Semester	Credits	Second Semester	Credits
MATH241	4	MATH246	3
PHYS260	3	PHYS270	3
PHYS261	1	PHYS261	1
ENMA300	3	Select one of the following:[1]	3-4
Oral Communication	3	CHEM231 & CHEM232	
		CHEM481	
		ENMA301	3
		GenED	3
	14		**16-17**

ENMA362	3	ENMA465	3
ENMA460	3	ENMA461	3
Scholarship in Practice[2]	3	Specialization Elective	3
Specialization Elective	3	ENMA470	3
	15		**15**

Senior Year

First Semester	Credits	Second Semester	Credits
ENMA441	3	Technical Elective (at or above 300 level)	3
ENMA471	3	Specialization Elective	3
Specialization Elective	3	Specialization Elective	3
ENMA487	1	GenED[2]	3
Professional Writing	3	ENMA490	3
Technical Elective (at or above 300 level)	3		
	16		**15**

Total Credits 122-123

1 CHEM231/CHEM232 is required for students focusing on polymers and biomaterials.

2 All students must complete two Distributive Studies courses that are approved for I-series courses. The Understanding Plural Societies (UP) and Cultural Competence (CC) courses may also fulfill Distributive Studies categories.

OTHER REQUIREMENTS FOR THE MAJOR

Students majoring in Materials Science and Engineering must follow the academic policies developed by the A. James Clark School of Engineering. Students must achieve a "C-" or better on all coursework in their major (including required non-engineering courses such as chemistry and physics). Students must achieve a minimum cumulative GPA of 2.0 and completion of all degree requirements to graduate. Students are encouraged to visit the Department webpage for a curriculum guideline. A multi-year academic plan will be developed in conjunction with their advisor. All Materials Science and Engineering students must be mentored by three different faculty members, preferably during their freshman and sophomore years (once per semester) to assist them in choosing their specialization area and to plan for post graduation.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

SPRING 2023 ADDENDUM

NOTICE OF ADDENDUM: THE REQUIREMENTS LISTED BELOW ARE EFFECTIVE AS OF SPRING 2023. TO VIEW PRIOR REQUIREMENTS, SEE THE REQUIREMENTS (p. 424) TAB. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Requirements (effective Spring 2023)

Requirements for the Materials Science and Engineering major include thorough preparation in mathematics, chemistry, physics, and engineering science as well as the required university general education requirements. All students will be required to select an area of specialization, an upper-class science elective, and two technical electives. A minimum of 122 credits is required for a bachelor's degree. A sample program follows:

Freshman Year

First Semester	Credits	Second Semester	Credits
CHEM135	3	MATH141	4
ENES100	3	ENMA165	3
MATH140	4	PHYS161	3
ENGL101	3	GenEd	3
CHEM136	1	GenEd	3
ENMA180	1		
	15		**16**

Sophomore Year

First Semester	Credits	Second Semester	Credits
MATH241	4	MATH246	3
PHYS260	3	PHYS270	3
PHYS261	1	PHYS271	1
ENMA300	3	Select one of the following:[1]	3-4
Oral Communication	3	CHEM231 & CHEM232	
		CHEM481	
		ENMA301	3
		GenED	3
	14		**16-17**

Junior Year

First Semester	Credits	Second Semester	Credits
ENMA312 (Or Upper Level Science Elective)	3	ENMA312 (Or Upper Level Science Elective)	3
ENMA362	3	ENMA465	3
ENMA460	3	ENMA461	3
Scholarship in Practice[2]	3	Specialization Elective	3
Specialization Elective	3	ENMA470	3
	15		**15**

Senior Year

First Semester	Credits	Second Semester	Credits
ENMA441	3	Technical Elective (at or above 300 level)	3
ENMA471	3	Specialization Elective	3
Specialization Elective	3	Specialization Elective	3
ENMA487	1	GenED[2]	3
Professional Writing	3	ENMA490	3
Technical Elective (at or above 300 level)	3		
	16		**15**

Total Credits 122-123

1 CHEM231/CHEM232 is required for students focusing on polymers and biomaterials.

2 All students must complete two Distributive Studies courses that are approved for I-series courses. The Understanding Plural Societies (UP)

and Cultural Competence (CC) courses may also fulfill Distributive Studies categories.

Other Requirements for the Major

Students majoring in Materials Science and Engineering must follow the academic policies developed by the A. James Clark School of Engineering. Students must achieve a "C-" or better on all coursework in their major (including required non-engineering courses such as chemistry and physics). Students must achieve a minimum cumulative GPA of 2.0 and completion of all degree requirements to graduate. Students are encouraged to visit the Department webpage for a curriculum guideline. A multi-year academic plan will be developed in conjunction with their advisor. All Materials Science and Engineering students must be mentored by three different faculty members, preferably during their freshman and sophomore years (once per semester) to assist them in choosing their specialization area and to plan for post graduation.

Mechanical Engineering

A. James Clark School of Engineering
2181 Glenn L. Martin Hall
Phone: 301-405-2410
ENMEundergrad@umd.edu
enme.umd.edu (http://www.enme.umd.edu)

Mechanical Engineering includes the study of the following areas:

- Design and Reliability of Systems,
- Thermal, Fluid, and Energy Sciences
- Mechanics, Materials, and Manufacturing.

In addition, to the learning opportunities provided through a vibrant curriculum of undergraduate and graduate offerings, students are also provided extensive experiential learning opportunities through the Terps Racing Program (https://www.facebook.com/terpsracing/), Solar Decathlon (http://2011.solarteam.org/), and other competition teams, and undergraduate research experiences. Students are also provided opportunities to make a difference worldwide with programs such as Engineers Without Borders (http://www.ewb.umd.edu).

PROGRAMS

Major

- Mechanical Engineering Major (p. 426)

Minor

- Nuclear Engineering Minor (p. 428)

ADVISING

Mechanical engineering students are required to meet with a departmental adviser each semester prior to registering for the following term. Mechanical Engineering has a team of faculty and staff academic advisors. For more information, please contact the department's Undergraduate Advising Office, 2182-2188 Glenn L. Martin Hall, at 301-405-2199, or review resources including office hours and the appointment process, on-line at meugrad.umd.edu (http://meugrad.umd.edu).

OPPORTUNITIES

Co-op Programs

Participation in the Cooperative Education Program (https://eng.umd.edu/careers/students/internships/) through the Engineering Career Services Office (https://eng.umd.edu/careers/) is encouraged. See Clark School of Engineering under Colleges and Schools on this site.

Honors Program

The Engineering Honors Program (https://eng.umd.edu/engineering-honors-program/) is administered through the Clark School of Engineering.

Individual honors and awards are presented based on academic excellence and extracurricular activities.

Student Societies and Professional Organizations

Student chapters of professional societies include the American Society of Mechanical Engineers, the Society of Automotive Engineers, the Mechanical Contractors Association and the American Society of Heating, Refrigeration and Air Conditioning Engineers. The mechanical engineering honor society is Pi Tau Sigma. Information regarding these societies may be obtained at 2186 Glenn Martin Hall.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

A limited amount of scholarship aid is available through the Department of Mechanical Engineering. Information may be obtained in the Mechanical Engineering Undergraduate Advising Office. Information about Clark School of Engineering scholarships and Department of Mechanical Engineering scholarships is also available online at eng.umd.edu/scholarships (https://eng.umd.edu/scholarships/).

Mechanical Engineering Major

Mechanical engineering is the broadest of the engineering disciplines. It is concerned with the design, manufacture, and operation of a wide range of components, devices, or systems. The field comfortably encompasses applications ranging from micro-mechanical surgical systems to internal combustion engines for Formula One racecars or giant turbines for renewable energy wind farms. A fitting adage for the discipline would be ***turning ideas into reality.***

Graduates of the program will possess the skills and the knowledge base critical for success in today's marketplace, with the problem solving expertise and flexibility necessary to adapt as technology and society evolve. Students must be proficient in the traditional fundamentals of mechanical engineering such as solid and fluid mechanics, thermodynamics, transfer processes, materials engineering, electronic instrumentation and measurements, controls, and design. However, they will also explore new/emerging areas through a variety of electives such as smart structures, machine learning, additive manufacturing, Lean Six Sigma, and medical robotics.

Attributes such as teamwork, ethics, and leadership are emphasized in the curriculum. The program is designed to integrate out-of-classroom experiences, helping students explore career options and apply what they are learning in the real world. Students can work with faculty on research projects, serve as teaching fellows, pursue leadership opportunities through clubs, and participate in national competitions such as the Formula SAE/Baja SAE teams or the DOE Solar Decathlon. The flexibility of the curriculum, and frequent offering of required courses, allows many of our students to participate in study abroad or cooperative education opportunities.

The Bachelor of Science degree in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Courses offered by this department may be found under the following acronym: ENME

Program Objectives

1. Graduates will provide value in their chosen career path, whether for mastery of the disciplines central to mechanical engineering or for the broader analytical skills, critical thinking, innovation and/or creative abilities provided by their engineering education.
2. Students will utilize skills in teamwork, leadership, and communication gained in their program of study, and act in a professional and ethical manner in the area in which they apply their degree.
3. Graduates will show a commitment to on-going professional development, whether through graduate study, research programs, training courses, or leadership opportunities thereby adapting to an evolving, competitive global work environment.

Program Learning Outcomes

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

REQUIREMENTS

Freshman Year

	15		**15**

Total Credits 124

[1] Can be taken 1st or 2nd semester

A minimum of 120 credits are required for a degree.

Sample Elective Topics

- Waste Technology
- Bio-Inspired Robotics
- Computer-Aided Design & Manufacturing
- Packaging of Electronic Systems
- Energy Conversion
- Engineering Management

- Environmental Engineering
- Flexible Macro-electronics
- Automotive Design
- Micro-nano Robotics
- Manufacturing
- Medical Robotics
- Fiber Optics
- Micro-Electro-Mechanical Systems
- Nuclear Reactor Engineering

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Nuclear Engineering Minor

Mechanical Engineering (ENME)
2181 Engineering Classroom Building
Phone: 301-405-0279
enme.umd.edu/undergraduate/degrees/minor-nuclear-engineering (https://enme.umd.edu/undergraduate/degrees/minor-nuclear-engineering/)

Contact Dr. Patrick McCluskey (mcclupa@umd.edu) for further information.

The minor in Nuclear Engineering provides the engineering student with the understanding of nuclear engineering and its application to many different fields, such as power generation, reactor operation, and industrial uses. Students in the minor will learn the fundamentals of nuclear reactor engineering, radiation interactions and measurement, power plant design concepts, and reactor safety. The minor is open to any student in the Clark School of Engineering.

REQUIREMENTS

To successfully complete the minor in nuclear engineering, a student must complete a total of 15 credits (5 3-credit courses). All courses must be completed with a grade of "C-" or higher. A maximum of two of the required five courses can be used to satisfy requirements of the student's major (with approval of the major department).

Course	Title	Credits
All students pursuing the minor will be required to take the following four courses:		
ENME430	Fundamentals of Nuclear Reactor Engineering	3
ENME431	Nuclear Reactor Systems and Safety	3
ENME432	Reactor and Radiation Measurements Laboratory	3
ENRE447	Fundamentals of Reliability Engineering	3
Nuclear Engineering Elective [1]		3
Total Credits		**15**

[1] The elective course should be related to nuclear engineering and must be approved by the minor advisor.

Students who fulfill minor requirements will receive a notation on their official transcript.

Nanoscale Science and Technology Minor

Maryland NanoCenter
Kim Engineering Building
nanocenter.umd.edu/education/nano-minor (https://www.nanocenter.umd.edu/education/nano-minor/)

Program Director: Ray Phaneuf, Ph.D.

Continued growth in the field of nanometer scale science and technology (NS&T) has led in the past several years to many technological advances in devices and materials structured at the nanometer scale. The Interdisciplinary Minor Program of Study in Nanoscience and Technology is intended to prepare participating students for a career in this rapidly developing field. This program draws upon the considerable expertise in nanoscience at the University of Maryland, in departments distributed among two schools: The Clark School of Engineering, and the College of Computer, Mathematics and Natural Sciences. Students take courses in Fabrication/Synthesis and Characterization, which emphasize the experimental side of NS&T, as well as Fundamental Science and Specialization Electives, which teach the underlying principles and directions, and include underlying theory and the motivations for NS&T.

Visit the website mse.umd.edu/undergraduate/degrees/minor-nano (https://mse.umd.edu/undergraduate/degrees/minor-nano/) for more information.

REQUIREMENTS

- The minor requirement will consist of a total of five courses (at least 15 credits).
- At least two of the courses (6 credits) must be from the list of NanoFabrication/Nanosynthesis and/or NanoCharacterization electives.
- At least two of the courses (6 credits) must be from the list of Fundamental Science and/or Nanoscience Electives. At least one of these must be listed as a NanoApplication / Specialization elective.
- Up to two courses (6 credits) may be double counted, i.e. used both toward satisfying the requirements of the major and the NS&T minor.
- Three of the courses (9 credits) must be from outside the individual major. Cross listed courses (e.g. ENMA460/PHYS431) which are offered by the major department do not qualify as being outside the major.
- At least three of the courses (9 credits) must be at the 400 level or above.
- No more than two courses (6 credits) from any one department will be credited toward the NS&T minor.
- A grade of "C-" or above is required in all courses to be credited toward the NS&T minor.
- Students wishing to participate in the NS&T minor must declare participation formally. Declaration of participation in the NS&T minor must follow a meeting with the individual department representative to the NS&T committee who will help the student develop a program

of courses suitable for the minor and a schedule for taking those courses. Students from outside participating departments will consult with one of the MSE representatives to develop a program of courses and declare participation.

Robotics and Autonomous Systems Minor (ENGR)

For any questions, please contact robotics-minor@umd.edu.

The Robotics and Autonomous Systems (RAS) minor is open to students majoring in Aerospace Engineering, Electrical and Computer Engineering, Mechanical Engineering, and Computer Science. The minor takes a multidisciplinary approach to robotics in which students gain knowledge about the design, control, programming, and integration of robotics and autonomous systems. With an emphasis on hands-on experiences, students will gain practical skills through coursework, group projects, and research. Students will have the opportunity to participate as peer mentors and tutors. The minor program will also include regular interactions with academic, corporate, and/or governmental leaders in robotics, who will serve as both mentors and professional contacts.

Program Learning Outcomes

1. Students will demonstrate the ability to apply advanced technical skills required to approach and resolve problems in the Robotics and Autonomous System (RAS) through upper-level RAS-related coursework in computer science and engineering disciplines.
2. Students will be able to apply the broad interdisciplinary aspects of RAS, such as the design, control, programming, and integration of complex robotic systems.
3. Students will obtain hands-on experience and demonstrate problem-solving skills in robotics through advanced coursework, experiential learning, and research.
4. Students will gain a sophisticated understanding of the range of professional opportunities available in RAS as a result of first-hand interactions with RAS faculty and professionals.

REQUIREMENTS

Prerequisites

Course	Title	Credits
Robotics and Autonomous Systems (RAS) Minor Prerequisites		
MATH246	Differential Equations for Scientists and Engineers	
or ENES221	Dynamics	
One of the following:		
CMSC131	Object-Oriented Programming I	
ENME202	Computing Fundamentals for Engineers	
ENAE202	Computing Fundamentals for Engineers	
ENEE150	Intermediate Programming Concepts for Engineers	

Requirements

A minimum grade of C- or better is required for all minor and all prerequisite courses. A maximum of 2 courses may be used to satisfy the requirements of both a major and a minor.

Course	Title	Credits
Required Courses		**12**
ENME480	Introduction to Robotics	
ENAE450	Robotics Programming	
ENEE467	Robotics Project Laboratory	
CMSC477	Robotics Perception and Planning	
Supporting Math Course (Required. Select one course. Must be completed prior to enrollment in CMSC477)		**3-4**
MATH240	Introduction to Linear Algebra	
MATH461	Linear Algebra for Scientists and Engineers	
Electives (select two courses):		**6**
Course options will depend on the student's academic major and being able to meet course requirements/restrictions set by each Department. Other electives may be available. Contact minor advisor for assistance.		
ENME400	Machine Design	
ENME410	Design Optimization	
ENME461	Control Systems Laboratory	
ENME489	Special Topics in Mechanical Engineering (ENME489L Bioinspired Robotics, ENME489B Mechatronics and the Internet of Things)	
ENME467	Engineering for Social Change	
ENME444	Assistive Robotics	
ENME476	Mircoelectromechanical Systems (MEMS) I	
ENEE440	Microprocessors	
ENEE460	Control Systems	
ENEE461	Control Systems Laboratory	
ENEE425	Digital Signal Processing	
ENEE426	Communication Networks	
ENEE408	Capstone Design Project (ENEE408I Capstone Autonomous Robotics)	
ENAE380	Flight Software Systems	
ENAE441	Space Navigation and Guidance	
ENAE403	Aircraft Flight Dynamics	
ENAE432	Control of Aerospace Systems	
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC426	Computer Vision	
CMSC427	Computer Graphics	
CMSC451	Design and Analysis of Computer Algorithms	
Total Credits		**21-22**

Science, Technology, Ethics and Policy Minor (ENGR)

stepminor@umd.edu
spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor (https://spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor/)

Program Director: David Tomblin, Ph.D.

The minor in Science, Technology, Ethics and Policy (STEP) explores the powerful social, ethical, and political relationships that drive research and innovation. The program delves into the challenges of living and innovating in a world where emerging science and technologies are becoming increasingly interconnected, pervasive, and powerful. The STEP minor offers students the knowledge and analytical skills to understand and assess the complex interactions among science,

technology, policy and ethics, providing students the opportunity to explore the ways that scientific practice and technological development are embedded in social, cultural, humanistic, and political systems.

STEP welcomes students from all majors who are interested in understanding how we can responsibly maximize the societal benefits of scientific inquiry and technological innovation. The program's primary goal is to give students analytical skills that help connect science and technology to broader social needs. Coursework emphasizes the importance of interdisciplinary modes of inquiry to generate new scientific knowledge and technologies, and to understanding the ethical considerations and social benefits that flow from them.

Electives are grouped in three concentrations, each linked to a learning outcome. Students can go deep in one concentration or choose across groupings. The end product of the program is a capstone research project of the student's own choosing, which is developed under faculty mentorship. At the onset of the capstone course, students will complete an assignment that allows them to articulate how their elective courses have shaped their understanding of science, technology, ethics and policy and how it informs their choice of capstone project.

Minor concentration areas:

Social, ethical and policy implications: This concentration explores the contemporary societal implications of science and technology. These courses ask students to think about the role science and technology have played in creating local and global social and environmental crises and what science and technology can do to help solve them.

Science and technology development: This concentration focuses on cultural, legal, organizational, and institutional forces that have shaped science and technology. It asks students to think about what causes knowledge production and technical practices to change over time and how these changes can improve implementation going forward.

Information economy: This concentration focuses on how the information economy has shaped scientific and technological practices. Students are asked to think about society's evolving relationships with information as a driving force in the private and public sector.

Program Learning Outcomes

1. Articulate and explore the social, ethical, and policy implications of how scientific ideas emerge and technologies are designed, developed, and used (Social, ethical and policy implications concentration)
2. Identify political and legal contexts governing science and technology (Social, ethical and policy implications concentration)
3. Recognize lessons from the historical contingency and legacy of scientific knowledge and technological development (Science and technology development concentration)
4. Synthesize broad implications of the "information economy" for science, technology, and society (Information economy concentration)
5. Interpret the rules, customs, and cultural practices that are the foundation for scientific and technological institutions. (Science and technology development concentration)

REQUIREMENTS

Course	Title	Credits
Required Courses (2 classes)		**6**
ENES240	Ethical, Policy and Social Implications of Science and Technology	3
ENES440	Science, Technology and Society: Certificate Program Capstone	3
Electives (3 classes)		**9**
For a comprehensive list of electives see website. [1]		
Total Credits		**15**

[1] Six credits must be at the 300-400 level.

spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor (https://spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor/)

Technology Entrepreneurship and Corporate Innovation Minor

Director: James Green, Ph.D.

A firm grasp of the entrepreneurial process benefits every person engaged in developing innovations, from startups to established companies and organizations. The goal of the Minor in Technology Entrepreneurship and Corporate Innovation is to infuse students with that knowledge and its accompanying skills. Armed with an entrepreneurial mindset and skill set, innovators can better drive economic growth by launching successful ventures and bringing new products and services to market. Students earn the minor by completing coursework that may include entrepreneurial opportunity analysis, strategies for managing innovation, marketing high-technology products, financing and leading new ventures, and international entrepreneurship.

For details and contact information, visit mtech.umd.edu/educate/minor (http://www.mtech.umd.edu/educate/minor/).

REQUIREMENTS

The 15-credit undergraduate minor is completed from a subset of 17 courses. At least nine credits must be completed at the 400-level to earn the minor. While course options are available, application of 100 and 200-level courses is limited to a total of six credits.

Course	Title	Credits
ENES140	Discovering New Ventures	3
ENES210	Entrepreneurial Opportunity Analysis and Decision-Making in 21st Century Technology Ventures	3
ENES460	Fundamentals of Technology Start-Up Ventures	3
ENES461	Advanced Entrepreneurial Opportunity Analysis in Technology Ventures	3
ENES462	Marketing High-Technology Products and Innovations	3
ENES463	Strategies for Managing Innovation	3
ENES464	International Entrepreneurship and Innovation	3
ENES466	Leading and Financing the Technology Venture	3
ENES471	Legal Aspects of Entrepreneurship	3

College of Information Studies, Maryland's iSchool

0217 Hornbake North
Phone: 301-405-2038
infosci@umd.edu
ischool.umd.edu (http://ischool.umd.edu)

Dean: Keith Marzullo, Ph.D.
Associate Deans: Brian Butler, Ph.D., Mega Subramaniam, Ph.D., Susan Winter, Ph.D., Katherine Izsak, Ph.D.
Assistant Dean: Melekte Truneh

The University of Maryland College of Information Studies (UMD iSchool) is a leading research and teaching college in the field of information science. Our faculty, staff, and students are expanding the frontiers of how people access and use information and technology in an evolving world – in government, education, business, and more. We offer five academic degree programs and lead cutting-edge research, specializing in library sciences, curation, data analytics and visualization, human-computer interaction, youth experience, computational linguistics, smart cities and connected communities, social computing, cybersecurity and privacy, diversity and inclusion, and the future of work. Located just outside of Washington, D.C., our faculty, staff, and students have unmatched research, internship, and career opportunities.

ACADEMIC PROGRAMS

Major

- Information Science Major (p. 434)
- Social Data Science Major (INFO) (p. 436)
- Technology and Information Design Major (p. 439)

Minors

- Information Risk Management, Ethics, and Privacy Minor (p. 433)
- Science, Technology, Ethics and Policy Minor (INFO) (p. 435)
- Technology Innovation Leadership Minor (p. 440)

ADVISING

Advisors will help you make informed decisions and feel confident about your plans, which will assist you in meeting your program goals. Your advisor will assist in helping you understand your degree requirements and your options, but you make the decisions, you are in charge of your education!

Advising is mandatory for all new InfoSci students and is available both virtually and in-person. Students have access to an advisor during their remaining time in the program, and are encouraged to complete a senior audit roughly a year out from graduation. This review will ensure students are progressing through the major in a satisfactory manner. We encourage all InfoSci students to schedule regular advising meetings and make sure you are on track to meet your academic and professional goals.

For more information on the program, including courses and policies, please visit the the Advising website (https://ischool.umd.edu/academics/bachelor-of-science-in-information-science-college-park/advising/) for undergraduate student services. For any other inquiries please contact the iSchool Undergraduate Student Services Office at InfoSci@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

Opportunities for undergraduate research experience in the iSchool's research centers become available from time to time. Participation in an on- or off-campus internship, co-op, or other experiential learning opportunity is strongly encouraged. See the Information Science program staff for information on performing research in an iSchool center or lab and contact the Campus Career Services office for assistance in obtaining off-campus positions or experiences.

Internships

Students are strongly encouraged to complete at least one internship during their course of study. The iSchool hosts an internship and networking fair in fall and spring semesters to help students find internship sites. Students should also consult the Career Center (http://www.careercenter.umd.edu) for additional internship opportunities.

The iSchool also offers a summer internship course that allows students to partner critical reflection on professional development with an existing internship opportunity.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information visit their website (https://financialaid.umd.edu/).

Awards and Recognition

Dean's Award for an Outstanding iSchool Project

The Dean's Award for an Outstanding iSchool Project will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding design or development project completed for an iSchool course. Projects must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Laurence B. Heilprin Award

The Laurence B. Heilprin Award will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding paper on a topic in library and information science which has been written for an iSchool course. Papers must be nominated by faculty and must represent outstanding work that furthers understanding

by offering new insights, incorporating original research, and/or analyzing existing information in new ways.

Dr. Joan Giesecke Best Student Paper on Health Informatics Award

The Dr. Joan Giesecke Best Student Paper on Health Informatics Award will be presented to a graduate student or a group of graduate students for an outstanding paper which has been written for an iSchool course and which focuses on any aspect(s) of Health Informatics. The iSchool defines Health Informatics broadly, including any work that focuses on health information management; health information technologies; health data analytics; health-related information needs or behaviors; health librarianship, etc. Papers must be nominated by faculty and must represent outstanding work that furthers understanding by offering new insights on issues relating to Health Informatics, incorporating original research, and/or analyzing existing information in new ways.

Dean's Award for Outstanding Undergraduate Research Achievement

The Dean's Award for Outstanding Undergraduate Research Achievement will be presented to an undergraduate student or a group of undergraduate students for an outstanding research paper or project that has been completed for an iSchool course. Projects/papers must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Special Advantages and Facilities

At the iSchool, faculty and students are exploring how people access and use information. From developing smart city technology to creating new archival methods, we seek to improve the individual experience as well as to foster connected communities. At our research centers and labs, we enable discovery, creativity, problem solving, and fun while tackling real-world challenges and developing impactful solutions.

The college operates six research centers: the Center for Advanced Study of Communities and Information (CASCI), the Computational Linguistics and Information Processing Lab (CLIP), the Digital Curation Innovation Center (DCIC), the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), the Trace Research and Development Center.

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), and the Maryland Institute for Technology in the Humanities (MITH) as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Research Units

The iSchool is home to a number of research centers and labs:

The Center for the Advanced Study of Communities and Information (CASCI)

Hornbake Bldg, South Wing, College Park
Phone: 301-405-2033
casci.umd.edu (https://casci.umd.edu)

Co-Directors: Dr. Jessica Vitak, Dr. Susan Winter

The Center for the Advanced Study of Communities and Information (CASCI) is a multidisciplinary research network, based at University of Maryland. CASCI exists to facilitate research and education that advances our understanding of the technology, information, and organization approaches needed to realize the potential of 21st century communities to support learning, facilitate innovation, transform science and scholarship, promote economic development, and enhance individual and civic well-being.

Computational Linguistics and Information Processing (CLIP)

Phone: 301-405-6722
wiki.umiacs.umd.edu/clip (https://wiki.umiacs.umd.edu/clip/)

Director: Dr. Jordan Boyd-Graber

The Computational Linguistics and Information Processing Lab (CLIP) at Maryland creates and evaluates systems that allow computers to effectively and efficiently use human language – together with large-scale information networks – to perform tasks such as search, translation, summarization and ontological reasoning. It is a part of the broader language science initiative at Maryland and of the University of Maryland Institute for Advanced Computer Studies (UMIACS).

Center for Archival Futures (CAFe)

cafe-info@umd.edu
cafe.ischool.umd.edu (https://cafe.ischool.umd.edu)

The Center for Archival Futures (CAFe) develops and disseminates human-centered approaches to creating the systems, processes, and institutions which enable the use of and care for digital objects and data over time. We take a holistic view of archives and digital curation as a research area, education domain, and growing profession that transcends disciplines and organizational contexts.

The Human-Computer Interaction Lab (HCIL)

2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2769
hcil-info@cs.umd.edu
hcil.umd.edu (http://hcil.umd.edu)

Director: Dr. Niklas Elmqvist
Associate Director: Dr. Jessica Vitak

The Human-Computer Interaction Lab (HCIL) transforms the experience people have with new technologies. From understanding user needs to developing and evaluating the technologies that support users' needs, the lab's faculty, staff, and students have been leading the way in HCI research and teaching for over 30 years. It is critical to understand how the needs and dreams of people can be reflected in future technologies. To this end, the HCIL develops advanced user interfaces and design methodology. The primary activities include collaborative research, publication and the sponsorship of seminars and brown bag talks, workshops and an annual symposium. The HCIL, though referred to as a lab, is actually a research center that is jointly administered by the iSchool and UMIACS, and has multiple labs, faculty, and students associated with it.

The Information Policy and Access Center (IPAC)

ipac.umd.edu (http://ipac.umd.edu)

Co-Directors: Dr. John Bertot, Dr. Paul Jaeger, Dr. Mega Subramaniam

The Information Policy & Access Center (iPAC) is a response to the pressing need for research on the processes, practices, policies, and social issues that govern access to information in our increasingly digital information society. We at iPAC are committed to studying what policies and/or technologies lead to equitable and inclusive information access, a digitally-ready population, an informed and engaged public, access to Internet-enabled resources and technologies, or preservation of the cultural record, among key examples.

Trace Research and Development Center

Room 2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2043
trace-info@umd.edu
trace.umd.edu (http://trace.umd.edu/)

Director: Dr. Jonathan Lazar

The Trace Center's purpose is to apply engineering, computer science, disability studies, public policy, and information science to prevent the barriers to, and capitalize on the opportunities presented by, current and emerging information and communication technologies. Our vision is of a world that is accessible and usable by people of all ages and all abilities – each experiencing ICT in a way they can understand and use. Founded in 1971, Trace has been a pioneer known for high-impact research and development, including access features implemented in computer operating systems, leadership in development of Web Content Accessibility Guidelines and many other accessibility standards, and techniques used to increase the accessibility of self-service kiosks in post offices, train stations, and airports. Trace is currently a leader in the development and large-scale deployment of a Global Public Inclusive Infrastructure that combines cloud computing, web, and platform services to make online information and services available for people facing accessibility barriers.

Social Data Science Center (SoDa)

socialdatascience.umd.edu (https://socialdatascience.umd.edu)

Co-Directors: Dr. Brian Butler and Professor Frauke Kreuter

The Social Data Science Center (SoDa) – a Center established by the College of Information Studies and the Joint Program in Survey Methodology (JPSM) within the College of Behavioral and Social Sciences – is an inter-disciplinary academic and research center. SoDa plans to sponsor seminars, workshops and focused conferences designed to bring attention to the rapidly expanding universe of digitized data and new forms of behavioral data, as well as developments in data science that can benefit investigators in the social sciences.

Information Risk Management, Ethics, and Privacy Minor

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The 5-course Information Science undergraduate minor in Risk Management, Ethics, and Privacy is designed to prepare students to evaluate major information and big data privacy and security issues facing individuals and organizations. The curriculum will examine risks organizations face while collecting, storing, and managing information and their existing customers' and stakeholders' data. Coursework will focus on practical strategies to mitigate risks and will explore the ways emerging technologies benefit in the context of risk management, ethics, and privacy.

All courses in the Information Risk Management, Ethics, and Privacy minor are offered either in-person or virtually by the UMD Information Science program at the **Shady Grove campus location** and are available to students from both College Park and Shady Grove campuses.

Program Learning Outcomes

1. Perform information security risk assessment, identify potential threats, and develop threat mitigation strategies.
2. Describe individual privacy rights, related laws and regulations, and the use of information assurance technologies to support the enforcement of these rights.
3. Describe the responsibilities of all levels of users related to the threats against information systems.
4. Describe security design principles and identify security mechanisms to implement desired security principles.
5. Identify malicious activities and attacks, and recommend appropriate response capabilities.
6. Perform audit procedures, evaluate the strengths and weaknesses of security mechanisms, and develop contingency plans to address the limitations of those procedures
7. Communicate information security concepts to individuals with diverse levels of computing skills.

REQUIREMENTS

Minor Completion Requirements
In order to complete the minor, students must:

- Complete all 15 required credits.
- Achieve a minimum grade of "C-" or better in all minor courses.
- At least nine credits must be completed at the 400-level to earn the minor.
- Only six credits or two courses from the minor are allowed to satisfy a degree requirement towards your major. Please consult with your academic advisor for more information.
- Students who matriculate to the university starting in fall 2012 (freshmen and transfers) must achieve a cumulative 2.0 GPA in their minor and major courses.
- No more than 6 credits can be completed at an institution other than the University of Maryland, College Park.
- The posting of a minor on a student's official transcript is done concurrently with the posting of the bachelor's degree. Therefore, all minor classes must be completed prior to graduation.

More information about the minor declaration process can be found here (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/minors/).

Course	Title	Credits
INST364	Human-Centered Cybersecurity	3
INST366	Privacy, Security and Ethics for Big Data	3
INST455	Information Assurance and Compliance	3
INST456	(Risk Management Leadership in the Information Age)	3

INST461	Emerging Technologies and Risk Management	3
Total Credits		**15**

ADVISING

Admission and advising for the Information Risk Management, Ethics, and Privacy minor is managed by the UMD Information Science undergraduate team at the Universities at Shady Grove campus (Rockville, MD).

Please note that advising questions related to how the Minor courses may count towards degree requirements or other program requirements should be directed to a student's academic advisor.

If you have any questions about this minor, please email usginfosci@umd.edu.

Information Science Major

Program Directors: Vedat Diker (College Park), G. Madjaroff Reitz (Shady Grove)

The field of information science, particularly in the iSchool, is a field concerned with the intersections of information, people, and technology. Information science is an interdisciplinary field, drawing from other areas of study such as computer science, management, social science, education, and the humanities, but with a focus on individual and institutional users of information and their information needs. In our program students gain the knowledge and the skills for creating information systems, resources, and services that help address society's pressing needs in a variety of contexts and in a variety of private and public sector positions, ranging from financial services to healthcare; from information technology to consulting; and from education to cultural institutions.

Admission to the Major

Students who are accepted to the university and list Information Science (InfoSci) as their preferred major will start directly in our program. Students currently in the University who are interested in declaring Information Science must complete our Change of Major process. For more information please visit the InfoSci website (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-college-park/) or email InfoSci@umd.edu.

Program Objectives

InfoSci students gain the knowledge and the skills for creating information systems, resources, and services that help address society's greatest needs. Through coursework, internships, extracurricular projects, and networking, InfoSci students build careers that will place them in leadership roles in information management, information technology, user-centered design, and data analytics.

Program Learning Outcomes

At the completion of this program, students will be able to:

1. Articulate, discuss and critically analyze information design and management: the interrelationships among information consumers or creators, information content, and the conduits through which information flows.
2. Apply basic principles to the design, development and management of information to meet the needs of diverse users.
3. Assess the impact of existing or emerging technologies on information practices and the flow of information.
4. Employ state-of-the-art tools and techniques to create, manage, and analyze information.
5. Articulate, discuss and critically analyze critical issues including the security, privacy, authenticity, and integrity of information.
6. Explain and discuss how information technologies, processes, and practices are situated in, and may reflect, reenact and reinforce broader social and organizational structures, and the ethics, diversity, equity, and inclusion issues engendered by those structures.
7. Critically evaluate information technologies, processes, and practices to identify biases they involve, and design technologies and processes that minimize those biases.

REQUIREMENTS

Students must earn a "C-" or better in all major requirements and an overall average of 2.0.

Course	Title	Credits
Benchmark Courses		
MATH115	Precalculus	3
PSYC100	Introduction to Psychology	3
STAT100	Elementary Statistics and Probability	3
INST126	Introduction to Programming for Information Science [1]	3
Major Core Requirements		
INST201	Introduction to Information Science	3
INST311	Information Organization	3
INST314	Statistics for Information Science	3
INST326	Object-Oriented Programming for Information Science	3
INST327	Database Design and Modeling	3
INST335	Organizations, Management and Teamwork	3
INST346	Technologies, Infrastructure and Architecture	3
INST352	Information User Needs and Assessment	3
INST362	User-Centered Design	3
INST490	Integrated Capstone for Information Science	3
Major Elective Requirements		
Select ONE of the following options:		15
1. Complete at least 15 credits of INST-coded major electives [2]		
2. InfoSci Specialization: Data Science, Cybersecurity and Privacy, Digital Curation (See below for more information)		
Total Credits		**57**

1. Other courses exist which fulfill this requirement. Please check with your advisor to make sure that a particular course fulfills this requirement before registering.
2. Check Testudo for currently available INST elective courses.

Data Science Specialization

The original specialization in the InfoSci program allows students develop understanding and skills for managing, manipulating, and mobilizing data to develop insight, create value, and achieve organizational goals in a wide range of sectors. The two career streams students aim for after completing this specialization are data analysts -

focusing on analyzing and reporting data - and data stewards - focusing on extracting, manipulating, and preparing data for quicker and more efficient analysis.

Course	Title	Credits
INST354	Decision-Making for Information Science	3
INST377	Dynamic Web Applications	3
INST414	Data Science Techniques	3
INST447	Data Sources and Manipulation	3
INST462	Introduction to Data Visualization	3
Total Credits		**15**

Cybersecurity and Privacy Specialization

This specialization is based on the perspective that a comprehensive and effective understanding of issues surrounding cybersecurity should encompass both technological and human aspects. In the hyper-connected world of today, cybersecurity and privacy are fundamentally problems of human interaction with technology, rather than purely technical problems to solve. As a result, the science and technology deployed to protect and defend our information and critical infrastructure must consider human, social, organizational, economic and technical factors, as well as the complex interaction among them. This specialization helps students equip themselves with human-centered cybersecurity skills and perspectives, and prepare to launch careers in the cybersecurity field with particular emphasis on management, policy, and governance-related functions.

Digital Curation Specialization

This specialization prepares students for jobs where they collect, digitize, appraise, curate, and disseminate information assets effectively and efficiently. Information is at the heart of our society's ability to learn, conduct business, recreate, and manage complex scientific, technological, industrial, and information infrastructures. It is critical that there are qualified professionals with the technical, intellectual, and social awareness required to manage large and complex collections of digital information in a variety of organizational settings. Students finishing this specialization will play critical roles in preserving a vast and varied body of information for posterity.

FOUR YEAR PLAN

Click here (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-college-park/advising/) for roadmaps for four-year plans in the College of Information Studies.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Science, Technology, Ethics and Policy Minor (INFO)

stepminor@umd.edu
spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor (https://spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor/)

Program Director: David Tomblin, Ph.D.

The minor in Science, Technology, Ethics and Policy (STEP) explores the powerful social, ethical, and political relationships that drive research and innovation. The program delves into the challenges of living and innovating in a world where emerging science and technologies are becoming increasingly interconnected, pervasive, and powerful. The STEP minor offers students the knowledge and analytical skills to understand and assess the complex interactions among science, technology, policy and ethics, providing students the opportunity to explore the ways that scientific practice and technological development are embedded in social, cultural, humanistic, and political systems.

STEP welcomes students from all majors who are interested in understanding how we can responsibly maximize the societal benefits of scientific inquiry and technological innovation. The program's primary goal is to give students analytical skills that help connect science and technology to broader social needs. Coursework emphasizes the importance of interdisciplinary modes of inquiry to generate new scientific knowledge and technologies, and to understanding the ethical considerations and social benefits that flow from them.

Electives are grouped in three concentrations, each linked to a learning outcome. Students can go deep in one concentration or choose across groupings. The end product of the program is a capstone research project of the student's own choosing, which is developed under faculty mentorship. At the onset of the capstone course, students will complete an assignment that allows them to articulate how their elective courses have shaped their understanding of science, technology, ethics and policy and how it informs their choice of capstone project.

Minor concentration areas:

Social, ethical and policy implications: This concentration explores the contemporary societal implications of science and technology. These courses ask students to think about the role science and technology have played in creating local and global social and environmental crises and what science and technology can do to help solve them.

Science and technology development: This concentration focuses on cultural, legal, organizational, and institutional forces that have shaped science and technology. It asks students to think about what causes knowledge production and technical practices to change over time and how these changes can improve implementation going forward.

Information economy: This concentration focuses on how the information economy has shaped scientific and technological practices. Students are asked to think about society's evolving relationships with information as a driving force in the private and public sector.

Program Learning Outcomes

1. Articulate and explore the social, ethical, and policy implications of how scientific ideas emerge and technologies are designed, developed, and used (Social, ethical and policy implications concentration)
2. Identify political and legal contexts governing science and technology (Social, ethical and policy implications concentration)
3. Recognize lessons from the historical contingency and legacy of scientific knowledge and technological development (Science and technology development concentration)

4. Synthesize broad implications of the "information economy" for science, technology, and society (Information economy concentration)
5. Interpret the rules, customs, and cultural practices that are the foundation for scientific and technological institutions. (Science and technology development concentration)

REQUIREMENTS

Course	Title	Credits

Social Data Science Major (INFO)

Program Directors: Brian Kim, PhD and Katie Shilton, PhD

Creating information products that capture aspects of human behavior requires an increasingly complex set of skills and knowledge. This program combines the expertise of faculty members from the College of Information Studies (iSchool) and the College of Behavioral and Social Sciences (BSOS) to prepare students to effectively, ethically and efficiently create high quality information products, such as datasets, visualizations, and models, about human activity and behavior. This critical suite of knowledge and skills is essential in many domains, including government, healthcare, sustainability, economics, entertainment, human rights, equity, and others. Students take a set of core courses housed primarily in the iSchool and BSOS's Joint Program in Survey Methodology (JPSM). They then select a track discipline, in which they train in relevant theory and methods, from among the following options: African-American Studies, Anthropology, Economics, Government and Politics/International Relations, Geography/Geospatial Information Science, Psychology, or Sociology.

Restriction: Students may not enroll in a double-major or double-degree with the Social Data Science major and the BSOS major of their track because of the significant overlap in coursework.

Program Learning Outcomes

1. Design, execute, document, and disseminate research that applies tools and methods from data science to address a social science research question
2. Develop expertise in specific contemporary social science theories and data science approaches to tackling research questions related to these theories
3. Apply findings from social data science research to analyze the policy and design of socio-technical systems
4. Identify and analyze social, legal, and ethical and equity issues in social data science work and in the profession

REQUIREMENTS

Major course requirements consist of core courses and track area courses in one of the following tracks: African American Studies, Anthropology, Economics, Geographical Sciences, Government & Politics, Psychology, and Sociology. Students will not be permitted to add a double-major or a double-degree with Social Data Science and the BSOS major associated with their track area. Both core courses and track courses include benchmark courses. Failure of a student to complete both sets of benchmark courses within the timeline indicated may result in probation and/or dismissal from the major. Benchmark I courses must be completed with a C- or higher within the first two semesters of the program. Benchmark II courses must be completed within the first three semesters of the program.

Social Data Sciences Requirements

Course	Title	Credits
Benchmark I Core Courses:		
INST126	Introduction to Programming for Information Science	3
or GEOG276	Principles of Python Programming and Geocomputing	
STAT100	Elementary Statistics and Probability	3
Math Course (Based on Track Requirement):		3
For African-American Studies, Anthropology, Government & Politics, and Sociology Tracks:		
MATH115	Precalculus	
For Economics, Geographical Sciences, and Psychology Tracks:		
MATH120	Elementary Calculus I	
Additional Core Courses:		
BSOS233	Data Science for the Social Sciences	3
Choose One:		3
INST326	Object-Oriented Programming for Information Science	
BSOS326	Python Programming for the Social Sciences	
GEOG376	Programming for Geospatial Analysis	
INST327	Database Design and Modeling	3
INST366	Privacy, Security and Ethics for Big Data	3
INST414	Data Science Techniques	3
INST447	Data Sources and Manipulation	3
INST462	Introduction to Data Visualization	3
SURV400	Fundamentals of Survey and Data Science	3
SURV430	Fundamentals of Questionnaire Design	3
Capstone		
INST492	(Integrated Capstone for Social Data Science)	3
Track Area Courses (see below for specific requirements)		**12-20**
Total Credits		**51-59**

African American Studies Track

Course	Title	Credits
Benchmark II Track Courses:		
AASP101	Public Policy and the Black Community	3

AASP210	Intro to Research Design and Analysis in African American Studies	3
Track I Requirement:		
AASP395	Fundamentals of Quantitative Research in Socio-Cultural Perspective	3
Track II Requirement:		
Nine credits from the following list:		9
AASP301	Applied Policy Analysis and the Black Community	
AASP310	African Slave Trade	
AASP313	Black Women in United States History	
AASP314	The Civil Rights Movement	
AASP400	Directed Readings in African American Studies	
AASP402	Classic Readings in African American Studies	
AASP411	Black Resistance Movements	
AASP441	Science, Technology, and the Black Community	
AASP443	Blacks and the Law	
AASP499	Advanced Topics in Public Policy and the Black Community	
Total Credits		**18**

Anthropology Track

Students in the Anthropology track choose one of three tracks: Health, Heritage, or Environment.

Course	Title	Credits
Anthropology-Health Track		
Benchmark II Anthropology-Health Track Courses:		
ANTH210	Introduction to Medical Anthropology and Global Health	3
INST314	Statistics for Information Science	3
Anthropology-Health Track I Requirement:		
ANTH310	Method & Theory in Medical Anthropology and Global Health	3
Anthropology-Health Track II Requirement:		
Nine credits from the following list:		9
ANTH411	Global Migration and Health	
ANTH412	Hypermarginality and Urban Health	
ANTH413	Health Disparities in the United States	
ANTH415	Advanced Studies in Global Health	
ANTH416	Anthropology of Global Violence	
Anthropology-Heritage Track		
Benchmark II Anthropology-Heritage Track Courses:		
ANTH240	Introduction to Archaeology	3
INST314	Statistics for Information Science	3
Anthropology-Heritage Track I Requirement:		
ANTH340	Method and Theory in Archaeology	3
Anthropology-Heritage Track II Requirement:		
Nine credits from the following list:		9
ANTH341	Introduction to Zooarchaeology	
ANTH440	Theory and Practice of Historical Archaeology	
ANTH441	Archaeology of Diaspora	
ANTH447	Material Culture Studies in Archaeology	
ANTH448	Special Topics in Archaeology	
ANTH451	Environmental Archaeology	
ANTH464	Anthropology of Cultural Heritage	
ANTH496	Field Methods in Archaeology	
Anthropology-Environment Track		
Bookmark II Anthropology-Environment Track Courses:		
ANTH222	Introduction to Ecological and Evolutionary Anthropology	4
INST314	Statistics for Information Science	3
Anthropology-Environment Track I Requirement:		
ANTH322	Method and Theory in Ecological Anthropology	3
Anthropology-Environment Track II Requirement:		
Nine credits from the following list:		9
ANTH450	Theory and Practice of Environmental Anthropology	
ANTH454	Political Ecology	
ANTH456	Conservation and Indigenous People in South America	
ANTH462	Amazon Through Film	
ANTH467	Researching Environment and Culture	

Economics Track

Course	Title	Credits
Benchmark II Track Courses:		
ECON200	Principles of Microeconomics	3
ECON201	Principles of Macroeconomics	3
ECON230	Applied Economic Statistics	3
Track I Requirement:		
ECON305	Intermediate Macroeconomic Theory and Policy	3
or ECON306	Intermediate Microeconomic Theory & Policy	
Track II Requirement: [1]		
Six credits from the following list:		6
ECON305	Intermediate Macroeconomic Theory and Policy	
or ECON306	Intermediate Microeconomic Theory & Policy	
ECON311	American Economic History Before the Civil War	
ECON312	American Economic History After the Civil War	
ECON315	Economic Development of Underdeveloped Areas	
ECON317	Global Economic Policies	
ECON330	Money and Banking	
ECON340	International Economics	
Total Credits		**18**

[1] The course taken for the Track I requirement may not also be used for the Track II requirement. No double-count for these two categories.

Geographical Sciences Track

Course	Title	Credits
Benchmark II Track Courses:		
GEOG202	Introduction to Human Geography	3
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
Track I Requirement:		
GEOG373	Geographic Information Systems	3

Track II Requirement:		
9 credits from the following list (six must be at the 400-level):		9
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change	
GEOG331	Introduction to Human Dimensions of Global Change	
GEOG332	Economic Geography	
GEOG333	The Social Geography of Metropolitan Areas in Global Perspective	
GEOG335	Population Geography	
GEOG415	Land Use, Climate Change, and Sustainability	
GEOG416	Conceptualizing and Modeling Human-Environmental Interactions	
GEOG421	Changing Geographies of China	
GEOG422	Changing Geographies of Sub-Saharan Africa	
GEOG432	Spatial Econometrics	
GEOG470	Algorithms for Geospatial Computing	
GEOG473	Geographic Information Systems and Spatial Analysis	
GEOG475	Computer Cartography	
GEOG477	Mobile GIS Development	
Total Credits		**18**

Government and Politics Track

Course	Title	Credits
Benchmark II Track Courses:		
GVPT170	American Government	3
GVPT200	International Political Relations	3
GVPT201	Scope and Methods for Political Science Research	3
Track I Requirement:		
GVPT320	Advanced Empirical Research	3
Track II Requirement:		
Any six credits of GVPT coursework at the 300- or 400- levels		6
Total Credits		**18**

Psychology Track

Course	Title	Credits
Benchmark II Track Courses:		
PSYC100	Introduction to Psychology	3
PSYC200	Statistical Methods in Psychology	3
Track I Requirement:		
PSYC300	Research Methods in Psychology Laboratory	4
Track II Requirement:		
Nine credits from the following list:		9
PSYC330	Child Psychopathology	
PSYC332	Psychology of Human Sexuality	
PSYC334	Psychology of Interpersonal Relationships	
PSYC336	Psychology of Women	
PSYC341	Introduction to Memory and Cognition	
PSYC344	Health Psychology	
PSYC353	Adult Psychopathology	
PSYC354	Multicultural Psychology in the U.S.	
PSYC355	Developmental Psychology	
PSYC356	Psychology of Adolescence	
PSYC361	Survey of Industrial and Organizational Psychology	
PSYC362	Introduction to Negotiation	
PSYC416	Development of Attachment in Infancy and Childhood: Theory, Research, Methods, and Clinical Implications	
PSYC417	Data Science for Psychology and Neuroscience Majors	
PSYC420	Experimental Psychology: Social Psychology Laboratory	
PSYC424	Communication and Persuasion	
PSYC425	Psychology and Law	
PSYC432	Counseling Psychology: Theories, Research, and Practice	
PSYC435	Temperament, Personality, and Psychopathology	
PSYC436	Introduction to Clinical Psychology: From Science to Practice	
PSYC437	The Assessment and Treatment of Addictive Behaviors	
PSYC440	Experimental Psychology: Cognitive Processes and Legal Applications	
PSYC450	Applying Psychology to the Workplace: Industrial Organizational Psychology Laboratory	
PSYC456	Research Methods in Developmental Psychology Laboratory	
PSYC460	Psychological Foundations of Personnel Selection and Training	
Total Credits		**19**

Sociology Track

Course	Title	Credits
Benchmark II Track Courses:		
SOCY100	Introduction to Sociology	3
SOCY201	Introductory Statistics for Sociology	4
Track I Requirement:		
SOCY202	Introduction to Research Methods in Sociology	4
Track II Requirement:		
Nine credits from the following list:		9
SOCY325	The Sociology of Gender	
SOCY335	Sociology of Health and Illness	
SOCY401	Intermediate Statistics for Sociologists	
SOCY405	Scarcity and Modern Society	
SOCY406		
SOCY407	Explaining Social Change: Historical and Comparative Methods	
SOCY410	Social Demography	
SOCY411	Demographic Techniques	
SOCY412	Family Demography	
SOCY413	Sociology of Aging	
SOCY415	Environmental Sociology	
SOCY420	Qualitative Research Methods in Sociology	
SOCY430		
SOCY431	Principles of Organizations	

SOCY432	Social Movements
SOCY441	Social Stratification and Inequality
SOCY442	The Black Middle Class
SOCY444	
SOCY445	Sex and Love in Modern Society
SOCY457	Sociology of Law
SOCY464	Military Sociology
SOCY465	The Sociology of War
SOCY467	Sociology of Education
SOCY480	Researching the Middle East
SOCY490	Experimental Research Practicum
SOCY491	Experimental Research Design
Total Credits	**20**

Technology and Information Design Major

Program Director: Dr. Tamara Clegg

The B.A. in Technology and Information Design (InfoDesign) teaches students to frame important problems at the intersection of people and information; to design solutions for those problems; and to realize, deploy and iterate on those solutions. InfoDesign supports students in their efforts to use technology in the service of the greater good; to apply and expand their creativity; to develop a start-up mentality (in which they must try solutions and fail first in order to succeed); and to engage in rapid development and prototyping grounded by rapid evaluation and assessment. Students participate in hands-on studio and laboratory classes in user-centered design, technology development, problem-solving and cross-disciplinary communication. Graduates may become designers, planners, technology consultants, project managers, and entrepreneurs, in such wide-ranging fields as user experience, mobile development, healthcare, law, entertainment, policy, smart-city development, libraries and archives.

Program Learning Outcomes

1. Frame important problems at the intersection of people and information
2. Analyze the interplay of people, information, and technology at various scales (e.g., individuals or small groups, communities or organizations, regions or institutions)
3. Leverage a systems-thinking approach through modeling and simulation
4. Design solutions for these problems
5. Implement design thinking skills, including user research, ideation, prototyping, and participatory design
6. Communicate ideas to gather momentum and iterate through sketching, prototyping and data visualization
7. Iteratively assemble existing components to form new solutions within a supportive culture of critique
8. Attend to the ethical and equitable implications of their designs
9. Realize, deploy, and iterate on these solutions at appropriately selected scale(s)
10. Assess the scale of the problem and the appropriate deployment of potential solutions
11. Organize people to properly implement solutions through leadership and entrepreneurship skills
12. Evaluate success of a solution in a socially embedded setting, to include the employment of skills such as testing, evaluation, and auditing

REQUIREMENTS

Course	Title	Credits
Core Courses		
INST104	Design Across Campus	3
INST126	Introduction to Programming for Information Science	3
IDEA258	Special Topics in Innovation (IDEA258A Becoming a Design Thinker: Tools and Mindsets for Innovation)	1

- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Technology Innovation Leadership Minor

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The minor in Technology Innovation Leadership will prepare students to effectively create and navigate a climate of technological innovation within an organization or team. By combining creative leadership practices with design thinking skills and analysis of sociotechnical challenges, students will tackle large-scale problems relating to technology innovation. The program will center on innovation thinking, a critical addition to business thinking, which will allow students to bring new ideas and energy to their leadership experiences and sociotechnical challenges. Coursework will examine the different ways leaders and social entrepreneurs strategically use innovative technologies and information to solve social, cultural, and environmental problems.

There are five (5) three-credit courses required as part of the minor.

All courses in the Technology Innovation Leadership minor are offered online by the UMD Information Science program through its **Shady Grove campus location** and are available to students from both College Park and Shady Grove campuses.

Program Learning Outcomes

1. Describe and analyze the principles of technology innovation, leadership, and entrepreneurship.
2. Assess the role entrepreneurship and technology innovation play in societal well-being and development.
3. Describe and apply practical, hands-on entrepreneurial and leadership skills through developing creative and innovative solutions to solve societal issues.
4. Analyze ways that Social Entrepreneurs strategically use innovative technologies and information to solve social, cultural, and environmental issues.
5. Implement best practices and knowledge to successfully lead, create, and discover while sustaining the culture of innovation in their organizations and teams.

REQUIREMENTS

Minor Completion Requirements
In order to complete the minor, students must:

- Complete all 15 required credits.
- Achieve a minimum grade of "C-" or better in all minor courses.
- At least nine credits must be completed at the 400-level to earn the minor.
- Only six credits or two courses from the minor are allowed to satisfy a degree requirement towards your major. Please consult with your academic advisor for more information.
- Students who matriculate to the university starting in fall 2012 (freshmen and transfers) must achieve a cumulative 2.0 GPA in their minor and major courses.
- No more than 6 credits can be completed at an institution other than the University of Maryland, College Park.
- The posting of a minor on a student's official transcript is done concurrently with the posting of the bachelor's degree. Therefore, all minor classes must be completed prior to graduation.

More information about the minor declaration process can be found here (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/minors/).

Course	Title	Credits
INST363	Fundamentals of Technology Innovation	3
INST407	Leading and Sustaining a Culture of Innovation	3
INST457	(Lean Startup)	3
INST453	Project Management for Information Science	3
INST463	(The Technology Socialpreneur)	3
Total Credits		**15**

ADVISING

Admission and advising for the Technology Innovation Leadership minor is managed by the UMD Information Science undergraduate team at the Universities at Shady Grove campus (Rockville, MD).

Please note that advising questions related to how the Minor courses may count towards degree requirements or other program requirements should be directed to a student's academic advisor.

If you have any questions about this minor, please email usginfosci@umd.edu.

The Philip Merrill College of Journalism

1100 Knight Hall
Phone: 301-405-2399
alljourundergrad@umd.edu
merrill.umd.edu (http://www.merrill.umd.edu)

Dean: Lucy Dalglish, J.D.
Associate Dean: Rafael Lorente

Assistant Deans: Katie Aune, J.D., Joshua Madden, Vanessa Nichols-Holmes

Admissions

Freshman Admission

Students who wish to study in the College of Journalism at Maryland starting in the fall are encouraged to apply for admission to the university by the priority deadline or the regular deadline. Students who wish to start their study in spring are encouraged to apply for admission by the priority deadline or the regular deadline. There is no separate application required for consideration to the journalism major. The Office of Undergraduate Admissions (http://www.admissions.umd.edu/) can assist you with your application for admission.

Current UMD Students

Current UMD students who wish to add the JOUR major should contact the JOUR Advising Team (jouradvisingrequest@umd.edu) for more information about the major declaration process. Your journalism advisor will discuss the major requirements, review any courses you have taken, assist you with a graduation plan and officially change your major.

Transfer Students from Another Institution

College students from outside the University of Maryland are welcome to apply, and can do so for fall by the priority deadline or the regular deadline. College students outside the university who are seeking to study starting in the spring can apply by the priority deadline or the regular deadline.

Transfer Credits

- No more than 12 transfer credits of communications courses from an accredited journalism program may be approved by Merrill College to be applied toward the degree.
- Transfer students who wish to receive credit for JOUR201 based communication/journalism coursework done at another journalism program must pass a proficiency exam.
- Other mass communication credits earned from nonaccredited mass-communication programs are not transferable to the Philip Merrill College of Journalism at the University of Maryland.
- The Office of Undergraduate Admissions (http://www.admissions.umd.edu/) can help you become familiar with the University of Maryland and assist you with your online application for admission.

Benchmarks

In accordance with the University's policies, the College of Journalism expects students to make satisfactory academic progress toward graduation. To help measure a student's progress toward their degree, students must attempt courses designated as benchmarks within a specified number of credits in order to continue in the major.

All students in the College of Journalism must take a series of benchmark courses by the time that they have completed 30 credits and 60 credits.

By 30 credits, students must have completed:

1. JOUR181 Grammar for Journalists
2. JOUR200 Journalism History, Roles and Structures

By 60 credits, students must have completed:

1. JOUR152 Introduction to Storytelling with Code
2. JOUR201 News Writing and Reporting I
3. JOUR262 News Videography or JOUR370 Photojournalism
4. JOUR320 News Writing and Reporting II: Multiplatform

The college reviews students' transcripts to determine if students have successfully completed benchmark courses within the established timeframe and with the appropriate grades. If benchmark courses are met, students are expected to continue making satisfactory progress toward their degree. Students not meeting the benchmarks will be denied continued enrollment in the College of Journalism, necessitating a change of major should they wish to continue at the university.

For further information, contact the College's Student Services office at 301-405-2399.

ACADEMIC PROGRAMS

Major

- Journalism Major (p. 446)

ADVISING

The Office of Student Services provides academic advising to journalism majors on an appointment basis. It is located at 1100 Knight Hall, 301-405-2399.

OPPORTUNITIES

Fieldwork Opportunities

Internships

Supervised internships are essential. Karen Denny is the Internships and Career Development Director, 3107C Knight Hall, 301-405-2429.

Professional Experience Opportunities

Capital News Service

Capital News Service is a student-powered news organization run by the Philip Merrill College of Journalism. For more than two decades, it has provided deeply reported, award-winning coverage of issues of import to Marylanders.

With bureaus in College Park, Annapolis and Washington run by professional journalists, it delivers news in multiple multimedia formats via partner news organizations, a destination website, a nightly on-air television newscast and affiliated social media channels. It provides breaking news coverage, in-depth investigative and enterprise journalism, and serves as a laboratory for students to test and develop innovative new methods of reporting and telling stories.

UMTV

For students interested in broadcast news, opportunities to gain experience with cable news programs are presented in the curriculum and by volunteering at the campus television station, UMTV.

Student-Run Campus Media Outlets

Students can gain broadcast news and sports reporting experience through the campus radio station, WMUC. There are numerous student-run publications on campus. These include, The Diamondback, an independent daily newspaper that appears in print and online. The Diamondback is one of the most-read campus dailies in the nation. Among the many campus publications there are literary magazines, newspapers and websites of interest to special populations. These

include The Black Explosion, The Mitzpeh, Stories Beneath the Shell, Unwind!, Her Campus, The Writers' Bloc, The Campus Trainer and The Left Bench.

Living-Learning Programs

College Park Scholars - Media, Self & Society

Co-sponsored by the Philip Merrill College of Journalism, the Media, Self and Society Program is one of the living/learning programs offered by the College Park Scholars Program. This two-year program for incoming freshmen is designed to give students the opportunity to undertake a critical examination of media organizations, institutions and practices as well as gain practical experience through involvement in a media-related activity of their choice. For more information, see the College Park Scholars Program entry in the "Office of Undergraduate Studies" section under "The Colleges and Schools."

Honors Program

Although no departmental honors program currently exists within the college, academically outstanding students are recognized through Kappa Tau Alpha, the Journalism academic honor society.

Student Societies and Professional Organizations

The college sponsors student chapters of the Society for Professional Journalists, the National Association of Hispanic Journalists, and the National Association of Black Journalists. These organizations provide students with opportunities to practice skills, establish social relationships with other students both on and off campus, and meet and work with professionals in the field.

For information on the organizations listed, contact the Student Services Office, 1100 Knight Hall, 301-405-2399.

Financial Assistance

The college is committed to enrolling the most qualified students, regardless of ability to pay. Toward that end, the college, through donor-sponsored awards, gives annual scholarships to undergraduates. Additionally, the university awards scholarships and financial aid including low-interest loans, grants and work-study opportunities.

Sources for Students

All incoming freshman are automatically considered for scholarships granted by the college. Current students are selected on a basis of need, merit, donors' intent or a combination of these factors. Below is a selection of scholarships students may be considered for.

The Steven C. Affens Broadcast Journalism Scholarship. This scholarship is awarded to an undergraduate broadcast student. Recipients shall be selected from applications that include evidence of the student's on-air TV work. A combination of overall academic performance, and judging of a sample of a student's on-air programming that emphasizes potential in visual storytelling and high-quality video news photography, will be used by the [PMC] scholarship committee in making the award.

Carolyn A. and Howard F. Ahrens Scholarship. Established by a bequest from Carolyn A. Ahrens, this scholarship is awarded to sophomores or juniors enrolled in the Philip Merrill College of Journalism. Students must be Maryland residents.

Fred I., Edna O. and Fred J. Archibald Scholarship. Established by a bequest from Fred I. Archibald of Baltimore News-American and Frederick News-Post newspaper editors, this scholarship is awarded to undergraduate students enrolled in the Philip Merrill College of Journalism.

Professor Thomas Aylward Journalism Scholarship. Awarded to a Merrill College Ph.D. student.

Paul Berg Diamondback Scholarship. Funded by friends and family and The Washington Post in memory of Paul Berg, Diamondback editor-in-chief 1978-79 and assistant editor of The Post's Health section at the time of his death in 1989. This scholarship is awarded to a Diamondback editor or news staff member who displays special achievement and effort while working for the campus daily newspaper. Applicants must have served at least one semester on the Diamondback staff, and must return to campus for the following fall semester. All majors may apply for this scholarship.

Bonnie Bernstein Scholarship. Bernstein is a 1992 Merrill College graduate who was an Academic All-American gymnast. Applicants must be a full-time, upperclass multi-platform journalism major (with preference for students in the broadcast component) who participates in an NCAA-sanctioned sport at the University of Maryland. Applicants also need to show evidence of financial need, have a GPA of 3.0 or above and submit an essay describing why they should receive the award.

John Story Cleghorn and Nona Reese Cleghorn Scholarship. Funded by the late College Dean Reese Cleghorn in honor of his parents, this scholarship is awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Reese Cleghorn Excellence in Journalism Scholarship. Created in memory of the late College Dean Reese Cleghorn, this scholarship is awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Francis J. Cormier White House Correspondents' Association Scholarship. Established in 1991 by the White House Correspondents' Association, this award was renamed in 1994 to honor the memory of Francis J. Cormier, who for two decades exemplified the best qualities of White House correspondents with a blend of gentleness, humor and professionalism that endeared him to the readers of his dispatches for The Associated Press. This renewable scholarship is awarded to four undergraduate students from Washington, D.C. or Prince George's County, Maryland on the basis of financial need. Students must re-apply each year to be considered for renewal.

Ralph Crosby Journalism Excellence Award. Funded by Mr. Crosby, a 1956 graduate of the College who is a member of the Merrill College Board of Visitors and chairman of Crosby Marketing Communications, Inc., in Annapolis. This scholarship provides an award toward tuition and fees to an undergraduate journalism student based on academic performance and financial need, with preference (in order) given to a student from Annapolis, Anne Arundel County or the State of Maryland.

The Ralph and Carlotta Crosby TerpStart Endowed Scholarship in Journalism. Ralph Crosby '56 said, "Being a journalism major at the University of Maryland helped form my character, gave me a profession, and trained me academically and socially. Good reasons for giving back." This scholarship provides annual need-based funds, under the auspices of the TerpStart Matching Scholarship Program, with preference given (in order) to undergraduate students from Anne Arundel County or the State

of Maryland who are enrolled in the Philip Merrill College of Journalism. (Students cannot apply for this scholarship.)

Theodore Crown, Sr. and Joseph T. Crown, Jr. Scholarship. Created by Kathryn Crown '66 in memory of her father and brother, this scholarship is awarded to undergraduate journalism students with junior or senior class standing.

Entravision. Awarded to a broadcast student in the Merrill College with high academic achievement. Preference is given to those who have demonstrated interest or experience covering issues or stories related to the Hispanic community, those who double major or minor in a Spanish language, who have studied abroad in Spain, Central America, or Latin America, and students who have worked or interned at a Spanish-language media organization.

Penny Bender Fuchs Scholarship. This scholarship was established by colleagues, family and friends of Penny Bender Fuchs, an admired and respected member of the Merrill College faculty from 1999 until her death in 2013. Rising Merrill College juniors and seniors are eligible for this award. Preference is given to students who have earned a grade point average of 3.0 or higher in journalism courses.

Lawrence L. Goldberg and Lillie Z. Goldberg Journalism Scholarships. Funded by Mr. and Mrs. Goldberg and their relatives and friends in honor of former Knight Chair Professors Hodding Carter III and Haynes Johnson, and former professor David Broder, three faculty members who taught classes that the Goldbergs attended at the Merrill College as retirees. Scholarships are awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Gridiron Scholarship. The Gridiron Foundation Journalism Scholarship was established in 2002 by the Gridiron Club and Foundation. The Gridiron Club is the oldest and most prestigious journalistic organization in Washington D.C., and its foundation makes charitable contributions and provides scholarship to journalism students. The Gridiron Foundation Journalism Scholarship is awarded to undergraduate students based upon outstanding academic achievements and a stated commitment to pursue a career in journalism. Students must re-apply each year to be considered for renewal.

The Michael Gurevitch Journalism Scholarship. The Michael Gurevitch Journalism Scholarship was established in January 2009 by Patricia Gurevitch, in memory of her husband. An internationally renowned mass communication scholar, Professor Emeritus Michael Gurevitch taught at the University of Maryland's College of Journalism from 1983 until 2008. Much of his work was grounded in case studies and original research relating to how journalists grasped the practical problems of keeping the public informed. Professor Gurevitch would not have been able to be in the United States to earn his 2 degrees if he did not have help from others. This scholarship provides non- renewable funds for doctoral students in the Merrill College. Preference will be given to international students with financial need.

The Ralph M. Hamaker TerpStart Endowed Scholarship. Started by Ralph M. Hamaker '53, this scholarship provides annual need-based funds, under the auspices of the TerpStart Matching Scholarship Program, for undergraduate students enrolled in the Philip Merrill College of Journalism. (Students cannot apply for this scholarship.)

The Ray Hiebert Scholarship Fund. This scholarship is awarded to graduate broadcast students.

Carol Horner Journalism Scholarship. This scholarship was established by family, friends and colleagues of the late Ms. Horner, a dedicated journalist and woman of wonderful good humor who forged a distinguished career as a reporter and editor at the Philadelphia Inquirer and Wall Street Journal before serving as director of the Knight Center for Specialized Journalism at the University of Maryland. This non-renewable scholarship is awarded to a high-achieving undergraduate student with financial need in the Philip Merrill College of Journalism.

Christopher Houston '85 Scholarship. The K. Christopher Houston Scholarship was established in memory of K. Christopher "Chris" Houston, '85, a distinguished journalist who worked for CNN Headline News in Atlanta and WUSA-TV in Washington, D.C. Funded by Karen Gray Houston, family and friends, this scholarship is awarded to a student at the Philip Merrill College of Journalism who has demonstrated a strong interest in pursuing a career in broadcast journalism.

Jay Jackson Scholarship. Funded by former Annapolis newspaper executive Allen Jackson in memory of his brother Jay, an honors graduate of Maryland's second journalism class. This scholarship is awarded based on merit and need, to a multi-platform student who will be a senior the following semester.

Haynes Johnson Scholarship Fund. The Haynes Johnson Scholarship Fund was established in 2013 by funds donated from the faculty, staff and friends of Haynes Johnson. This scholarship will be awarded to an outstanding student in the Merrill College based on financial need and academic merit.

Robert C. Keith Fund for Investigative Journalism. The Fund shall be used to provide support for scholarships and teaching grants to faculty and students and support for other investigative journalism endeavors at the discretion of the dean of the Philip Merrill College of Journalism.

Phyllis and Frank Kopen Broadcast Journalism Scholarship. Endowed by broadcast faculty member and College alumna Sue Kopen Katcef '76 in honor of her parents, this scholarship is awarded to a sophomore or junior broadcast student (radio or TV) in recognition of their contributions to the College's broadcast journalism program. Consideration may be given to financial need and academic performance. Awards may be renewable for up to two years if recipients continue to make satisfactory academic progress. Students must re-apply each year to be considered for renewal.

Tom Kunkel Journalism Excellence Scholarship. Created by colleagues and friends of former dean Tom Kunkel (2000-2008), this scholarship is awarded to outstanding undergraduate students based on academic merit, with preference given to students with financial need.

Jonathan Ledecky Sports Journalism Scholarship. Funded by New York Islanders minority owner Jonathan Ledecky to support scholarships for students in the Philip Merrill College of Journalism who have interest in sports journalism. Recipients must have an expressed interest in sports journalism, be accepted for full-time enrollment and maintain good academic standing.

Rick Martin '92 Scholarship in Journalism. The Rick Martin '92 Scholarship in Journalism was established in 2015 by Mr. Rick Martin. Mr. Martin has worked in the television news industry for more than 20 years as an assignment editor and manager – at CNN as well as other local news markets in Washington, D.C., Baltimore and Philadelphia. He has covered the White House, Congress, the Pentagon and the State Department. He has covered major breaking news, including the White House shooting by gunman Francisco Duran, the D.C. Sniper Attacks, and

the September 11th terrorist attacks. Martin was born in Washington, D.C., and grew up in the West Indies' twin-island nation of Trinidad & Tobago. The Scholarship shall be awarded to an undergraduate student in the Philip Merrill College of Journalism who demonstrates financial need and maintains good academic standing. This scholarship may be renewed each year if the student meets these criteria. Students must re-apply each year to be considered for renewal.

John McNamara '83 Endowed Sports Journalism Scholarship. This scholarship, funded by family and friends of 1983 Merrill College alumnus John McNamara, was created to recognize McNamara and his devotion to sports journalism, to allow others to learn from McNamara and his work, to develop and reward writers who demonstrate potential for producing accessible and informative sports journalism and to provide opportunity for talented students.

Maryland-Delaware-DC Press Association Scholarship. This scholarship is funded by the MDDC Press Association and is awarded to full-time undergraduate multi-platform (non-broadcast) students who are residents of Maryland, Delaware, or D.C. Recipients and must also have completed at least three semesters with an overall GPA of 3.0 or higher.

Ron Menchine Broadcast Journalism Scholarship. Established in 2013 with a bequest from the estate of Mr. Menchine, a 1956 Maryland graduate who was the last baseball broadcasting voice of the Washington Senators. In his earlier career, he was sports director of WBAL radio in Baltimore and WDCA-TV in Washington, and was a play-by-play announcer for Temple and Navy football games. The Menchine fund awards scholarships to high-achieving broadcast students in the Merrill College.

The David Mills Scholarship (The Diamondback). The David Mills Scholarship is awarded annually to at least one student who will receive a $5,000 scholarship. The requirements include: they be a Diamondback (DBK) staffer with at least two semesters of experience; be full time (12 or more credits); and that they continue to work at the DBK for the two semesters that follow the award. The students are asked to submit an application and materials which should include writing, multi-media or other journalism samples. The final decision is made by David Simon (DBK and UMD alumnus), a current UMD professor from the English Department and a relative of the late David Mills for whom the award is named.

Gertrude Poe Fund for Journalism Excellence. An endowed fund established in 1988 by the former editor, publisher and owner of the weekly Laurel News Leader in Maryland. Ms. Poe was the first female president of the Maryland-Delaware-D.C. Press Association and was inducted into to the MDDC Hall of Fame in 1987. Spendable income from the Poe fund supports student scholarships in the Merrill College, with preference given to students with an interest in community journalism.

Frank Quine and Mary Ellen Doran-Quine Journalism Scholarship. Funded by the College's former Assistant Dean Frank Quine and his wife, this scholarship is awarded to a high achieving multi-platform student (grad or undergrad) with financial need and high potential as a professional journalist.

Stanley E. Rubenstein Memorial Journalism Scholarship. Established by Ruth Ann Rubenstein '53 in memory of her husband, a 1953 economics graduate of Maryland, who became a leading New York City public relations executive. This scholarship is awarded to an outstanding undergraduate student based on financial need and academic merit.

Richard W. Worthington Journalism Scholarship. Named in memory of the late publisher of the weekly Bel Air, Md. Aegis newspaper. This scholarship is awarded to a multi-platform major (undergraduate or graduate) based on a combination of academic excellence, evidence of potential as a journalist and financial need. Preference given to a resident of Harford County, Maryland.

From the University

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

The National Scholarships Office is committed to helping students of the University of Maryland identify, apply for, and win national scholarships and fellowships in their pursuit of higher education. They also help students find research opportunities in their fields of study.

From Outside Sources

The Academy of Television Arts & Sciences — Fred Rogers Memorial Scholarship (http://www.emmys.com/foundation/programs/mister-rogers/) - The Academy of Television Arts & Sciences and the accounting firm, Ernst & Young, have created this $10,000 scholarship to support and encourage college students to go into the field of children's television. The scholarship is open to graduating seniors who are continuing on to graduate school and graduate students (Masters/Ph.D.).

Peter Agris Memorial Scholarships (http://www.alphaomegacouncil.org/scholarships/application-3/) - Five scholarships of $5,000 are available to journalism or communications graduate and undergraduate students of Greek American heritage. March 1 Deadline.

American Copy Editors Society Scholarships (https://aceseditors.org/awards/scholarships/) - All ACES scholarships are for potential professional copy editors. The scholarships are open to students who will be juniors, seniors or graduate students in the fall, and graduating students who will take full-time copy editing jobs or internships. Late November deadline.

American Society of Newspaper Editors (http://www.schooljournalism.org/scholarships/) - Comprehensive listing of various journalism scholarships from ASNE via schooljournalism.org.

Asian American Journalist Association (https://www.aaja.org/news-and-resources/scholarships-internships/) - AAJA offers a variety of scholarships.

Association for Women in Sports Media Scholarship (http://awsmonline.org/internships-scholarships/) - AWSM offers an annual scholarship program for female college students who plan to pursue careers in any sports communications fields: writing, copy editing, public relations, broadcasting, Internet or photography. Winners in each category receive a $1,000 scholarship.

The John Bayliss Broadcast Foundation (http://www.beaweb.org/bayliss/radio.html) - Juniors, seniors and graduate-level broadcast majors are encouraged to apply for the Bayliss Radio Scholarship.

CCNMA: Latino Journalists of California Scholarship (https://www.ccnma.org/general-1/) - Open to residents of California only.

Chips Quinn Scholars Program (http://www.newseuminstitute.org/initiatives/chips-quinn-scholars-program-for-diversity-in-journalism/)

- Sponsored by the Freedom Forum, the program offers journalism students of color hands-on training, paid internships and $1,000 awards. Candidates must be nominated by the college to be considered for the program. Recent graduates are also encouraged to apply.

Evert Clark/Seth Payne Award for Young Science Journalists (https://casw.org/awards-fellowships/clark-payne/) - For nearly three decades, the Evert Clark/Seth Payne Award has recognized the contributions to journalism of both Ev Clark and Seth Payne. The Award is intended to encourage young science writers by recognizing outstanding reporting and writing in any field of science. The winner will receive $1,000 and expenses to attend the annual meeting of the National Association of Science Writers (NASW) and the New Horizons briefing of the Council for the Advancement of Science Writing (CASW) in October.

Freedom Forum — Al Neuharth Free Spirit Scholarship (http://freespirit.org/) - The Al Neuharth Free Spirit Scholarship and Conference Program annually awards $1,000 college scholarships to each of 102 high school seniors (a male and female from each state and the District of Columbia) who are interested in pursuing a career in journalism and who demonstrate qualities of "free spirit."

Garden State Scholastic Press Association (https://gsspa.org/scholarships/) - Two scholarships are available from GSSPA for New Jersey high school students.

National Academy of Television Arts and Sciences, Chesapeake Bay Chapter — Betty Endicott Scholarship (http://www.capitalemmys.tv/students/scholarships/) - NATAS-DC will award scholarships ranging from $1000 to $5000 to full-time college sophomores, juniors or non-graduating seniors with a declared major in communications, television or broadcast journalism. March application with May announcement – check website for announcement.

National Association of Black Journalists Sustaining Scholarship Awards (http://www.nabj.org/?SEEDScholars2015) - This competition for two four-year sustaining scholarships is open to any graduating foreign or U.S. high school senior who plans to pursue a career in journalism. NABJ offers a number of additional scholarships as well. February deadline.

The National Association of Negro Business and Professional Women's Clubs, Inc. (https://nanbpwc.org/education/scholarships/) - Offers two scholarships for African American students whose major can include journalism. March deadlines.

National Association of Hispanic Journalists Scholarships (https://nahj.org/next-generation/) - Open to high school grads, college and graduate students who are interested in a career in broadcast, photojournalism or print journalism. March 1 deadline.

The National Italian American Foundation (http://www.niaf.org/programs/scholarships/) - Scholarships open to Italian American students who demonstrate outstanding potential and high academic achievements or those students from any ethnic background majoring or minoring in Italian language, Italian studies, Italian American studies or a related field, who demonstrate outstanding potential and high academic achievements. Must have a membership in NIAF to apply and an ancestor who immigrated to the U.S. from Italy.

National Lesbian and Gay Journalists Association Leroy F. Aarons Scholarship Award (http://www.nlgja.org/students/aarons.htm) - Leroy F. Aarons and the Kay Longcope scholarships are awarded annually to students who demonstrate a commitment to providing fair and accurate coverage of the lesbian, gay, bisexual and transgender (LGBT) community. These annual scholarships are presented in honor of two prominent journalists. Applications will be available in late February. They will also have the Kay Longcope Scholarship which will be available at the same time.

National Press Club — Persina Scholarship for Minorities in Journalism (http://www.press.org/about/scholarships/) - Renewable scholarship for $2,500 per year for up to 4 years. For minority students planning to pursue a career in journalism. New: Richard G. Zimmerman Scholarship of $5000 (non-renewable.) The Press Club also offers a graduate-level scholarship.

New York Women In Communications Foundation Scholarship Program (https://nywici.org/advance/students/scholarships/scholarship-application/) - Open to high school seniors as well as undergraduate and graduate students. Scholarships are awarded on the basis of academic excellence, need and a demonstrated commitment to the field of communications.You must be a permanent resident of New York, New Jersey, Connecticut or Pennsylvania. Deadline January 30.

The NewsGuild — The David S. Barr Award (http://newsguild.org) - The David S. Barr Award is intended to recognize one high school and one college student for their journalistic achievement and to encourage young journalists to focus on issues of social justice. (Check the Newspaper Guild (now Newsguild.org) website for information about when applications will be accepted.)

The Overseas Press Club of America Foundation (http://www.overseaspressclubfoundation.org/programs.html) - Aspiring foreign correspondents and students interested in international journalism are encouraged to apply for OPC Foundation's scholarship. The winners receive $2,000 checks each.

Radio Television Digital News Association and Foundation (http://www.rtdna.org/content/scholarship_info/#UiiKoLzFaZs) - RTDNA and RTDNF honor professional achievements in electronic journalism through numerous prestigious awards, scholarships, fellowships and internship programs. April 30 deadline to apply.

Society of Professional Journalists Maryland Pro Chapter College Scholarship (http://www.spj.org/grants.asp) - Applicants must have regular home residence in the State of Maryland, but may attend colleges or universities outside Maryland in nearby Virginia, D.C. or Pennsylvania.

SPJ — Sigma Delta Chi Journalism Scholarships (http://sdxdc.org/scholarship-application/) - The SDX Foundation of Washington, the educational arm of the Washington, D.C., Professional Chapter of the Society of Professional Journalists, will be awarding scholarships totaling up to $15,000 to full-time juniors or seniors. Late February deadline.

South Asian Journalists Association Scholarships (http://www.saja.org/scholarships/) - The South Asian Journalists Association awards one $500 scholarship to a high school senior about to enter college and one $500 scholarship to a college student.

For more information, and eligibility requirements, visit merrill.umd.edu/admissions/tuition-financial-aid (http://merrill.umd.edu/admissions/tuition-financial-aid/).

Awards and Recognition

Maryland-Delaware-District of Columbia Press Association Top Students

Awarded annually to an outstanding top broadcast journalism student and top multiplatform journalism student at commencement.

Julie Galvan Outstanding Campus Member Award

The Society of Professional Journalists chapter selects one graduate in journalism who is outstanding in their class on the basis of character, service to the community, scholarship, proficiency in practical journalism and significant contributions to their SPJ chapter.

Kappa Tau Alpha Top Scholar Award

Awarded at each commencement to the journalism student earning the highest academic achievement for all undergraduate study.

Kappa Tau Alpha National Honor Society

The top ten percent of the journalism graduating class is inducted into this national organization each commencement.

Special Advantages and Facilities

The Merrill College is home to many unique programs and opportunities available to undergraduate students:

UMTV

Broadcast journalism students study and learn at UMTV, the college-owned cable TV station that houses state-of-the-art equipment, including DVCPro, Avid and ENPS systems used in the field today. Students begin their broadcast education from their first semester at the college, volunteering as crew members for programs produced under the guidance of renowned broadcast faculty members.

Capital News Service

The college's Capital News Service operates news-editorial and multi-platform bureaus in College Park, Washington, D.C., and Annapolis, and a daily television newscast. CNS provides students with real-life reporting experiences covering a beat, developing sources, generating story ideas and writing on deadline under the supervision of a faculty editor.

Real-World Experience

Students take their education out of the classroom and into the real world. Using internships, student media and in-class reporting, our students don't just learn why, but how. The college is located just outside Washington, D.C., the country's seventh-largest media market.

Top-Notch Faculty

The Merrill College is home to internationally renowned journalists and media scholars. Courses are also taught by working journalists who serve as adjunct professors.

Access to Centers of Journalism Study

The Merrill College is home to several centers for journalism study and professional development. Undergraduates have opportunities to interact with these programs.

Technology for the Real World

Students use the same technologies used by professional journalists and media specialists. From the latest in non-linear editing systems, to updated technologies for digital art and pagination, every undergraduate will have access to the software used by professionals in TV/radio production, visual journalism, online news and media communication.

Journalism Major

Program Director: Lucy Dalglish, Dean and Professor

The Philip Merrill College of Journalism prepares students for careers in newspapers, magazines, TV news, newsletters and online journalism outlets. The undergraduate journalism program culminates in a B.A. degree in journalism.

The College is fully accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC).

Students learn in college programs such as Capital News Service, a daily wire service in College Park, Washington, D.C., and Annapolis and UMTV, a cable station operated by the college.

Students majoring in journalism take approximately one-third (42-48 credits) of their total coursework in the Philip Merrill College of Journalism. Journalism courses are designed to provide students with a working knowledge of the tools and concepts they will need to perform as top-flight professional communicators. Courses offered by this department may be found under the following acronym: JOUR.

The remaining approximately two-thirds (74-80 credits) of undergraduate coursework consists of a variety of other subjects such as history, economics, government, sociology and psychology. This exposure acquaints students with fundamental problems and issues they will encounter in their careers. Within these credits, journalism students must choose a "Concentration" (a core of advanced work in a substantive field) to establish competency in a specialized area of knowledge they will be able to use as professionals.

Program Objectives

About the College

The Philip Merrill College of Journalism is widely considered one of the best journalism programs in the nation, blending a mix of prize-winning journalists, communication scholars and nationally recognized professional programs. The school's mission is simple: to produce the best possible journalists for leading newspapers, magazines, TV, radio and online news outlets. Recent graduates are editors, reporters and producers at The New York Times, The Washington Post, CBS, Los Angeles Times, CNN and many of the nation's other top news organizations.

Located less than 10 miles from the news capital of Washington, students participate in internships during the academic year at The Washington Post, The (Baltimore) Sun, CNN, and a wide array of Washington news bureaus. In the summer, students intern at top news organizations around the country. Broadcast news students produce and anchor a 30-minute nightly news show that reaches more than 400,000 households in suburban Washington on the College-operated UMTV station, and advanced students enroll in Capital News Service, an intensive reporting program in Washington, Annapolis and College Park. Students also participate in some of the school's professional programs.

The Vision

The Philip Merrill College of Journalism is shaping the future of news and media. As the top journalism school in the Washington, D.C., region

and a global leader in journalism education, the College is committed to promoting a strong and independent free press.

- Through its faculty and curriculum, the Merrill College champions the fundamental journalistic values of accuracy, accountability and fairness, and is a trailblazer in using digital and multimedia technologies in dynamic storytelling.
- It prepares its undergraduate students for success in today's exciting and innovative journalism landscape and gives its graduate students the skills and confidence to rise to the top of today's demanding news and media-dependent professions.

The Mission

The college educates students at the undergraduate, master's and doctoral levels within a liberal arts context, preparing them for careers in journalism and related fields, as well as careers in academic research and teaching.

- The College works to elevate professional and ethical standards of practice and advocates for increased public knowledge and involvement in democratic processes through dissemination of news.
- The mission of the College is to improve the production, delivery, and access to news, as well as to enhance the understanding of journalism's political, cultural and social roles in the United States and around the globe.

Our undergraduate mission is an uncompromising dedication to the principles of the journalism profession, with training in evolving types of news gathering and delivery.

Our professional master's program provides a post-graduate education to those with a host of undergraduate degrees seeking to enter the field and intensive specialized training for mid-career journalists with a particular focus on investigative, sports, security and computational journalism.

Program Learning Outcomes

1. Demonstrate the ability to research, write, report and edit relevant news stories acceptable by a professional news outlet.
2. Understand the history of journalism, its relationship with diverse groups in society and its historic special role in a democratic society.
3. Understand the ethical guidelines and practices that govern the profession and the legal implications and considerations that inform the profession.
4. Demonstrate the ability to apply tools, concepts and technology appropriate for the profession.
5. Conduct research and evaluate information by methods appropriate to the profession.
6. Apply basic numerical and statistical concepts appropriate for the profession.
7. Demonstrate knowledge of grammar, spelling, punctuation and syntax and an ability to apply Associated Press style to news stories in a manner acceptable to professional news outlets.
8. Demonstrate preparedness for the media job market through resumes and published clips.

REQUIREMENTS

Students are required to earn a minimum of 122 credits. Accredited journalism programs require majors to complete successfully approximately two-thirds of their coursework in areas other than journalism and communication. The Philip Merrill College of Journalism at the University of Maryland adheres to this nationwide policy. In practical terms, this means that of the 122 minimum credits required for graduation, a journalism student must take 42 credits (and may take up to 48) in journalism (numbered 100 or above). Of the remaining 74-80 credits, a minimum of 65 must be earned in liberal-arts designated courses.

The Philip Merrill College of Journalism stipulates that 57 of the total credits must be taken in upper-level courses (courses numbered 300-499).

Required courses for all journalism majors, whether primary or secondary major:

Course	Title	Credits
Journalism Requirements Outside the College		
Abstract thinking skills requirement:		
Select one of the following:		3
BIOM301	Introduction to Biometrics	
BMGT230	Business Statistics	
CCJS200	Statistics for Criminology and Criminal Justice	
ECON230	Applied Economic Statistics	
ECON321	Economic Statistics	
EDMS451	Introduction to Educational Statistics	
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	
GVPT422	Quantitative Political Analysis	
INST314	Statistics for Information Science	
JOUR405	Breaking News With Numbers: Statistics for Journalists	
PSYC200	Statistical Methods in Psychology	
SOCY201	Introductory Statistics for Sociology	
STAT400	Applied Probability and Statistics I (or a more advanced statistics course.)	
Select a minimum of 6 credits through one or a combination of the following options: [1]		6
Language [2]		
Math/Statistics/Computer Science [3]		
Public Speaking:		
Select one of the following:		3
COMM100		
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
COMM230	Argumentation and Debate	
History:		
HIST200	Interpreting American History: Beginnings to 1877	3
or HIST201	Interpreting American History: From 1865 to the Present	
Behavioral or Social Science:		
Select one of the following:		3
ANTH260	Introduction to Sociocultural Anthropology and Linguistics	
PSYC100	Introduction to Psychology	
or PSYC221	Social Psychology	
SOCY100	Introduction to Sociology	
or SOCY105	Introduction to Contemporary Social Problems	

Economics:		
ECON200	Principles of Microeconomics	3
or ECON201	Principles of Macroeconomics	
Government and Politics:		
GVPT170	American Government	3
Supporting Area:		
Select 4 upper upper-level courses for a minimum of 12 credits in a supporting field [4]		12
Select four additional upper-level courses for a minimum of 12 credits [4]		12
Journalism Course Requirements		
JOUR152	Introduction to Storytelling with Code	1
JOUR200	Journalism History, Roles and Structures	3
JOUR201	News Writing and Reporting I	3
JOUR320	News Writing and Reporting II: Multiplatform	3
JOUR352	Interactive Design and Development	3
JOUR396	Supervised Internship	2
JOUR402	Journalism Law and Ethics	3
Journalism and Society Course (One JOUR course from the 410-469 range)		**3**
Media Research Course (One JOUR course from the 470-479 range)		**3**
Menu 1 - Visual Menu (One course from the following):		**3**
JOUR262	News Videography	
JOUR370	Photojournalism	
Menu 2- Exploration Menu (One course from the following):		**3**
JOUR202	News Editing	
JOUR262	News Videography	
JOUR360	News Writing and Reporting II: Broadcast	
JOUR370	Photojournalism	
JOUR371	Feature Writing	
Journalism Capstone Experience		**3-9**
Upper-Level Courses of Choice. A minimum of 9 credits must be upper-level JOUR courses, at least 6 of which must be upper-level skills courses in the 321-389 range.		**9-15**

[1] Should a student choose to combine the options, at least one language course must be at the intermediate level

[2] Up to two courses with at least one course at the intermediate level and no more than one course at the introductory level. (High school equivalency does not satisfy this requirement.)

[3] Up to two courses:

- Any mathematics (MATH) course numbered 107 or higher.
- Any computer science (CMSC) course numbered 102 or higher (at least three credits).

[4] Numbered 300 or higher, cannot be in Communication.

Specializations

For students seeking to develop skills in particular areas, the Philip Merrill College of Journalism offers optional specializations that fit inside the curricular requirements.

Broadcast Specialization

Course	Title	Credits
JOUR262	News Videography	3
JOUR360	News Writing and Reporting II: Broadcast	3
An approved capstone [1]		3-9
Total Credits		**9-15**

[1] Several broadcast capstones also require JOUR361

Investigative Reporting Specialization

Course	Title	Credits
JOUR343	Investigative Reporting	3
or JOUR353	News Bureau: Multimedia Reporting	
JOUR472	Data Journalism	3
An approved JOUR seminar course in the 410-469 range		3
Total Credits		**9**

Sports Specialization

Course	Title	Credits
Sports skills JOUR course from the 321-389 range		3
Sports discussion/seminar JOUR course from the 410-469 range		3
Sports capstone course [1]		3-9
Sports experiential course (an approved sports internship for JOUR396 or a second sports-focused capstone course)		2-6
Total Credits		**11-21**

[1] If taking a second capstone for the sports experiential course, limit each to 6 credits

Specific Journalism Requirements

- Completion of JOUR201: Students must complete JOUR201 with a "C-" or higher. Consult the Undergraduate Catalog or online Schedule of Classes for a list of prerequisites and restrictions for journalism courses.
- "C-" Requirement: Students must earn a "C-" or higher in the following courses in order to have them count for the major: JOUR152, JOUR200, JOUR201, JOUR202, JOUR262, JOUR320, JOUR352, JOUR360, JOUR361, JOUR370, JOUR371, JOUR402 and any course that qualifies as a Capstone Experience. This minimum grade must be achieved prior to taking courses which the aforementioned courses serve as a prerequisite.

Placement in Courses

Enrollment in JOUR201 requires proof of grammar competency through the attainment of at least a "C-" in JOUR181 or a score of 80 or higher on the grammar diagnostic exam, completion of ENGL101 (or another FSAW course) with at least a "C-" and completion of JOUR200 with at least a "C-".

FOUR YEAR PLAN

Click here (https://drive.google.com/file/d/1t2BhLenni9wZ-BpANJuGXEwk108Xmua7/view/) for roadmaps for four-year plans in the Philip Merrill College of Journalism.

Additional information on developing a four-year academic plan can be found on the following pages:

sph.umd.edu (http://www.sph.umd.edu)

Dean: Boris Lushniak, M.D.
Associate Deans: Dushanka Kleinman, D.D.S., Stephen Roth, Ph.D.
Assistant Deans: Nicole Cousin-Gossett, Ph.D., Amanda Grimes, Kelly Blake

---

The mission of the School of Public Health is to promote and protect the health and well-being of the diverse communities throughout Maryland, the nation and the world through leadership and collaboration in interdisciplinary education, research, practice, and public policy. The school provides preparation leading to the Bachelor of Science degree in the following professional areas: Kinesiology, Community Health, Family Science, and Public Health Science. Additionally, stellar students may apply in the junior year to the combined Bachelor of Science/Masters in Public Health (MPH) program, allowing the completion of both degrees within 5 years.

The School of Public Health is fully accredited through the Council on Education for Public Health.

ADVISING

The School of Public Health's Center for Academic Success and Achievement serves all students, particularly upon entry into the major. Following the first semester at College Park, students are encouraged to see their departmental advisors. It is strongly recommended that students seek regular advising throughout their academic career.

For student athletes and students currently on probation, advising is mandatory. Please see the CASA website: sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement (https://sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement/).

OPPORTUNITIES

Global Public Health Scholars Living and Learning Community

The School of Public Health offers a Global Public Health Scholars program within the College Park Scholars Living and Learning Communities. For more information please refer to scholars.umd.edu (http://www.scholars.umd.edu).

College Honors Program

For specific departmental honors program admissions information and requirements, please refer to the individual departments.

Approved Student Societies and Professional Organizations

Phi Alpha Epsilon

Honorary Society of the School of Public Health. The purpose of this organization is to recognize academic achievement and to promote professional growth by sponsoring activities in the fields of kinesiology, family science, community health, public health science and related areas.

Students qualify for membership when they attain junior standing in kinesiology, family science, public health science or community health, and have a minimum overall average of 3.5 and a minimum of 24 credits at the University of Maryland, College Park. For additional information, please contact the Center for Academic Success and Achievement.

The School of Public Health is also home to the university-wide Public Health Beyond Borders organization. For more information, please see sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs/public-health-beyond-borders (https://sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs/public-health-beyond-borders/).

Student Engagement and Service Units

Center for Academic Success and Achievement

0222 School of Public Health Building
Phone: 301-405-2753
sph.umd.edu/advising (http://www.sph.umd.edu/advising/)

The Center for Academic Success and Achievement provides advising on admissions, orientation, academic policy, 4-year planning, career information, and required advising for students on academic probation or dismissal and all college athletes. The center collaborates with the departments in recruitment, retention and graduation initiatives. The center is open from 8 a.m. - 4:30 p.m. weekdays for use by students for studying and group meetings. There are twelve computers available for student use.

Gymkana Troupe

1120 SPH Building
Phone: 301-405-2566
gymkana.umd.edu (https://gymkana.umd.edu/)

Director: Josh Montfort

For over 75 years, the University of Maryland Gymkana Troupe has been influencing young people to live healthy lifestyles. Founded at the University of Maryland College Park campus in 1946, the troupe has traveled throughout Maryland and neighboring states promoting drug-free living. Each of its 60+ members pledges themselves to be drug-free. Through their role-modeling and unique gymnastic performances, they have influenced hundreds of thousands of people to join them in living a drug-free life. The troupe, which is open to all University of Maryland students of all abilities, is considered a one-of-a-kind organization and is believed to be the only collegiate exhibitional gymnastic troupe actively touring the United States. As an outreach program of the School of Public Health, the Gymkana Troupe uses peer role models who share their experiences and their message of healthy living with others. Students influencing students to avoid drugs is the heart of Gymkana's program.

Public Health Beyond Borders

sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs/public-health-beyond-borders (https://sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs/public-health-beyond-borders/)

Director: Dr. Elisabeth Maring

STEP Program

Director: Ms. Tia Cunningham

The STEP Program is a professional training program designed to help students gain practical knowledge and develop essential skills to succeed in a professional work environment. This program was specifically designed to work with undergraduate students in the UMD School of Public Health. Through a series of workforce training workshops, students will enhance their competencies in communication, leadership and cultural intelligence. The STEP program allows students to embrace a supportive community and develop a professional network while in an active and engaging learning environment.

Undergraduate Teaching Assistant Program

Director: Ms. Cynthia Kershaw

The Undergraduate Teaching & Education Assistants and Mentors (UTEAM) Program facilitates peer educational support in the School of Public Health through peer mentoring and teaching assistance. The UTEAM Program is a **combination of experiences** designed to provide foundational knowledge to successfully support peer education and in-class, hands-on experiences within your major, The UTEAM members are dedicated student learners who provide peer educational support for a specific course as part of the teaching team. Working closely with faculty and graduate assistants, UTEAM members are an asset to the SPH learning community. This program is open to undergraduate students in the School of Public Health at the College Park Campus and requires a co-requisite enrollment in SPHL333 and SPHL399.

Financial Assistance

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

Awards

Awards within the School of Public Health include the Jerry P. Wrenn Scholarships, the Noel Myricks Endowed Scholarship, the Ned Gaylin Endowed Scholarship, the Jeanette Spier Beavers Memorial Scholarship the Andrew Billingsley Endowed Scholarship, the David Hyde Scholarship, the Doris Sands Scholarship, the Quinn Scholarship, the Alice Morgan Love Scholarships, NASPE Major of the Year Award, EDA/AAPHERD Outstanding Future Professionals Awards, the Dean's Senior Scholars Awards the Fraley Award, and several TerpStart Scholarships.

Departments and Centers

The School is composed of several centers, departments and institutes. The Centers for Health Equity, Health Literacy, Prevention Research, Aging, Health Behavior Research and Young Adult Health and Development offer multiple opportunities for students to engage with faculty mentors in funded research projects. The following departments offer major programs that lead to a Bachelor of Science degree:

- Department of Behavioral and Community Health
- Department of Family Science
- Department of Kinesiology
- Public Health Science (at both the College Park and Shady Grove campuses)

Special Advantages and Facilities

The Friedgen Family Student Lounge, located in the SPH Building is available for use by all students in the college between 7 a.m. and 10 p.m. Access is through the student ID card. See the Director of Facilities in 3310 SPH Bldg if you do not have access. The Student Service Center, 2242C SPH, has study areas and computers available to SPH students from 8 a.m. - 4:30 p.m. daily. Occasionally, availability and access are limited due to classes and student programs.

The school also offers several specialized laboratories related to student success, technology and specific course applications.

Research Units

See all the School of Public Health research centers here: sph.umd.edu/research-impact/research-centers (https://sph.umd.edu/research-impact/research-centers/).

Center on Aging

The Center on Aging, as part of the Department of Health Services Administration (a graduate program), stimulates and supports aging-related activities within existing departments, colleges, and schools throughout all of the various institutions of the University System of Maryland. The center coordinates the Graduate Gerontology Certificate (master's and doctoral levels), the university's first approved graduate certificate program. The center assists undergraduate and graduate students interested in the field of gerontology and helps them to devise educational programs to meet their goals. It is a research center working in health and aging policy, lifelong learning and civic engagement, disability and aging, behavioral and social aspects of aging, and health service delivery systems. It also conducts community education programs, assists faculty in pursuing research activities in the field of aging, conducts conferences on adulthood and aging-related topics, provides on- and off-campus technical assistance to practitioners who serve older adults and sponsors the University of Maryland Osher Lifelong Learning Institute, Legacy Leadership Institutes, the University

of Maryland Retirees Association, and Retired and Senior Volunteer Programs International (RSVPI).

Herschel S. Horowitz Center for Health Literacy

The Herschel S. Horowitz Center for Health Literacy has been established to address the major public health problem of poor health literacy and its effect on health outcomes. This is the nation's first academic based health literacy center and is devoted to improving health through the lifespan with emphasis on closing the health disparities gap. Research is needed to establish the nature of the casual relationships between and among the various factors including culture and society, education systems, health systems and health outcomes and costs to develop effective interventions and health policy. The center was established with a generous gift from Alice Horowitz and her family.

Maryland Center for Health Equity

The Maryland Center for Health Equity is designed to address issues connected with health disparities. The emphasis is on creating effective change from the level of the individual to issues at the macro policy level. The director is Dr. Stephen Thomas. For more information, please contact the Center at 3302E, School of Public Health Building, 301 405-8859.

The University of Maryland Prevention Research Center

The University of Maryland Prevention Research Center (UMD-PRC) is committed to research, service and training around issues of mental health among LGBTQ+ communities. We bring awareness to inequities, as well as disseminate data, validate tools and best practices to improve access to quality mental health and health care for these communities.

Bradley O. Boekeloo, ScM, PhD
Professor, Department of Public and Community Health

Behavioral and Community Health

School of Public Health
1234 School of Public Health Building
Phone: 301-405-2463
tzeeger@umd.edu
sph.umd.edu/undergraduate-degrees/bs-community-health (https://sph.umd.edu/undergraduate-degrees/bs-community-health/)

Director of Undergraduate Studies: Dr. Tracy Zeeger

The Bachelor of Science in Community Health prepares students to effectively plan, develop, implement and evaluate community health education programs. Students in this program are exposed to material in health behavior, community health research, biostatistics, epidemiology, grant writing, health communication and professional development.

Behavioral and community health uses an ecological framework to identify the causes of and solutions for inequalities in the health of individuals, groups, and communities. The process of promoting health for all individuals is viewed as complex and multidimensional, thus it requires the perspectives of many stakeholder groups. Practitioners and researchers in this public health field use theory, evidence-based practices, and community-based strategies to improve health and well-being. By understanding the different aspects of behavioral and community health, students are able to actively engage with communities to develop approaches and solutions to everyday health issues.

Behavioral and community health also seeks to improve the public's health through the application of social and behavioral sciences. Through studying behavior, graduates are able to not just understand disease, but are also able to modify the incidence, prevalence, and mortality rates of many diseases that affect the communities in which we live. Additionally, community health specialists promote more efficient uses of health services, adopt self-care practices, and participate actively in the design and implementation of health programs.

The Department of Behavioral and Community Health works to establish community relationships in order to develop community interventions. The faculty and students of this department promote and foster active collaboration with researchers and community partners from many different specialties and institutions. By working with the University of Maryland, the department has established several partnerships and research and service centers that work to actively engage the community in a variety of capacities.

PROGRAMS

Major

- Community Health Major (p. 452)

ADVISING

In the Community Health major academic advising is mandatory in your first semester and in your senior year. It is recommended that students meet with an academic advisor once per semester at a minimum. To schedule an academic advising appointment with Matt Wootten or the BCH Academic Advising Graduate Assistant, Community Health Academic Advisors, go to our website (https://sph.umd.edu/academics/departments-units/department-behavioral-and-community-health/student-resources-and-programs-behavioral-and-community-health/undergraduate-student-resources-community-health/undergraduate-advising-behavioral-and-community-health/).

OPPORTUNITIES

Internships

HLTH491: Community Health Internship

HLTH491: Community Health Internship is a unique and rewarding experience that provides Community Health majors with the opportunity to work in a mentored, professional, public and community health setting prior to graduation. This required internship is completed during the student's final semester after all other academic requirements have been successfully completed. HLTH491 is a 12 credit, 36 hours per week (15 weeks) requirement, and should be considered a full-time commitment. Students may not enroll in other classes during the internship semester.

HLTH491 may be completed during the fall, spring, or summer semesters; for planning purposes, summer internships require an application. Questions related to HLTH491: Community Health Internship may be directed to Tracy Kennedy, Undergraduate Internship Program Manager, at kennedyt@umd.edu.

Community Health Honors Program

The Department of Behavioral and Community Health Honors Program offers undergraduates the opportunity to engage in challenging

educational experiences related to social and behavioral aspects of public health. Rising juniors with strong academic records and significant interest in intellectual pursuits are invited to apply for this opportunity to partake in independent, mentored, scholarly work.

Students interested in the Community Health Honors program must meet the following requirements:

- Student in the Community Health major
- Overall GPA of 3.5 or higher
- Have successfully completed at least 3 HLTH courses (9 credits) with a major GPA of 3.5 or higher
- Must have taken HLTH200 by the start of the program
- Have completed 45 total credits before applying to the program (students should be of junior standing [approximately 60 credits] by the first semester in the program)
- Must have at least 2 semesters left of coursework prior to the HLTH491 Community Health Internship

Community Health Honors Program highlights include:

- Working one on one with a Department of Behavioral and Community Health faculty member on a thesis/project
- Graduating with distinction of departmental honors
- Ability to take HONR seminars and be a part of the UMD Honors College
- Access to HLTH410, a small, seminar-style Honors Program course to develop personal interests and professional skills

Interested students may learn more about the Community Health Honors Program by going to: sph.umd.edu/department/bch/undergraduate-honors-program (http://sph.umd.edu/department/bch/undergraduate-honors-program/) or contacting Dr. Kerry Green, Honors Program Director, at greenkm@umd.edu.

Eta Sigma Gamma

Eta Sigma Gamma is the only National Professional Honorary in Health Education. Since being revitalized in 2017, the Epsilon Chapter of Eta Sigma Gamma (ESG) has proudly excelled in the ares of service, academics, and membership growth. Through our philanthropy and social activities, members find lifetime friendships and valuable connections for the future.

All community health majors (graduate and undergraduate) are welcome to join. Initiation of members occurs once per year. To be eligible for initiation members must:

- Attend meetings regularly
- Participate in at least 2 events per semester
- Maintain a GPA of 2.7 or higher

For more information visit: terplink.umd.edu/organization/etasigmagamma (https://terplink.umd.edu/organization/etasigmagamma/).

Scholarships and Financial Assistance

The Office of Student Financial Aid administers all types of federal, state, and institutional financial assistance programs, and in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, go to: financialaid.umd.edu (https://www.financialaid.umd.edu/).

The School of Public Health also provides some scholarships for undergraduate students in need, including the Jerry P. Wrenn Endowed Scholarship, the School of Public Health Student Emergency Scholarship, the SPH Scholarship Fund, and TerpStart Scholarships. To learn more about School of Public Health scholarships, go to: sph.umd.edu/content/financing-your-degree (http://sph.umd.edu/content/financing-your-degree/).

Additional information on UMD-related financial resources can be found at sph.umd.edu/content/student-resources-and-services (http://sph.umd.edu/content/student-resources-and-services/), by clicking the "Financial/Resource Assistance" link.

Awards and Recognition

Each spring, the Department of Behavioral and Community Health recognizes a select few exceptional Community Health undergraduates and graduates by honoring them with awards in recognition of their achievements at the annual School of Public Health Convocation.

Community Health Major

Program Director: Tracy Zeeger, Ph.D

The Bachelor of Science in Community Health is an interdisciplinary public health degree program rooted in social and behavioral science and theory and focused on making meaningful contributions to impact health and quality of life at all levels of society. Students learn to address the complex individual, community, and societal factors impacting health through a highly-structured, professionally-focused program that culminates in a full-time, mentored internship during the final semester.

The program is designed to serve as a gateway to graduate studies or as a transition directly to the field as an engaged, prepared, and well-informed public health practitioner. During the program, students have opportunities to learn outside of the classroom through volunteer work, study abroad opportunities, collaboration with departmental faculty through independent study, work at the University Health Center for credit, and public health-related student groups.

Graduates of the Community Health major pursue careers in research, advocacy, policy, health education, social work, community outreach, and other public health related areas. They work locally, nationally, and internationally primarily through foundations, non-profit organizations, and government services.

Program Learning Outcomes

As a result of the Bachelor of Science in Community Health degree program, students will be able to:

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.

5. Examine the socio-economic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health-specific writing and communication.
10. Assess and communicate individual and community-level needs for health promotion and disease prevention.
11. Create and apply strategies that effectively incorporate cultural competences with health promotion and community health initiatives.
12. Synthesize and apply principles and theories of community health that are needed for the development of effective and evidence based health promotion and disease prevention strategies.
13. Promote and advocate for effective community health initiatives at the local, state, and federal levels.
14. Collaborate with community organizations to apply public health principles in a real-world setting.
15. Demonstrate requisite competencies in professional etiquette and career readiness to allow for a successful transition into the workplace (adapted from NACE).
16. Critically analyze the impact racism has on population health and reflect on what it means to be anti-racist.

REQUIREMENTS

The total number of credits required to graduate with a Bachelor of Science degree in Community Health is 120, and the number of Community Health major-required course credits is 69. Students must earn a grade of C- or higher in all Community Health major-required coursework. HLTH491, Community Health Internship, is completed during the final semester in the Community Health major, after all other coursework has been successfully completed. Students can elect to complete an area of specialization in selected areas (Special Populations, Health Communication, Health Risk Behavior).

Course	Title	Credits
Public and Community Health Core		**13**
SPHL100	Foundations of Public Health	
HLTH124	Introduction to Behavioral and Community Health	
EPIB301	Epidemiology for Public Health Practice	
EPIB315	Biostatistics for Public Health Practice	
HLTH306	Macro Level Influences on Community Health	
Public and Community Health Foundational Science		**8**
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
BSCI201	Human Anatomy and Physiology I	
Social and Behavioral Public Health		**9**
HLTH200	Introduction to Research in Community Health	
HLTH230	Introduction to Health Behavior	
HLTH364	Social Media & Digital Tools for Community & Public Health	
Community Public Health		**9**
HLTH140	Personal and Community Health	
HLTH302	Methods of Community Health Assessment	
HLTH391	Making a Difference: Applying Community Health	
Health Electives		**12**
Students can select from a pre-approved list of 3-credit health elective offerings		
Professional Preparation		**18**
HLTH420	Effective Strategies for Public Health Practice	
HLTH490	Professional Preparation in Community Health	
HLTH491	Community Health Internship	
Total Credits		**69**

FOUR YEAR PLAN

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Family Science

School of Public Health
1142 School of Public Health, Bldg. 255
Phone: 301-405-3672
fmsc@umd.edu
sph.umd.edu/fmsc (http://www.sph.umd.edu/fmsc/)

The major in Family Science focuses on the study of families and the problems they face in contemporary society. The major offers excellent training in scientific methods to understand family development, behavior, and strengths, and to solve family problems. Students learn to describe, explain, and improve the quality of family life through education, applied research, policy analysis, and human services program management. For additional information on the field of family science, please visit the National Council on Family Relations website: family.science (http://family.science/).

PROGRAMS

Major

- Family Science Major (p. 455)

ADVISING

The Family Science Department provides a multi-tier advising system that will help students design and carry out a program of study best suited to their interests and needs. Several advisors are available, depending on student need: the Family Science Undergraduate Program Manager, Kendyl Oliver; Faculty advisors; and SPH advisors at the School of Public Health Center for Academic Success and Achievement (CASA).

For general questions, consultation about degree requirements, careers in Family Science and research opportunities, the Family Science

Undergraduate Program Manager, Kendyl Oliver, is available in the main office (1142MM School of Public Health) as a first point of contact. The Undergraduate Program Manager, also conducts change of major workshops and orientations for students in the major.

For more information, or to schedule an appointment with the Undergraduate Program Director visit sph.umd.edu/fmsc (https://sph.umd.edu/fmsc/).

OPPORTUNITIES

Undergraduate Research Experiences

The department has an active Undergraduate Research Assistant Program, which enables students to learn from and work with world-class scholars on family issues. Family Science undergraduates volunteer to assist Department faculty with their ongoing research projects on topics including:

- African American Families
- Couple Relationships
- Ethnicity & Families
- Family and Community Violence
- Family Financial Education
- Family Law
- Family Policy
- Fathering
- Latino Families
- LGBTQ Families
- Maternal and Child Health
- Mental Health/Addiction/Family Therapy
- Military Families
- Minority Populations
- Health
- Interracial Marriages
- Parenting
- Poverty
- Reproductive Health
- Rural Families
- Vaccine Behavior
- Work and Family

Undergraduate students who participate in Family Science research may also participate in the Maryland Center for Undergraduate Research and serve as research assistants. These research opportunities particularly benefit students who are applying to graduate school.

The department also participates in several other undergraduate research programs, such as the Senior Summer Scholars Program and the Ronald E. McNair Post-Baccalaureate Achievement Program. Students may also set an appointment with Undergraduate Program Director to answer questions and learn about current undergraduate research projects in Family Science.

Internships

All Family Science majors are required to complete an internship experience as part of the major. The internship program is a capstone project designed to integrate department and other coursework with a real-time work experience that focuses on healthy families. In addition to a 120-hour semester-long field placement, students are required to attend a capstone seminar (FMSC477). Students in the seminar integrate classroom theory with their field placement and share work-related activities, broadening their exposure to work in the discipline of Family Science and their knowledge of specific career opportunities. In addition, the seminar focuses on students' cultural competence in the workplace. Each approved internship must have a significant focus on the family unit, incorporating the needs and concerns of the family in addition to those of the individual. Interns will be expected to utilize Family Science theories and concepts throughout the accompanying seminar to evaluate their internship experience. Therefore, it is essential that the internship responsibilities relate directly to family.

Students who need help deciding on an internship have access to the **FMSC Internship Database**, which contains listings of organizations that have requested our students along with those where Family Science students have completed internships.

The internship course is open to all FMSC majors who have completed FMSC330 and FMSC383 plus a minimum of six additional credits of FMSC coursework. The internship contract forms and supervisor's letter are available online (https://sph.umd.edu/academics/departments-units/department-family-science/student-resources-family-science/undergraduate-student-resources-family-science/). Students may also pick up the documents in the main FMSC office, 1142 School of Public Health Building.

There are strict deadlines for turning in completed contracts to the FMSC office:

Spring Internship contract: Due the first Monday in December

Summer internship contract: Due the first Monday in May

Fall internship contract: Due the first Monday in August

Honors Program

The FMSC Honors Program is designed to provide academically talented students with a more advanced and enriching educational experience in Family Science. The Honors Program gives students an opportunity to participate in scholarly independent study, interact with FMSC faculty, and examine a range of intellectual topics in greater depth than is possible in the traditional Family Science program. Students enroll in special Honors courses, Honors option work in regular courses, and independent research. The program culminates with the preparation and possible presentation of a Senior Honors Thesis.

FMSC majors who are interested in this additional challenging educational experience and meet the following criteria, may apply to the FMSC Honors Program:

- A UMD GPA of 3.3 with at least 45 credits completed
- A FMSC GPA of 3.5 and
- Completed FMSC290 with a grade of "B" or better and an additional three credits in FMSC

Or

- ECON200 and an additional six credits in FMSC

Students meeting the criteria and wishing to participate in the Honors Program must apply three semesters (not including summer) prior to graduation. More information and application forms are available on the

FMSC website or from the FMSC Honors Program Coordinator, Dr. Mia Smith Bynum at msbynum@umd.edu.

Student Societies and Professional Organizations

Maryland Council on Family Relations (MCFR) is a student chapter of the National Council on Family Relations, a professional organization for family researchers, educators, and practitioners. The organization provides an opportunity for students to explore family issues, meet fellow students, and prepare for careers in teaching, research, policy analysis, or direct service to families. MCFR is open to all undergraduate and graduate Family Science students. For more information, please contact FMSC at FMSC.umd.edu

Phi Upsilon Omicron is a nationally recognized honor society focused toward observing academic excellence, enhancing qualities of leadership by providing opportunities for service, and encouraging lifelong learning and commitment in order to advance family and consumer sciences and related areas. Members participate in community service activities on campus and in the surrounding Metropolitan DC areas. They also collaborate with MCFR to conduct informative workshops for members and other Family Science students on academic skills development, stress management, graduate school, and potential career paths with a Family Science degree. The Gamma Lambda Chapter has a local alumni chapter to provide our members with networking and other resources. Other membership benefits include additional networking opportunities through regional and national meetings, scholarship and fellowship awards, honor cords at graduation, and leadership opportunities at the chapter, regional, and national levels. For more information please contact the FMSC Undergraduate Academic Advisor, Kendyl Oliver.

Scholarships and Financial Assistance

The Department of Family Science has several endowed scholarships that enable us to provide some assistance to meritorious students in our Family Science Program. Early in the spring semester the department announces the availability of the awards and begins the application process. Recipients are announced by May of each year.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

Awards and Recognition

FMSC nominates meritorious students for recognition at the annual SPH Convocation for many prestigious awards including Dean's Scholars awards, the Jerry Wrenn Scholarship awards and the Lester M. Fraley award. For more information on FMSC department Scholarships and Awards, please see the FMSC website (https://sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement/casa-scholarships/).

Academic Programs and Departmental Facilities

The Family Science program is located in the UMD School of Public Health, which supports our faculty and students' public health-focused programs and encourages cross-collaborations with other SPH departments. FMSC's main office, room 1142, is open year-round (except university holidays), Monday through Friday, from 8:30 am to 4:30 pm. Students are encouraged to drop by for: advising or information about undergraduate programs; department courses and internships; faculty meetings and mentoring; and ways to get involved in departmental research and student activities.

Family Science Major

Academic Advisor: Kendyl Oliver

The Department of Family Science promotes the physical, mental, and social well-being of all families in order to eliminate the burden of disease and health disparities, and to foster resilience and social justice. As one of the only Family Science departments in a school of public health in the US, the undergraduate program is uniquely positioned to train students in the study of family health. Faculty bring the synergies of multiple disciplines, including family science, couple and family therapy, human development, maternal and child health, psychology, epidemiology, and economics, to enhance family health and well-being.

The curriculum focuses on individual and family development over the life course, examining social, cultural, economic, and historical trends that affect family functioning, and their physical and mental health. Students learn to describe, explain, and improve the quality of family life through education, applied research, legal and policy analysis, and human services program management. The major offers excellent training in scientific methods, including data analyses, application, and communication. Required coursework examines challenges to family health, diverse families, mental health and trauma, global health, child/family development, maternal and child health, sexual and reproductive health, social inequality and health disparities, sexual and gender diversity, family law and economics, work and family issues, family crises, research methods, and the delivery of human services to families. As part of the required research course, all students design a study, collect data, prepare, and present an empirical research project prior to graduation.

Family Science graduates are the next generation of investigators, practitioners, and policy leaders who can tackle the complex health challenges facing families. The major prepares students for many career paths including family therapy, public health, family life education, social work, law, policy analysis, human services, nursing, and family mediation. A wide variety of employment opportunities exist for Family Science graduates in direct service and management positions in government, non-profit, and private agencies. The major also provides excellent preparation for graduate study in family science, public health, marriage and family therapy, social work, professional schools such as medicine, nursing, dentistry and law, psychology, human resource management, and other social science disciplines.

Courses offered by this department are listed under the acronym **FMSC.**

Admission to the Major

Upper-level students who wish to change or declare a major in Family Science can only do so through a Change of Major Workshop. To register for a workshop, visit the School of Public Health website (https://sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement/casa-advising/casa-declare-sph-major/). Students must register in advance in order to attend a Change of Major Workshop. Freshman or admitted high school seniors may declare the FMSC major at orientation.

Program Learning Outcomes

1. Students evaluate policy and programmatic interventions to address social and behavioral factors that influence family well-being.
2. Students demonstrate the principles of cultural competence that shape the experiences and disparities of vulnerable families and populations.
3. Students create a hypothesis, conduct research, prepare data and present a research project that addresses a significant issue of family well-being.
4. Students demonstrate basic knowledge of family theories and apply the knowledge to diverse contexts, including experientially in the required workshop.
5. Students analyze and critique the range of social structures and systems including health, legal, and economic that affect family well-being.

REQUIREMENTS

All students must earn a grade of "C-" or better in all courses applied toward completion of the major.

Course	Title	Credits
Required Courses - Major Subject Area (45 Credits)		
SPHL100	Foundations of Public Health	3
FMSC110	Families and Global Health	3
FMSC260	Couples, Marriage, and Families: Intimate Relationship Across the Life Course	3
FMSC302	Research Methods in Family Science	3
FMSC310	Maternal, Child and Family Health	3
FMSC330	Family Health: Health Happens in Families	3
FMSC332	Children in Families	3
FMSC340	Mental Health and Healing in Families	3
FMSC374	Working with Diverse Families in Public Health Services	3
FMSC381	Family Inequality	3
FMSC383	Health and Human Services Delivery and Evaluation	3
FMSC432	Adult Development and Aging in Families	3
FMSC477	Internship and Analysis in Family Science	3
FMSC487	Family Law	3
FMSC431	Family Crises, Emergencies and Interventions	3
or FMSC460	Violence in Families	
Required Courses - Department Electives		**12**
Two (2) 100-200 level FMSC courses (6 credits)		
Two (2) 300-400 level FMSC courses (6 credits)		
Additional Courses Required of All Majors		
Select one of the following social sciences general courses:		3
PSYC100	Introduction to Psychology	
SOCY100	Introduction to Sociology	
SOCY105	Introduction to Contemporary Social Problems	
Select one of the following statistics general courses:		3
EDMS451	Introduction to Educational Statistics	
STAT100	Elementary Statistics and Probability	
Select one of the following communication general courses:		3
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
INAG110	Oral Communication	
Select one of the following economics general courses:		3
FMSC290	Family Economics	
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
Total Credits		**69**

FOUR YEAR PLAN

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Kinesiology

Department of Kinesiology
School of Public Health Building
Phone: 301-405-2450
sph.umd.edu/department/knes (http://sph.umd.edu/department/knes/)

The Department of Kinesiology offers a Bachelor of Science Degree. Students gain conceptual and experiential knowledge in the anatomical, physiological, psychological, sociological, and historical perspectives on physical activity, movement, exercise and sport. Our undergraduates majoring in Kinesiology will go on to further study in health professions (such as physical therapy, occupational therapy, medicine), sport-related professions (athletic training, strength and conditioning, sport management, sport marketing, coaching), fitness-related professions (exercise leader, personal trainer) and other public health and physical activity-related careers (physical education, recreation). Our students are prepared to pursue graduate programs in Kinesiology and related fields. We offer a vibrant departmental Honors Program to students who excel in our program and seek research experience.

A brief description of the program follows. Students should obtain a current Student Handbook for the Kinesiology degree on the web at www.sph.umd.edu/KNES (http://www.sph.umd.edu/KNES/). The program requires a grade of "C-" or better in all required course-work.

PROGRAMS

Major

- Kinesiology Major (p. 458)

ADVISING

There are a variety of advisors available to assist you with your degree progress and future plans. Kinesiology advisors assist with registration procedures, program updates, university resources, career guidance, and related issues. Students are strongly encouraged to follow their approved academic plan for timely progress throughout the degree program. Changes in the academic plan should be discussed with an academic advisor.

Walk-in hours are available each semester and advertised through the KNES listserv. Students are encouraged to use the online advising appointment process or email an advisor at advisingknes@umd.edu.

Advising is mandatory for new students, student-athletes, and students on academic probation. However, it is highly recommended all students meet with an advisor regularly. Additionally, meeting with a pre-health or career advisor in addition to an academic advisor is strongly encouraged.

To learn more about advising for Kinesiology students visit sph.umd.edu/department/knes/advising.

Dr. Elizabeth Brown; Instructor, Advisor & Internship Coordinator, ebrown2@umd.edu

April Carroll; Advisor/Orientation & Recruiting, arcarrol@umd.edu

Dr. Joanne Klossner; Instructor, Advisor & Internship Coordinator, jklossne@umd.edu

Polly Schurer; Director of Undergraduate Studies, pollys@umd.edu

Lindsey Winter; Senior Advisor, lmrodkey@umd.edu

Schedule an appointment online: sph.umd.edu/department/knes/advising (https://sph.umd.edu/department/knes/advising/)

OPPORTUNITIES

Undergraduate Research Experiences

Undergraduate research experiences are strongly encouraged.

Research internships are available from 1 to 3 credits and are recommended at the junior or senior level, following the completion of most kinesiology core courses but requests can be made to participate earlier.

Additional information is available on the UMD Undergraduate Research website (http://ugresearch.umd.edu) or by contacting the director of the undergraduate programs (301-405-2480).

Internships

Internships are strongly encouraged to assist students in connecting and applying academic and conceptual knowledge to the real world. Most students consider internships during their junior and senior years (or earlier in certain situations) following the completion of related kinesiology core and options courses.

From a practical perspective, internships are invaluable in helping students focus on career options, gain experience, establish professional contacts and, perhaps most importantly, deciding whether a particular field is truly a good fit both professionally and personally. Students can take up to 15 credits of internship credits.

Additional information is available on the department website (http://sph.umd.edu/department/knes/internships/) or by contacting a member of our advising team.

Honors Program

The Department of Kinesiology Honors Program provides an opportunity for students to engage in challenging educational experiences related to the study of human movement, sport, and exercise. Students with strong intellectual interests and the ability to pursue those interests at a high level are eligible for this program. The goal of the Honors Program is to nurture these students and encourage them to pursue their interests in a range of intellectual topics. The Honors Program in the Department of Kinesiology is primarily designed for junior and senior level students to encourage them to engage in scholarly independent study and discussions.

Students interested in entering the Honors Program should visit the following website: sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs (https://sph.umd.edu/student-opportunities/student-organizations-honor-societies-and-honor-programs/).

Admission to the Honors Program is based on a multifaceted set of criteria and administered through the Departmental Honors Committee. Students interested in entering the Honors Program should submit a written request to the Chair of the Honors Program, described below in detail. Each application will be treated on an individual basis; therefore the Honors Committee may take work experience, leadership, motivation and maturity into consideration. Contact the Director for more information. The applicant must meet the following minimum requirements and is expected to participate in the Honors Program for a minimum of 3 semesters:

1. An overall GPA of 3.50 on a minimum of 45 credits. (Exception: Students who are close to achieving a 3.50 GPA may submit additional materials to the Honors Committee for consideration.)
2. Have a 3.50 GPA in courses taken within the Department of Kinesiology, to include at least 9 credits from the following courses: KNES287, 293, 300, 350, 360, 370, 385.

Student Societies and Professional Organizations

Kinesiology Student Organization (KSO)

The mission of this Kinesiology Student Organization is to increase networking within the department (students, faculty, alumni), expose members to a variety of resources to help them succeed, and to enhance the overall sense of community through social events and community service. This is a student run organization that values opinions and ideas from everyone in the kinesiology community.

E-mail ksoumd@gmail.com to subscribe to the group's list-serve.

Pre-Physical Therapy Association

The Pre-Physical Therapy Association is a student organization that is directed towards students who are seeking a career or are interested in physical therapy. This organization is designed to prepare students for entrance into a professional curriculum for physical therapy at institutions that offer professional advanced degrees. Our goal is to be an effective organization that guides its members to become competitive candidates for PT school. We prepare our members by organizing meetings regarding GREs, PT school applications, resumes, community service, different paths in the PT field, plus much more.

The Pre-Physician Assistant Club

The purpose of the “Pre-PA Club” is to prepare students for the profession by providing students with different opportunities to explore and learn the profession, inform students of the history and the purpose of the profession, and to provide students information about the admission requirements for PA schools and on the application process. The club

provides a welcoming, safe and fun environment for students to come together with an interest in becoming a physician assistant. We will do volunteer work, fundraisers, guest speaker events and more to learn and gain knowledge and access to the medical world.

The Pre-Occupational Therapy Association

The Pre-Occupational Therapy Association is a student organization consisting of students who are seeking a career or are interested in the field of occupational therapy. This organization is designed to prepare students for entrance into Occupational Therapy school at institutions that offer professional MS and OTD degrees.

Sport Business Society

Our goal is to expose our members to the business side of the sports we love. We take a look behind the curtain to examine the economic and business underpinnings that drive the decisions that are reported on ESPN and discussed around water coolers across the country. To get a well-rounded view of this world we bring in guests from all over the sports world to speak to our club. This includes visits from owners, reporters, coaches, talent evaluators, agents, contract negotiators, and many more. Members get much more than just a better understanding of sports. Through listening and interacting with very accomplished guests we learn how they have become successful. The lessons learned are applicable not only in the business world (sports or not) but in life as well. We also have occasional social events such as trips to sporting events or tailgates to let members socialize and connect.

Phi Alpha Epsilon

Phi Alpha Epsilon (PAE) is a local honorary society open to undergraduate and graduate students in Kinesiology, Behavioral and Community Health, Family Science, and Public Health Science. The organization was founded in the fall of 1952 by students and faculty of the college that would recognize academic achievement and promote professional development. Members make a commitment to provide service to the college, university, and community.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu) or scholarships.umd.edu (http://www.scholarships.umd.edu).

For information on departmental scholarships, please visit the department website: sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement/casa-scholarships (https://sph.umd.edu/academics/advising-resources/undergraduate-center-academic-success-and-achievement/casa-scholarships/).

Kinesiology Major

NOTICE OF ADDENDUM: THE REQUIREMENTS FOR THIS PROGRAM WERE UPDATED EFFECTIVE SPRING 2023 AND HAVE BEEN PUBLISHED ON THE SPRING 2023 ADDENDUM (p. 459) TAB. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Program Director: Polly Sebastian Schurer

The Department of Kinesiology offers a Bachelor of Science Degree. Students gain conceptual and experiential knowledge in the anatomical, physiological, psychological, sociological, and historical perspectives on physical activity, movement, exercise and sport. Today there are close to 1000 undergraduates majoring in Kinesiology who will go on to further study in health professions (such as physical therapy, occupational therapy, medicine), sport-related professions (sport management, sport marketing, coaching), fitness-related professions (exercise leader, personal trainer) and other public health and physical activity-related careers. Our students are prepared to pursue graduate programs in Kinesiology and related fields. We offer a vibrant departmental Honors Program to students who excel in our program and seek research experience.

A brief description of the program follows. Students should obtain a current Student Handbook for the Kinesiology degree on the web at www.sph.umd.edu/KNES (http://www.sph.umd.edu/KNES/). The program requires a grade of "C-" or better in all required course-work.

Program Learning Outcomes

At the completion of the B.S. degree in Kinesiology, students should demonstrate the following outcomes:

1. Students will interpret, synthesize, and critically analyze research underlying the kinesiological dimensions of physical activity and health.
2. Students will develop principled reasoning skills necessary to apply and extend kinesiology knowledge to address problems that are relevant to physical activity and the health of diverse populations.
3. Students will integrate, interrogate, and communicate the connection between the scholarship of kinesiology and the goals of public health.
4. Students will engage in a diversity of physical activities both within and outside their formal curriculum.
5. Students will integrate their physical activity experiences with kinesiology sub-disciplinary knowledge.

REQUIREMENTS

NOTICE OF ADDENDUM: THE REQUIREMENTS FOR THIS PROGRAM WERE UPDATED EFFECTIVE SPRING 2023 AND HAVE BEEN PUBLISHED ON THE SPRING 2023 ADDENDUM (p. 459) TAB. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

The Kinesiology program offers students the opportunity to study the interdisciplinary body of knowledge related to human physical activity and sport, and to pursue specific specializations so that each individual can prepare for a particular career goal within the broad discipline. To complete the Kinesiology degree a minimum of 120 credits is required, including the general education program.

Course	Title	Credits
Supporting Courses		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI201	Human Anatomy and Physiology I	4
BSCI202	Human Anatomy and Physiology II	4

MATH113	College Algebra and Trigonometry (or higher level MATH course)	3

SPRING 2023 ADDENDUM

NOTICE OF ADDENDUM: THE CURRICULUM INFORMATION LISTED BELOW IS EFFECTIVE AS OF SPRING 2023. TO VIEW PRIOR INFORMATION, SEE THE OVERVIEW (p. 458) AND REQUIREMENTS (p. 458) TABS. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Description (effective Spring 2023)

The Department of Kinesiology offers a Bachelor of Science Degree. Students gain conceptual and experiential knowledge in the anatomical, physiological, psychological, sociological, and historical perspectives on physical activity, movement, exercise and sport. Our undergraduates majoring in Kinesiology will go on to further study in health professions (such as physical therapy, occupational therapy, medicine), sport-related professions (athletic training, strength and conditioning, sport management, sport marketing, coaching), fitness-related professions (exercise leader, personal trainer) and other public health and physical activity-related careers (physical education, recreation). Our students are prepared to pursue graduate programs in Kinesiology and related fields.

We offer a vibrant departmental Honors Program to students who excel in our program and seek research experience.

A brief description of the program follows. Students should obtain a current Student Handbook for the Kinesiology degree on the web at www.sph.umd.edu/KNES (http://www.sph.umd.edu/KNES/). The program requires a grade of "C-" or better in all required course-work.

Program Requirements (effective Spring 2023)

The Kinesiology program offers students the opportunity to study the interdisciplinary body of knowledge related to human physical activity and sport, and to pursue specific specializations so that each individual can prepare for a particular career goal within the broad discipline. To complete the Kinesiology degree a minimum of 120 credits is required, including the general education program.

Course	Title	Credits
Supporting Courses		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI201	Human Anatomy and Physiology I	4
BSCI202	Human Anatomy and Physiology II	4

Public Health Science

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena. As a collaborative degree

involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park (p. 460) and Shady Grove (p. 488) campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. **Discuss** the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. **Use** basic public health concepts, methods, and tools for data collection and analysis.
3. **Identify** the major health-related needs and concerns of populations and **formulate** basic processes, approaches, and interventions as possible solutions.
4. **Describe** the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. **Examine** the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. **Demonstrate** the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. **Compare and contrast** the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. **Characterize** the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. **Illustrate** the basic concepts of public health specific writing and communication.
10. **Interpret and synthesize** scientific knowledge to **propose** evidence-based approaches and solutions to public health problems.

PROGRAMS

Major

- Public Health Science: College Park (p. 460)
- Public Health Science: Shady Grove (p. 488)

ADVISING

Academic advising is strongly encouraged. To see specific advising requirements and resources for each campus location, please view our student resources (https://sph.umd.edu/academics/departments-units/public-health-science/student-resources-public-health-science/).

OPPORTUNITIES

Student Opportunities

Public Health Science majors are encouraged to participate in opportunities within the major, including research, internships, and study abroad. For more information on research opportunities for Public Health Science majors, please see the Research Credit: Public Health Science webpage (http://go.umd.edu/phscresearch/). For more information on internship opportunities for Public Health Science majors, please see the Internship Credit: Public Health Science webpage (http://go.umd.edu/phscintern/). For more information on study abroad opportunities for Public Health Science majors, please see the Study Abroad: Public Health Science webpage (https://go.umd.edu/PHSCabroad/).

Public Health Science majors are also invited to participate in a wide variety of student opportunities across the School of Public Health.

Financial Assistance, Scholarships, & Awards

The Public Health Science program, School of Public Health, and the University of Maryland offer opportunities for financial assistance, scholarships, and awards based on merit and need.

For a listing of awards and scholarships, please see the Awards and Scholarships: Public Health Science webpage (https://go.umd.edu/PHSCawards/).

Public Health Science Major

School of Public Health
Room 2387
Phone: 301- 405-5436
phsc@umd.edu
sph.umd.edu/degrees/bachelor-science-public-health-science-college-park (https://sph.umd.edu/degrees/bachelor-science-public-health-science-college-park/)

Program Associate Director: Kristin Cipriani

The Public Health Science program includes a strong curriculum in science and public health courses, such as biostatistics, epidemiology, environmental health, and global health. Students will have the opportunity for individual exploration in public health through electives, laboratory experiences, optional internships, and a culminating interdisciplinary capstone course. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health specific writing and communication.
10. Interpret and synthesize scientific knowledge to propose evidence-based approaches and solutions to public health problems.

REQUIREMENTS

To view the coursework described below, please visit our PHSC curriculum page (https://sph.umd.edu/academics/departments-units/public-health-science/student-resources-public-health-science/curriculum-public-health-science-college-park/).

In order to graduate with a Bachelor of Science degree in Public Health Science, students must complete 120 credits, 74 of which are specific to the Public Health Science degree. Students must earn a minimum grade of C- or higher in all Public Health Science major-required coursework.

Course	Title	Credits
Scientific Foundation Courses		
MATH120	Elementary Calculus I	3

Public Health Science Options Courses [1]		**12**
Total Credits		**74**

[1] The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options. https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018 (https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018/)

FOUR YEAR PLAN

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

School of Public Policy

2101 Van Munching Hall
Phone: 301-405-6330
spp.umd.edu (https://spp.umd.edu/)

Dean: Robert Orr, Ph.D.
Associate Dean for Academic and Student Affairs: Nina P. Harris, Ph.D.

The school currently offers a Bachelor of Arts in Public Policy, as well as minors in Nonprofit Leadership and Social Innovation, Sustainability Studies, Science, Technology, Ethics and Policy (STEP) and Public Leadership. Courses may be found under PLCY. These courses are suggested for students wishing to develop knowledge and experience in public policy and leadership. The school also offers a 5-year bachelor's/master of public policy program for selected students. For additional information on the wide range of undergraduate opportunities see spp.umd.edu/your-education/undergraduate (https://spp.umd.edu/your-education/undergraduate/).

Admission to the Major

First-time freshmen students who wish to major in Public Policy at the University of Maryland are encouraged to apply for admission to the university by the early action deadline of November 1. There is no

separate application for our major and seats in the major are guaranteed as we are NOT a limited enrollment program.

Current University of Maryland students who wish to add the Public Policy major should contact our advisor at plcyundergrad@umd.edu for more information. Our major is not limited enrollment so all students are welcome assuming you have time to complete all the major requirements.

ACADEMIC PROGRAMS

Major

- Public Policy Major (p. 464)

Minors

- Nonprofit Leadership and Social Innovation Minor (p. 462)
- Public Leadership Minor (p. 463)
- Science, Technology, Ethics and Policy Minor (PLCY) (p. 465)
- Sustainability Studies Minor (PLCY) (p. 465)

ADVISING

The Public Policy major has mandatory advising every semester. Academic advising is an ongoing process that helps students clarify their educational and career goals, and then chart a meaningful plan for achieving those goals. Advising is the joint responsibility of the student and the advisor. The advisor assists students in evaluating their degree progress and helps them select appropriate courses and other educational experiences tailored to their personal goals. Ultimately, students are responsible for making decisions, setting and meeting identified goals and published requirements. More information for students can be found here (https://spp.umd.edu/info/students/undergraduate/). Students can contact the Public Policy advising office by calling 301-405-2370 or emailing plcyundergrad@umd.edu.

OPPORTUNITIES

Living-Learning Programs

Public Leadership Program in College Park Scholars

A living-learning program of the University's College Park Scholars (https://scholars.umd.edu), Public Leadership explores the theory and practice of leadership, empowering students to become social change agents through hands-on public service projects and examination of pressing social, political and economic issues. Join a community of students from across the University who are committed to developing their leadership skills for the common good.

Learn more about Public Leadership (https://scholars.umd.edu/programs/pl/)

iGive: Carillon Community

A living-learning program in the University's Carillon Communities (https://carillon.umd.edu), iGive explores a big question that matters to our world - how can you use philanthropy, innovation and social change for good? Spend your freshman year with a group of like-minded students as you identify a social cause you share a passion for and then develop and practice leadership skills as you support a local nonprofit organization.

Learn more about iGive (https://carillon.umd.edu/communities/igive/)

Specialized Academic Programs

Rawlings Undergraduate Leadership Fellows Program

Honoring the legacy of Howard Peters "Pete" Rawlings and his decades of public service in the Maryland House of Delegates, the Rawlings Program provides students the opportunity to champion causes they are passionate about and advocate for those in the community that are underserved and marginalized. Combining mentorship, engagement with expert faculty and public leaders, and hands-on experiences working in the community, the Rawlings Program realizes students' commitment to ethical leadership and public service.

Learn more about the Rawlings Program (https://spp.umd.edu/your-education/undergraduate/co-curricular-programs/rawlings-undergraduate-leadership-fellows/)

Financial Assistance

Scholarships in the School of Public Policy

Opportunities for scholarship provide not just funding for your education, but the chance to be part of a legacy. The School of Public Policy's prestigious scholarship awards, generously endowed by members of our community committed to helping finance education, are awarded to undergraduate students each year. The School of Public Policy offers funding for both admitted prospective students as well as current students. To learn more and apply for scholarships, please review the details found here (https://spp.umd.edu/admissions/financial-aid-scholarships/).

UMD Financial Aid

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: financialaid.umd.edu (http://financialaid.umd.edu).

Nonprofit Leadership and Social Innovation Minor

School of Public Policy
1118 Taliaferro
nplminor@umd.edu
spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/)

Program Director: Susannah Washburn

Built with hands-on learning, the Minor in Nonprofit Leadership and Social Innovation heightens students' awareness of local, national and global issues and examines different approaches to social impact. Students study the role of the nonprofit, NGO, and social sector, as well as social innovation, leadership, and the skills required for effective nonprofit management. This minor is open to all undergrads on campus, regardless of major. Students who want to take a deeper dive, can pursue the Major in Public Policy (https://spp.umd.edu/your-education/undergraduate/public-policy-major/) with a focus on Nonprofit Leadership and Social Innovation.

REQUIREMENTS

Complete the application form (https://spp.umd.edu/sites/default/files/2019-06/

Nonprofit_Leadership_and_SI_Minor_Application.pdf) (electronically or handwritten) and email it to nplminor@umd.edu. More information about this minor can be found at spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/).

Students must complete at least 15 credits, including three required courses and two electives. Other electives are being added to this list and students may also propose other courses to meet the elective requirements. No course may be used to satisfy the requirements of more than one minor and at least nine credits must be at the 300-400 level. All courses must be passed with a grade of C- or better.

Course	Title	Credits
Required Courses: (3 classes, 9 credits)		
PLCY213	Foundations of Nonprofit Leadership and Social Innovation	3
PLCY310	Nonprofit Leadership and Social Innovation in Action	3
Add one of the following		3
PLCY215	Innovation and Social Change: Creating Change for Good	
PLCY380	Innovation and Social Change: Do Good Now	
BSOS388	Behavioral and Social Sciences Special Topics (BSOS388B Innovation and Social Change: Do Good Now)	
HONR348	Advanced Honors Seminar (HONR348D Innovation and Social Change: Do Good Now)	
ARHU380	Arts & Humanities in Social Innovation, Change, and Justice: Do Good Now	
ENME467	Engineering for Social Change	
Electives (2 classes, 6 credits)		**6**
One of the following courses is allowed and encouraged as an elective (students may not count more than one of the courses below toward the minor requirements):		
PLCY214	Leading and Investing in Social Change: Re-defining and Experimenting with Philanthropy	
PLCY359	Contemporary Issues in Political Leadership and Participation (PLCY359I Re-defining and Experimenting with Philanthropy)	
PLCY388	Special Topics in Public Policy (PLCY388G Global Perspectives on Leading and Investing in Social Change)	
HONR349	Honors Colloquium (Re-defining and Experimenting with Philanthropy)	
Other Electives:		
For a comprehensive list of electives see website		
Total Credits		**15**

Three credits of study abroad or three credits of an internship or experiential learning related to nonprofits and social innovation and approved by the director will be accepted as an elective.

Public Leadership Minor

School of Public Policy
1118 Taliaferro
plminor@umd.edu

spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/)

Program Director: Nina Harris, Ph.D.

Explore the complex issues that face leaders around the world by minoring in Public Leadership. You will be empowered to think critically about the solutions needed for a range of pressing problems, examining such issues as democratization and human rights, crime and punishment, diversity and affirmative action, and poverty and inequality. In addition to exploring the issues, you will engage in critical questions and learning about leadership for the public good and effective citizenship.

The Public Leadership minor will allow students to examine today's most pressing issues. Matters facing our world leaders such as, the global environment, human rights, the criminal justice system, equity in education, diversity, poverty, and inequality will be analyzed on multiple levels. Students will face these same challenges in their courses while learning to critically assess and recommend viable solutions through effective leadership for the public good.

1. To develop students' knowledge of leadership theories;
2. To offer undergraduate students a coherent and integrated public leadership curriculum;
3. To give undergraduate students an education providing knowledge and skills appropriate to the understanding and exercise of appropriate leadership in their chosen professions, organizations, and communities;
4. To create and support a community of young public leaders who hold a common interest in leadership studies;
5. To offer students who are interested in public service a place to begin to build an intellectual foundation which will allow them to address the problems of the next decade;
6. To prepare our students for the responsibilities of leadership and citizenship in a complex world; and
7. To gain experience in applying leadership theories and concepts in a structured internship experience.

REQUIREMENTS

Requirements: 15 approved credits, at least 9 of which are 300- or 400-level. All courses taken for a minor must be completed with a minimum grade of C-. A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor is also required. Notes: No more than 6 credits may overlap between your major and the Public Leadership Minor, unless otherwise approved by your major. Additionally, courses completed in one minor may not be used to satisfy the requirements in another minor.

Course	Title	Credits
Core Course		
Select one of the following:		3
PLCY201	Public Leaders and Active Citizens	
PLCY302	Examining Pluralism in Public Policy	
Signature and Elective Courses		
Select 12 credits from approved list [1]		12
Total Credits		**15**

[1] The remaining 12 credits will be selected by the student from a list of approved signature courses and electives. A credit-bearing experiential

learning option for which a grade is earned, e.g., internship, study abroad, research project, etc. can count as part of the remaining 12 credits. The experiential learning option must be linked to public leadership and approved in advance.

For more information, visit here (https://spp.umd.edu/your-education/undergraduate/minors/) **or e-mail plminor@umd.edu.**

Public Policy Major

School of Public Policy
1118 Taliaferro Hall
Phone: 301-405-2370
plcyundergrad@umd.edu
spp.umd.edu/your-education/undergraduate/public-policy-major (https://spp.umd.edu/your-education/undergraduate/public-policy-major/)

Program Director: Jennifer Littlefield, Ph.D.

With no shortage of complex challenges, the world needs leaders who are able to understand and communicate the issues, who can design and implement bold solutions and who can ethically and compassionately lead the movements and organizations that create real change. As a PolicyTerp, students will:

- Learn how to analyze the issues to create and critically evaluate responses that promote better outcomes for communities.
- Cross disciplinary boundaries to better understand the complexities of the challenges the world faces and immerse yourself in multiple perspectives.
- Develop decision-making and leadership skills to translate theory and analysis into on-the-ground action.

The interdisciplinary Public Policy major focuses on using analytical decision-making to study an array of subjects ranging from the processes of making, implementing and evaluating government policies to the ethical evaluation of contemporary social problems, both domestic and international. The major has two distinctive components:

1. core foundational skills critical for the understanding and analysis of problems and proposed solutions; and
2. the application of these skills and competencies to address challenges in the real world by engaging with the policy process at local, state and national levels through real-time projects.

The major in Public Policy at the University of Maryland equips students with competence in leadership and analytical skills, supported by theory and data, to prepare them for careers in public service, policymaking, and the public, private, and nonprofit sectors.

Courses offered by this department may be found under the following acronym: PLCY.

Program Learning Outcomes

Students completing a Public Policy major will:

1. Understand public policy problems, concepts, processes, institutions and actors through a multidisciplinary lens, with perspectives from the local to the global.
2. Analyze public issues from a range of ideological, demographic, and socioeconomic perspectives, including those that are underrepresented in the public policy process.
3. Apply quantitative and qualitative tools to real-world policy issues.
4. Communicate complex ideas and findings in written and oral forms.
5. Demonstrate teamwork, ethical decision-making, management and leadership skills. \

REQUIREMENTS

C- or better is required in all major courses and the cumulative average of these courses must be a 2.0.

Course	Title	Credits
Benchmark Requirement One [1]		
PLCY100	Foundations of Public Policy	3
HIST201	Interpreting American History: From 1865 to the Present	3
Benchmark Requirement Two [2]		
PLCY101	Great Thinkers on Public Policy	3
STAT100	Elementary Statistics and Probability	3
(STAT100 equivalent accepted)		
Required Major Courses		
ECON200	Principles of Microeconomics	3
PLCY201	Public Leaders and Active Citizens	3

[4] Taken after 90 credits

FOUR YEAR PLAN

Click here (https://spp.umd.edu/spp_4-year_plan/) for roadmaps for four-year plans in the School of Public Policy.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Science, Technology, Ethics and Policy Minor (PLCY)

stepminor@umd.edu
spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor (https://spp.umd.edu/your-education/undergraduate/minors/science-technology-ethics-and-policy-step-minor/)

Program Director: David Tomblin, Ph.D.

The minor in Science, Technology, Ethics and Policy (STEP) explores the powerful social, ethical, and political relationships that drive research and innovation. The program delves into the challenges of living and innovating in a world where emerging science and technologies are becoming increasingly interconnected, pervasive, and powerful. The STEP minor offers students the knowledge and analytical skills to understand and assess the complex interactions among science, technology, policy and ethics, providing students the opportunity to explore the ways that scientific practice and technological development are embedded in social, cultural, humanistic, and political systems.

STEP welcomes students from all majors who are interested in understanding how we can responsibly maximize the societal benefits of scientific inquiry and technological innovation. The program's primary goal is to give students analytical skills that help connect science and technology to broader social needs. Coursework emphasizes the importance of interdisciplinary modes of inquiry to generate new scientific knowledge and technologies, and to understanding the ethical considerations and social benefits that flow from them.

Electives are grouped in three concentrations, each linked to a learning outcome. Students can go deep in one concentration or choose across groupings. The end product of the program is a capstone research project of the student's own choosing, which is developed under faculty mentorship. At the onset of the capstone course, students will complete an assignment that allows them to articulate how their elective courses have shaped their understanding of science, technology, ethics and policy and how it informs their choice of capstone project.

Minor concentration areas:

Social, ethical and policy implications: This concentration explores the contemporary societal implications of science and technology. These courses ask students to think about the role science and technology have played in creating local and global social and environmental crises and what science and technology can do to help solve them.

Science and technology development: This concentration focuses on cultural, legal, organizational, and institutional forces that have shaped science and technology. It asks students to think about what causes knowledge production and technical practices to change over time and how these changes can improve implementation going forward.

Information economy: This concentration focuses on how the information economy has shaped scientific and technological practices. Students are asked to think about society's evolving relationships with information as a driving force in the private and public sector.

Program Learning Outcomes

1. Articulate and explore the social, ethical, and policy implications of how scientific ideas emerge and technologies are designed, developed, and used (Social, ethical and policy implications concentration)
2. Identify political and legal contexts governing science and technology (Social, ethical and policy implications concentration)
3. Recognize lessons from the historical contingency and legacy of scientific knowledge and technological development (Science and technology development concentration)
4. Synthesize broad implications of the "information economy" for science, technology, and society (Information economy concentration)
5. Interpret the rules, customs, and cultural practices that are the foundation for scientific and technological institutions. (Science and technology development concentration)

REQUIREMENTS

Course	Title	Credits
Required Courses (2 classes)		**6**
ENES240	Ethical, Policy and Social Implications of Science and Technology	3
ENES440	Science, Technology and Society: Certificate Program Capstone	3
Electives (3 classes)		**9**

Sustainability Studies Minor (PLCY)

Co-sponsored by the College of Agriculture and Natural Resources and the School of Public Policy
1118C Taliaferro
susminor@umd.edu
spp.umd.edu/your-education/undergraduate/minors#sus (http://spp.umd.edu/your-education/undergraduate/minors/#sus)

Program Directors: Joanna Goger, J.D. and Yueming (Lucy) Qiu, Ph.D

The study of sustainability examines each generation's commitment to protect and preserve the quality of the natural environment for the benefit of succeeding generations. The stability of natural systems and the environment, economic progress, and promoting social justice are all important sustainability goals. Promoting these goals involves choices among competing ends.

The Sustainability Studies Minor at the University of Maryland provides students the opportunity to learn how human relationships, natural resources, and diverse environments can be understood and used to address creatively and positively the global challenges that will affect future human populations and cultures. It will complement any major on campus and provide both intellectual breadth and depth in a challenging area of inquiry that is gaining a high level of interest in businesses, government agencies, and non-governmental organizations. This minor will provide students with the critical thinking and problem-solving skills necessary for them as citizens, employees, or graduate students.

To apply please: 1) complete the application form (electronically) and email it to susminor@umd.edu and 2) schedule a mandatory advising appointment during advising hours. For more information, please visit our page at spp.umd.edu/your-education/undergraduate/minors#sus (https://spp.umd.edu/your-education/undergraduate/minors/#sus) or e-mail susminor@umd.edu.

REQUIREMENTS

15 approved credits, at least 9 of which are 300- or 400-level. All courses taken for a minor must be completed with a minimum grade of "C-". A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor is also required. Notes: No more than 6 credits may overlap between your major and Sustainability Studies, unless otherwise approved by your major. Additionally, courses completed in one minor may not be used to satisfy the requirements in another minor. Students must declare the minor a full academic year before their intended graduation.

Course	Title	Credits
AGNR/PLCY301	Sustainability [1]	3
Select one course from each of the following groups: [2]		9
Science and Technology		
Policy and Institutions		
Social and Human Dimensions		
Select an additional approved course from one of these categories or an approved, credit-bearing experiential learning option for which a grade is earned [3]		3
Total Credits		**15**

1. This course will introduce you to the normative concepts and new thinking surrounding sustainability. We will use readings, lectures, writing exercises, and small group exercises that address how environmental responsibility, economic health, social equity, and cultural vitality are defined and considered in the sustainability context. The roles of resilience and adaptive management will be examined as key pragmatic dimensions of sustainability and as challenging concepts shaping our environmental ethics today. Guest speakers from the Washington region with research and policy expertise will discuss current policy issues.
2. See web site for a list of approved courses
3. These experiences include internships, study abroad trips, and research projects. The experiential learning option must be linked to sustainability and approved in advance.

The Universities at Shady Grove

Camille Kendall Academic Center Building III
9636 Gudelsky Drive
Rockville, MD 20850
Phone: 301-738-6000
shadygrove@umd.edu
shadygrove.umd.edu (http://www.shadygrove.umd.edu)

USG Executive Director and Associate Vice Chancellor for Academic Affairs, USM: Anne Khademian, Ph.D.

The Universities at Shady Grove (USG) is part of the University System of Maryland and a partner campus of nine Maryland universities that collaborate to offer their top degree programs, as well as certificate and continuing education programs, at one convenient location in Montgomery County. USG currently serves nearly 4,000 graduate and undergraduate students.

With coursework beginning at the junior level, USG provides all the prestige and benefits of a Maryland education during a student's final two years of undergraduate study. Most credit earned at Maryland community colleges will transfer, and students can choose from a variety of majors, with classes offered at times that meet their schedules. At the Universities at Shady Grove campus, students work closely with professors from nationally ranked academic programs. Everything you need to be successful as a student can be found on USG's campus, including advising, financial aid assistance, career and internship opportunities, academic support, a library, fitness center, and cafe. Students can also take advantage of a growing number of social events, community service activities and student leadership opportunities.

The University of Maryland, College Park is one of the powerful partners that make up USG. **Students can earn a University of Maryland, College Park degree** at USG and celebrate Terrapin traditions no matter which campus they call home.

The University of Maryland, the Universities at Shady Grove, and Montgomery College have worked together to offer the Terp Transfer Partnership, which benefits students while they are still enrolled at Montgomery College and creates a seamless pathway to one of the University of Maryland programs offered at the Universities at Shady Grove. Students with at least one semester left at Montgomery College gain early access to advising, workshops, and events related to their University of Maryland program of interest at Shady Grove through the Terp Transfer Partnership program. The Terp Transfer Partnership has also been expanded to include serving students who begin at Frederick Community College.

The University of Maryland, College Park offers ten undergraduate degrees at Shady Grove.

- Accounting, B.S.
- Biocomputational Engineering, B.S.
- Biological Sciences, B.S.
- Communication, B.A.
- Criminology and Criminal Justice, B.A.
- Embedded Systems and Internet of Things, B.S.
- Information Sciences, B.S.
- Management with Specialization in Entrepreneurship, B.S.
- Marketing, B.S.
- Public Health Science, B.S.

A. James Clark School of Engineering at Shady Grove

The Universities at Shady Grove
9636 Gudelsky Drive
Rockville, MD 20850
Biocomputational Engineering: Biomedical Sciences and Engineering Facility 4119
biocomp@umd.edu

Dean: Samuel Graham, Jr., Ph.D.
Associate Deans: Hugh Bruk, Ph.D., Ken Kiger, Ph.D., Min Wu, Ph.D., Jelena Srebric, Ph.D.

Discipline-defying combustion experiments aboard the International Space Station. New advanced technologies that help farmers tap the economic potential and environmental benefits of shellfish aquaculture. Wood transformed into something clear, bouncy, bulletproof, and that might help save our planet.

These and other research innovations poised to benefit millions are borne from the A. James Clark School of Engineering, one of the premier engineering schools in the United States.

Maryland Engineering's mission is to be a place where students make a positive impact on the world. We believe in practicing engineering as a public service: innovating for people in communities we may never see or meet, but whose quality of life will be improved through our innovation.

Located a few miles from Washington, D.C., the Clark School is at the center of a constellation of high-tech companies and federal laboratories, offering students access to one of the most vibrant research programs in the country. With industry-leading expertise in areas that are shaping society such as quantum technology, energy, robotics, communications and networking, life cycle and reliability engineering, disaster resilience, and intelligent transportation systems, Clark School students conduct research relied upon by federal agencies, major companies, and other academic institutions alike.

We combine rigorous classroom learning with opportunities for hands-on experience, including the autonomous vehicle project in freshman year and capstone courses in junior and senior years; participation in numerous national and international engineering competitions in which the school is consistently successful; a vibrant entrepreneurial ecosystem; and extensive internship opportunities.

With one of the nation's most active chapters of Engineers Without Borders, Clark School students can apply their skills and energies in the service of others all around the world. Service options closer to home are available through the many student societies, alternative spring breaks, and targeted initiatives started by fellow students.

Society needs solutions to its grand challenges; engineers will play a part in every solution. eng.umd.edu (http://www.eng.umd.edu/)

Admission Requirements

Transfer Admission

Direct Admissions Requirements

Internal and external transfer students will be directly admitted to the Clark School if they meet the following Gateway requirements: MATH141 with a "B-" or higher, PHYS161 with a "B-" or higher, either CHEM135 or CHEM271 or CHEM134 with a minimum grade of "C-" or higher (Students who take CHEM134 must also have completed CHEM131 with a minimum grade of "C-"). Students must also have a minimum cumulative GPA of 3.0 in all college-level coursework, and have not previously been admitted to the Clark School of Engineering. Only one repeat of a single Gateway course, either at the University of Maryland or at any other university or college, will be considered to meet the review requirements. A course in which a grade of "W" (withdrawn) is earned is counted as an attempt. Students should wait until all gateway requirements are complete before applying for admission to the School.

Transfer Admission Appeal Process

All students denied admission to the Clark School may appeal the decision in writing directly to the Associate Dean of Undergraduate Student Affairs in the Clark School.

Maryland Community College Transfer Students

Students who complete an associate's at a Maryland community college may be prepared to enter into the sophomore or junior year in engineering at the University of Maryland if they have completed the required engineering coursework. To ensure that you are enrolling in the correct courses to transfer, please consult the Engineering four-year plans and the Transfer Credit Services website. There may be some courses which are not offered at Maryland community colleges. Students should investigate the feasibility of completing these courses during the summer session at the University of Maryland before starting their junior coursework in the fall semester. A maximum of one-half of the degree credits (approximately 60 semester hours) may be transferred from a two-year community college program.

Majors

- Biocomputational Engineering Major at Shady Grove (p. 469)
- Embedded Systems and Internet of Things Major at Shady Grove (p. 470)

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements

Structure of Engineering Curricula: The section below describes the requirements and the prescribed credit hours leading to the Bachelor of Science degrees awarded in the Clark School of Engineering. The courses in each curriculum may be classified in the following categories:

1. Courses in the General Education Program;
2. Courses in Basic Sciences (mathematics, chemistry, and physics);

3. Related technical courses, engineering sciences and other courses approved for one curriculum but offered by another department;
4. Courses in the major department. The courses in each engineering curriculum, as classified below, form a sequential and developmental pattern in subject matter. In this respect, curricula in engineering may differ from curricula in other colleges. Some regulations which are generally applicable to all students may need clarification for purposes of orderly administration among engineering students (see Academic Regulations (p. 66)). Moreover, the Clark School of Engineering establishes policies that supplement university regulations.

School Regulations

1. The responsibility for proper registration and for satisfying stated prerequisites for any course must rest with the student as does the responsibility for proper achievement in courses in which the student is enrolled. Each student should be familiar with the provisions of this catalog, including the Academic Regulations.
2. Required courses in mathematics, physics, and chemistry have highest priority. It is strongly recommended that every engineering student register for mathematics and chemistry or mathematics and physics each semester until the student has fully satisfied requirements of the Clark School of Engineering in these subjects.
3. To be eligible for a bachelor's degree in the Clark School of Engineering, a student must have an overall cumulative grade point average of at least a 2.0 and a "C-" or better in all engineering degree requirements (including all technical coursework but not limited to courses taken in MATH, PHYS, CHEM). Students matriculating to UMD in the fall of 2012 or after must also have a 2.0 cumulative GPA in their major courses, minor courses and classes used to satisfy certificate programs.
4. A course taken at UMD in which a grade has been earned may not be repeated via transfer from another institution.
5. Students in the Clark School of Engineering must have a minimum 2.0 University of Maryland GPA to enroll in courses at another institution.
6. All students are required to complete a number of general education courses and must follow the university's requirements regarding completion of the General Education Program. Consult the Academic Regulations section of this catalog for additional information. Engineering students are required to complete Technical Writing, (ENGL393) for the Professional Writing requirement.
7. All degree programs in the Clark School of Engineering require a minimum of 120 credits plus satisfaction of all department, School, and University general education program requirements (Aerospace Engineering majors are required to complete a minimum of 124 credits). Students should be aware that, for all currently existing engineering programs, the total number of credits necessary for the degree exceeds 120 by some number that depends on the specific major.

Curricula for the various engineering departments are given in this catalog to illustrate how the programs may be completed in four years. These curricula are rigorous and relatively difficult. It is not uncommon for a student to extend their curriculum; this may be necessary or desirable for a variety of reasons. However, students should seek academic advising in order to ensure that courses are taken in the proper sequence.

Another factor impacting the academic plan is the math placement exam. For entering freshmen, the math placement is determined solely by performance on the University math placement exam and not on the Math SAT score. Placement in MATH115 or lower will delay eligibility to take certain engineering courses by a semester.

All students are encouraged to utilize the university's degree auditing system, uAchieve, and to review the audit with their departmental advisor throughout the course of their academic career. The purpose of the audit is to discuss academic progress and to confirm that graduation requirements are met.

Departments and Degrees

The Clark School of Engineering consists of eight academic departments and offers the degree of Bachelor of Science in the following fields of study: Aerospace Engineering, Bioengineering, Biocomputational Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Embedded Systems and Internet of Things, Fire Protection Engineering, Materials Science and Engineering, and Mechanical Engineering. All of the above programs are accredited by the Engineering Accreditation Commission of ABET, abet.org (http://abet.org) (with the exception of Biocomputational Engineering and Embedded Systems and Internet of Things).

Entering freshmen may enroll in the Clark School as Undecided Engineering. Students declared as Undecided Engineering are advised by the Undergraduate Advising & Academic Support Office. No later than their third semester a student should select an academic degree program. The student's newly declared major department assumes the responsibility for the student's academic guidance, counseling, and program planning from that point until the completion of the degree requirements. For the specific requirements, see the curriculum listing in each engineering department.

Freshmen-Sophomore Years

The freshmen and sophomore years in engineering are designed to lay a strong foundation in mathematics, physical sciences, and the engineering sciences upon which the student will later develop a professional program during the upper division (junior and senior) years. During the first two years, students are introduced to the concepts of engineering design and work in multidisciplinary teams. The Clark School course requirements for the freshmen and sophomore years are similar for all students, regardless of their intended academic program, thus affording the student maximum flexibility in choosing a specific engineering specialization.

Engineering Sciences

Engineering Science courses represent a common core of basic material offered to students of several different departments. All freshmen and sophomore students of engineering are required to take ENES100. Other ENES courses, ENES102, ENES220, ENES221, and ENES232 are specified by the different departments. The responsibility for teaching the engineering science courses is shared among faculty from different departments by means of the Keystone Program. In addition to the core courses noted above, several courses of general interest to engineering or non-engineering students have been given ENES designations.

ADVISING

Advising is mandatory prior to registration each semester for all students in the Clark School. Each engineering department has a representative who advises students in their respective discipline. Undecided Engineering students are advised by the Undergraduate Advising & Academic Support Office until they have declared a major,

typically in their first year. Refer to the individual program for additional advising information.

During orientation to the university, all students will receive advising from the Undergraduate Advising & Academic Support Office in collaboration with departmental advising representatives.

Biocomputational Engineering Major at Shady Grove

Program Director: Ian White, Ph.D
Assistant Program Director: Lan Ma, Ph.D

Biocomputational engineering brings together the field of bioengineering, a discipline grounded in fundamentals of physics, chemistry, and biology, with computation and data science, which enhances the value of all fields. The objective of the biocomputational engineering program is to provide a breadth of fundamentals in biology and quantitative problem solving while developing skills in computation and data science that can be applied to the modeling of complex biological systems and the analysis of complex biological data sets in order to create new knowledge from the molecular to organ to system levels, and to develop innovative processes for the prevention, diagnosis, and treatment of disease. The synthesis of bioengineering, computation, and data science gives the graduates unique capabilities to solve existing and emerging challenges of the modern medical world.

Admission to the Major

Prior to being admitted to the Biocomputational Engineering major, students must complete the UMD A. James Clark School of Engineering LEP gateway courses, prerequisite math/science courses, lower-level General Education requirements (or an associate's degree), and 60 credits. Students are welcome to apply as transfer students from community college or four-year institutions. For more information regarding admission to the Biocomputational Engineering major, visit biocomp.umd.edu/admissions (https://biocomp.umd.edu/admissions/).

Program Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

Prior Study

Prior to being admitted to the Biocomputational Engineering major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level general education requirements (or an associate's degree from a Maryland public institution), and 60 credits.

Course	Title	Credits
ENGL101	Academic Writing	3
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
MATH246	Differential Equations for Scientists and Engineers	3
PHYS161	General Physics: Mechanics and Particle Dynamics	3
PHYS260	General Physics: Vibration, Waves, Heat, Electricity and Magnetism	3
PHYS261	General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	1
ENES100	Introduction to Engineering Design	3
CHEM135	General Chemistry for Engineers	3
CHEM136	General Chemistry Laboratory for Engineers	1
BSCI170 or BIOE120	Principles of Molecular & Cellular Biology Biology for Engineers	3
MATLAB programming course -- e.g. BIOE241 or equivalent		3
Lower-level general education requirements or A.A./A.S. degree from a Maryland public institution		22
Total Credits		**60**

Required Courses

Course	Title	Credits
ENBC301	Introduction to Biocomputational Engineering	1
ENBC311	Python for Data Analysis	3
ENBC312	Object Oriented Programming in C++	3
ENBC321	Machine Learning for Data Analysis	3

ENBC351	Quantitative Molecular and Cellular Biology	3
ENBC352	Molecular Techniques Laboratory	2
ENBC353	Synthetic Biology	3
ENBC425	(Imaging and Image Processing)	3
ENBC431	Finite Element Analysis	3
ENBC441	(Computational Systems Biology)	3
ENBC491	(Senior Capstone Design in Biocomputational Engineering)	3
Professional Writing Requirement		3
Elective Courses		12
Total Credits		**60**

Elective Courses

Students are required to take four technical electives (12 credits). The courses must be selected from an approved list of engineering and biology courses; the list will be updated regularly by the program director. At least two of the elective courses must be from the category of engineering, mathematics, or programming, while at most two of the electives can be from the category of biology courses. The program will offer electives; at the same time, the program will arrange for opportunities for electives outside the program, including USG programs offered by other universities.

Course	Title	Credits
Possible technical electives		**12**
ENBC403	Research Methods in Biological Data Mining	
ENBC411	(Advanced Programming in Python)	
ENBC413	(Data Analysis with R)	
ENBC423	Applied Computer Vision	
ENBC435	(Numerical Methods)	
ENBC442	(Computational Molecular Dynamics)	
ENBC443	(Multiscale Simulation Methods)	
ENBC444	(Modeling Protein Folding)	
ENBC445	(Spatial Control of Biological Agents)	
ENBC455	(Bioinformatics Engineering)	

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Embedded Systems and Internet of Things Major at Shady Grove

NOTICE OF ADDENDUM: THIS PROGRAM WAS RENAMED CYBER-PHYSICAL SYSTEMS ENGINEERING EFFECTIVE SPRING 2023. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

Program Director: Romel Gomez, Ph.D.

The Bachelor of Science in Embedded Systems and Internet of Things will provide students with a solid foundation in key emerging technologies of the Internet of Things (IoT), the ability to integrate devices into complete IoT systems, and an understanding of how IoT fits within the wider context of information and communications technology, including data analytics and cloud computing. At the senior level, students will ultimately be able to specialize in one of the following tracks: Hardware, Computation, or Security track or pursue a General track option that provides a focus on courses from the other three tracks. It is expected that graduates will be in high demand in such occupational areas as hardware/software developers, computer systems analysts, network architects and administrators, information security analysts, information systems analysts and computer programs.

Admission to the Major

As an undergraduate program within the A. James Clark School of Engineering, the Embedded Systems major is a Limited Enrollment Program (LEP). Admission to this program will follow the School of Engineering's admissions criteria found on the LEP website: lep.umd.edu (http://lep.umd.edu).

Beyond the LEP gateway criteria, students will need to fulfill the following requirements to gain admission to the Embedded Systems major:

- Completion of all first and second year required major courses with a minimum grade of a "C-."
- Completion of all lower-level University General Education requirements.
- Completion of 60 credits.

A minimum grade point average of 3.0 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Due to the similarity in curriculum content and the physical location of course offerings, students in the Electrical Engineering, Computer Engineering, and Computer Science programs at UMD will not be eligible to add Embedded Systems as a second major or degree.

This program is mainly intended for students transferring from a Maryland public community college. While students at the College Park campus can pursue the program, they will not be able to seek admission into the School of Engineering and the Embedded Systems major until they have completed the Engineering LEP gateway courses, required first and and second year major courses, lower-level General Education requirements, and have earned at least 60 credits. The junior and senior years would take place at the Shady Grove campus.

Program Objectives

The program education objective of this program is to produce a well-trained workforce in the emerging technologies of internet of things. The Bachelor of Science in Embedded Systems and Internet of Things will produce engineering graduates who:

- Use their hardware and software engineering design training and problem-solving skills to contribute professionally in an industrial, research and applications environment;
- Demonstrate initiative, leadership, teamwork, and continued professional development;
- Demonstrate understanding of the impact of their professional activities on society.

Program Learning Outcomes

1. An ability to apply knowledge of computing, engineering, science, and mathematics to identify, analyze and solve complex engineering problems.
2. An ability to design, implement, and evaluate a computer#based system, process, component, or program that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An understanding of professional, ethical, legal, security, and social issues and responsibilities.

5. An ability to analyze the local and global impact of computing on individuals, organizations, and society.
6. An ability to function effectively on teams to accomplish a common goal.
7. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
8. An ability to acquire and apply new knowledge, using appropriate learning strategies.

REQUIREMENTS

NOTICE OF ADDENDUM: THIS PROGRAM WAS RENAMED CYBER-PHYSICAL SYSTEMS ENGINEERING EFFECTIVE SPRING 2023. FOR ADDITIONAL INFORMATION, SEE ADDENDA TO THIS CATALOG (p. 1056).

FIRST & SECOND YEAR

Prior to being admitted to the Embedded Systems and Internet of Things major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level General Education requirements, and at least 60 credits.

Course	Title	Credits
MATH140	Calculus I	4
MATH141	Calculus II	4
ENGL101	Academic Writing	3
CHEM135	General Chemistry for Engineers	3

GENERAL TRACK

The General Track offers a general focus of course content with classes from each of the three tracks. While there are no specific required or elective courses for this track, the General Track requires 12 credits, which is the same as the other three tracks. Consult with an advisor for details.

FOUR YEAR PLAN

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog

Biological Sciences Major at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Biomedical Sciences and Engineering Facility (Bldg IV, Room 4110)
Rockville, MD 20850
Phone: 301-738-6007
usgbiosci@umd.edu
shadygrove.umd.edu/academics/degree-programs/bs-biological-sciences (https://www.shadygrove.umd.edu/academics/degree-programs/bs-biological-sciences/)

Program Director: Dr. Hadiya Woodham
Program Coordinator: Tracy Odim

The Biological Sciences Program at the University of Maryland offers a degree program in Physiology and Neurobiology (PHNB) at the Universities at Shady Grove. The Biological Sciences Program at Shady Grove offers the Advanced Program courses normally taken in the junior and senior years.

All Biological Sciences majors complete a common sequence of introductory and supporting courses referred to as the Basic Program. For students matriculating at the Universities at Shady Grove most of these introductory and supporting courses are taken at a community college or at another four-year institution prior to admission to the Biological Sciences Program. Depending on space available, students who matriculated at College Park may transfer to the Shady Grove Program in their junior year, where they may complete the Advanced Program in Physiology and Neurobiology.

Program Learning Outcomes

1. Students should have mastered the critical knowledge at each level in the curriculum that is necessary to move on to the next level in the curriculum.
2. Students should demonstrate an ability to use and apply quantitative methods, especially: interpretation of graphical or tabular data; expression of physical, chemical, or biological process in mathematical form; solving equations to determine the value of physical, chemical, or biological variables.
3. Students at the lower level should demonstrate an ability to carry out key experimental techniques used in the chemical and life sciences disciplines.
4. Students at the lower level should have a basic understanding of how to express questions as a hypothesis, how to design a test of a hypothesis, and how to gather and analyze simple data.
5. Students at the upper level should be able to integrate and apply a relevant body of basic knowledge to the evaluation of existing scientific studies and to design studies to test specific hypotheses that includes design elements typically found in a specific field of the chemical and life sciences.
6. Students should effectively communicate in writing the processes of science and the results of scientific inquiry.

REQUIREMENTS

Course	Title	Credits
General Education Program Requirements [1]		
Complete General Education		
Basic Program in Biological Sciences [1]		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
BSCI223	General Microbiology	4
BSCI222	Principles of Genetics	4
MATH130 or MATH140	Calculus I for the Life Sciences Calculus I	4
MATH131	Calculus II for Life Sciences	4

or MATH141	Calculus II	
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
CHEM271 & CHEM272	General Chemistry and Energetics and General Bioanalytical Chemistry Laboratory [2]	4
Courses taken at the Universities at Shady Grove		
PHYS131	Fundamentals of Physics for Life Sciences I	4
or PHYS331	Physics for Life Sciences I	
PHYS132	Fundamentals of Physics for Life Sciences II	4
or PHYS332	Physics for Life Sciences II	
PHNB	Advanced Program in Physiology and Neurobiology	27
ELECT	Electives	22
Total Credits		**97**

[1] Courses equivalent to be taken at an institution that offers lower level course work.

[2] CHEM272 is not offered at most institutions. Students accepted into the UMCP Shady Grove Biological Sciences may substitute a General Chemistry II Lab for this course

Advanced Program in Physiology and Neurobiology

Course	Title	Credits
Required Courses		**13**
BCHM461	Biochemistry I	3
or BCHM463	Biochemistry of Physiology	
BSCI330	Cell Biology and Physiology	4
BSCI353	Principles of Neuroscience [1]	3
BSCI450	Mammalian Systems Physiology	3
Physiology and Neurobiology		**11**
BSCI338	Special Topics in Biology (BSCI338E: Neuroethology)	
BSCI338	Special Topics in Biology (BSCI338G: Seminar on Deregulated Cell Growth in Cancer and Drug Development)	
BSCI338	Special Topics in Biology (BSCI338P: Pathophysiology of the Circulatory System)	
BSCI338	Special Topics in Biology (BSCI338R: Darwinian Medicine)	
BSCI339	Selected Topics in Biology (BSCI339D: Biology of Chemosensory Systems)	
BSCI339	Selected Topics in Biology (BSCI339F: Neurophysiology of Cells and Circuits)	
BSCI339	Selected Topics in Biology (BSCI339G: Advanced Physiology)	
BSCI339	Selected Topics in Biology (BSCI339I: Cellular Mechanisms of Aging and Disease)	
BSCI339	Selected Topics in Biology (BSCI339Q: Diseases Due to Dysfunctional Cell Organelles)	
BSCI339	Selected Topics in Biology (BSCI339W: Molecular Neuroethology)	
BSCI339	Selected Topics in Biology (BSCI339X: Advanced Cellular Neuroscience)	
BSCI348	Special Topics in Cell Biology and Molecular Genetics (BSCI348C: Cell Biology Lab) [2,3]	
BSCI355		
BSCI360	Principles of Animal Behavior	
BSCI370	Principles of Evolution	
BSCI374	Mathematical Modeling in Biology [4]	
BSCI401	Animal Communication	
BSCI402	Genomics of Sensory Systems	
BSCI403	Biology of Vision	
BSCI406	Membranes and Biological Interfaces	
BSCI407	Behavioral Genetics	
BSCI410	Molecular Genetics	
BSCI414	Recombinant DNA Laboratory	
BSCI416	Human Genetics	
BSCI420	Cell Biology Lectures	
BSCI421	Cell Biology	
BSCI422	Principles of Immunology	
BSCI423	Immunology Laboratory [3]	
BSCI430	Developmental Biology	
BSCI433	Biology of Cancer	
BSCI434		
BSCI442	Plant Physiology	
BSCI443	Microbial Physiology	
BSCI446	Neural Systems	
BSCI447	General Endocrinology	
BSCI452	Diseases of the Nervous System	
BSCI454	Neurobiology Laboratory [3]	
BSCI462	Population Ecology	
BSCI464	Microbial Ecology	
BSCI465	Behavioral Ecology	
Statistics, one course maximum		
BIOM301	Introduction to Biometrics	
STAT400	Applied Probability and Statistics I	
STAT464	Introduction to Biostatistics	
Special Topics Courses [5]		
BSCI328	Special Topics in Entomology	
BSCI338	Special Topics in Biology	
BSCI339	Selected Topics in Biology	
BSCI348	Special Topics in Cell Biology and Molecular Genetics	
Departmental Honors Seminar [6]		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	
BSCI398H	Biology Department Honors Seminar	
Enrichment		**3**
Minimum 3 credits from any 300- or 400-level BSCI, CHEM, or BCHM course.		
Total Credits		**40**

ADVISING

Advising is mandatory during each pre-registration period for all Biological Sciences majors. Advising for students interested in or enrolled in the Shady Grove Program is available from the director. Call 301-738-6007 for an advising appointment.

College of Behavioral and Social Sciences at Shady Grove

2141 Tydings Hall
Phone: 301-405-1679
bsos@umd.edu
bsos.umd.edu (http://www.bsos.umd.edu/)

Interim Dean: Wayne McIntosh, Ph.D. (through July 31, 2022)
Dean: Susan Rivera, Ph.D. (effective August 1, 2022)
Associate Deans: Patricio Korzeniewicz, Ph.D., Jean McGloin, Ph.D., Katherine Russell, Ph.D.
Assistant Deans: Ann Holmes, Mengxue Li, Ph.D., Kim Nickerson, Ph.D.

The College of Behavioral and Social Sciences at the University of Maryland (BSOS) increases understanding of and pursues innovative solutions to the challenges facing our global community. BSOS draws on its Washington, D.C., and worldwide connections to enrich its teaching, research and service. The BSOS community works to enhance international relations, advance global sustainability, understand societies and cultures and improve the human condition.

In all that we do, BSOS aims to **Be the Solution** to the world's great challenges.

The College of Behavioral and Social Sciences actively practices TerrapinSTRONG values that affirm our mission, culture, and values as a diverse, unified, proud, respectful, inclusive, accountable, and empowered community of people from every background that works to impact positively our globally-connected society.

Students interested in human behavior and in solving human and social problems will find many exciting opportunities through the programs and courses offered by the College of Behavioral and Social Sciences.

ACADEMIC PROGRAMS

Major

- Criminology and Criminal Justice Major at Shady Grove (p. 475)

Minor

- Criminal Justice Minor at Shady Grove (p. 476)

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements/ Degree Options

- Each student must complete a minimum of 120 hours of credit with at least a 2.0 cumulative grade point average. Courses must include the credits required in the University's general education requirements and the specific major and supporting course and grade requirements of the programs in the academic departments offering bachelor's degrees.
- Students must have a minimum "C" (2.00) cumulative grade point average across all courses used to satisfy major degree requirements.
- Upon entering BSOS as a freshman, transfer, or by major change, students must complete and submit a graduation plan to the college advising office for review and approval.
- In accordance with university policy, fundamental English and Math requirements must be attempted by 30 credits and successfully completed by 60 credits.
- Students must complete 15 upper level credits in the student's final 30 credits.
- All students are responsible for carefully tracking completion of degree requirements using UAchieve. Students are urged to meet with an academic advisor in their major or college if they have any questions. Advising is especially important two semesters before graduation to discuss final graduation requirements.

ADVISING

Please refer to your specific program to see advising information and requirements.

- Criminology and Criminal Justice Major at Shady Grove (p. 475)
- Criminal Justice Minor at Shady Grove (p. 476)

OPPORTUNITIES

Dean's List

Any student who has passed at least 12 hours of academic work under the regular grading method in the preceding semester, without failure of any course, and with an overall average grade of at least 3.5, will be placed on the Dean's List. The Distinguished Dean's List consists of students who have completed successfully a minimum of 12 credit hours in a semester with a 4.0.

Student Societies and Professional Organizations

Students who are interested in organizations and honor societies related to their fields of study should consult with departmental websites.

Financial Assistance

The college offers scholarship opportunities to current students on a competitive basis. Each scholarship has eligibility criteria. Scholarship information and applications are available on the scholarships page on the BSOS website: bsosundergrad.umd.edu/opportunities/scholarships (http://bsosundergrad.umd.edu/opportunities/scholarships/).

The college also offers student experience funds to help support research, internship, and other extracurricular activities: bsosundergrad.umd.edu/academics/bsos-undergraduate-experience. (https://bsosundergrad.umd.edu/academics/bsos-undergraduate-experience/)

The National Scholarship Office at the University of Maryland provides information on nationally competitive scholarships at the undergraduate (and graduate) level. For more information, please visit: scholarships.umd.edu (http://www.scholarships.umd.edu).

The Office of Student Financial Aid (OFSA) administers offers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: financialaid.umd.edu (http://www.financialaid.umd.edu).

Criminology and Criminal Justice Major at Shady Grove

The Universities at Shady Grove
9636 Gudelsky Drive
5105 Camille Kendall Academic Center (Building III)
Rockville, MD 20850
Phone: 301-738-6307
ccjsusg@umd.edu
shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice (https://www.shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice/)

Program Director: Wendy Stickle, Ph.D.

The Major

Criminology and criminal justice encompasses the study of both the causes of, and responses to crime. It involves studying individual, group, and mass behavior, as well as the institutions, professions, and laws that exist to detect, control, and ameliorate the effects of crime. As a discipline, criminology and criminal justice is situated at the nexus of other social science disciplines such as sociology, psychology, and government, in addition to public policy and legal studies.

The University of Maryland, College Park offers its Bachelor of Arts in Criminology & Criminal Justice at the Universities at Shady Grove. Students transfer into this Program after completing their freshman and sophomore years elsewhere, typically at a junior college. Through this Program, students complete their junior- and senior-year coursework at USG with the option to attend full- or part-time. Upon completion of this Program, students are awarded a University of Maryland, College Park B.A. degree.

Program Learning Outcomes

Having completed the CCJS degree program, students should have acquired the following knowledge and skills:

1. Students will demonstrate basic knowledge of major criminology and criminal justice content areas.
2. Students will demonstrate a basic knowledge of descriptive and inferential statistics appropriate to the social sciences.
3. Students will demonstrate competence in basic social science research methods.

REQUIREMENTS

The CCJS major is comprised of 36 credit hours of coursework in the CCJS department and either MATH107 (formerly MATH111) or STAT100. A calculus class (MATH120, MATH130, or MATH140) with a grade of C- or higher may be substituted for MATH107 or STAT100.

Course	Title	Credits
Required CCJS Courses		
CCJS100	Introduction to Criminal Justice	3
CCJS105	Introduction to Criminology	3
CCJS200	Statistics for Criminology and Criminal Justice	3
CCJS230	Criminal Law in Action	3
CCJS300	Criminological and Criminal Justice Research Methods	3
CCJS Criminal Justice Courses		
Select two of the following:		6
CCJS340	Policing	
CCJS345	Courts and Sentencing	
CCJS342	Corrections	
CCJS Criminology/Theory Course		
Select one of the following:		3
CCJS450	Advanced Juvenile Delinquency	
CCJS451	Crime and Delinquency Prevention	
CCJS454	Contemporary Criminological Theory	
CCJS Courses of Choice		
Select four CCJS courses [1]		12
CCJS LEP Gateway Requirements		
Select one of the following: [2]		3
MATH107	Introduction to Math Modeling and Probability (Formerly MATH111)	
STAT100	Elementary Statistics and Probability	
Total Credits		**39**

[1] Courses of Choice must be completed using one or a combination of the following ways:
- Complete additional CCJS courses that are not required (i.e., CCJS325, CCJS360, CCJS418)
- Complete 1 Independent Study for credit (max 3 credits)
- Complete 1 Internship for credit (max 3 credits)

Note: Two CCJS Courses of Choice must be at the 4xx-level.

[2] A calculus class, MATH120 (formerly MATH220), MATH130 or MATH140, with a grade of C- or higher may be substituted

Please keep the following information in mind:

- No grade lower than a C- may be used toward the major
- Students must achieve a combined grade point average of a 2.0 in the CCJS major

OTHER REQUIREMENTS FOR THE MAJOR

The CCJS Department enforces all prerequisites and does not oversubscribe students to courses that are closed.

OPPORTUNITIES

Internships

The internship must be a learning experience involving work in a criminal justice or criminological setting. Interns are expected to gain valuable information which will add to their overall understanding of the field of criminology and criminal justice. Internship positions must center around gaining new material over the course of the semester and are expected to involve some degree of ongoing training/learning for the intern. Internship placements are subject to the approval of the Internship Director.

Internship Eligibility

Interns must meet the following criteria:

- Interns must be CCJS majors
- Interns must have completed a minimum of 56 credits at the time of application
- Interns must have a cumulative GPA of at least 2.5 at the time of application
- Interns must work 45 hours per credit over the course of the semester
- A maximum of 6 internship credits per semester and a total of 12 internship credits overall will be permitted
- Internship credit will not be approved for current or previously held jobs

Interns must register themselves for the internship prior to the end of the semester's schedule adjustment period. Obtaining Departmental approval for the internship does NOT register the student for the class. Additional information about internships can be picked up from the CCJS advising office in Building III, room 5105 or found on the CCJS@USG blog (https://ccjsusg.blogspot.com/).

Student Societies and Professional Organizations

There are two student societies available for membership for CCJS majors: the Criminal Justice Student Association (CRIMSA) and Alpha Phi Sigma Honor Society (APS).

The Criminal Justice Student Association (CRIMSA) is dedicated to supplementing our members' academic experience by providing extracurricular opportunities to further explore critical issues involving criminology and criminal justice. Through a regular program of speakers, agency demonstrations, and community service projects, the CRIMSA provides students with valuable information for making decisions about career choices, further graduate level study, and law school. CRIMSA provides students with opportunities for academic and social interaction, and access to criminology and criminal justice researchers, teachers, and practitioners representing a variety of government, academic and commercial corporate and non-profit organizations. All Universities at Shady Grove students, regardless of home institution or major, are eligible for CRIMSA membership. CRIMSA meetings and programs are held at least monthly during the Fall and Spring semesters.

Alpha Phi Sigma (APS) is a National Criminal Justice Honor Society founded 1942 and membership is open to CCJS majors who have completed at least 40 total credits with at least 12 credits in CCJS courses. Undergraduate Applicants must have an overall GPA of at least a 3.2 and a major GPA of at least 3.4. Graduate student applicants must have a 3.4 overall GPA. Applicants must fill out an application, submit an official or unofficial transcript, and a check (personal check is fine) made out to Alpha Phi Sigma for $55. The local chapter's name is Omega Iota. Completed applications, check, and transcripts should be submitted to Dr. Stickle in Building III, room 5105. Applications are processed throughout the academic year. You will be notified when you have been officially accepted. Applications are available from Dr. Stickle or at ccjs.umd.edu (http://www.ccjs.umd.edu/).

Awards and Recognition

Each year the department selects the outstanding graduating senior for the Peter J. Lejins award. A graduating senior is also selected for the Shady Grove Academic Achievement Award and is eligible to receive the USG Student Leadership Award.

ADVISING

All majors are strongly encouraged to see an advisor at least once each semester. Advising is available by appointment in the Camille Kendall Academic Center (Building III), room 5105. Students must complete all course prerequisites and obtain department permission from the Program Director to enroll in most CCJS classes. Call 301-738-6307 or email ccjsusg@umd.edu.

FOUR YEAR PLAN

Roadmaps for all four-year plans can be found here (http://4yearplans.umd.edu). Select the College of your major to find the corresponding roadmap.

For more information on developing a four-year academic plan, please refer to the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog.

Criminal Justice Minor at Shady Grove

The Universities at Shady Grove
9636 Gudelsky Drive
5105 Camille Kendall Academic Center (Building III)
Rockville, MD 20850
Phone: 301-738-6307
ccjsusg@umd.edu
shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice (https://www.shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice/)

Program Director: Wendy Stickle, Ph.D.

The Minor in Criminal Justice offers non-CCJS majors at Shady Grove the opportunity to learn more about the criminal justice system and the challenges it faces. Students who complete the minor will have a better understanding of how the criminal justice system, including police, courts, and corrections, operates, its strengths and weaknesses. Students will also be exposed to emerging topics such as forensics, homeland security, elder abuse and human trafficking.

Program Learning Outcomes

1. Students will demonstrate understanding of the three pillars of our criminal justice system - courts, policing, and corrections
2. Students will demonstrate competency in understanding how criminal justice intersects with a variety of disciplines and career paths
3. Students will demonstrate an understanding of pressing challenges experienced by our criminal justice system
4. Students will demonstrate competency in their ability to read, interpret, and synthesize (in writing and/or orally) important research related to the criminal justice system

REQUIREMENTS

Course	Title	Credits
Introductory Course		**3**
CCJS100	Introduction to Criminal Justice	

or CCJS301	Fundamentals in Criminal Justice	
Criminal Justice Requirement (Select 2)		**6**
CCJS340	Policing	
CCJS342	Corrections	
CCJS345	Courts and Sentencing	
Elective Courses		**9**
CCJS310	Criminal Investigations	
CCJS325	Slavery in the Twenty First Century: Combating Human Trafficking	
CCJS330	Contemporary Criminological Issues	
CCJS331	Contemporary Legal Policy Issues	
CCJS346	Domestic Violence	
CCJS352	Drugs and Crime	
CCJS358	Special Topics in Study Abroad III	
CCJS360	Victimology	
CCJS370	Race, Crime and Criminal Justice	
CCJS418	Seminar in Criminology and Criminal Justice	
CCJS432		
CCJS440	Security Administration	
CCJS453	White Collar and Organized Crime	
CCJS461	Psychology of Criminal Behavior	
CCJS498	Selected Topics in Criminology and Criminal Justice	
Total Credits		**18**

College of Information Studies, Maryland's iSchool at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Biomedical Sciences and Engineering (BSE) Education Facility – Office 4109
Rockville, MD 20852
Phone: 301-738-6243
USGInfoSci@umd.edu (usginfosci@umd.edu)
ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/)
shadygrove.umd.edu/academics/degree-programs/bs-information-science-bsis (https://shadygrove.umd.edu/academics/degree-programs/bs-information-science-bsis/)

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The University of Maryland College of Information Studies, also known as the UMD iSchool (https://ischool.umd.edu), is driven by the pursuit of big ideas and new discoveries that empower people and inspire communities. From labs to libraries, we are combining principles of information science with cutting-edge technology to foster access to information, improve information interfaces, and expand how information is used in government, education, business, social media, and more.

Located just outside of Washington, D.C., the iSchool provides unmatched research, internship, and career opportunities with government agencies, nonprofits, and businesses that shape information science and policy.

ACADEMIC PROGRAMS

Major

- Information Science Major at Shady Grove (p. 480)

Minors

- Information Risk Management, Ethics, and Privacy Minor at Shady Grove (p. 479)
- Technology Innovation Leadership Minor at Shady Grove (p. 484)

ADVISING

Advisors will help you make informed decisions and feel confident about your plans, which will assist you in meeting your program goals. Your advisor will assist in helping you understand your degree requirements and your options, but you make the decisions, you are in charge of your education!

Please refer to your specific program to see advising information and requirements.

- Information Science Major at Shady Grove (p. 480)
  - Information Risk Management, Ethics, and Privacy Minor at Shady Grove (p. 479)
  - Technology Innovation Leadership Minor at Shady Grove (p. 484)

If you are a prospective student interested in our program and would like to schedule a pre-transfer advising appointment, please email us at usginfosci@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

Opportunities for undergraduate research experience in the iSchool's research centers become available from time to time. Participation in an on- or off-campus internship, co-op, or other experiential learning opportunity is strongly encouraged. See the Information Science program staff for information on performing research in an iSchool center or lab and contact the Campus Career Services office for assistance in obtaining off-campus positions or experiences.

Internships

Internships are not required but are strongly encouraged by the program. An internship is a real-world application of concepts and theories that students learn in the classroom. It involves students providing meaningful work in a career field that is directly related to their major and/or area of career interest. An internship is an excellent opportunity for a student to gain professional experience in the information science field, as well as build/expand their professional network. The program does not provide internship placements. However, students have access to six career/networking events throughout each academic year (at College Park and Shady Grove campuses), giving them an opportunity to meet potential employers from the field.

Students should also consult the College Park Career Center (http://careercenter.umd.edu) and the Shady Grove Career and Internship

Services Center (https://shadygrove.umd.edu/student-services/CISC/) for additional internship opportunities.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information visit their website (https://financialaid.umd.edu/).

UMD BSIS at Shady Grove students are also eligible for the scholarship programs and opportunities offered by the Center for Student Engagement and Financial Resources (https://shadygrove.umd.edu/student-services/csef/) at the Universities at Shady Grove campus.

Awards and Recognition

Dean's Award for an Outstanding iSchool Project
The Dean's Award for an Outstanding iSchool Project will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding design or development project completed for an iSchool course. Projects must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Laurence B. Heilprin Award
The Laurence B. Heilprin Award will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding paper on a topic in the library and information science that has been written for an iSchool course. Papers must be nominated by faculty and must represent outstanding work that furthers understanding by offering new insights, incorporating original research, and/or analyzing existing information in new ways.

Dr. Joan Giesecke Best Student Paper on Health Informatics Award
The Dr. Joan Giesecke Best Student Paper on Health Informatics Award will be presented to a graduate student or a group of graduate students for an outstanding paper that has been written for an iSchool course and which focuses on any aspect(s) of Health Informatics. The iSchool defines Health Informatics broadly, including any work that focuses on health information management; health information technologies; health data analytics; health-related information needs or behaviors; health librarianship, etc. Papers must be nominated by faculty and must represent outstanding work that furthers understanding by offering new insights on issues relating to Health Informatics, incorporating original research, and/or analyzing existing information in new ways.

Dean's Award for Outstanding Undergraduate Research Achievement
The Dean's Award for Outstanding Undergraduate Research Achievement will be presented to an undergraduate student or a group of undergraduate students for an outstanding research paper or project that has been completed for an iSchool course. Projects/papers must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Special Advantages and Facilities

At the iSchool, faculty and students are exploring how people access and use information. From developing smart city technology to creating new archival methods, we seek to improve the individual experience as well as to foster connected communities. At our research centers and labs, we enable discovery, creativity, problem-solving, and fun while tackling real-world challenges and developing impactful solutions.

The college operates six research centers all located at the main College Park campus: the Center for Advanced Study of Communities and Information (CASCI), the Computational Linguistics and Information Processing Lab (CLIP), the Digital Curation Innovation Center (DCIC), the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), the Trace Research and Development Center.

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), and the Maryland Institute for Technology in the Humanities (MITH) as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Research Units

The iSchool is home to a number of research centers and labs:

The Center for the Advanced Study of Communities and Information (CASCI)

Hornbake Bldg, South Wing, College Park
Phone: 301-405-2033
casci.umd.edu (https://casci.umd.edu/)

Co-Directors: Dr. Jessica Vitak, Dr. Susan Winter

The Center for the Advanced Study of Communities and Information (CASCI) is a multidisciplinary research network, based at the University of Maryland. CASCI exists to facilitate research and education that advances our understanding of the technology, information, and organization approaches needed to realize the potential of 21st-century communities to support learning, facilitate innovation, transform science and scholarship, promote economic development, and enhance individual and civic well-being.

Computational Linguistics and Information Processing (CLIP)

Phone: 301-405-6722
wiki.umiacs.umd.edu/clip (https://wiki.umiacs.umd.edu/clip/)

Director: Dr. Jordan Boyd-Graber

The Computational Linguistics and Information Processing Lab (CLIP) at Maryland creates and evaluates systems that allow computers to effectively and efficiently use human language – together with large-scale information networks – to perform tasks such as search, translation, summarization, and ontological reasoning. It is a part of the broader language science initiative at Maryland and of the University of Maryland Institute for Advanced Computer Studies (UMIACS).

Digital Curation Innovation Center (DCIC)

4110 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2033
dcic.ischool@umd.edu
dcic.umd.edu (http://dcic.umd.edu/)

Director: Dr. Richard Marciano
Assistant Director: Noah Dibert
Digitization Lab Director: Dr. Ken Heger

ARC Lab Director: Dr. Ricky Punzalan

The Digital Curation Innovation Center (DCIC) was founded to lead research and education in digital curation and foster interdisciplinary partnerships using Big Records and archival analytics through public/industry/government partnerships. DCIC sponsors interdisciplinary projects that explore the integration of archival research data, user-contributed data, and technology to generate new forms of analysis and historical research.

The Human-Computer Interaction Lab (HCIL)

2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2769
hcil-info@cs.umd.edu
hcil.umd.edu (http://hcil.umd.edu/)

Director: Dr. Niklas Elmqvist
Associate Director: Dr. Jessica Vitak
Associate Director of Research: Dr. Catherine Plaisant
Assistant Director of Technology: Dr. Evan Golub

The Human-Computer Interaction Lab (HCIL) transforms the experience people have with new technologies. From understanding user needs to developing and evaluating the technologies that support users' needs, the lab's faculty, staff, and students have been leading the way in HCI research and teaching for over 30 years. It is critical to understand how the needs and dreams of people can be reflected in future technologies. To this end, the HCIL develops advanced user interfaces and design methodology. The primary activities include collaborative research, publication, and the sponsorship of seminars and brown bag talks, workshops, and an annual symposium. The HCIL, though referred to as a lab, is actually a research center that is jointly administered by the iSchool and UMIACS, and has multiple labs, faculty, and students associated with it.

The Information Policy and Access Center (IPAC)

4121 Hornbake Bldg, South Wing, College Park
Phone: 301-405-9445
ipac.umd.edu (http://ipac.umd.edu)

Co-Directors: Dr. John Bertot, Dr. Paul Jaeger, Dr. Mega Subramaniam

The Information Policy & Access Center (iPAC) is a response to the pressing need for research on the processes, practices, policies, and social issues that govern access to information in our increasingly digital information society. We at iPAC are committed to studying what policies and/or technologies lead to equitable and inclusive information access, a digitally-ready population, an informed and engaged public, access to Internet-enabled resources and technologies, or preservation of the cultural record, among key examples.

Trace Research and Development Center

Room 2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2043
trace-info@umd.edu
trace.umd.edu (http://trace.umd.edu)

Director: Dr. Gregg Vanderheiden

The Trace Center's purpose is to apply engineering, computer science, disability studies, public policy, and information science to prevent the barriers to, and capitalize on the opportunities presented by current and emerging information and communication technologies. Our vision is of a world that is accessible and usable by people of all ages and all abilities – each experiencing ICT in a way they can understand and use. Founded in 1971, Trace has been a pioneer known for high-impact research and development, including access features implemented in computer operating systems, leadership in the development of Web Content Accessibility Guidelines, and many other accessibility standards, and techniques used to increase the accessibility of self-service kiosks in post offices, train stations, and airports. Trace is currently a leader in the development and large-scale deployment of a Global Public Inclusive Infrastructure that combines cloud computing, web, and platform services to make online information and services available for people facing accessibility barriers.

Information Risk Management, Ethics, and Privacy Minor at Shady Grove

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The 5-course Information Science undergraduate minor in Risk Management, Ethics, and Privacy is designed to prepare students to evaluate major information and big data privacy and security issues facing individuals and organizations. The curriculum will examine risks organizations face while collecting, storing, and managing information and their existing customers' and stakeholders' data. Coursework will focus on practical strategies to mitigate risks and will explore the ways emerging technologies benefit in the context of risk management, ethics, and privacy.

All courses in the Information Risk Management, Ethics, and Privacy minor are offered either in-person or virtually by the UMD Information Science program at the **Shady Grove campus location** and are available to students from both, College Park and Shady Grove, campuses.

Program Learning Outcomes

1. Perform information security risk assessment, identify potential threats, and develop threat mitigation strategies.
2. Describe individual privacy rights, related laws and regulations, and the use of information assurance technologies to support the enforcement of these rights.
3. Describe the responsibilities of all levels of users related to the threats against information systems.
4. Describe security design principles and identify security mechanisms to implement desired security principles.
5. Identify malicious activities and attacks, and recommend appropriate response capabilities.
6. Perform audit procedures, evaluate the strengths and weaknesses of security mechanisms, and develop contingency plans to address the limitations of those procedures
7. Communicate information security concepts to individuals with diverse levels of computing skills.

REQUIREMENTS

Minor Completion Requirements
In order to complete the minor, students must:

- Complete all 15 required credits.
- Achieve a minimum grade of "C-" or better in all minor courses.

- At least nine credits must be completed at the 400-level to earn the minor.
- Only six credits or two courses from the minor are allowed to satisfy a degree requirement towards your major. Please consult with your academic advisor for more information.
- Students who matriculate to the university starting in fall 2012 (freshmen and transfers) must achieve a cumulative 2.0 GPA in their minor and major courses.
- No more than 6 credits can be completed at an institution other than the University of Maryland, College Park.
- The posting of a minor on a student's official transcript is done concurrently with the posting of the bachelor's degree. Therefore, all minor classes must be completed prior to graduation.

More information about the minor declaration process can be found here - ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/admissions (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/admissions/).

Course	Title	Credits
INST364	Human-Centered Cybersecurity	3
INST366	Privacy, Security and Ethics for Big Data	3
INST455	Information Assurance and Compliance	3
INST456	(Risk Management Leadership in the Information Age)	3
INST461	Emerging Technologies and Risk Management	3
Total Credits		**15**

ADVISING

Admission and advising for the Information Risk Management, Ethics, and Privacy minor is managed by the UMD Information Science undergraduate team at the Universities at Shady Grove campus (Rockville, MD).

Please note that advising questions related to how the Minor courses may count towards degree requirements or other program requirements should be directed to a student's academic advisor.

If you have any questions about this minor, please email usginfosci@umd.edu.

Information Science Major at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Biomedical Sciences and Engineering (BSE) Education Facility – Office 4109
Rockville, MD 20852
Phone: 301-738-6243
USGInfoSci@umd.edu
ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/)
shadygrove.umd.edu/academics/degree-programs/bs-information-science-bsis (https://shadygrove.umd.edu/academics/degree-programs/bs-information-science-bsis/)

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The University of Maryland College of Information Studies, also known as the UMD iSchool (https://ischool.umd.edu/), is driven by the pursuit of big ideas and new discoveries that empower people and inspire communities. From labs to libraries, we are combining principles of information science with cutting-edge technology to foster access to information, improve information interfaces, and expand how information is used in government, education, business, social media, and more.

Located just outside of Washington, D.C., the iSchool provides unmatched research, internship, and career opportunities with government agencies, nonprofits, and businesses that shape information science and policy.

The Major

The field of information science, particularly in an iSchool, is a field concerned with the intersections of information, people and technology. It is an interdisciplinary field, drawing from other areas of study such as computer science, management, social science, education, and the humanities, but with a focus on individual and institutional users of information and their information needs. Information Science students gain the knowledge and the skills for creating information systems, resources, and services that help address society's pressing needs in a variety of contexts and in a variety of private and public sector positions, ranging from financial services to healthcare; from information technology to consulting; and from education to cultural institutions. Undergraduate courses offered by this college may be found under the acronym: INST.

Starting in Fall 2018, UMD iSchool offers the Bachelor of Science in Information Science (BSIS) program at the Universities at Shady Grove (USG) (https://www.shadygrove.umd.edu/) campus, as well as the College Park campus.

Qualified transfer students are admitted to the BSIS at Shady Grove program as a cohort group. Students complete their degree over four consecutive semesters as full-time students, taking five 3-credit courses per semester, and graduate with a Bachelor of Science in Information Science degree. The BSIS program at Shady Grove is a cohort program with a pre-set class schedule to ensure admitted students are able to complete their degree in four consecutive semesters.

The BSIS at Shady Grove program offers outstanding nationally recognized faculty, uniquely qualified for excelled learning classrooms, academic support, valuable financial resources, career advising, and various student engagement and leadership opportunities.

Admission Requirements

Please note that admission into the BSIS at Shady Grove program is during the fall semesters only.

To be considered for admission to the BSIS program at Shady Grove, applicants must complete the following admission requirements:

1. Minimum 2.5 cumulative GPA (preferred, but may vary based on the overall application pool)
2. Have successfully (with a grade "C-" or better) completed the following BSIS benchmarks or their equivalents:
   - MATH 115 - Precalculus (or higher)
   - PSYC 100 - Intro to Psychology

- STAT 100 - Elementary Statistics
- INST 126 - Intro to Programming

3. Have completed 60 college-level credits:
   - Have completed a two-year Associate of Arts (A.A.) or Associate of Science (A.S.) degree in information science or other related fields
     OR
   - Have completed all General Education requirements (https://academiccatalog.umd.edu/undergraduate/general-education-requirements/#text) with the Exception of Professional Writing

Program Learning Outcomes

At the completion of this program, students will be able to:

1. Demonstrate an understanding of information design and management: the interrelationships among information consumers or creators, information content, and the conduits through which information flows.
2. Apply basic principles to the design, development and management of information to meet the needs of diverse users.
3. Assess the impact of existing or emerging technologies on information practices and the flow of information.
4. Employ state-of-the-art tools and techniques to create, manage, and analyze information.
5. Demonstrate an understanding of critical issues including the security, privacy, authenticity, and integrity of information.

REQUIREMENTS

With the aid of an academic advisor, the BSIS student devises a course plan to meet the graduation requirements: ten core courses, five major electives, professional writing, and four open electives, for a total of twenty courses (60 credits). At least 45 of the 60 credits must be information studies courses taken from the College of Information Studies.

The Bachelor of Science degree will be awarded to the student who successfully completes a program of 120 undergraduate hours, with a cumulative grade point average of 2.0 on a 4.0 scale for all courses taken for undergraduate credit since matriculation into the program. A student whose cumulative grade point average at any time in the program is lower than 2.0 is automatically placed on academic probation by the College until the problem leading to probationary status has been corrected. Students have one semester to raise their GPA over 2.0.

Upon completion of all degree requirements, students will earn a Bachelor of Science (B.S.) degree from the College of Information Studies at the University of Maryland College Park.

Benchmark Courses

All BSIS at Shady Grove students need to have successfully completed (with a C- or better) all benchmark courses or their equivalents prior to taking program courses.

Course	Title	Credits
MATH115	Precalculus (or higher)	3
PSYC100	Introduction to Psychology	3
STAT100	Elementary Statistics and Probability	3
INST126	Introduction to Programming for Information Science [1]	3

[1] Other courses exist which fulfill this requirement. Please check with your advisor to make sure that a particular course fulfills this requirement before registering.

BSIS Curriculum

This program requires the completion of twenty 3-credit courses. Students are expected to follow all course prerequisites, (https://ischool.umd.edu/sites/default/files/page_files/prerequisite_list_2017_03_13.docx.pdf) course sequences, and major requirements.

Course	Title	Credits
INST Core Courses		
Select ten of the following:		30
INST301	Introduction to Information Science	
INST311	Information Organization	
INST314	Statistics for Information Science	
INST326	Object-Oriented Programming for Information Science	
INST327	Database Design and Modeling	
INST335	Organizations, Management and Teamwork	
INST346	Technologies, Infrastructure and Architecture	
INST352	Information User Needs and Assessment	
INST362	User-Centered Design	
INST490	Integrated Capstone for Information Science	
INST Elective Courses		
Complete at least 15 credits of INST-coded major electives		15
Complete 12 credits of open electives		12
Professional Writing		**3**
Total Credits		**60**

ADVISING

All current BSIS @ USG students are required to meet with an Academic Advisor prior to registration for each academic semester. Advising is available by appointment in the Biomedical Sciences and Engineering (BSE) Education Facility (the Universities at Shady Grove campus (https://www.google.com/maps/dir//universities+at+shady+grove/data=!4m6!4m5!1m1!4e2!1m2!1m1!1s0x89b632b6a8fe197f:0x292768fbf6722042/?sa=X&ved=2ahUKEwikzayx-8juAhUUFVkFHQXCBMIQ9RcwDnoECBYQBQ)), room 4109. Your Academic Advisor will help you make informed decisions and feel confident about your plans, which will assist you in meeting your program goals. Your advisor will assist in helping you understand your degree requirements and your options, but you make the decisions, you are in charge of your education!

If you are a prospective student interested in our program and would like to schedule a pre-transfer advising appointment, please email us at usginfosci@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

Opportunities for undergraduate research experience in the iSchool's research centers become available from time to time. Participation in an on- or off-campus internship, co-op, or other experiential learning opportunity is strongly encouraged. See the Information Science program staff for information on performing research in an iSchool center or lab and contact the Campus Career Services office for assistance in obtaining off-campus positions or experiences.

Internships

Internships are not required but are strongly encouraged by the program. An internship is a real-world application of concepts and theories that students learn in the classroom. It involves students providing meaningful work in a career field that is directly related to their major and/or area of career interest. An internship is an excellent opportunity for a student to gain professional experience in the information science field, as well as build/expand their professional network. The program does not provide internship placements. However, students have access to six career/networking events throughout each academic year (at College Park and Shady Grove campuses), giving them an opportunity to meet potential employers from the field.

Students should also consult the College Park Career Center (http://www.careercenter.umd.edu) and the Shady Grove Career and Internship Services Center (https://shadygrove.umd.edu/student-services/CISC/) for additional internship opportunities.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information visit their website (https://financialaid.umd.edu/).

UMD BSIS at Shady Grove students are also eligible for the scholarship programs and opportunities offered by the Center for Student Engagement and Financial Resources (https://shadygrove.umd.edu/student-services/csef/) at the Universities at Shady Grove campus.

Awards and Recognition

Dean's Award for an Outstanding iSchool Project
The Dean's Award for an Outstanding iSchool Project will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding design or development project completed for an iSchool course. Projects must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Laurence B. Heilprin Award
The Laurence B. Heilprin Award will be presented to an iSchool student or a group of students (which includes at least one iSchool student) for an outstanding paper on a topic in the library and information science that has been written for an iSchool course. Papers must be nominated by faculty and must represent outstanding work that furthers understanding by offering new insights, incorporating original research, and/or analyzing existing information in new ways.

Dr. Joan Giesecke Best Student Paper on Health Informatics Award
The Dr. Joan Giesecke Best Student Paper on Health Informatics Award will be presented to a graduate student or a group of graduate students for an outstanding paper that has been written for an iSchool course and which focuses on any aspect(s) of Health Informatics. The iSchool defines Health Informatics broadly, including any work that focuses on health information management; health information technologies; health data analytics; health-related information needs or behaviors; health librarianship, etc. Papers must be nominated by faculty and must represent outstanding work that furthers understanding by offering new insights on issues relating to Health Informatics, incorporating original research, and/or analyzing existing information in new ways.

Dean's Award for Outstanding Undergraduate Research Achievement
The Dean's Award for Outstanding Undergraduate Research Achievement will be presented to an undergraduate student or a group of undergraduate students for an outstanding research paper or project that has been completed for an iSchool course. Projects/papers must be nominated by a faculty member(s) and must represent outstanding work that furthers understanding by offering new insights into development or design or displays excellence in applying existing state-of-the-art methods and knowledge.

Special Advantages and Facilities

At the iSchool, faculty and students are exploring how people access and use information. From developing smart city technology to creating new archival methods, we seek to improve the individual experience as well as to foster connected communities. At our research centers and labs, we enable discovery, creativity, problem-solving, and fun while tackling real-world challenges and developing impactful solutions.

The college operates six research centers all located at the main College Park campus: the Center for Advanced Study of Communities and Information (CASCI), the Computational Linguistics and Information Processing Lab (CLIP), the Digital Curation Innovation Center (DCIC), the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Trace Research and Development Center.

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), and the Maryland Institute for Technology in the Humanities (MITH) as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Research Units

The iSchool is home to a number of research centers and labs:

The Center for the Advanced Study of Communities and Information (CASCI)

Hornbake Bldg, South Wing, College Park
Phone: 301-405-2033
casci.umd.edu (https://casci.umd.edu/)

Co-Directors: Dr. Jessica Vitak, Dr. Susan Winter

The Center for the Advanced Study of Communities and Information (CASCI) is a multidisciplinary research network, based at the University of Maryland. CASCI exists to facilitate research and education that advances our understanding of the technology, information, and organization approaches needed to realize the potential of 21st-century communities to support learning, facilitate innovation, transform science

and scholarship, promote economic development, and enhance individual and civic well-being.

Computational Linguistics and Information Processing (CLIP)

Phone: 301-405-6722
wiki.umiacs.umd.edu/clip/index.php (https://wiki.umiacs.umd.edu/clip/)

Director: Dr. Jordan Boyd-Graber

The Computational Linguistics and Information Processing Lab (CLIP) at Maryland creates and evaluates systems that allow computers to effectively and efficiently use human language – together with large-scale information networks – to perform tasks such as search, translation, summarization, and ontological reasoning. It is a part of the broader language science initiative at Maryland and of the University of Maryland Institute for Advanced Computer Studies (UMIACS).

Digital Curation Innovation Center (DCIC)

4110 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2033
dcic.ischool@umd.edu
dcic.umd.edu (http://dcic.umd.edu/)

Director: Dr. Richard Marciano
Assistant Director: Noah Dibert
Digitization Lab Director: Dr. Ken Heger
ARC Lab Director: Dr. Ricky Punzalan

The Digital Curation Innovation Center (DCIC) was founded to lead research and education in digital curation and foster interdisciplinary partnerships using Big Records and archival analytics through public/industry/government partnerships. DCIC sponsors interdisciplinary projects that explore the integration of archival research data, user-contributed data, and technology to generate new forms of analysis and historical research.

The Human-Computer Interaction Lab (HCIL)

2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2769
hcil-info@cs.umd.edu
hcil.umd.edu (http://hcil.umd.edu/)

Director: Dr. Niklas Elmqvist
Associate Director: Dr. Jessica Vitak
Associate Director of Research: Dr. Catherine Plaisant
Assistant Director of Technology: Dr. Evan Golub

The Human-Computer Interaction Lab (HCIL) transforms the experience people have with new technologies. From understanding user needs to developing and evaluating the technologies that support users' needs, the lab's faculty, staff, and students have been leading the way in HCI research and teaching for over 30 years. It is critical to understand how the needs and dreams of people can be reflected in future technologies. To this end, the HCIL develops advanced user interfaces and design methodology. The primary activities include collaborative research, publication, and the sponsorship of seminars and brown bag talks, workshops, and an annual symposium. The HCIL, though referred to as a lab, is actually a research center that is jointly administered by the iSchool and UMIACS, and has multiple labs, faculty, and students associated with it.

The Information Policy and Access Center (IPAC)

4121 Hornbake Bldg, South Wing, College Park
Phone: 301-405-9445
ipac.umd.edu (http://ipac.umd.edu)

Co-Directors: Dr. John Bertot, Dr. Paul Jaeger, Dr. Mega Subramaniam

The Information Policy & Access Center (iPAC) is a response to the pressing need for research on the processes, practices, policies, and social issues that govern access to information in our increasingly digital information society. We at iPAC are committed to studying what policies and/or technologies lead to equitable and inclusive information access, a digitally-ready population, an informed and engaged public, access to Internet-enabled resources and technologies, or preservation of the cultural record, among key examples.

Trace Research and Development Center

Room 2117 Hornbake Bldg, South Wing, College Park
Phone: 301-405-2043
trace-info@umd.edu
trace.umd.edu (http://trace.umd.edu/)

Director: Dr. Gregg Vanderheiden

The Trace Center's purpose is to apply engineering, computer science, disability studies, public policy, and information science to prevent the barriers to, and capitalize on the opportunities presented by current and emerging information and communication technologies. Our vision is of a world that is accessible and usable by people of all ages and all abilities – each experiencing ICT in a way they can understand and use. Founded in 1971, Trace has been a pioneer known for high-impact research and development, including access features implemented in computer operating systems, leadership in the development of Web Content Accessibility Guidelines, and many other accessibility standards, and techniques used to increase the accessibility of self-service kiosks in post offices, train stations, and airports. Trace is currently a leader in the development and large-scale deployment of a Global Public Inclusive Infrastructure that combines cloud computing, web, and platform services to make online information and services available for people facing accessibility barriers.

Careers in Information Science

Many new and emerging job positions are becoming available in the Information Science field. It is expected that the demand for individuals who can fill those positions will continue to grow. iSchool graduates will be prepared to compete for these positions in all types of organizations – including government institutions, non-profits, educational and cultural institutions, and the private sector.

The InfoSci degree will prepare you to compete for a variety of positions and job functions. Listed are some of the types of positions that might be of interest to an InfoSci grad.

Interested in working with data to find novel information that can help guide strategic decision making or help others analyze data? Below are some examples of positions you could have with links to information about salary, position description, and popular employers:

- Data Analyst (https://www.payscale.com/research/US/Job=Data_Analyst/Salary/)
- Data Scientist (https://www.payscale.com/research/US/Job=Data_Scientist%2c_IT/Salary/)

- Data Steward (https://www.payscale.com/research/US/Job=Data_Steward/Salary/)
- Database Administrator (https://www.payscale.com/research/US/Job=Database_Administrator_(DBA)/Salary/)

Want to work with individuals and teams to understand their information needs and their expectations for tools and applications they will use to work with information? You might be interested in a position like:

- User Experience Designer (https://www.payscale.com/research/US/Job=User_Experience_Designer/Salary/)
- User Interface Designer (https://www.payscale.com/research/US/Job=User_Experience_Designer/Salary/)

If you are looking for a job where you work to gather, organize, disseminate information to members of an organization to address their information needs, you should look for positions like:

- Content Management Specialist (https://www.payscale.com/research/US/Job=Web_Content_Manager/Salary/)

Want to design, develop and/or deploy an information system, manage individuals and teams who do such work? You might like to work as one of the following:

- Systems Architect (https://www.payscale.com/research/US/Job=Systems_Architect/Salary/)
- Data Architect (https://www.payscale.com/research/US/Job=Data_Architect/Salary/)
- Project Manager (https://www.payscale.com/research/US/Job=Project_Manager%2c_Information_Technology_(IT)/Salary/)

Technology Innovation Leadership Minor at Shady Grove

Faculty Program Director: Galina Reitz, Ph.D.
Assistant Director: Tetyana Bezbabna

The minor in Technology Innovation Leadership will prepare students to effectively create and navigate a climate of technological innovation within an organization or team. By combining creative leadership practices with design thinking skills and analysis of sociotechnical challenges, students will tackle large-scale problems relating to technology innovation. The program will center on innovation thinking, a critical addition to business thinking, which will allow students to bring new ideas and energy to their leadership experiences and sociotechnical challenges. Coursework will examine the different ways leaders and social entrepreneurs strategically use innovative technologies and information to solve social, cultural, and environmental problems.

There are five (5) three-credit courses required as part of the minor.

All courses in the Technology Innovation Leadership minor are offered online by the UMD Information Science program through its **Shady Grove campus location** and are available to students from both College Park and Shady Grove campuses.

Program Learning Outcomes

1. Describe and analyze the principles of technology innovation, leadership, and entrepreneurship.
2. Assess the role entrepreneurship and technology innovation play in societal well-being and development.
3. Describe and apply practical, hands-on entrepreneurial and leadership skills through developing creative and innovative solutions to solve societal issues.
4. Analyze ways that Social Entrepreneurs strategically use innovative technologies and information to solve social, cultural, and environmental issues.
5. Implement best practices and knowledge to successfully lead, create, and discover while sustaining the culture of innovation in their organizations and teams.

REQUIREMENTS

Minor Completion Requirements
In order to complete the minor, students must:

- Complete all 15 required credits.
- Achieve a minimum grade of "C-" or better in all minor courses.
- At least nine credits must be completed at the 400-level to earn the minor.
- Only six credits or two courses from the minor are allowed to satisfy a degree requirement towards your major. Please consult with your academic advisor for more information.
- Students who matriculate to the university starting in fall 2012 (freshmen and transfers) must achieve a cumulative 2.0 GPA in their minor and major courses.
- No more than 6 credits can be completed at an institution other than the University of Maryland, College Park.
- The posting of a minor on a student's official transcript is done concurrently with the posting of the bachelor's degree. Therefore, all minor classes must be completed prior to graduation.

More information about the minor declaration process can be found here - ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/admissions (https://ischool.umd.edu/academics/bachelors-programs/bachelor-of-science-in-information-science-shady-grove/admissions/).

Course	Title	Credits
INST363	Fundamentals of Technology Innovation	3
INST407	Leading and Sustaining a Culture of Innovation	3
INST457	(Lean Startup)	3
INST453	Project Management for Information Science	3
INST463	(The Technology Socialpreneur)	3
Total Credits		**15**

ADVISING

Admission and advising for the Technology Innovation Leadership minor is managed by the UMD Information Science undergraduate team at the Universities at Shady Grove campus (Rockville, MD).

Please note that advising questions related to how the Minor courses may count towards degree requirements or other program requirements should be directed to a student's academic advisor.

If you have any questions about this minor, please email usginfosci@umd.edu.

Communication Major at Shady Grove

The Universities at Shady Grove

9636 Gudelsky Drive
5119 Camille Kendall Academic Center (Building III)
Rockville, MD 20850
Phone: 301-738-6208
sgcomm@umd.edu
shadygrove.umd.edu/academics/degree-programs/ba-communication (https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication/)

Program Director: Leah Waks, Ph.D.

The department offers an exciting curriculum that prepares students for academic and professional careers in business, government, health, education, social and human services, and related fields. Courses offered by the department include persuasion and social influence, rhetoric and the analysis of messages, communication and new media, digital communication, organizational communication, public relations strategies, and intercultural communication. All students in the program at Shady Grove are required to complete mandatory advising each semester.

Admission to the Major

Students interested in Communication should have an overall GPA of 2.7 or better, and a grade of "C-" or better in each of the three courses specifically required by the major (COMM250, COMM107, Statistics, or their equivalents). Applicants should also attain junior standing (56 or more transferable college credits) by the time of enrollment. For more information on admission and 1xx or 2xx-level coursework requirements, please visit the Communication website at shadygrove.umd.edu/academics/degree-programs/ba-communication (https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication/) or the Transfer Credit Services website at transfercredit.umd.edu (http://www.transfercredit.umd.edu). Requirements for the major are as follows:

1. Complete one of the following courses with a grade of "C-" or better: BMGT230, CCJS200, EDMS451, PSYC200, SOCY201, STAT100 or equivalent.
2. Complete COMM107, COMM200, COMM230, or equivalent with a grade of "C-" or better
3. Complete COMM250 or equivalent with a grade of "C-" or better
4. A cumulative GPA of 2.7 or better

Students may repeat only one of the gateway courses and that may be repeated only once in their attempt to meet the requirements.

Transfer Students

Internal and external transfer students who meet the gateway requirements specified above and have a cumulative GPA of 2.7 in all college-level coursework may apply to the program.

Appeals

All students may appeal admission decisions. Those students denied admission may appeal to the university's Office of Undergraduate Admissions.

Program Learning Outcomes

Upon completion of the degree program in Communication, students should be able to demonstrate the following knowledge and skills:

1. An ability to distinguish among a variety of theoretical approaches in the communication discipline and use them appropriately and effectively in academic work.
2. An ability to conduct research and write research reports employing social scientific and/or humanistic approaches in the communication discipline.
3. An ability to argue clearly and effectively in a speech.

REQUIREMENTS

The course of study for a Communication major must satisfy all of the following requirements:

Course	Title	Credits
Oral Communication		
Select one of the following:		3
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
COMM230	Argumentation and Debate	
Modes of Communication Inquiry		
COMM250	Introduction to Communication Inquiry	3
Fundamentals of Communication Skills		
COMM130	Professional Communication and Writing	1
Select one of the following:		3
BMGT230	Business Statistics	
STAT100	Elementary Statistics and Probability	
EDMS451	Introduction to Educational Statistics	
CCJS200	Statistics for Criminology and Criminal Justice	
PSYC200	Statistical Methods in Psychology	
SOCY201	Introductory Statistics for Sociology	
Communication Studies		
Communication Theory & Principles		**6**
COMM201	Introduction to Public Relations	
COMM301	Rhetorical Theories	
COMM302	Communication Science Theories	
COMM303	Media Theory	
Research Methods		
COMM304	Communication Research Literacy	3
Select one of the following:		3
COMM305	Qualitative Communication Research Methods	
COMM306	Rhetorical Methods in Communication	
COMM307	Quantitative Methods in Communication	
Select one of the following Leadership & Social Change courses:		**3**
COMM330	Argumentation and Public Policy	
COMM385	Influence	
COMM420	Theories of Group Discussion	
COMM421	Communicating Leadership	
COMM422	Communication Management	
COMM424	Communication in Complex Organizations	
COMM425	Negotiation and Conflict Management	
COMM428	Special Topics Seminar in Dialogues and Deliberation	
COMM436	Interpersonal Arguing	
COMM448	Special Topics in Public Relations	
COMM449	Special Topics in Digital Communication	

COMM455	Speechwriting	
COMM459	Special Topics in Science Communication	
COMM461	Voices of Public Leadership in the Twentieth Century	
COMM462	Visual Communication	
COMM469	The Discourse of Social Movements	
COMM470	Listening

Notes:

- Because the department's curriculum changes over time, the department's Undergraduate Director may approve other appropriate Communication courses to meet the requirements for each track.
- Courses required for the Communication major, but taken outside COMM, may be used to satisfy general education requirements.
- Only 3 credits of COMM386 may apply toward the major.
- No course grade below the grade of "C-" may count toward the major.
- An overall GPA of 2.0 in the major is required for graduation.

OPPORTUNITIES

Undergraduate Research Experiences

Research experiences include assisting on faculty research projects, and participating in special team research projects.

Fieldwork Opportunities

To further enhance learning and career training, the department incorporates special hands-on classes such as Health Communication Campaigns, Visual Communication, and Web Design. The department also strongly promotes internship and service learning opportunities with local and state businesses and institutions, and encourages students' participation in student-run clubs.

Internships

The department's internship program helps communication majors gain professional experience, build a professional portfolio, and take the first steps toward a career. The department structures its internship program around a course, COMM386: Experiential Learning, offered each school term.

Student Societies and Professional Organizations

Social and academic activities are available to students by participating in the following student organizations: the Undergraduate Communication Association and the Lambda Pi Eta Honor Society.

Scholarships and Financial Assistance

The department offers the Chaim and Miriam Bentzlovitch Scholarship to students who exhibit academic excellence. Each year the department distributes a call for applications through e-mail.

ADVISING

Advising is available throughout the year in the Camille Kendall Academic Center, Suite 5119. Students should check Testudo (http://testudo.umd.edu) for their registration date and for any mandatory advising blocks.

FOUR YEAR PLAN

Roadmaps for all four-year plans can be found here (http://4yearplans.umd.edu). Select the College of your major to find the corresponding roadmap.

For more information on developing a four-year academic plan, please refer to the Student Academic Success-Degree Completion Policy (p. 63) section of this catalog.

Fermentation Science Major at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Rockville, MD 20850

In addition to providing competencies for several areas of work, the fermentation science major is designed specifically for certain

professional industrial careers including the fermented food, alcoholic beverage and pharmaceutical products.

The Fermentation Science major is concerned with the application of the fundamental principles of the physical, biological, and behavioral sciences and processing to understand the complex and heterogeneous materials recognized as the raw precursors or/and final food products and beverages of fermentation. The fermentation science major prepares students for careers not only in traditional food and alcoholic beverage industries but also the biotechnology fermentation industry for pharmaceutical and nutraceutical production.

Program Learning Outcomes

1. Careers and opportunities in fermentation science - Graduates of fermentation science undergraduate program will be well prepared for at least four career options in beverage (beer, wine, distilled spirits and kombucha), vegetable foods (kimchi, tempeh and miso), dairy foods (cheese and yogurt) and biotechnology industries (biofuels, pharmaceuticals and nutraceuticals) based upon their UMD fermentation science training, experience and interests.
2. Fermentation science - Graduates of the undergraduate program will be able to apply fermentation science knowledge and research to enhance fermentation process, propagation and modification of fermentation microbes, fermenter design and downstream processing including effluent treatment. Students will demonstrate mastery of the manufacturing steps involved in various fermented products and gain hands-on experience in making these products at pilot scale and evaluate their quality and safety.
3. Fermented food, feed and pharmaceuticals - Graduates of the fermentation science program will be able to correctly apply their knowledge in the use of prokaryotic and eukaryotic microorganisms in the fermentation of dairy, vegetables and fruits, meat, and grains (food), feed, and pharmaceuticals. Students will be able to describe fermenter design and scale-up, fermentation byproducts and downstream processing, and different types of fermentations.
4. Fermentation science literacy - Graduates of the program will be able to select, understand, and critically evaluate scientific studies in fermentation science disciplines such that they employ research that is applicable, timely, accurate, and useful for their fermentation production and management needs.
5. Knowledge of major issues in fermentation science - Graduates of the program will be well-versed in the issues related to fermentation science such that they contribute to societal debates around the future of farming, the use of microbes and phages in fermentation, sustainability of our fermentation industry, the worker needs, and scaling fermentation enterprises up and down to meet our growing population's fermented product needs.

REQUIREMENTS

Students enrolled in Fermentation Science Major are required to earn a grade of "C-" or better in courses applied toward satisfaction of the major. This includes all the required and elective courses.

Curriculum for the Fermentation Science Major

Course	Title	Credits
BSCI170	Principles of Molecular & Cellular Biology	3
BSCI171	Principles of Molecular & Cellular Biology Laboratory	1
BSCI223	General Microbiology	4
CHEM131	Chemistry I - Fundamentals of General Chemistry	3
CHEM132	General Chemistry I Laboratory	1
CHEM231	Organic Chemistry I	3
CHEM232	Organic Chemistry Laboratory I	1
CHEM241	Organic Chemistry II	3

NFSC450	Food and Nutrient Analysis	
NFSC498	Selected Topics	
AGST333	Crafty Beverage Crops	

[1] High-demand course. For non-major students, these seats are assigned as "first-come, first-served". Students are encouraged to register as early as possible for a seat in these courses.

Public Health Science Major at Shady Grove

The Universities at Shady Grove
University of Maryland
Public Health Science Program
9636 Gudelsky Drive
Building III
Rockville, MD 20850
Phone: 301-738-6165
jhodgson@umd.edu
Shady Grove: go.umd.edu/phsc-sg (http://go.umd.edu/phsc-sg/)

Program Director: Jennifer Hodgson, Ed.D, MPH

The Public Health Science program includes a strong curriculum in science and public health courses, such as biostatistics, epidemiology, environmental health, and global health. Students will have the opportunity for individual exploration in public health through electives, laboratory experiences, optional internships, and a culminating interdisciplinary capstone course. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health-specific writing and communication.
10. Interpret and synthesize scientific knowledge to propose evidence-based approaches and solutions to public health problems.

REQUIREMENTS

For full details of degree requirements, please view the Shady Grove curriculum online at: http://sph.umd.edu/department/phssg/shady-grove-curriculum (http://sph.umd.edu/department/phssg/shady-grove-curriculum/).

In order to graduate with a Bachelor of Science degree in Public Health Science, students must complete 120 credits, 74 of which are specific to the Public Health Science degree. Students must earn a minimum grade of C- or higher in all Public Health Science major-required coursework.

Course	Title	Credits
Scientific Foundation Courses

Public Health Science Options Courses [1]		**12**
Total Credits		**74**

[1] The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged

to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options: https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018 (https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018/)

ADVISING

Major academic advising is mandatory for Public Health Science students at Shady Grove each semester. Academic advising is by appointment only and can be scheduled at: go.umd.edu/phscadvising (http://go.umd.edu/phscadvising/).

FOUR YEAR PLAN

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

The Robert H. Smith School of Business at Shady Grove

The Universities at Shady Grove
9630 Gudelsky Drive
Building II, Suite 2202
Rockville, MD 20850
Phone: 301-738-6079
rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/)

Director of Programs at Shady Grove: Luke Glasgow

The Robert H. Smith School of Business is an internationally recognized leader in management education and research for the digital economy. The faculty are scholars, teachers, and professional leaders with a commitment to superior education in business and management, specializing in accounting, finance, information systems, operations management, management and organization, marketing, logistics, transportation and supply chain management. The Smith School is accredited by AACSB International - The Association to Advance Collegiate Schools of Business, the premier accrediting agency for bachelor's, master's and doctoral degree programs in business administration and accounting, aacsb.edu (http://www.aacsb.edu/).

The Smith School of Business offers students the opportunity to complete the junior-senior curriculum in three majors at the Shady Grove campus in Rockville, MD including:

1. Accounting;
2. Management; and
3. Marketing.

For details on the majors offered at Shady Grove visit rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/).

Admission Requirements

All students applying for admission to the Robert H. Smith School of Business as transfer students, whether internal transfers already enrolled at UMD or external transfer students entering the university for the first time, will be subject to competitive admission for a limited number of spaces in the Smith School at either the College Park or Shady Grove location. For complete details on admission to the Smith School at Shady Grove visit rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/).

Statement of Policy on Transfer of Credit from Community Colleges

It is the practice of the Smith School of Business to consider for transfer from a regionally accredited community college only the following courses in business administration: an introductory business course, business statistics, or elementary accounting. Thus, it is anticipated that students transferring from another regionally accredited institution to Shady Grove will have devoted the major share of their academic effort below the junior year to the completion of basic requirements in the liberal arts. A total of 60 semester hours from a community college may be applied toward a degree from the Smith School of Business.

Other Institutions

The Smith School of Business normally accepts transfer credits from regionally accredited four-year institutions. Junior- and senior-level business courses are accepted from colleges accredited by the Association to Advance Collegiate Schools of Business (AACSB). Junior- and senior- level business courses from other than AACSB-accredited schools are evaluated on a course-by-course basis to determine transferability.

The Smith School of Business requires that at least 50 percent of the business and management credit hours required for a business degree be earned at the University of Maryland, College Park.

Additional Information

For more information on the Smith School of Business undergraduate program at Shady Grove visit rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/).

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements/ Degree Options

Upon completion of all degree requirements, students at the Smith School at Shady Grove will earn a Bachelor of Science (B.S.) degree from the Robert H. Smith School of Business at the University of Maryland, College Park. In addition, the Smith School of Business awards Master of Business Administration (M.B.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Information concerning admission to

the M.B.A. or M.S. program is available at rhsmith.umd.edu (http://www.rhsmith.umd.edu/).

Summary of Bachelor of Science Degree Requirements (All Curricula)

At least 45 hours of the 120 semester hours of academic work required for graduation must be in business and management subjects. A minimum of 58 hours of the required 120 hours must be in 300- or 400-level courses. Fifty percent of the required BMGT credit hours must be completed at the Smith School of Business (College Park or Shady Grove campus). A "C-" or higher is required in all Smith School required courses, and students must have an overall combined 2.000 GPA in Smith required courses. In addition, students are required to have an overall cumulative grade point average of 2.000 (C average) in all university course work.

1. BMGT110 provides a useful introduction to business as an academic program and exposes students to potential career opportunities. As a result, this course best serves students early in their college careers. However, this particular course is redundant for students who have already begun their upper level BMGT coursework and thus, have already received more in-depth exposure to business functions. Therefore this course is only required for students who enter the Smith School as freshmen. Students who transfer to the Smith School and have not completed BMGT110 will not be required to complete this course for graduation.
2. The following courses are approved substitutes for BMGT230: BIOM301, CCJS200, ECON230, ECON321, EDMS451, GEOG305, INST and SOCY201.
3. The following courses are approved substitutes for BMGT231: BIOE372, ENEE324, ENME392, or STAT400.
4. Any course that fulfills the university's Oral Communication General Education requirement will also satisfy the Smith School's public speaking requirement.
5. 0-3 credits of approved upper-level economics courses are required by the Smith School of Business. Visit https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) to view the specific requirements for each major offered at the Smith School at Shady Grove.
6. In addition to the Smith School of Business Bachelor of Science requirements listed above, generally another 18-24 credits are required for each major. See https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) to view the specific requirements for each major offered at the Smith School at Shady Grove.

Accounting Major at Shady Grove

Director of Programs at Shady Grove: Luke Glasgow

Go here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

Accounting, in a limited sense, is the analysis, classification, and recording of financial events and the reporting of the results of such events for an organization. In a broader sense, accounting consists of all financial systems for planning, controlling, and appraising performance of an organization. Accounting includes among its many facets: financial planning, budgeting, accounting systems, financial management controls, financial analysis of performance, financial reporting, internal and external auditing, and taxation. The accounting curriculum provides an educational foundation for careers in public accounting and management, whether in private business organizations, government or nonprofit agencies, or consulting. Two tracks are provided: The Public Accounting Track leading to the CPA (Certified Public Accounting) and the Management Accounting/Consulting Track. ***Please note:*** Currently, only the Public Accounting track is available.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.

9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Prepare a multiple-step income statement from a trial balance and supporting documentation.
12. Understand the impact of audit objectives and risk of material misstatement in planning an audit.
13. Define audit engagement procedures and where each procedure is used appropriately.
14. Identify the factors that an auditor should consider in order to determine the correct format and contents of an audit opinion.

[1] Required for CPA in Maryland

In addition to the major requirements listed above, please consult the list of College Requirements (p. 289) or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

The basic educational requirements of the Maryland State Board of Public Accountancy to sit for the CPA examination are a baccalaureate or higher degree with a major in Accounting or with a non-accounting degree supplemented by course work the Board determines to be substantially the equivalent of an Accounting major. Students planning to take the CPA examination for certification and licensing outside Maryland should determine the educational requirements for that state and arrange their program accordingly.

120 credits are required to complete a degree in Accounting; however, students seeking to become a Certified Public Accountant (CPA) must meet the certification requirements for the state in which they wish to practice. Most states, including Maryland, require a minimum of 150 credit hours of college education to fulfill the education requirements to obtain a CPA license. However many of these states, including Maryland, will allow applicants to take the CPA exam prior to earning 150 credits if they have accumulated 120 credits, earned a degree, and meet specified education requirements. In addition, do not assume the course and credit requirements for the accounting major are sufficient for all states. For details on various states' CPA requirements visit www.nasba.org (http://www.nasba.org).

FOUR YEAR PLAN

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/academics/academic-majors/) for roadmaps for four-year plans in the Robert H. Smith School of Business.

Management Major at Shady Grove

Director of Programs at Shady Grove: Luke Glasgow

Go here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

The Robert H. Smith School of Business has long been recognized as a leading undergraduate program in management and entrepreneurship. Both these programs regularly appear highly ranked in a variety of publications. The management major focuses on leadership and entrepreneurship to engage students in critical thinking and problem solving applicable in many careers.

The core of the management major offers two courses in leadership and negotiations. These core courses emphasize skills students need in a changing employment environment. As more jobs become automated, managing people and solving tough problems will become increasingly important to attaining meaningful employment. The core classes in the management major provide education in problem solving, leadership, and effective teamwork. The demanding and fast-paced careers of the future will require students to demonstrate a strong ability to communicate and solve problems in a team under extreme pressure. The core major classes prepare students for careers in areas such as strategy, information technology, operations, healthcare administration, and organizational transformation.

There are a number of potential career paths stemming from the management major, such as consulting analyst, financial advisor, human resource management, nonprofit management, rotational leadership programs, and entrepreneur, including social entrepreneurship. These are grouped into two major areas of focus, leadership & innovation and entrepreneurship. Both areas focus on critical thinking and problem solving, and allow students to create a major tailored to their future goals.

The Management & Organization department has relationships with a number of centers of excellence, including the Dignman Center for Entrepreneurship and the Center for Leadership, Innovation and Change which provide relationships with professors, researchers, and organizations for students interested in enhancing their course of study with co-curriculuar opportunities.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Develop and implement a concrete, relevant, and practical action plan based on a set of leadership approaches and skills selected best for a given management problem.
12. Identify key strengths and weaknesses of students' leadership skills and abilities based on the assessment data and self-reflection.
13. Apply negotiation concepts to prepare for and execute an actual negotiation based on strategic and tactical choices made best for a given situation.
14. Identify key strengths and weaknesses of students' negotiation skills and styles based on the assessment data and self-reflection.

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration of the Management major are as follows:

Course	Title	Credits
College Requirements (p. 289)		
BMGT363	Leadership and Teamwork in Organizations	3
BMGT362	Negotiations	3
Select four of the following:		12
BMGT360	Strategic Management of Human Capital	
BMGT366	Growth Strategies for Emerging Companies	
BMGT461	Entrepreneurship	
BMGT463	Cross-cultural Challenges in Business	
BMGT466	Global Business Strategy	
BMGT468	Special Topics in Management and Organization [1]	
BMGT469	Management and Organization Short-term Study Abroad [1]	
Total Credits		**18**

[1] A maximum combined total of 6 credits of BMGT468 and BMGT469 coursework can satisfy Management major requirements.

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

FOUR YEAR PLAN

Marketing Major at Shady Grove

Director of Programs at Shady Grove: Luke Glasgow

Go here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) for more information about the Robert H. Smith School

of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

The goal of marketing is to satisfy all the stakeholders of the firm - employees, dealers, stockholders, and customers - by seeing that quality goods and services are developed and provided at fair prices and in a way that benefits the community and society. World-class competition has forced businesses to develop marketing programs that are as good as the best. This means getting closer to the customer, joining other organizations to create value for the consumer, and designing integrated distribution and communication programs that provide a seamless flow from producers to consumers. Pricing, communication/promotion, product/service, and distribution activities inherent in the development of marketing programs are applicable to non-profit organizations, business-to-business organizations, and firms that sell to ultimate consumers.

Many types of careers are available to the marketing major. These include, but are not limited to: sales, advertising, retailing, product/service management, and marketing research. Because of the many different employment opportunities in marketing, many marketing electives are offered along with three core courses required of all marketing majors - consumer analysis, marketing research, and marketing strategy.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Apply consumer behavior concepts to solve real world issues in marketing.
12. Analyze survey data using appropriate tools and techniques and apply findings to resolve marketing issues.
13. Formulate STP plans and apply the proper alignment of 4Ps of marketing to solve real world problems in business.

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration in Marketing are as follows:

Course	Title	Credits
College Requirements (p. 289)		
BMGT451	Consumer Analysis	3
BMGT452	Marketing Research Methods	3
BMGT457	Marketing Policies and Strategies	3
Select three of the following:		9
BMGT352	Customer-Centric Innovation	
BMGT353	Retail Management	
BMGT357	Retailing and Marketing Internship	
BMGT372	Introduction to Logistics and Supply Chain Management	
BMGT450	Integrated Marketing Communications	
BMGT454	Global Marketing	
BMGT455	Sales Management	
BMGT458	Special Topics in Marketing (maximum of 6 credits if content differs)	
BMGT484	Digital Marketing	
Upper Level Economics Requirements		
Select one of the following:		3
ECON305	Intermediate Macroeconomic Theory and Policy	
ECON306	Intermediate Microeconomic Theory & Policy	
ECON330	Money and Banking	
ECON340	International Economics	
Total Credits		**21**

Note: Students who have completed ECON325 and ECON326 can substitute these courses for ECON305 and ECON306 respectively.

In addition to the major requirements listed above, please consult "Colleges and Schools" on this site or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

Office of Undergraduate Studies

2110 Marie Mount Hall
Phone: 301-405-9363
ugst@umd.edu
ugst.umd.edu (http://ugst.umd.edu)

Associate Provost and Dean: William A. Cohen, Ph.D.

Through its many programs, the Office of Undergraduate Studies serves all undergraduate students at the university, and the faculty and staff that support the undergraduate mission of the campus. The Office of Undergraduate Studies is the primary division at the University of Maryland responsible for leadership and oversight of undergraduate curricular and co-curricular education. The responsibilities of Undergraduate Studies include:

- Academic advising policy and assessment
- Academic enrichment programs
- Academic planning and policy
- Enrollment management
- General Education
- Interdisciplinary and individual studies programs
- Living-learning programs
- University learning outcomes assessment

Academic Common Market

2110 Marie Mount Hall
Phone: 301-405-9363
ugst.umd.edu/acmnotice.pdf (http://ugst.umd.edu/acmnotice.pdf)

Special Notice

August 23, 2012
(Updated April 12, 2014)

The University of Maryland, College Park has discontinued participation in the Academic Common Market.

The last ACM certifications the University of Maryland, College Park accepted were those specifying spring 2013 as the first term of enrollment in the certified major. The University of Maryland, College Park will not accept ACM certifications for later semesters. Only students with ACM certifications for spring 2013 or earlier semesters and who enroll in the certified program at UMD in their ACM certified semester may continue to receive the ACM in-state tuition benefit.

Transition Plans

Fall 2012 and Earlier

Undergraduate students approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of fall 2012 or earlier may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Undergraduate students admitted for fall 2012 who deferred their admission to spring 2013 or fall 2013 will be treated according to the rules for undergraduate students admitted fall 2012. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Graduate students approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of fall 2012 or earlier may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the graduate degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified program.

Graduate students admitted for fall 2012 who deferred their admission to spring 2013 or fall 2013 will be treated according to the rules for graduate students admitted fall 2012. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Spring 2013

Undergraduate students, who receive ACM certification for spring 2013 and who are admitted to and enrolled in their approved ACM inventory majors for spring 2013, may receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Undergraduate students admitted for spring 2013 who deferred their admission to fall 2013 or spring 2014 will be treated according to the rules for undergraduate students admitted spring 2013. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain

permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Graduate students, who receive ACM certification for *spring 2013* and who are admitted to and enrolled in their approved ACM inventory majors for spring 2013, may receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the graduate degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified program.

Graduate students admitted for spring 2013 who deferred their admission to fall 2013 or spring 2014 will be treated according to the rules for undergraduate students admitted spring 2013. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Air Force Reserve Officer Training Corps (AFROTC)

0121 Reckord Armory
Phone: 301-314-3242
afrotcdet330@umd.edu
afrotc.umd.edu (http://afrotc.umd.edu)

Director: Colonel Steven Jantz

The Air Force Reserve Officer Training Corps (AFROTC) provides students the opportunity to earn a commission as a second lieutenant in the United States Air Force while completing their undergraduate degree. It is highly recommended that students seeking a commission contact the AFROTC department for full program details before registering for classes.

Program Requirements

AFROTC is designed to be a 4-year experience, but the schedule can be compressed (minimum of 3 years) for highly qualified candidates. A full four-year program is composed of the two-year General Military Course (GMC) and the two-year Professional Officer Course (POC). Students wishing to pursue a military career must successfully meet all cadet standards each semester including a Leadership Laboratory (ARSC059) course and fitness regimen. Non-scholarship GMC students incur no military service obligation and may elect to discontinue the program at any time. After successfully completing the 2-year GMC portion of the program, cadets apply for positions as POC in a selection process. After a summer Field Training program, POC continue development of leadership skills and the study of United States defense policy. Additionally, POC students contract into the Department of the Air Force and begin receiving a monthly stipend.

Scholarships and Incentives

If the Air Force is offering scholarships, members of AFROTC in all degree programs are eligible to compete for in-college scholarships based on a competitive selection process. Scholarship recipients receive money for tuition up to $18,000 per year, a book allowance (currently $900/year), and a monthly allowance from $300 to $500, depending on the student's AFROTC year.

Army Reserve Officer Training Corps (ROTC)

2100 Reckord Armory
Phone: 301-314-9939
armyrotc@umd.edu
armyrotc.umd.edu (http://armyrotc.umd.edu)

Director: Lieutenant Colonel Marisa Pace

The Army Reserve Officer Training Corps offers students the opportunity to develop leadership skills plus earn a commission as a Second Lieutenant in the United States Army (Active, Reserve, or National Guard) while completing their undergraduate or graduate degree.

Four-Year Program

The four-year program is composed of the Basic Leadership Course and the Advanced Leadership Course. The first two years (Basic Course) consist of a general introduction to military customs and courtesy, soldier skills, communication skills, personal development, and introductory leadership skills. Students enrolled in the Basic Course *incur* ***no obligation*** and *may discontinue the program at any time.* In the final two years (Advanced Course), students concentrate on developing leadership skills in organizations. Students must have permission of the Director of Army ROTC to enroll in the advanced course. The Advanced Course requires four weeks of field training at Fort Knox, Kentucky (Advanced Camp) the summer after their junior year.

Two-Year Program

The two-year program is available to students with two years remaining in their university studies. The academic requirements for this program are identical to the Advanced Course in the four-year program, and students are eligible to receive the same benefits. Prerequisites for the Advanced Course must be fulfilled prior to enrollment. The following options exist to help students fulfill Basic Course requirements before enrolling in the Advanced Course:

1. Basic Camp: Students may attend a five week adventure challenge course at Fort Knox, Kentucky. Students should start the application process for this option no later than January of their sophomore year.
2. Veterans: Students with prior military service.
3. Basic Training: Constructive credit will be awarded for students who have completed Basic Training prior to starting their junior year.
4. JROTC: Students who completed 3-4 years of JROTC in High School.
5. Service Academy or Senior ROTC: Two year attendance at a service academy or successful completion of two years in a sister service Senior ROTC training can qualify for constructive credit.

Scholarships and Incentives

Army ROTC Scholarships are available for four, three or two years on a competitive basis. The scholarships are based solely on merit, not financial need. Scholarship awardees may apply benefits for either Room and Board or Tuition and Mandatory Fees. An additional book allowance

($1,200 a year) and a non-taxable monthly stipend of $420 is also given to contracted Cadets.

Army ROTC students/cadets may compete for summer training opportunities to include Airborne, Air Assault, Sapper School, Combat Diver Qualification, or Northern Warfare Training during the summer and winter breaks.

Curriculum

Freshman Year

Total Credits 24			

Basic Leadership Course
Advanced Leadership Course
Military
History

Cadets must complete an approved course in Military History prior to graduation

All ROTC classes are *open to any student* for college credit, whether or not he or she is considered a cadet in the Army ROTC program. Students who complete the Advanced Course requirements (ARMY301,ARMY302,ARMY401,ARMY402 and Military History) may be conferred a Minor in Leadership Studies.

Carillon Communities

2110 Marie Mount Hall
Phone: 301-314-9402
carillon@umd.edu
carillon.umd.edu (http://carillon.umd.edu)

Assistant Director: Melissa Del Rios

Carillon Communities is a one year living-learning community with a focus on teamwork and creative problem solving. Students complete a 3-credit I-Series course related to a community theme and a 1-credit Carillon Studio course using skills from the design field to map their academic plan. The admission process for this opportunity is managed by the Admissions Office.

College Park Scholars Program

1125 Cumberland Hall
Phone: 301-314-2777
askcpscholars@umd.edu
scholars.umd.edu (http://scholars.umd.edu)

Executive Director: Marilee Lindemann, Ph.D.

College Park Scholars is a nationally acclaimed living-learning program that offers academically talented students the interpersonal benefits of a small college paired with the intellectual advantages of a major research university. Each of its 12 programs is based on a theme that allows students to explore complex issues from an interdisciplinary perspective. Admission to the two-year program is selective and by invitation; students who successfully complete the program earn an academic citation.

In Scholars, students live together with others in their program, and they take one or two classes together each semester. Classwork includes hands-on learning opportunities and co-curricular experiences, such as program field trips and Scholars-wide activities. (Several program faculty also lead global learning experiences during the winter term or summer semester.) Finally, program faculty maintain offices in the Cambridge Community residence halls, where Scholars students live. This framework has been deliberately designed to provide students immediate access to a supportive community, close faculty connections, and opportunities to learn and grow that other students typically don't get until they're upperclassmen.

College Park Scholars consists of the following 12 programs:

- Arts (http://www.scholars.umd.edu/programs/arts/)
- Business, Society and the Economy (http://www.scholars.umd.edu/programs/bse/)
- Environment, Technology and Economy (http://www.scholars.umd.edu/programs/ete/)
- Global Public Health (http://www.scholars.umd.edu/programs/gph/)
- International Studies (http://www.scholars.umd.edu/programs/is/)
- Justice and Legal Thought (http://www.scholars.umd.edu/programs/jlt/)
- Life Sciences (http://www.scholars.umd.edu/programs/ls/)
- Media, Self and Society (http://www.scholars.umd.edu/programs/mss/)
- Public Leadership (http://www.scholars.umd.edu/programs/pl/)
- Science, Discovery and the Universe (http://www.scholars.umd.edu/programs/sdu/)
- Science and Global Change (http://www.scholars.umd.edu/programs/sgc/)
- Science, Technology and Society (http://www.scholars.umd.edu/programs/sts/)

Federal Fellows Program

2407 Marie Mount Hall
Phone: 301-314-0261
federalfellows@umd.edu
federalfellows.umd.edu (http://federalfellows.umd.edu)

Director: Joan Burton, Ph.D.

The Federal Fellows Program is a selective, yearlong program offered within the Office of Undergraduate Studies, in conjunction with other colleges, programs and campus initiatives. The program brings together students from all disciplines to learn, discuss, and explore issues related to federal policy, and galvanizes them toward public service

careers. Rising sophomores, juniors, and seniors with strong academic backgrounds and an interest in exploring the possibility of public service are encouraged to apply.

Students who successfully complete all program requirements will earn a "Federal Fellows" notation on their transcript.

The Federal Fellows Program consists of three primary components:

1. The Federal Fellows Seminar: FGSM310, FGSM320, FGSM330, or FGSM340 (3 credits, fall semester). A choice of seminar courses, each focused on a specific theme (for example, political engagement and advocacy, public health policy, homeland and national security policy, or energy and environmental policy). The seminars benefit from the diversity of students who participate in the program. The small setting allows students to bring knowledge from their disciplinary focus into the discussion. Taught by expert practitioners, the seminars examine the policy-making process and discuss vital current issues within each theme. Guest speakers provide real-world perspectives on how governments and other actors create and implement policy.
2. The Internship: FGSM398 (3-9 credits, spring semester). The Federal Fellows experiential learning course offers credit for an internship with a federal agency or related organization (including the White House, NGOs, etc.). In class, students work on professional development and reflect on their internship experiences through journal assignments. With permission, students may complete the internship under the course number for internships in the student's major or other programs.
3. Supporting course work: Two regular UM courses, approved by the Federal Fellows program, that complement the Federal Fellows mission (6 credits). With permission, students may apply courses completed prior to the Federal Fellows year.

Students also participate in Federal Fellows Program activities including visits to Capitol Hill and federal agencies, conversations with leaders in public policy, professional development workshops, one-on-one advising check-ins, and an end-of-the-year reception. The program offers a lively, engaged community of students and supportive alumni.

Students in the program must have completed 45 credits by the end of the semester in which they apply and have a grade point average of 3.0 or higher. For details and application please see federalfellows.umd.edu. (http://federalfellows.umd.edu)

First Year Book Program

2110 Marie Mount Hall
firstyearbook.umd.edu (http://firstyearbook.umd.edu)

Assistant Dean: Lisa Kiely, Ph.D.

Each year since 1993, the University has selected a book for all first year students. The goal of the First Year Book Program (FYB) is to provide a shared intellectual experience for all new students along with the opportunity to discuss the book from a variety of disciplines. Courses, departmental lectures, living/learning programs, and student groups all sponsor events that complement a major address by the author and/or other important visitors to campus.

Global Fellows in Washington DC Program

2407 Marie Mount Hall
Phone: 301-314-0261
globalfellowsdc@umd.edu
globalfellowsdc.umd.edu (http://globalfellowsdc.umd.edu)

Director: Joan Burton, Ph.D.

The Global Fellows in Washington, D.C. Program is an innovative internship program designed to equip undergraduate students of all majors with the knowledge, skills, and experience to become leaders in an increasingly globalized society. The aim is to increase student involvement in and access to opportunities within the global arena. The program combines a fall academic seminar on global leadership and policy related to a specific theme with a spring internship experience in the Washington, D.C. area. Classes bring students in contact with professionals who share their knowledge, expertise, and perspectives. The spring internship placements are with international organizations, federal agencies, foreign embassies, NGOs, and non-profit organizations. The program is designed to support students of all majors and colleges. Rising sophomores, juniors, and seniors with strong academic backgrounds and an interest in the global arena are encouraged to apply. The program offers a lively, engaged community of students and supportive alumni.

Global Fellows in Washington, D.C. is a program of the Office of Undergraduate Studies, in collaboration with the College of Behavioral and Social Sciences and the Office of International Affairs, and includes stakeholders and supporters across the University. We are excited to announce a new partnership, starting Fall 2019, with the Clark School of Engineering, the College of Agriculture & Natural Resources, and the School of Public Health.

Students who successfully complete all program requirements will earn a "Global" notation on their transcript.

The Global Fellows in Washington, D.C. Program consists of four primary components:

1. The Global Fellows in Washington, D.C. Seminar: FGSM350, FGSM360, FGSM370, or FGSM390 (3 credits, fall semester). Students in the program choose from several seminar courses based in global leadership and policy and designed especially for program participants. The courses are taught by expert practitioners and provide a deep understanding of global leadership and policy related to a specific theme. Guest speakers offer additional real-world and professional perspectives.
2. The Internship: FGSM398 (3-9 credits, spring semester). The experiential internship course offered by the Global Fellows in Washington, D.C. Program enables students to earn credits for their professional experience in the global arena. Students registering for FGSM398 will provide signed confirmation of an internship position, submit guided journal entries, and complete a final reflective report on their internship experience. (Important note: Students may substitute another departmental internship course, offered in the student's major or elsewhere at the University, for FGSM398 in the Global Fellows in Washington, D.C. Program.)
3. Supporting course work: To round out the Global Fellows experience, two additional UMD courses, approved by the Global Fellows program, are required of students participating in the program. These courses complement the fall seminar and spring internship by providing greater depth and context to the academic experience (6 credits). With permission, courses completed prior to beginning the program may be used to satisfy this requirement.
4. Supplemental Activities: Throughout the year, students attend workshops and roundtable discussions and participate in off-campus

activities, including visits to Capitol Hill and federal agencies, to learn more about real-world applications. Program staff offer one-on-one consultations regarding cover letters, resumes, and interviews.

Minimum requirements: Students in the program must have completed 45 credits by the end of the semester in which they apply and have a cumulative grade point average of 3.0 or higher. For further details and application see globalfellowsdc.umd.edu (http://globalfellowsdc.umd.edu).

Global Studies

The Global Studies Minor Program provides opportunities for students from any discipline or major to study how evolving global connections affect the well-being of people throughout the world. Students in this interdisciplinary program develop an understanding and appreciation of how and why interactions across national and ethnic borders are shaped by language, culture, politics, economic development, and conflict. The program is comprised of a number of specialization tracks which address issues from the perspective of different disciplines. The tracks are:

- International Development and Conflict Management (http://globalstudies.umd.edu)
- International Engineering (http://ilp.umd.edu/coursework/)
- Global Poverty (http://arec.umd.edu/undergraduate/minors/global-poverty/)
- Global Terrorism Studies (http://start.umd.edu)

All students choose one course from a set of "signature" courses outside of their chosen track for exposure to major global issues addressed by the other Global Studies minors. The minors provide an opportunity for an experiential component within a student's elective courses, including a study abroad experience. The Global Studies Minor Program includes special activities that involve students across the minors, such as special speaker forums, participation in major events, and experiences in Washington, D.C.

Honors College

Anne Arundel Hall
Phone: 301-405-6771
honors@umd.edu
honors.umd.edu (http://honors.umd.edu)

Executive Director: Peter Mallios
Associate Directors: Stephen Blatti, Traci Dula, and Jenny Lang

The University of Maryland Honors College gives students of great promise the opportunity to encounter new ideas and experiences, to learn through inclusive community and with deep respect for others, and to explore the power of knowledge to make a difference in the world.

The Characteristics of an Honors College Graduate:
Critically self-reflective
Ethically aware
An intellectual and creative risk-taker
Collaborative
Committed to deep respect for and listening to diverse others, and values of inclusivity

Small classes and outstanding teachers encourage discussion and foster innovative thinking across academic disciplines. Honors students have exclusive access to Honors living-learning program courses and Honors versions of courses offered by the academic departments on campus.

Students in the Honors College may earn an Honors College Citation on the transcript by completing coursework and satisfying all requirements in an Honors Living-Learning Program (http://www.honors.umd.edu/livinglearning-prospstudents.html). Honors Living-Learning Programs include: ACES (http://www.aces.umd.edu/), Design Cultures & Creativity (https://dcc.umd.edu), Gemstone (http://www.gemstone.umd.edu/), Honors Humanities (http://www.honorshumanities.umd.edu/), Integrated Life Sciences (http://www.ils.umd.edu/), Interdisciplinary Business Honors (https://ibh.umd.edu/), Honors Global Communities (https://globalcommunities.umd.edu/), and University Honors (http://www.universityhonors.umd.edu/). Acceptance of first-year students into the Honors College is competitive and by invitation based on the standard application to the University of Maryland (by November 1st for best consideration for Honors College and merit scholarships).

In addition to joining an Honors College Living-Learning Program, Honors students may apply to one of over 40 Departmental Honors Programs offered by the academic departments and colleges on campus to take full advantage of advanced, discipline-based Honors coursework and research opportunities in their major area of study. Most departmental honors programs begin in the sophomore or junior year. Students in a Departmental Honors Program (http://www.honors.umd.edu/departmentalhonors.html) may earn departmental honors on the transcript and diploma.

C.D. Mote Jr. Incentive Awards Program

1103 Cole Student Activities Building
incentiveawards@umd.edu
umincentiveawards.umd.edu (http://umincentiveawards.umd.edu)

Director: Jacqueline W. Lee

The C. D. Mote, Jr. Incentive Awards Program offers full financial support to the University of Maryland to exceptional students who demonstrate academic ability, uncommon persistence and maturity in the face of challenging circumstances.

Directed toward graduates of Baltimore City, Charles County, Prince George's County and Montgomery County public high schools who demonstrate financial need, the award is more than a prestigious scholarship. At the heart of the Incentive Awards Program is the development of individual character and community responsibility within an intimate community of staff, peers, advisors and mentors.

The cohort of students who form the core of this community benefit from outstanding programming and, in return, are active in their home high schools and neighborhoods through peer advising, high school visits and other outreach programs, with the intention of inspiring young people to similar academic achievement.

Individual Studies Program

2407 Marie Mount Hall
Phone: 301-314-0023
individualstudies@umd.edu
ivsp.umd.edu (http://ivsp.umd.edu)

Director: Joan Burton, Ph.D.

The Individual Studies Program (IVSP) is a degree-granting academic program administered through the Office of Undergraduate Studies. The

program enables students to design their own interdisciplinary majors leading to the Bachelor of Arts or Bachelor of Science degree. Students draw primarily from the University of Maryland's course offerings to form an academic concentration not otherwise available to them at the institution. A written proposal defining the student's major and outlining the curriculum is required to apply to the program. Recent individually-created student majors have included such titles as Global Health, Civic Engagement and Media, Design and the Built Environment, Global Economic Development, Middle Eastern Studies, Immigration and Ethnic Studies, Neuroscience, Maternal and Child Health, Environmental Business, Medieval Studies, Modern Ethnomusicology, and Urban Planning and Renewal. The program provides a supportive community of highly engaged and self-motivated students, alumni, and staff.

Students must seek the guidance and approval of a Faculty Mentor prior to having their proposal reviewed by the Individual Studies Faculty Review Board. If approved, the courses agreed upon by the Faculty Review Board become the basis for the student's major requirements. These listed requirements from numerous academic departments, along with the general education requirements, are analogous to the academic requirements given to students who select from the University's traditional majors. However, each student is required to design a unique program of study and defend it in order to be a part of IVSP.

Individual Studies students must complete a senior capstone project and are encouraged to engage in internships, research projects, independent studies, and study abroad to supplement their work in the classroom. Drawing from real-world experience as a supplement to the academic curriculum is generally encouraged. Such projects often serve as a way for students to develop academic connections among the multiple disciplines involved in their programs.

While IVSP allows students the opportunity to create a unique academic program focused on a specific area of study, using courses from multiple academic departments, it does not substitute for or replicate the educational goals of existing University programs, including the Limited Enrollment Programs (LEPs). IVSP programs may not include substantial numbers of courses from LEP departments.

Developing a successful IVSP proposal takes time and involves several meetings to review and edit the draft proposal. Ideally, interested students should contact the IVSP staff and begin the application process early in their academic career. Working closely with the IVSP staff and their prospective Faculty Mentor, students should plan to complete and submit their IVSP proposal, preferably during their sophomore year or in their junior year before reaching 90 credits.

To be admitted into the Individual Studies Program, the student must:

1. Have a clearly defined academic goal that cannot be reasonably satisfied in an existing curriculum at the University of Maryland, College Park.
2. Have at least 30 earned college credits with at least 12 credits completed at College Park.
3. Have a minimum of a 2.5 GPA in each of their previous two semesters of college and at least a 2.0 GPA overall.
4. Complete at least 30 additional credits beginning the term following admission to IVSP.
5. Identify an appropriate faculty mentor, preferably tenured or tenure track, with significant undergraduate education experience related to the field of study.
6. Complete a detailed plan of study (proposal) that is approved by their Faculty Mentor and then approved by the Individual Studies Faculty Review Board. This proposal will include:
   a. A clear statement of the central academic purpose for their major.
   b. Specific course requirements including at least 27 credits of upper-division major coursework (300- and 400-level) beyond the IVSP courses (IVSP317, IVSP318, and IVSP420).
   c. The list of courses must include at least one Writing Craft course (in addition to the CORE Fundamental Studies Academic Writing and the Professional Writing requirements) selected from an approved list that is available from the Individual Studies staff.
   d. A semester-by-semester plan for the completion of their undergraduate degree within a reasonable period of time.

Following admission, students must:

1. Earn a grade of "C-" or better in all courses required in their IVSP program of study, including IVSP420 as well as a satisfactory grade in IVSP317.
2. Complete mandatory advising sessions with their Faculty Mentor and the IVSP staff every semester, including a review of their semester-by-semester academic plan for completion of their IVSP program.
3. If not already completed, work towards immediate completion of the Fundamental Studies requirements.

For details and further information, you may visit the IVSP website at ivsp.umd.edu (http://ivsp.umd.edu), Students are also encouraged to visit the program office at 2407 Marie Mount Hall.

Naval Reserve Officer Training Corps Program (Naval ROTC)

0110 Reckord Armory
Phone: 301-314-6289
navalrotc@umd.edu
navalrotc.umd.edu (http://navalrotc.umd.edu)

Director: Captain John Howrey

The Naval Reserve Officers Training Corps (NROTC) Program was established to educate and train qualified young men and women for service as commissioned officers in the US Navy (unrestricted line), or in the Marine Corps while completing their undergraduate degree. The NROTC Scholarship Program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps. It is highly recommended that students seeking a commission contact the Department of Naval Science/NROTC unit for full program details before registering for classes.

Program Requirements

The UMD NROTC Program was established to educate and train qualified young men and women for service as commissioned officers in the United States Navy and Marine Corps. The NROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical military environment. NROTC midshipmen are required to complete the naval science courses and attend weekly professional seminars. During the summer, NROTC midshipmen participate in active duty at sea or shore-based training cruises for approximately four weeks. Upon receiving their Baccalaureate Degree and completing the NROTC

program, qualified midshipmen are commissioned as ensigns in the U.S. Navy or second lieutenants in the Marine Corps. Commissioned naval officers go on to training in various warfare specialties and serve as surface or submarine officers, naval aviators, explosive ordinance disposal officers or SEALs. Marine Corps officers attend “The Basic School” in Quantico, Virginia, and serve in fields such as infantry, artillery, combat engineers, and aviation. Staff positions (intelligence, law, medicine) are not normally offered through NROTC.

The NROTC Program was established to develop midshipmen mentally, morally and physically and to imbue them with the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as naval officers who possess a basic professional background, are motivated toward careers in the naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

Academic Requirements

The Naval Science curriculum includes courses on topics such as Navy and Marine Corps organization, at-sea navigation, leadership, naval history, amphibious warfare, engineering, and weapons systems. Courses emphasize development of professional knowledge and leadership skills, which are placed in the context of military service immediately following graduation from University of Maryland.

Students in the NROTC program enroll in one Naval Science course per term. Some courses are required for both Navy and Marine option students, while others are specific to the branch of service. All NROTC students must also enroll in the Naval Science Laboratory (NAVY108) each term.

Navy option students must complete eight core curriculum courses offered by University of Maryland, including two term courses in calculus to be completed by the sophomore year, two term courses in calculus-based physics, with laboratory, to be completed by the junior year, two term courses in English or equivalent writing courses, one term course in history or national security policy, and one term course in world culture or regional studies.

Curriculum

Navy Option students typically will take:

Freshman Year

First Semester	Credits	Second Semester	Credits
NAVY100	3	NAVY101	3
	3		**3**

Sophomore Year

First Semester	Credits	Second Semester	Credits
NAVY200	3	NAVY201	3
	3		**3**

Junior Year

First Semester	Credits	Second Semester	Credits
NAVY300	3	NAVY301	3
	3		**3**

Senior Year

First Semester	Credits	Second Semester	Credits
NAVY400	3	NAVY401	3
	3		**3**

Total Credits 24

Marine Option typically will take:

Freshman Year

First Semester	Credits	Second Semester	Credits
NAVY100	3	NAVY101	3
	3		**3**

Sophomore Year

First Semester	Credits	Second Semester	Credits
NAVY200	3	NAVY302	3
	3		**3**

Junior Year

		Second Semester	Credits
		NAVY402	3
			3

Senior Year

		Second Semester	Credits
		NAVY401	3
			3

Total Credits 18

Scholarships and Incentives

Recipients of National Scholarships are selected from applicants to a national competition (http://www.netc.navy.mil/nstc/nrotc/). Additionally, through the NROTC 3 year and 2 year scholarship process, freshmen and sophomore members of NROTC in all degree programs are eligible to compete for scholarships also based on a competitive NROTC selection process. Scholarship recipients receive money for full tuition and fees, a book allowance (currently $750/year), and a monthly allowance from $250 to $400, depending on the student's NROTC year. If unqualified for a scholarship but recommended for "advanced standing," a student will have the ability to commission in the U.S. Navy and will receive a book stipend and monthly allowance. There are no scholarship opportunities for juniors or seniors.

Campus Involvement

The NROTC unit values well-rounded future officers and encourages battalion members to get involved with numerous activities on campus. With participation in an internship, a semester abroad, intramural and varsity sports teams, fraternities or sororities, music or performance groups and countless clubs and groups, many members find outside activities an enjoyable aspect of their college experience.

National Scholarship Office

2403 Marie Mount Hall
Phone: 301-314-1289
scholarships@umd.edu
scholarships.umd.edu (http://scholarships.umd.edu)

Director: Francis DuVinage, Ph.D.

The National Scholarships Office at the University of Maryland, College Park aims to provide undergraduates with the best possible information,

guidance and support as they learn about and apply for national scholarships.

National scholarships are competitive, prestigious awards that provide opportunities and support for a wide range of enriching experiences, including study abroad, graduate study (and sometimes undergraduate study also), federal employment, teaching, research, and public service. National scholarships are looking for students (with or without financial need) who are developing strong interests and goals - academic and extracurricular - and who want to take advantage of every constructive opportunity that will help them reach their objectives. Just as each national scholarship offers a different kind of opportunity, each is also looking for a different range of strengths and interests in its applicants. If you develop a strong academic record, are thoughtful about your choices and devote yourself to activities you care about, you may well find one or more scholarship opportunities of interest to you.

The National Scholarships Office strives to make learning about and applying for national scholarships an enlightening experience. In addition to providing information about national scholarships through our website, through group presentations and through individual advising, we also provide individualized guidance and support at every stage of the application process. We invite you to visit our website and to make an appointment with us to learn more about national scholarships that may help you attain your goals.

Advanced Cybersecurity Experience for Students Minor

Prince Frederick Hall
Phone: 301-314-7414
aces@umd.edu
aces.umd.edu (http://aces.umd.edu)

Director: Michel Cukier, Ph.D

The ACES (Advanced Cybersecurity Experience for Students) Minor is housed in the Honors College but is open to all undergraduate students in all majors. This minor takes a multidisciplinary approach to cybersecurity education in that students gain knowledge about many of the fields that intersect in cybersecurity (e.g., legal and public policy aspects, criminal justice, journalism, and computer science and engineering). With an emphasis on hands-on experiences, students will gain practical skills through coursework, seminars, group projects, internships, and research, both on and off campus.

Students in the ACES Minor will also have opportunities to engage in the larger ACES community, including serving as peer mentors, tutors, and advisors for ACES Living-Learning Program students; participating in educational events; and serving as student leaders on the ACES Student Board. ACES Minor students will also have regular interactions with corporate and governmental leaders in cybersecurity, who will serve as both mentors and professional contacts.

REQUIREMENTS

The ACES Minor features a customizable 16-credit curriculum.

Course	Title	Credits
PREREQUISITES: Required for students who have not completed the ACES Living-Learning Program		
HACS201	Introduction to UNIX [1]	1
HACS202	Group Project in Cybersecurity	3
Total Credits		**4**

[1] HACS201 is waived for students who have completed CMSC216

Course	Title	Credits
Required Course [2]		
HACS318	Cybersecurity Professionals Colloquium Series	1
Electives [3]		
HACS408	Advanced Seminar in Cybersecurity	3
Experiential Learning		
Select a minimum of 3 and a maximum of 6 credits		
HACS479	Undergraduate Research in Cybersecurity	1-3
HACS498	Cybersecurity Group Problem Solving	3
Total Credits		**8-10**

[2] Required for all ACES Minor students
[3] Select at least 3 courses. Students may also substitute one or two electives from courses including CCJS418B, CMSC414, CMSC456, CMSC498R, ENEE459C, ENEE459D, ENEE459E, and ENME442.

Notes:

- At the time of application students must have 30 university credits completed (including transfer credit), a minimum cumulative GPA of a 3.0, and at least 3 semesters remaining prior to graduation
- Upon admission to the minor students will become part of the Honors College and are subject to its policies
- Students must maintain a 3.0 cumulative GPA to remain in good standing in the minor per Honors College requirements
- All courses used to satisfy the requirements of the minor must be completed with a grade of "C-" or better
- A maximum of 2 courses may be used to satisfy the requirements of both a major and a minor

Army Leadership Studies Minor

Program Director: LTC Daniel Fass

The Army Leadership Studies program promotes the development of undergraduate students on small group leadership. Students will walk away with an in-depth understanding of Small Unit Tactics, Land Navigation and Field Training, Operations and Logistical Planning, Team Building, and Peer-to-Peer counseling. The core courses in the Minor are sequenced to meet the increasingly complex sets of outcomes-based instruction across cognitive, personal development, and group/organizational domains.

The Army Leadership Studies minor consist of the courses identified below and is open to any student at the University of Maryland. Students of all majors will be eligible to apply and prior military or ROTC experience is not required. Students seeking a minor in Army Leadership Studies must be approved by the Director of Army ROTC.

REQUIREMENTS

Course	Title	Credits
ARMY301	Advanced Military Leadership I	3
ARMY302	Advanced Military Leadership II	3

ARMY401	Advanced Military Leadership III	3
ARMY402	Advanced Military Leadership IV	3
Elective		
HIST224	Modern Military History, 1494-1815	3
or HIST225	Modern Military History, 1815-Present	
Total Credits		**15**

At the 300 level, students learn the application of Army leadership strategies, critical decision making methodologies, physical and mental fitness excellence. Includes a laboratory period in applied leadership, common military tasks and physical fitness, as well as a three day field exercise.

At the 400 level, students learn the military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

Asian American Studies Minor

Asian American Studies Program (AAST)
2117 Susquehanna Hall
Phone: 301-405-0996
aast@umd.edu
aast.umd.edu (http://aast.umd.edu)

Director: Julie Park, Ph.D.

In the Asian American Studies Program (AAST), students undertake an interdisciplinary and critical study of race, immigration, and political and social representation through examination of the experiences of Asian Americans. Students study the experiences of Asian Americans compared to and connected with other groups in the United States, as well as situated within a global and transnational context. Through this approach, students examine the histories, communities and cultures of Asian Americans as both distinctive and connected to the broader themes for diversity, ethnicity, race, gender, sexual orientation, and migration in the Americas. AAST offers a 15 credit-hour minor. For the minor, courses may be cross-listed in other departments and some may satisfy general education requirements.

REQUIREMENTS

Course	Title	Credits
AAST Foundational Course		
Select one of the following:		3
AAST200/ AMST298	Introduction to Asian American Studies (AMST298C)	
AAST201/ HIST221/219	Asian American History (HIST219M, HIST219G)	
Elective Courses		
Select 9 credits of additional AAST or other approved courses [1]		9
At least two of which must be upper division (300 or 400 level)		
and		
One must fulfill comparative ethnic or global/transnational/ international area requirement [2]		
AAST222	Immigration and Ethnicity in America	
AAST233	Introduction to Asian American Literature	
AAST298	Special Topics in Asian American Studies (AAST298A: Islam in America)	
AAST298	Special Topics in Asian American Studies (AAST298B: Visual Cultures of Islam)	
AAST298	Special Topics in Asian American Studies (AAST298J:Asian American Performance)	
AAST378	Experiential Learning	
AAST388	Independent Research	
AAST398	Selected Topics in Asian American Studies (AAST398A: Vietnamese American Studies)	
AAST398	Selected Topics in Asian American Studies (AAST398B:Asian American Social Policy and Community Advocacy)	
AAST398	Selected Topics in Asian American Studies (AAST398D: Filipino American History and Biography)	
AAST398	Selected Topics in Asian American Studies (AAST398E: Growing up Asian American: The Asian Immigrant Family and the Second Generation)	
AAST398	Selected Topics in Asian American Studies (AAST398M: Asian Americans and Media)	
AAST420	Asian American Women: The Social Construction of Gender	
AAST424	Sociology of Race Relations	
AAST443	Asian American Politics	
AAST498	Advanced Topics in Asian American Studies (AAST498B: Urban Democracy and Community)	
AAST498	Advanced Topics in Asian American Studies (AAST498J: Asian American Psychology)	
AAST498	Advanced Topics in Asian American Studies (AAST498M:Asian American Public Policy)	
AAST498	Advanced Topics in Asian American Studies (AAST498X: Techno-Orientalism)	
AAST498	Advanced Topics in Asian American Studies (AAST498B: Confucius' Many Lives in East Asia and Asian American) [2]	
AAST/ AMST498	Advanced Topics in Asian American Studies (AAST498W/AMST498R: Transnational American Studies) [2]	
Upper Division Courses		
AAST499	Senior Thesis (Or one additional 400-level AAST course) [3]	3
Total Credits		**15**

Notes:

- No more than 6 credits (2 courses) taken at the 100 or 200-level may count towards the minor.
- A minimum of 9 credits (3 courses) must be taken at the 300 or 400-level.
- All courses used for the minor must have a grade of C- or better.
- A student may use a maximum of 6 credits (2 courses) to satisfy requirements for both a major and a minor. Courses completed for one minor may not be used to satisfy the requirements for another minor.

[1] Students may take a course not on this list with approval from the AAST Director.

[2] For the most current list of courses that fulfill comparative ethnic/global transnational/international area requirement, see AAST website (https://www.aast.umd.edu/aast-minor/#minorreq).

[3] Restriction: Permission of instructor or enrolled in AAST minor. This advanced colloquium in Asian American Studies is designed as a senior seminar. The course offers an intensive learning experience and students are required to complete a thesis, applied research project, or take part in and write about a sustained community experience.

Global Studies Minor

The Global Studies Minor Program provides opportunities for students from any discipline or major to study how evolving global connections affect the well-being of people throughout the world. Students in this interdisciplinary program develop an understanding and appreciation of how and why interactions across national and ethnic borders are shaped by language, culture, politics, economic development, and conflict.

The program is comprised of a number of specialization tracks which address issues from the perspective of different disciplines. The tracks are:

- International Development and Conflict Management (https://cidcm.umd.edu)
- International Engineering (http://ilp.umd.edu/coursework/)
- Global Poverty (http://arec.umd.edu/undergraduate/minors/global-poverty/)
- Global Terrorism Studies (http://start.umd.edu)

All students choose one course from a set of "signature" courses outside of their chosen track for exposure to major global issues addressed by the other Global Studies minors. The minors provide an opportunity for an experiential component within a student's elective courses, including a study abroad experience. The Global Studies Minor Program includes special activities that involve students across the minors, such as special speaker forums, participation in major events, and experiences in Washington, D.C.

Individual Studies Program

2407 Marie Mount Hall
Phone: 301-314-0023
individualstudies@umd.edu
ivsp.umd.edu (http://ivsp.umd.edu)

Director: Joan Burton, Ph.D.

The Individual Studies Program (IVSP) enables UM students to design their own interdisciplinary majors, subject to a proposal process, when their educational goals cannot be reasonably achieved within an existing departmental curriculum. The Individual Studies Program leads to a Bachelor of Arts or Bachelor of Science degree. IVSP degree programs focus on academic and intellectual growth through interdisciplinary study. Individually created student majors have recently included such titles as International Relations and East Asia, Global Health, 3D Environment Modeling and Design, Environmental Sustainability, Education and Social Change in Latin America, Healthcare Management for Diverse Communities, Global Development, Middle Eastern Studies, Asian American Policy and Advocacy, Women's Health, Digital Media in Society, and Urban Policy Studies.

For information, see Office of Undergraduate Studies (p. 493).

Program Learning Outcomes

1. Students will demonstrate the ability to gather information, understand the defining-concepts from three or more areas of study, and combine these concepts to propose an individually designed major to be independently pursued.
2. Students will be able to apply the concepts of their individually designed major in an internship or independent research project.
3. Through a final capstone project, students will demonstrate their ability to integrate different areas of study to examine a question, problem, or phenomenon.

Military Studies Minor

Program Director: Colonel Steven Jantz

The minor in Military Studies provides students with the opportunity to study the U.S. military and more specifically the U.S. Air Force. Students seeking a minor in Military Studies are not required to be members of the Air Force ROTC program. This minor enables students to develop a secondary academic experience which may serve them in the future. The minor may also alert potential employers to the student's knowledge in a minor field of study.

The Military Studies minor consists of the courses identified in the Requirements section, and is open to any student at the University of Maryland. Students seeking a minor in Military Studies must be approved by the Director of Air Force ROTC and be advised by instructional personnel in that office.

REQUIREMENTS

Course	Title	Credits
Required Courses [1]		
ARSC300	Management and Leadership I	3
ARSC301	Management and Leadership II	3
ARSC400	National Security Forces in Contemporary American Society I	3
ARSC401	National Security Forces in Contemporary American Society II	3
Elective Courses [2]		
Select one of the following Global Affairs courses:		3
GVPT200	International Political Relations	
GVPT280	The Study of Comparative Politics	
GVPT289L		
GVPT354	International Development and Conflict Management	
GVPT360	International Negotiations	
GVPT456	The Politics of Terrorism	
HIST224	Modern Military History, 1494-1815	
HIST225	Modern Military History, 1815-Present	
HIST240	Europe in the Twentieth Century	
HIST266	The United States in World Affairs	
HIST353	America in the Revolutionary Era, 1763-1815	

HIST355	Civil War and the Rise of Industrialization, 1860-1900	
HIST357	Recent America: 1945-Present	
Select on of the following Military Affairs courses:		3
BMGT360	Strategic Management of Human Capital	
BMGT364	Managing People and Organizations	
JOUR283	Probing War: Investigative Narratives and American Conflicts	
SOCY120	Veterans in American Society: What does America Owe Its Veterans?	
SOCY464	Military Sociology	
SOCY465	The Sociology of War	
SOCY869	Research Seminar in Military Sociology	
BSST334	States of Emergency	
Total Credits		**18**

[1] At the 300 level, students focus on case studies in effective leadership, management, and team-building. Readings explore topics such as accountability, motivation, teamwork, and ethical and moral leadership. These exercises help students develop critical thinking and problem solving skills, as well as effective professional writing.
At the 400 level, students study military policies, doctrine, and strategy, especially as related to areas of the world that are in crisis or transition. Special units are included on Europe, South Asia, East Asia, Latin America, Russia, and the Middle East to prepare students to function effectively in today's multi-ethnic, multi-cultural societies at home and abroad. Students also explore problem areas in military personnel management, including sexual harassment awareness, suicide awareness, and guidelines for working with civilian personnel. Capstone projects and activities for each student are part of the 400-level curriculum.

[2] Other courses may be substituted with approval of the minor advisor and Advisory Committee. Students will be advised on the options for seeking BMGT courses.

Restrictions

- Courses completed in one minor may not be used to satisfy the requirements in another minor.
- No more than six of the required credits (or two courses) may be taken at an institution other than the University of Maryland, College Park.
- At least six upper division credits applied to the minor must be taken at the University of Maryland, College Park.
- All courses presented for the Minor must be passed with a grade of "C-" or better.
- Course work other than that listed in section B must be approved by the Air Force ROTC advisor and the ROTC Advisory Committee.

Naval Science Minor

Program Director: Captain John Mowrey

The minor in Naval Science is a 24-Credit minor that provides students with the opportunity to develop their own inherent leadership skills through the Naval NROTC development program. Students seeking a minor in Naval Science are not required to be members of the Naval ROTC program. This minor program enables students to develop a secondary academic experience that may serve them in their future professional work.

The Naval Science minor is open to any student at the University of Maryland. Students seeking a minor in Naval Science must be approved by the Professor of Naval Science of the Naval ROTC program and be advised by instructional personnel in that office.

REQUIREMENTS

Course	Title	Credits
Naval Science Core		**18**
18 credits selected from the following:		
NAVY100	Introduction to Naval Science	
NAVY101	Sea Power and Maritime Affairs	
NAVY200	Leadership and Management	
NAVY201	Navigation	
NAVY300	Naval Ship Systems I (Engineering)	
NAVY301	Naval Ship Systems II (Weapons)	
NAVY302	Evolution of Warfare	
NAVY400	Naval Operations and Seamanship	
NAVY401	Leadership and Ethics	
NAVY402	Fundamentals of Maneuver Warfare	
Expanded Learning		**6**
National Security/Military History		
HIST224	Modern Military History, 1494-1815	
HIST225	Modern Military History, 1815-Present	
Cultural/Regional Studies [1]		
GEOG130	Development Geography: Environmental & Social Justice	
HIST120	Islamic Civilization	
HIST284	East Asian Civilization I	
HIST285	East Asian Civilization II	
PERS251	Modern Iran	
Total Credits		**24**

[1] One semester course to enhance knowledge of cultural and/or regional studies of developing nations. Courses are not limited to the examples listed.

UNIVERSITY POLICIES

University of Maryland, College Park and University System of Maryland policies and procedures that may impinge on an undergraduate student's studies can be found on the following sites:

- **University System of Maryland Academic Affairs:** usmd.edu/regents/bylaws/SectionIII (http://www.usmd.edu/regents/bylaws/SectionIII/)
- **Statewide Educational Policies:** dsd.state.md.us/comar/subtitle_chapters/13B_Chapters.aspx (http://www.dsd.state.md.us/comar/subtitle_chapters/13B_Chapters.aspx)

Appendix A: University of Maryland Non-Discrimination Policy and Procedures VI-1.00B (http://president.umd.edu/administration/policies/section-vi-general-administration/vi-100b/)

Appendix B: University of Maryland Policy and Procedures on Sexual Harassment and Other Sexual Misconduct VI-1.60(A) (http://president.umd.edu/administration/policies/section-vi-general-administration/vi-160a-0/)

Appendix C: University of Maryland Code of Student Conduct V-1.00(B) (http://president.umd.edu/administration/policies/section-v-student-affairs/v-100b/)

Appendix D: University of Maryland Policy and Procedures on the Disclosure of Student Education Records III-6.30(A)

The policy below is current as of this publication. For more information and possible updates go to:

president.umd.edu/administration/policies/section-iii-academic-affairs/iii-630a (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-630a/).

III-6.30(A) University of Maryland Policy and Procedures on the Disclosure of Student Education Records

Approved by the President August 1, 1991; technical amendments April 15, 1996; June 2, 1997; October 1, 2002; amended December 11, 2018.

I. POLICY

It is the policy of UMD to comply with the requirements of the Federal Family Educational Rights and Privacy Act (FERPA), also known as the Buckley Amendment, concerning the disclosure of student records. FERPA affords eligible students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student's education records.
2. The right to request the amendment of the student's education records.
3. The right to provide written consent before UMD discloses personally identifiable information (PII) from the student's education records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by UMD to comply with the requirements of FERPA.

Following is an outline of the policy, and an explanation of the procedures by which students may obtain access to education records. Accordingly, UMD shall provide students with annual notification of their rights pursuant to FERPA.

II. DEFINITIONS

- **"Attendance"** includes but is not limited to attendance in person or by paper correspondence, videoconference, satellite, Internet, or other electronic information and telecommunication technologies for students who are not physically present in the classroom; and the period during which a person is working under a work-study program.
- **"Directory Information"** means information which would generally not be considered harmful or an invasion of privacy if disclosed. It includes, but is not limited to, a student's name, address, telephone listing, e-mail address, date and place of birth, major field of study, full-time/part-time status, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended.
- **"Disclosure"** means to permit access to or the release, transfer, or other communication of, PII contained in education records by any means, including oral, written, or electronic means, to any party except the party identified as the party that provided or created the record.
- **"Education Records"** means those records directly related to a student and maintained by UMD or by a party acting on UMD's behalf. Education records do not include:

    1. Sole possession records: records that are kept in the sole possession of the maker, are used only as a personal memory aid, and are not accessible or revealed to any other person except a temporary substitute for the maker of the record.
    2. Records maintained by the UMD Police Department solely for law enforcement purposes and kept separately from the education records described above.
    3. Records of employment which relate exclusively to the individual in that individual's capacity as an employee, and are not available for use for any other purpose. (**NOTE**: If a currently enrolled student is employed as a result of their status as a student, records relating to that employment are education records.)

4. Medical records on a student who is eighteen years of age or older made by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional made or used only for treatment purposes and available only to persons providing treatment. (**NOTE**: Treatment for the purposes of this definition does not include remedial educational activities.)
5. Post-attendance records: also called alumni records, are records which contain only information relating to a person's activities after that person is no longer a student at UMD and do not relate to that person as a student.
6. Grades on peer-graded papers before they are collected and recorded by a teacher.

- **"Eligible Student"** means a student who has reached the age of 18 or is attending UMD.
- **"Parent"** means a parent of a student, and includes a natural or adoptive parent, a guardian, or, in the absence of natural or adoptive parents, an individual acting as a parent.
- **"Party"** means an individual, agency, institution, or organization.
- **"Personally identifiable information"** or **"PII"** means data or information which includes, but is not limited to, a student's name; a name of a student's parent or family member; an address of a student or a student's family; a personal identifier, such as a social security number, University Identification Number (UID), or biometric record; other indirect identifiers, such as mother's maiden name; other information that alone, or in combination, is linked or linkable to a specific student and that would allow a reasonable person in the UMD community who does not have personal knowledge of the relevant circumstances to identify the student with reasonable certainty; or information requested by a person who UMD reasonably believes knows the identity of the student to whom the education record relates.
- **"Record"** means any information or data recorded in any medium (e.g., handwriting, print, tape, film, microfilm, microfiche, database, or any form of electronic data storage including emails).
- **"School Official"** is a person employed by any institution within the University System of Maryland in an administrative, supervisory, academic, research, or support staff role; a member of the Board of Regents; or a person engaged, employed by, or under contract with UMD to perform a special task, such as an attorney, auditor, or student serving on a UMD committee (e.g., University Student Judiciary, Honor Council, Standing Review Committee, scholarship & awards committees, etc.).
- **"Student Recruiting Information"** is information identified in the Solomon Amendment that UMD is required to provide to military recruiters upon request. Those items are: student name, addresses, telephone listings, age (or year of birth), class level, academic major, degrees received, and the most recent educational institution in which the student was enrolled.

III. RIGHT TO INSPECT AND REVIEW EDUCATION RECORDS

Each student in attendance at UMD has a right to inspect and review their education records within 45 days after the day UMD receives a request for access. A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The school official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the school official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

Procedure

Form of Request

Requests for access to education records must be made in writing and signed by the student.

Place of Request

Requests are made to:
Office of the Registrar
1130 Clarence M. Mitchell, Jr. Building
College Park, Maryland 20742-5231

Response by UMD

UMD will comply with a request for access within a reasonable period of time, not to exceed 45 days after UMD receives a request for access. Whenever possible, arrangements shall be made for the student to read the records in the presence of a staff member.

Reproduction of Records

A student may ordinarily obtain copies of education records by paying the cost of reproduction. The fee for photocopies is $0.25 per page. There is no charge for staff time to search for or collect education records. Only copies of a student's current UMD transcript will be provided. However, an official UMD transcript can be provided upon specific request of the student and subsequent payment of costs for the document.

Types and Locations of Education Records Maintained at UMD

(**NOTE:** All requests must be routed through the Office of the Registrar.)

1. Admissions (e.g., applications and transcripts from institutions previously attended)

Undergraduate:
Director of Undergraduate Admissions
1130 Clarence M. Mitchell, Jr. Building

Graduate:
Director of Graduate Records
Lee Building

2. Records & Registration Services (e.g., all ongoing academic and biographical records, undergraduate and graduate)

Office of the Registrar
1130 Clarence M. Mitchell, Jr. Building

3. Departments

Departmental Offices
Chair or Head of the Department

4. Deans

Dean's Office of each School/College

5. Resident Life (e.g., student's housing records)

Director of Resident Life

6. Advisors (e.g., with student permission: letters of evaluation, personal information sheet, transcript, test scores)

7. Office of Student Conduct (e.g., student's judicial and disciplinary records)

Director of the Office of Student Conduct
1130 Clarence M. Mitchell, Jr. Building

8. Counseling Center (e.g., biographical data, summaries of conversations with students, test results)

Director of the Counseling Center

Shoemaker Building

(**NOTE**: Where records are used only for treatment purposes, they are not education records and are not subject to this policy.)

9. Financial Aid (e.g., financial Aid applications, needs analysis statements, awards made)
Director of Financial Aid
Lee Building

(**NOTE**: There is no student access to parents' confidential statements.)

10. University Career Center (e.g., recommendations and unofficial copies of academic records)
Director of the Career Center
Hornbake Library

11. Office of Student Financial Services (e.g., student accounts receivable, records of students' financial charges and credits with UMD)
Office of Student Financial Services
Lee Building

Waiver of Access to Confidential Recommendations

A student may waive any or all of their rights to review confidential letters of recommendation, subject to the following conditions:

1. The waiver must be in writing, signed by the student, regardless of age.
2. UMD shall not require such waivers as a condition to admission, or the receipt of any service or benefit.
3. If right of access is waived, a student will be notified, upon written request, of the names of all persons making confidential recommendations. Such recommendations shall be used only for the purpose for which they were specifically intended.

A waiver may be revoked in writing at any time; however, by revoking it, the student does not have the right to inspect and review documents collected while the waiver was in force.

IV. RIGHT TO REQUEST THE AMENDMENT OF EDUCATION RECORDS

It is the policy of UMD to provide students the opportunity to request that amendments be made to their education records which are believed to be inaccurate, misleading, or which violate the right to privacy or other rights.

Request to Amend an Education Record

1. A request must be in writing to the Office of the Registrar.
2. A request must contain:
   a. the specific document(s) being challenged; and
   b. the basis for the challenge.
3. UMD shall decide within a reasonable period of time whether to amend the document(s). The student shall be notified of the decision in writing, and if the decision is to refuse to amend, the student shall be notified of the right to a hearing.

Right to a Hearing

1. Upon request, a student shall be provided an opportunity for a hearing to challenge the content of education records.
2. A request for a hearing must be made in writing to the Office of the Registrar.
3. Within a reasonable period of time, the student shall be given reasonable advance notice in writing of the date, place, and time.

Conduct of Hearing

1. The hearing shall be conducted by a UMD official with no direct interest in the outcome.
2. The student shall have a full and fair opportunity to present evidence, and may be represented by individuals of their choice, including an attorney. The cost for such representation shall be the responsibility of the student.

Decision

1. The student shall be notified in writing within a reasonable period of time.
2. The decision is to be based solely upon evidence presented at the hearing, and must include a summary of the basis of the decision.
3. In cases where the challenged information is found to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student, the education records shall be amended accordingly within a reasonable time.
4. In cases where the challenged information is not found to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of a student, the student shall be informed in writing of the right to place in the challenged record a statement commenting on the information and explaining any reasons for disagreeing with the decision.
5. The statements described above shall be kept as part of the student's record and disclosed whenever that portion of the record is disclosed.

V. DISCLOSURE OF PERSONALLY IDENTIFIABLE INFORMATION

It is the policy of UMD to limit disclosure of PII without a student's prior written consent, subject to the following limitations and exceptions:

Directory Information

1. This information may be disclosed and may appear in public documents unless a student files a written notice not to disclose any or all of the information (i.e., opts out). Such notice must be filed with the Office of the Registrar.
2. Students will be given annual notice of the categories of information designated as directory information.

Prior Consent Not Required

Prior consent is not required for disclosure of education records in several circumstances. These circumstances include disclosure:

1. To the student.
2. To anyone, if UMD has obtained the prior written consent of the student.
3. To anyone, in response to request for directory information, unless the student has opted out.
4. To UMD school officials determined to have a legitimate educational interest. They may access student education records within the scope of performing their job duties.
   A school official has a legitimate educational interest if the official is:
   a. Performing a task that has been assigned as part of their duties or a position description or contract.
   b. Performing a task related to a student's education.
   c. Performing a task related to the discipline of a student.

   d. Providing a service or benefit relating to the student's family, such as health care, counseling, job placement, or financial aid.
5. To officials of another institution of post-secondary education where the student seeks or intends to enroll, or where the student is already enrolled, if the disclosure is for purposes related to the student's enrollment or transfer. A student will be provided with a copy of the records which have been transferred upon request and payment of copying fees as described above.
6. To authorized representatives of the following government entities, if the disclosure is in connection with the audit or evaluation of federal- or statesupported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs: U.S. Comptroller General, U.S. Secretary of Education, U.S. Attorney General or state and local educational authorities, such as the Maryland Higher Education Commission (MHEC), the authority that is responsible for supervising UMD's education programs. Subject to controlling federal law, these officials will protect information received so as not to permit personal identification of students to outsiders.
7. To authorized persons and organizations, such as the Department of Veterans Affairs or an employer, in connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.
8. To state and local officials to which such information is required to be reported by effective state law adopted prior to November 19, 1974.
9. To organizations conducting education studies for, or on behalf of, UMD for the purpose of developing, validating, or administering predictive tests; administering student programs; and improving instruction. The studies shall be conducted so as not to permit personal identification of students to outsiders, and the information is to be destroyed when no longer needed for these purposes.
10. To accrediting organizations to carry out their accrediting functions.
11. To either parent of a student who is claimed as a dependent for income tax purposes by at least one parent.
12. To parents when their student (under age 21) is found to have violated UMD's alcohol or drug policies.
13. To appropriate parties when UMD determines that disclosure is necessary to protect the health or safety of the student or other individuals and the information will assist in resolving the emergency.
14. In response to a court order or subpoena, including ex parte orders under the USA Patriot Act. Unless the issuing entity orders UMD against prior notification, UMD will make reasonable efforts to notify the student before complying with the court order or subpoena.
15. To an alleged victim of a crime of violence when the disclosure is the result of a disciplinary hearing regarding the alleged perpetrator of that crime with respect to that crime.
16. To anyone requesting the final results of a disciplinary hearing against an alleged perpetrator who has been found in violation of the UMD Code of Student Conduct or UMD Sexual Misconduct Policy and Procedures relating to a crime of violence or non-forcible sex offense.
17. To the Department of Homeland Security (DHS), Immigration and Customs Enforcement (ICE) for the purpose of complying with a request from ICE relative to UMD's participation in the Student and Exchange Visitor Program (SEVIS).
18. To military recruiters who request "Student Recruiting Information" for recruiting purposes only (e.g., Solomon Amendment).
19. To the Internal Revenue Service (IRS) for purposes of complying with the Taxpayer Relief Act of 1997.
20. When the disclosure concerns sex offenders and other individuals required to register under state or federal law, and the information was provided to the University under 42 U.S. C. 14071 and applicable federal guidelines.

Prior Consent Required In All Other Cases

1. UMD will not release PII in education records, or allow access to those records without prior consent from the student.
2. The consent must be in writing, signed by the student, and dated. The consent will remain in effect until rescinded by the student, or its purpose is achieved.
3. The student must specify the records to be disclosed, the identity of the recipient, and the purpose of the disclosure.
4. A copy of the record disclosed will be provided to the student upon request and payment of copying fees described above.

Record of Disclosures

1. **Maintenance of List**: UMD shall maintain a list of each request and each disclosure of PII with each student's education records. The list shall include:
   a. the parties who have requested and/or received the information; and
   b. the legitimate interest the parties had in requesting and/or receiving the information.
2. **Inspection of List**: The list of disclosures may be inspected by:
   a. the student;
   b. the official custodian of the record; and
   c. other UMD and governmental officials.
3. **Exceptions:** Disclosures in the following circumstances do not need to be recorded:
   a. disclosures to the student;
   b. disclosures pursuant to written consent;
   c. disclosures to school officials including instructional or administrative officials of UMD;
   d. disclosures of directory information; and
   e. disclosures related to judicial orders or lawfully issued subpoenas.

VI. RIGHT TO FILE A COMPLAINT

Students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by UMD to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Independence Avenue, S.W.
Washington, D.C. 20202

Appendix E: Policy on Smoking at University of Maryland VI-8.10(A) (http://president.umd.edu/administration/policies/section-vi-general-administration/vi-810a/)

Appendix F: University of Maryland Code of Academic Integrity III-1.00(A) (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-100a/)

Appendix G: Statute of Limitations for the Termination of Degree Programs

Committee on Academic Procedures and Standards
Approved December 7, 1989

The following policies apply to all undergraduate degree programs terminated at the University of Maryland at College Park at the beginning of the Spring, 1990 Semester and thereafter.

1. All students enrolled at the University of Maryland, College Park or at a Maryland community college program articulated with the terminated degree program during the semester in which the program is terminated must complete the major requirements of the terminated degree program within five calendar years of the date upon which the program is terminated. If only a few students are enrolled in a terminated program, a shorter time limit may be imposed based on a study of the academic records of all students enrolled in the program. If a shorter time period is imposed, all students enrolled in the program will be notified of its length.
2. Students who, prior to the termination date had been enrolled in the terminated program or a Maryland community college articulated with the terminated program, but who subsequently interrupt their studies at the University of Maryland, College Park or the community college for one or more semesters will be allowed to enter or re-enter the program only if a careful analysis of their records by the appropriate dean indicates they will be able to complete the major requirements of the terminated program within the remaining time period specified.
3. When a program is terminated the University of Maryland, College Park will make a good faith effort to notify those students who had interrupted their studies in that program. As part of that good faith effort, the University of Maryland at College Park will publish in its re-enrollment forms, catalogues, and schedules of classes a statement advising returning students that programs may have been terminated and that the student needs to check the current status of the program.
4. At the end of the time period specified for completion of major requirements after the termination date of the program, the relevant department or college will evaluate the records of each student enrolled in the program for fulfillment of departmental major requirements and will notify students whether they have completed these requirements. Such notice shall be in writing and sent to the student's last known addresses.
5. When a degree program is terminated, the university will send notification of the time limit for completion of the major requirements to all students enrolled in the program at that time. It will also attempt to send notification to students who interrupted their studies while enrolled in the program in the preceding three years, insofar as such students can reasonably be identified. This notification will be sent to the students' last known addresses on file with the university. Such notifications also will be sent to the Maryland community colleges having programs articulated with the terminated program.

Appendix H: Policy on Student Classification for Admission and Tuition Purposes VIII-2.70

The policy below is current as of this publication. For more information and possible updates go to: www.usmd.edu/regents/bylaws/SectionVIII/VIII-2.70.pdf (https://www.usmd.edu/regents/bylaws/SectionVIII/VIII-2.70.pdf)

(Approved by the Board of Regents August 28, 1990; Amended July 10, 1998; Amended November 27, 2000; Amended April 11, 2003; Amended June 23, 2006; Amended February 15, 2008; Amended October 24, 2014; Amended April 10, 2015; Amended February 17, 2017; Amended June 16, 2017; Amended April 19, 2019; Amended June 17, 2021; Amended June 17, 2022)

I. POLICY

A. Purpose

To extend the benefits of its system of higher education while encouraging the economical use of the State's resources,[1] it is the policy of the Board of Regents of the University System of Maryland (USM) to recognize the categories of in-state and out-of-state residency for the purpose of admission and assessing tuition at USM institutions.

B. Qualification for In-State Status

Generally, in order to qualify for in-state status, a prospective, returning, or current student must demonstrate that he or she is a permanent Maryland resident. Under certain circumstances, as set forth in this Policy, students who are not permanent Maryland residents may qualify temporarily for in-state status. Students who do not qualify for in-state status under this Policy shall be assigned out-of-state status for admission and tuition purposes.

C. Standard of Proof

The student seeking in-state status shall have the burden of proving by clear and convincing evidence that he or she satisfies the requirements and standards set forth in this Policy. Assignment of in-state or out-of-state status will be made by each USM institution upon a review of the totality of facts known or presented to it.

[1] Annotated Code of Maryland, Education Article, §12-101.

II. DETERMINATION OF RESIDENCY STATUS

A. Criteria for Determination of Residency Status

An initial determination of residency status will be made at the time of admission and readmission based upon information provided by the student with the signed application certifying that the information provided is complete and correct. Additional information may be

requested by the institution, to clarify facts presented. To qualify for in-state status, the student must demonstrate that for at least 12 consecutive months immediately prior to and including the last date available to register for courses for the semester/term for which the student seeks in-state status, the student had the continuous intent to reside in Maryland indefinitely and for a primary purpose other than that of attending an educational institution in Maryland. The student will demonstrate the requisite intent by satisfying all of the following requirements for the 12-month period (or shorter period indicated):

1. Has continuously maintained his or her primary living quarters in Maryland.
2. Has substantially all of his or her personal property, such as household effects, furniture and pets in Maryland.
3. Has paid Maryland income tax on all taxable income, including all taxable income earned outside of Maryland, and has filed a Maryland Resident Tax return.
4. Has registered all owned or leased motor vehicles in Maryland for at least 12 consecutive months, if previously registered in another state. Students who have lived in Maryland for at least 12 consecutive months but who have had their motor vehicle(s) registered in Maryland for less than 12 months will be deemed to have satisfied this requirement if they can show evidence that their owned or leased motor vehicle(s) was (were) registered in Maryland within 60 days after moving to the state.
5. Has possessed a valid Maryland driver's license for at least 12 consecutive months, if previously licensed to drive in another state. Students who have lived in Maryland for at least 12 consecutive months but who have held a Maryland driver's license for less than 12 months will be deemed to have satisfied this requirement if they can show evidence that their driver's license was issued in Maryland within 60 days after moving to the state.
6. Is currently registered to vote in Maryland, if previously registered to vote in another state (no time requirement).
7. Receives no public assistance from a state other than the State of Maryland or from a city, county or municipal agency other than one in Maryland.
8. Has a legal ability under Federal and Maryland law to live permanently without interruption in Maryland.

B. Presumption of Out-of-State Status

Either of the following circumstances raises a presumption that the student is residing in the State of Maryland primarily for the purpose of attending an educational institution and, therefore, does not qualify for in-state status under this Policy:

1. A student is attending school or living outside Maryland at the time of application for admission to a USM institution, or
2. A student is Financially Dependent on a person who is not a resident of Maryland. A student will be considered financially independent if the student provides 50% or more of his or her own living and educational expenses and has not been claimed as a dependent on another person's most recent tax returns.

III. CHANGE IN CLASSIFICATION FOR TUITION PURPOSES

A. Petition for Change in Classification for Tuition Purposes

After the initial determination is made, a student seeking a change to in-state tuition status must submit a Petition for Change in Classification for Tuition Purposes that includes all of the information the student wishes the institution to consider. All information must be submitted by the institution's deadline for submitting a petition for the semester for which the student seeks reclassification. Only one Petition may be filed per semester.

B. Criteria for Change in Tuition Status

A student seeking reclassification from out-of-state to in-state tuition status must demonstrate, by clear and convincing evidence, that for at least twelve (12) consecutive months immediately prior to and including the last date available to register for courses for the semester/term for which the student seeks in-state tuition status, the student had the continuous intent to 1) make Maryland his or her permanent home; 2) abandon his or her former home state; 3) reside in Maryland indefinitely; and reside in Maryland primarily for a purpose other than that of attending an educational institution in Maryland.

A student will demonstrate the requisite intent by satisfying all of the following requirements for a period of at least twelve (12) consecutive months (or for the shorter period of time indicated) immediately prior to and including the last date available to register for courses in the semester/term for which the student seeks in-state tuition status. Evidence of intent must be clear and convincing and will be evaluated not only by the amount presented but also based upon the reliability, authenticity, credibility and relevance of the evidence and the totality of facts known to the institution. The student must demonstrate (providing appropriate documentation as necessary) that for the relevant period he or she:

1. Continuously maintained his or her primary living quarters in Maryland.
2. Has substantially all of his or her personal property, such as household effects, furniture and pets, in Maryland.
3. Has paid Maryland income tax on all taxable income including all taxable income earned outside the State and has filed a Maryland Resident Tax Return.
4. Has registered all owned or leased motor vehicles in Maryland for at least 12 consecutive months, if previously registered in another state Students who have lived in Maryland for at least 12 consecutive months but who have had their motor vehicle(s) registered in Maryland for less than 12 months will be deemed to have satisfied this requirement if they can show evidence that their owned or leased motor vehicle(s) was (were) registered in Maryland within 60 days after moving to the state.
5. Has held a valid Maryland driver's license, if licensed, for at least 12 consecutive months, if a driver's license was previously held in another state has possessed a valid Maryland driver's license for at least 12 consecutive months, if previously licensed to drive in another state. Students who have lived in Maryland for at least 12 consecutive months but who have held a Maryland driver's license for less than 12 months will be deemed to have satisfied this requirement if they can show evidence that their driver's license was issued in Maryland within 60 days after moving to the state.
6. Is currently registered to vote in Maryland, if previously registered to vote in another state (no time requirement).
7. Receives no public assistance from a state other than the State of Maryland or from a city, county or municipal agency other than one in Maryland.
8. Has a legal ability under Federal and Maryland law to live permanently without interruption in Maryland.
9. Has either not raised the presumption set forth in Section II.B above; or alternatively, if the student's circumstances have raised the

presumption set forth in Section II.B above, the student has rebutted that presumption.

C. Rebuttal Evidence

If the information received by the institution about the student has raised the presumption set forth in Section II.B, the student bears the burden of rebutting the presumption set forth in Section II.B by presenting additional evidence of objectively verifiable conduct to rebut the presumption and show the requisite intent. Rebuttal evidence of intent must be clear and convincing and will be evaluated not only by the amount presented but also based upon the reliability, authenticity, credibility and relevance of the evidence and the totality of facts known to the institution. Evidence that does not document a period of at least twelve (12) consecutive months immediately prior to and including the last date available to register for courses in the semester/term for which the student seeks in-state tuition status is generally considered an unfavorable factor under this Policy. The absence of objective, relevant evidence is generally considered an unfavorable factor. A student's statement of intent to remain in Maryland in the future is generally not considered to be objective evidence under this Policy.

For purposes of rebutting the presumption, additional evidence that will be considered includes, but is not limited to:

1. Source of financial support:
   a. Maryland employment and earnings history through sources beyond those incident to enrollment as a student in an educational institution e.g., beyond support provided by work study, scholarships, grants, stipends, aid, student loans, etc. (Tuition costs will be considered as a student expense only to the extent tuition exceeds the amount of any educational scholarships, grants, student loans, etc.), or
   b. Evidence the student is Financially Dependent, for the previous 12 months, upon a person who is a resident of Maryland.
2. Substantial participation as a member of a professional, social, community, civic, political, athletic or religious organization in Maryland, including professionally related school activities that demonstrate a commitment to the student's community or to the State of Maryland.
3. Registration as a Maryland resident with the Selective Service, if applicable.
4. Evidence that the student is married to a Maryland resident.
5. Evidence that the student attended schools in Maryland for grades K-12.
6. Evidence showing the student uses his or her Maryland address as his or her sole address of record for all purposes including on health and auto insurance records, bank accounts, tax records, loan and scholarship records, school records, military records, leases, etc.
7. An affidavit from a person unrelated to the student that provides objective, relevant evidence of a student's conduct demonstrating the student's intent to reside in Maryland primarily for a purpose other than that of attending an educational institution in Maryland.
8. Evidence of life and employment changes that caused the student to relocate to Maryland for reasons other than primarily educational purposes (e.g. divorce, family relocation, taking care of a sick family member, etc.)

D. Appeal

A student may appeal an adverse decision on a Petition for Change in Classification.

E. Change in Circumstances Altering In-State Status

The student shall notify the USM institution in writing within fifteen (15) days of any change in circumstances which may alter in-state status. Failure to do so could result in retroactive charges for each semester/term affected.

F. Incomplete, Untimely, False or Misleading Information

If necessary information is not provided by the institution's deadline, the USM institution may, at its discretion, deny or revoke in-state status. In the event incomplete, false, or misleading information is presented, the USM institution may, at its discretion, revoke in-state status and take disciplinary action provided for by the institution's policies. Such action may include suspension or expulsion. In such cases, the institution reserves the right to retroactively assess all out-of-state charges for each semester/term affected.

IV. CRITERIA FOR TEMPORARY QUALIFICATION OF NON-RESIDENTS FOR IN-STATE STATUS

Non-residents with the following status shall be accorded the benefits of in-state status for the period in which they hold such status, if they provide clear and convincing evidence through documentation, by the institution's deadline for the semester for which they seek in-state status, showing that they fall within one of the following categories:

A. A full-time or part-time (at least 50 percent) regular employee of USM or a USM institution.

B. The spouse or Financially Dependent child of a full-time or part-time (at least 50 percent) regular employee of USM or a USM institution.

C. An active duty member of the Armed Forces of the United States as defined in 38 U.S.C.A. § 101(10) as the United States Army, Navy, Marine Corps, Air Force, and Coast Guard, including the reserve components thereof, who is stationed in Maryland, resides in Maryland, or is domiciled in Maryland, or his/her spouse or a financially dependent child of that active duty member. Spouses and children who qualify for exemptions under this provision will retain in-state status for tuition purposes as long as they are continuously enrolled, regardless of whether the active duty member's station assignment, residence, or domicile remains in Maryland.[2]

D. A veteran of the Armed Forces of the United States who provides documentation that he or she was honorably discharged and currently resides or is domiciled in Maryland.[3]

E. A veteran who lives in Maryland and was discharged from a period of at least 90 days of service in the active military, naval, or air service and is pursuing a course of education with educational assistance under the Montgomery G.I. Bill ® (38 U.S.C. §3001) or the Post-9/11 Bill ®(38 U.S.C. §3301).[4] A veteran so described will continue to retain in-state status if the veteran is enrolled prior to the expiration of the three-year period following discharge, is using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code, and remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school.

F. Anyone who lives in Maryland, and:

1. Is using transferred Post-9/11 Bill ® benefits (38 U.S.C. §3319) and enrolls after the transferor's discharge or release from a period of at least 90 days of service in the active military, naval or air service; or

2. Is using transferred Post-9/11 Bill ® benefits (38 U.S.C. §3319) and the transferor is a member of the uniformed services who is serving on active duty;
3. Is using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. §3311(b)(9))[5]; or
4. Is using benefits through the Survivors' and Dependents' Educational Assistance Program (DEA), (38 U.S.C. chapter 35) or
5. Is entitled to rehabilitation under 38 U.S.C. §3102(a).

An individual as described in this Section IV.F will continue to retain in-state status if the individual is using educational benefits under chapter 30, 31, 33, or 35 of title 38, United States Code, and remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school.

G. A member of the Maryland National Guard, as defined in the Public Safety Article of the Maryland Annotated Code, who joined or subsequently serves in the Maryland National Guard to: (i) provide a critical military occupational skill; or (ii) be a member of the Air Force Critical Specialty Code as determined by the National Guard.

H. For UMUC, only, a full-time active member of the Armed Forces of the United States on active duty, or his/her spouse.

I. A graduate assistant appointed through a USM institution for the semester/term of the appointment. Except through prior arrangement, this benefit is available only for enrollment at the institution awarding the assistantship.

V. ADDITIONAL PROCEDURES

Each USM institution shall develop and publish additional procedures to implement this Policy. Procedures shall provide that on request the institution President or designee has the authority to waive any requirement set forth in Section II if it is determined that the application of the requirements creates an unjust result. These procedures shall be filed with the Office of the Chancellor.

VI. DEFINITIONS

A. Financially Dependent: For the purposes of this Policy, a financially dependent student is one who has been claimed as a dependent on another person's prior year tax returns or is a ward of the State of Maryland.

B. Financially Independent: For the purposes of this Policy, a financially independent student is one who provides 50% or more of his or her own living and educational expenses and has not been claimed as a dependent on another person's most recent tax returns.

C. Parent: A parent may be a natural parent, or, if established by a court order recognized under the law of the State of Maryland, an adoptive parent.

D. Guardian: A guardian is a person so appointed by a court order recognized under the laws of the State of Maryland.

E. Spouse: A spouse is a partner in a legally contracted marriage.

F. Child: A child is a natural child or a child legally adopted pursuant to a court order recognized under the law of Maryland.

G. Regular Employee: A regular employee is a person employed by USM or a USM institution who is assigned to a State budget line or who is otherwise eligible to enroll in a State retirement system. Examples of categories NOT considered regular employees are graduate students, contingent employees, and independent contractors.

H. Continuous Enrollment:

1. Undergraduate Student - An undergraduate student who is enrolled at a USM institution for consecutive fall and spring semesters, until completion of the student's current degree program or unless on an approved leave of absence or participating in an approved program off-campus.
2. Graduate and Professional - Continuous enrollment for a graduate or professional student is defined by the institution in accordance with program requirements.

I. Armed Forces of the United States: As defined in 38 U.S.C.A. § 101(10) as the United States Army, Navy, Marine Corps, Air Force, and Coast Guard, including the reserve components thereof.

Appendix J: University of Maryland Procedures for Review of Alleged Arbitrary and Capricious Grading - Undergraduate Students III-1.20(B) (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-120b/)

Appendix K: Policy on Participation by Students in Class Exercises that Involve Animals

Students who are concerned about the use of animals in teaching have the responsibility to contact the instructor, prior to course enrollment, to determine whether animals are to be used in the course, whether class exercises involving animals are optional or required and what alternatives, if any, are available. If no alternatives are available, the refusal to participate in required activities involving animals may result in a failing grade in the course. Departments including courses where

animals are used must actively inform students of such courses, including, but not limited to, notices in the Catalog.

The University of Maryland, College Park campus, affirms the right of the faculty to determine course content and curriculum requirements. The University, however, also encourages faculty to consider offering alternatives to the use of animals in their courses. In each course, the instructor determines whether the use of animals in the classroom exercises will be a course requirement or optional activity. The following departments have courses that may require animals to be used in class activities: Animal and Avian Sciences, Cell Biology and Molecular Genetics, Psychology, Veterinary Medicine, Biology, and courses with the NFSC prefix.

Committee on Academic Procedures and Standards
April 27, 1990

Appendix L: Completion of Interrupted Degree

Students whose registration at the University of Maryland, College Park, has lapsed for more than 10 years shall be required to complete a minimum of 15 credit hours at College Park after their return to campus in order to earn a baccalaureate degree.

Recommendations about courses needed to satisfy the remaining degree requirements will be made at the department level, with approval of the Dean's Office required. The reason for requiring these credits is that many fields change sufficiently in 10 years to require that students take current courses if they are to be awarded a current degree. Exceptions to the requirement for a minimum of 15 credits earned at College Park upon return to the campus can be recommended by the Deans for approval in the Office of the Vice President for Academic Affairs.

Appendix M: University of Maryland Policy on the Collection, Use and Protection of ID Numbers VI-26.00(A)

The policy below is current as of this publication. For more information and possible updates go to:

http://president.umd.edu/sites/president.umd.edu/files/documents/policies/VI-2600a.pdf

VI-26.00(A) University of Maryland Policy on the Collection, Use and Protection of ID Numbers

(Approved by the President May 31, 2005; Technical Amendment November 7, 2013)

Purpose

The University of Maryland is dedicated to ensuring the privacy and proper handling of confidential information relating to students, faculty, staff and individuals associated with the University. Traditionally, the Social Security Number (SSN) has been used as a common "person" identifier and the key to University "person" databases. The purpose of this policy is to authorize the creation of new methods of unique identification that will replace reliance on the SSN and allow for easy identification of a person for University transactions.

Policy

Use of the SSN as an identifier will be discontinued, except where required for employment, IRS reporting, Office of Institutional Research, Planning & Assessment, federal student financial aid processing, state and federal reporting and a limited number of other business transactions.

While the SSN will be collected and retained as authorized by law, it will not be used for routine identification or authentication purposes. Instead, a unique, nine digit university identification number called U ID Number will be assigned to each individual. For computer access, individuals will also have a unique Directory ID. For complete authentication, these identifiers (U ID Number and Directory ID) are accompanied by the use of a PIN or password.

Policy Implementation

1. The University of Maryland prohibits the use of a person's SSN as a publicly visible identification number for University-related transactions, unless specifically required by law or business necessity. A listing of currently approved uses is provided in Appendix A. This list is subject to change.
2. The University of Maryland will use SSN as a data element but not as a key for access to databases.
3. Each member of the University community will be assigned a unique identification number that will not be the same as nor derived from the individual's SSN. This number is called the U ID Number.
4. Software systems purchased or developed by the University of Maryland will not display a SSN either in read-only format or on print or other system output, unless authorized by law or business necessity.
5. Name and directory systems, purchased or developed by the University of Maryland, will be keyed for access by an individual's unique U ID Number, not the SSN.
6. When databases need to utilize SSN, they will use secure conversion tables or other technical mechanisms that automatically cross-reference SSN and other information within systems. In exceptional circumstances, it may be necessary to use SSN as an alternate search field. All such cases shall be referred to the data custodian (Office of the Registrar for students, UHR for employees) who shall seek approval from the University Data Policy Advisory Committee (DPAC) DPAC has a strict procedure for reviewing and approving requests for the use of SSN in any campus application or database. Justifications must be submitted to the appropriate divisional DPAC representative for committee review and consideration of approval. In addition, any transmission of data containing SSN over any communication network must be transmitted using a secure methodology.
7. Systems or technology developed or purchased by the University of Maryland after the effective date of this policy shall comply with these provisions.
8. For computer access or login purposes, members of the University community will also be assigned a Directory ID. The Directory ID will be used as a standard identifier for all computer resource authentication purposes but individuals may also be allowed to authenticate by using their U ID Number.
9. Campus validation of University of Maryland photo ID cards will be by reference to either the holder's U ID Number or bar code.

Timeframe for Implementation
The University of Maryland recognizes that some of its major systems are currently keyed for access to SSN as an identifier and that the conversion of all systems will take time and resources. The expectation is that there will be a steady and purposeful movement away from dependency on SSN. Appropriate interim measures may be developed until such time as the conversion to U ID Numbers is complete.

"Legacy" Data
The University recognizes that the SSN must be retained and used as a person identifier in older "legacy" data pertaining to ex-students and ex-employees as it is impractical to assign U ID numbers to these individuals.

Protection of ID Data Held in Secondary or Derivative Data Files
Any University office that collects and maintains an individual's social security number in any media must:

1. Ensure that the number is stored in a secure and confidential environment;
2. eliminate using the number for any purpose except those specifically addressed in this policy;
3. begin a steady and purposeful movement away from its dependency on the SSN in performing its functions and processes; and
4. follow University guidelines for the retention and destruction of records containing the SSN.

Notification Requirement
Any University office that collects SSN from an individual must provide a disclosure statement approved by the Data Policy Advisory Committee. Notifications for students, employees, and affiliates/guests are provided in Appendix B.

Appendix A
Uses for Social Security Numbers (SSN) (Subject to change)

Employment
The SSN is required for a variety of employment matters; such as tax withholding, FICA, Medicare, etc. SSN may also be used and maintained if it is supplied by an employee as documentation when completing the Federal I-9 Employment Authorization Form.

Application and Receipt of Financial Aid
Any student who applies for student aid by use of the federal Free Application For Student Assistance (FAFSA) is required to provide his SSN. Students are also required to provide SSNs when applying for student education loans.

Tuition Remission
The SSN is required for state reporting of taxable tuition remission benefits received by employees, their spouses and dependents, and by graduate assistants.

Veterans Administration Benefits
The SSN is required for enrollment verification and reporting on all Veterans Administration beneficiaries.

IRS Reporting
The SSN is used for producing federally required 1098-T forms, which report the amount of tuition paid to the University during the tax year. Copies of these forms are mailed to students each year, and the information reported to the IRS. In addition, the University reports the value of all taxable and non-taxable scholarships and grants awarded to non-resident aliens to the IRS.

Inter-Institutional Communication and Information Exchange
Many institutions, including postsecondary educational institutions, use the SSN as a student identifier. To ensure the accuracy of inter-institutional data exchanges (transcripts, transfer credit evaluations, USM ArtSys data base, MHEC, etc.) the SSN may be used for the exchange of information from student academic records between appropriate institutions including other colleges and universities.

Tracking Name Changes of Students and Alumni
The SSN is also used internally to track name changes of students and alumni of the University.

Appendix B Required Disclosure Statements
Student Notification
"Use of Social Security Number (SSN) - Students

Section 15-110 of the Education Article of the Annotated Code of Maryland prohibits the use of SSN on University identification cards. Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, also require that when any Federal, State, or local government agency requests an individual to disclose his or her Social Security Number (SSN), that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each applicant for admission is advised that disclosure of his or her SSN is required as a condition for making application to the University of Maryland for purposes of administering federal financial aid programs and complying with various State and Federal reporting requirements including reporting to the IRS. The University may use a student's SSN to accurately report federally required data, to generate various federal tax and financial aid reports, and to ensure the accuracy of student data that is exchanged within the University of Maryland, between post-secondary education institutions, with the University System of Maryland and other outside entities as necessary or required for the conduct of legitimate University business and consistent with applicable law. The SSN will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

The authority for requesting disclosure of a student's SSN is grounded in various federal laws including but not limited to: 42 USC 405c, affecting wage reporting and withholdings; 34 CFR 668.14 and 34 CFR 668.16, relating to student aid programs; and 26 CFR 1.6050S-1, addressing Internal Revenue Code reporting requirements pertaining to tuition payments.

In addition, it should be noted that the SSN of a parent, guardian or spouse of an applicant is also requested if the student claims dependency on that person for financial aid or residency for tuition purposes. A parent, guardian or spouse is advised that disclosure of his or her SSN is necessary for the above student purpose and failure to provide it may affect the student's financial aid or tuition status. A parent's, guardian's or spouse's SSN will only be used for the purpose for which it was collected and will not be maintained in any other system of records.

A unique U ID Number is assigned to students as part of their initial application to the University and is used for all University identification purposes."

Employee Notification

"Use of Social Security Number (SSN) – Employees

Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, requires that when any Federal, State, or local government agency requests an individual to disclose his or her social security number, that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each employee is advised that disclosure of his or her SSN is required as a condition of employment at the University of Maryland in complying with State and Federal employment matters including but not limited to, the withholding and reporting of State and Federal income tax, FICA, and Medicare insurance tax. Additionally, the SSN may be used and maintained, when supplied by an employee, as documentation for completing the Federal I-9 Employment Authorization Form. The employee's SSN will be used to accurately record state and federal required data as necessary or required for the conduct of legitimate University business and consistent with applicable law. This number will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

The authority for requesting disclosure of an employee's SSN is grounded in various federal laws including but not limited to, 42 U.S.C. 405c, affecting wage reporting and withholdings.

Efforts to limit the use of SSN include the issuance of a unique U ID Number that is assigned to all employees as part of their initial employment and will be used for all University identification purposes."

Affiliates Notification

"Use of Social Security Number (SSN) – Affiliates/Guests who receive University services and are not students, employees, or non-paid appointees.

Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, requires that when any Federal, State, or local government agency requests an individual to disclose his or her social security number, that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each affiliate/guest is advised that disclosure of his or her SSN is requested as a condition of applying for services from the University of Maryland for the purpose of administering those services. The University may use an affiliate or guest's SSN to accurately identify affiliates/guests, to coordinate services administered by different departments, and to ensure accuracy of data as necessary for the conduct of legitimate University Business and consistent with applicable law. The SSN will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

A unique U ID Number is assigned to affiliates/guests as part of their initial request to receive University services and is used for all University identification purposes."

Appendix P: University of Maryland Immunization Policy V-1.00(H)

The policy below is current as of this publication. For more information and possible updates go to: policies.umd.edu/student-affairs/university-of-maryland-college-park-immunization-policy (https://policies.umd.edu/student-affairs/university-of-maryland-college-park-immunization-policy/).

(Approved by the President August 1, 1991; revised June 1, 2000; amended February 4, 2014)

Policy

The University enforces a mandatory pre-matriculation immunization requirement to reduce the incidence and risk of vaccine-preventable disease in the university community. This policy meets the regulatory requirements of the State of Maryland Department of Health and Mental Hygiene. It is also consistent with the recommendations for pre-matriculation immunizations of the Advisory Committee on Immunization Practices (ACIP) of the U.S. Center for Disease Control and Prevention, and the American College Health Association.

Applicability

This policy applies to all undergraduate and graduate degree and non-degree seeking students, regardless of credit hours, taking courses on campus at the University's main campus or any of its satellite locations.

Students taking courses online, overseas, or at their place of employment if employment is off-campus, are exempt from this policy.

Immunization Requirements

1. All students to whom this policy applies shall be required to provide proof of 2 MMR immunizations or 2 measles, 1 mumps, 1 rubella and tetanus/diphtheria/pertussis (Td/Tdap) within the past 10 years. These immunization requirements do not apply to students born before 1957. Students living in on-campus residence halls must also provide proof of meningococcal vaccine within 5 years of matriculation, or sign the waiver on the University's immunization form.
2. An immunization form must be completed and returned to the Health Center prior to the first day of classes.
3. Students in noncompliance with this requirement shall be unable to drop/add classes or register for their second semester. This restriction shall be lifted by the University Health Center upon receipt of the required information or the granting of an approved waiver as described in Section 4.
4. Exemptions:
   a. A student who objects to immunization upon the grounds that it conflicts with his or her bonafide religious beliefs and practices may not be required to present a physician's certificate of immunization in order to register for classes. A religious exemption may be obtained by submitting the request to the Director of the Health Center. In case of an epidemic or disease outbreak, declared by the State of Maryland Secretary of Health and Mental Hygiene or his/her designee, the student must be immunized or not attend classes or functions on campus until the outbreak has resolved.
   b. A student may be exempted from an individual vaccine-specific immunization requirement if he or she presents a written statement from a licensed physician or a local deputy state health officer indicating that immunization is medically contraindicated. The physician's statement shall state whether the contraindication is permanent or temporary. If temporary, the physician must provide a date by which the student will receive the vaccine and provide documentation when the immunization has been completed. Should there be an epidemic or disease outbreak that is pertinent to the student's immunization status, the student cannot attend classes or functions on campus until the outbreak has resolved.

AASP - African American Studies

AASP100 Introduction to African American Studies (3 Credits)
Significant aspects of the history of African Americans with particular emphasis on the evolution and development of black communities from slavery to the present. Interdisciplinary introduction to social, political, legal and economic roots of contemporary problems faced by blacks in the United States with applications to the lives of other racial and ethnic minorities in the Americas and in other societies.

AASP101 Public Policy and the Black Community (3 Credits)
The impact of public policies on the black community and the role of the policy process in affecting the social, economic and political well-being of minorities. Particular attention given to the post-1960 to present era.
Formerly: AASP300.

AASP187 The New Jim Crow: African-Americans, Mass Incarceration and the Prison Industrial Complex (3 Credits)
Students will examine the birth of the racial caste system following the abolition of slavery, the parallels between the racial hierarchy of the Jim Crow system and contemporary mass incarceration, and the rise of the prison industrial complex as a multi-billon business which thrives on the oppression of low-income populations and poor communities of color.
Recommended: AASP100.

AASP200 African Civilization (3 Credits)
A survey of African civilizations from 4500 B.C. to present. Analysis of traditional social systems. Discussion of the impact of European colonization on these civilizations. Analysis of the influence of traditional African social systems on modern African institutions as well as discussion of contemporary processes of Africanization.

AASP202 Black Culture in the United States (3 Credits)
The course examines important aspects of African American life and thought which are reflected in African American literature, drama, music and art. Beginning with the cultural heritage of slavery, the course surveys the changing modes of black creative expression from the 19th-century to the present.

AASP210 Intro to Research Design and Analysis in African American Studies (3 Credits)
Introduces students to quantitative and qualitative research methods used in social science with a focus on Black populations and African American Studies Research. Uses practical exercises, such as class surveys and mock focus groups, to examine fundamental concepts of the research process from conceptualization of research questions to interpretation of data and research articles. The course is designed for undergraduate students with little or no background knowledge in social science research methods.

AASP211 Get Out: The Sunken Place of Race Relations in the Post-Racial Era (3 Credits)
Prevailing thought suggests that we live in an era that is post-racial, particularly after the election of Barack Obama. Media often serves to drive our assessment of where our nation stands on issues like race, gender and sexuality. This course uses the film Get Out to delve into the production, evolution and significance of race in present day America. The course will engage multiple forms of media to investigate life in "Post-Racial" America, including but not limited to the role of stereotypes, interracial relationships, police-community relations, etc.
Credit Only Granted for: AASP298G or AASP211.
Formerly: AASP298G.

AASP230 Social (In)Justice and African-American Health and Well-Being (3 Credits)
African Americans suffer worse outcomes than non-Hispanic whites on nearly every health measure and outcomes that link to overall well-being like depressive symptoms or homicides. Health disparities are experienced by other underrepresented minority groups, but because of the unique historic and current experiences of African Americans, the determinants and solutions to African American health disparities are unique. The premise of this course is that African American health disparities are due to social injustices perpetuated on the institutional level that have permeated the lived experiences of African Americans leading to racial disparities in health and well-being. As such, the solutions on the both policy, and community, level must have a social justice approach.

AASP258 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AASP260 Africa in World Politics (3 Credits)
Introduction to the politics of Africa, especially Sub-Saharan Africa, on the world stage from the colonial period era to recent push towards democracy in Africa and the rise of religious extremism. It also engages such themes as culture, religion and progress, dictatorship, former colonial powers and international influence, etc.

AASP264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)
Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word "quare" invites us to do), Quare/Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.Cross-listed with: LGBT264, WGSS264.
Credit Only Granted for: LGBT264, AASP264, WMST264 or WGSS264.

AASP274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.
Restriction: Must not have completed ENGL271, ENGL274, ENGL294,or AASP274. Cross-listed with ENGL274.
Credit Only Granted for: ENGL274 or AASP274.

AASP297 Research Methods in African American Studies (3 Credits)
Introduces African American Studies majors to the basic research skills, methodologies, sources, and repositories for studying African Diaspora. Students will be required to select a research topic, write a research proposal, develop an annotated bibliography, and in the process will be prepared for completing their senior thesis or other significant writing projects necessary to fulfill the requirements of the major.
Prerequisite: AASP101 or AASP202.
Restriction: Must be in African American Studies program.
Credit Only Granted for: AASP297 or AASP299R.
Formerly: AASP299R.

AASP298 Special Topics in African American Studies (3 Credits)
An introductory multi-disciplinary and inter-disciplinary educational experience to explore issues relevant to black life, cultural experiences, and political, economic, and artistic development.
Repeatable to: 6 credits if content differs.

AASP298B Constructions of Manhood and Womanhood in the Black Community (3 Credits)
Investigates the ways that African Americans are represented and constructed in public and private spheres and explores the social constructions and representations of Black manhood and womanhood from various disciplinary perspectives.Cross-listed with: WGSS265.
Credit Only Granted for: WMST265, AASP298B or WGSS265.
Formerly: WMST265.

AASP298C African Civilization to 1800 (3 Credits)
Survey of the principal developments in the history and culture of the peoples of African descent in colonial North America and the United States to 1865. Examines the African past, the Atlantic slave trade, variation in slavery, the growth of free black communities, the transformations of families and cultural forms, and patterns of resistance.Cross-listed with: HIST254.
Credit Only Granted for: HIST254 or AASP298C.

AASP298L African-American Literature and Culture (3 Credits)
An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.Cross-listed with: ENGL234.
Credit Only Granted for: ENGL234 or AASP298L.

AASP298M Martin Luther King Jr. (3 Credits)
Examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual, who articulated a moral compass of the nation, to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community", the Social Gospel, liberalism, "socially conscious democracy", militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.Cross-listed with: HIST108C, AMST189C.
Credit Only Granted for: HIST108C, AASP298M, or AMST189C.

AASP299 Selected Topics in African American Studies (1-3 Credits)
An introductory multi-disciplinary academic exploration of the cultural, political, and economic issues relevant to Africans and African-Americans.
Repeatable to: 6 credits if content differs.

AASP301 Applied Policy Analysis and the Black Community (3 Credits)
Development and application of the tools needed for examining the effectiveness of alternative policy options confronting minority communities. Review policy research methods used in forming and evaluating policies. Examination of the policy process.
Prerequisite: AASP101; and (ECON201 or ECON200).
Recommended: Completion of one semester of statistics is recommended.

AASP303 Computer Applications in African American Studies (3 Credits)
Introduction to statistics and database processing software used in model estimation and simulation in policy analysis. Special emphasis on applications for applied research on policy problems confronting minority communities.
Prerequisite: STAT100, MATH107, MATH111, or SOCY201; or students who have taken courses with comparable content may contact the department.

AASP305 Theoretical, Methodological and Policy Research Issues in African American Studies (3 Credits)
Theories and concepts in the social and behavioral sciences relating to problems in minority communities. Issues include validity and soundness of theoretical arguments, epistemological questions of various methodologies and the relationship between policy making and policy research.
Prerequisite: AASP301; and (STAT100, MATH111, PSYC200, BMGT230, or SOCY201). Or students who have taken courses with comparable content may contact the department.
Formerly: AASP401.

AASP310 African Slave Trade (3 Credits)
The relationship of the slave trade of Africans to the development of British capitalism and its industrial revolution; and to the economic and social development of the Americas.
Prerequisite: AASP202 or AASP100; or permission of BSOS-African American Studies department.
Formerly: AASP311.

AASP313 Black Women in United States History (3 Credits)
Black American women's history from slavery to the present. Focused on gaining a fuller understanding of the effect of race, class and gender on the life cycles and multiple roles of Black women as mothers, daughters, wives, workers and social-change agents.
Restriction: Sophomore standing or higher. Cross-listed with: WGSS314.
Credit Only Granted for: AASP313, WMST314 or WGSS314.
Formerly: WMST314.

AASP314 The Civil Rights Movement (3 Credits)
Survey of the twentieth century civil rights movement from the desegregation of UM Law School through the National Black Political Congress in Gary in 1972. Major themes include leadership, legal and constitutional challenges, non-violence, Black Power, and Pan-Africanism.
Prerequisite: AASP100 or HIST157.

AASP358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AASP360 Issues in African Development (3 Credits)
An introduction to the study of development on the African continent. Students will have an opportunity to think critically about the ways in which Africa is portrayed in the academic literature, popular press, and media. Issues of focus include population dynamics, gender, health, migration, HIV/AIDS, and globalization with particular attention paid to the role of culture.
Credit Only Granted for: AASP398D, GEOG398A, GVPT359F, SOCY398Y, or AASP360.
Formerly: AASP398D.

AASP386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-African American Studies department; and junior standing or higher.

AASP395 Fundamentals of Quantitative Research in Socio-Cultural Perspective (3 Credits)
Introduction to quantitative methods for African American Studies majors in the cultural and social analysis concentration. Basics of survey design and experimental design and data analysis and use of statistical software programs.
Restriction: Must be in African American Studies program; and junior standing or higher.

AASP396 Independent Study Non-Thesis Option (3 Credits)
A research seminar that allows African American Studies majors to complete an independent study research project in lieu of completing the AASP397: Senior Thesis. Students will examine various concepts of race, gender, labor and ethnicity in the seminar lecture component to be applied toward their specific research projects.
Prerequisite: AASP386 and AASP297.
Restriction: Must be in African American Studies program.
Credit Only Granted for: AASP396 or AASP397.

AASP397 Senior Thesis (3 Credits)
Directed research in African American Studies resulting in the completion and defense of a senior thesis.
Restriction: Permission of BSOS-African American Studies department.

AASP398 Selected Topics in the African Diaspora (3 Credits)
Analysis of the historical experiences and cultures of Africans in the diaspora.
Repeatable to: 6 credits if content differs.

AASP399 Research in African-American Studies (1-3 Credits)
African American Studies research labs are the settings in which the most recent scholarly work of each faculty member takes place with the enterprise of conducting and disseminating research. Faculty members operate as the team leader and faculty mentor working with undergraduate students around a specific research topic or project. Students will have the opportunity to assist with reviewing literature, data gathering, data management, coding analysis, and the preparation of conference presentations and scholarly publications while advancing their own scholarship and interests, cultivating integrative skills, and gain training in a specialized aspect of the African American Studies discipline, which may not be otherwise available from other experiences on campus.
Prerequisite: Two of the following courses: AASP100, AASP101, AASP200, or AASP202.
Recommended: AASP210 or equivalent.
Restriction: Must be in the Africa-American Studies major; and must have completed 30 credits; and must have earned a minimum cumulative GPA of 2.00.
Repeatable to: 6 credits.

AASP400 Directed Readings in African American Studies (3 Credits)
The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.
Prerequisite: AASP202 or AASP100.

AASP401 Research Directions in African-American Studies (3 Credits)
Utilizing a pro seminar format, this course offers an overview of recent research on the experiences of African Americans and the African diaspora. The course will cover selective topics from research portfolios of department faculty related to the status of African Americans and the diaspora across a number of topics. Students will read recent original research studies and discuss with the authors both the theoretical underpinnings of the research, the methods and evaluate the interpretations. This course fulfills the capstone requirement for African American studies majors and certificate students by providing an opportunity to consolidate and integrate a range of ideas encountered in the curriculum.
Restriction: Must have earned a minimum of 90 credits; and must be major in African-American Studies.

AASP402 Classic Readings in African American Studies (3 Credits)
Classic readings of the social, economic and political status of blacks and other minorities in the United States and the Americas.
Prerequisite: AASP202 or AASP100.

AASP411 Black Resistance Movements (3 Credits)
A comparative study of the black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.
Prerequisite: AASP100.

AASP441 Science, Technology, and the Black Community (3 Credits)
Scientific knowledge and skills in solving technological and social problems, particularly those faced by the black community. Examines the evolution and development of African and African American contributions to science. Surveys the impact of technological changes on minority communities.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP443 Blacks and the Law (3 Credits)
The relationship between black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP468 Special Topics in Africa and the Americas (3 Credits)
Cultural, historical and artistic dimensions of the African experience in Africa and the Americas.
Repeatable to: 6 credits if content differs.

AASP478 Humanities Topics in African American Studies (3 Credits)
Advanced studies in the humanities, often requiring prerequisites, focusing on the literary, artistic and philosophical contributions of Africans and African Americans.
Repeatable to: 6 credits if content differs.

AASP493 Feminist and Nationalist Thought in Black Communities (3 Credits)
The historical and theoretical foundations of feminist and nationalist thought in Black Communities will be examined. Further, we will discover why feminist and nationalist thought has been routinely ignored or misrepresented as disparate, if not oppositional, themes in Black intellectual and political life.
Prerequisite: AASP101 or AASP100.
Credit Only Granted for: AASP493 or AASP499W.
Formerly: AASP499W.

AASP496 Special Topics in Afro-American Studies: Diversity in Oneness: The Making of African-American Communities (5 Credits)
The making of African-American communities.

AASP498 Special Topics in Black Culture (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.
Prerequisite: AASP202 or AASP100.
Repeatable to: 6 credits if content differs.

AASP499 Advanced Topics in Public Policy and the Black Community (3 Credits)
Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.
Prerequisite: AASP301; or permission of BSOS-African American Studies department.
Repeatable to: 6 credits if content differs.

AAST - Asian American Studies

AAST200 Introduction to Asian American Studies (3 Credits)
The aggregate experience of Asian Pacific Americans, from developments in the countries of origin to their contemporary issues. The histories of Asian Pacific American groups as well as culture, politics, the media, and stereotypes, viewed from an interdisciplinary perspective.Cross-listed with: AMST298C.
Credit Only Granted for: AAST200 or AMST298C.

AAST201 Asian American History (3 Credits)
Introduction to the history of Asian Americans and Asians in the United States and the Americas and to the field of Asian American Studies, from an interdisciplinary perspective. Topics include theories of race and ethnicity; Asian migration and diaspora to the Americas; Asian American work and labor issues; gender, family, and communities; nationalism and nativism, and anti-Asian movements; Asian Americans in World War II, the Cold War, and the issues in the civil rights & post-civil rights era.Cross-listed with: HIST221.
Credit Only Granted for: AAST201 or HIST221.

AAST222 Immigration and Ethnicity in America (3 Credits)
The history of immigration and the development of diverse populations in the United States are examined. Topics include related political controversies, the social experiences of immigrants, ethnicity, generations, migration, inter-group relations, race and diversity in American culture.
Credit Only Granted for: AAST222 or HIST222.

AAST233 Introduction to Asian American Literature (3 Credits)
A survey of Asian American literature with an emphasis on recurrent themes and historical context.Cross-listed with: ENGL233.
Credit Only Granted for: ENGL233 or AAST233.

AAST262 Asian American Psychology (3 Credits)
An overview of how socio-cultural influences impact the development and psychological health of Asian Americans. Other topics include how minority group status, adaptation and identity development influence various aspects of psychological functioning; the role of historic systematic racism; and, how the COVID-19 pandemic has negatively impacted Asian Americans. Students develop a deeper understanding of the role of stereotypes and racism, acculturation, racial identity development, cultural values, gender socialization, behavioral norms, family roles, stressors and social support systems on the mental health, well-being and health of Asian Americans.Cross-listed with: PSYC262.
Credit Only Granted for: PSYC262, AAST262 or PSYC489Z.
Formerly: PSYC489Z.

AAST298 Special Topics in Asian American Studies (3 Credits)
An introductory multidisciplinary and interdisciplinary educational experience to explore issues relevant to Asian American life, cultural experiences; and political, economic, and artistic development.
Repeatable to: 6 credits if content differs.

AAST310 Introduction to Comparative Ethnic and Racial Studies (3 Credits)
Introduces students to the study of race and ethnicity in the United States. The class is organized according to the following five units: (1) Introduction; (2) Key concepts; (3) Mechanisms of racial formation; (4) Prevailing myths about race; and (5) Contemporary issues related to race and ethnicity. Through readings, film clips, and presentations, we will explore how the concept of race has developed and endured over time and become familiar with key concepts, such as "race" and "intersectionality". We will attempt to better understand how race is associated with other forms of difference, such as class, gender and ethnicity. We will identify and confront the prevailing myths about race and ethnicity in the United States. Finally, we examine the ways in which contemporary issues reveal the dynamics of race and ethnicity.Cross-listed with: AMST310.
Credit Only Granted for: AMST310, AAST398F, AAST310, or AMST328L.
Formerly: AMST328L and AAST398F.

AAST351 Asian Americans and Media (3 Credits)
From yellow peril invaders to model minority allies, Asian Americans have crafted their own dynamic cultural expressions in a number of media from film, television, and music to fashion, sports, and food that reveal and contest the contradictions of the U.S. nation-state. Asian American culture also uniquely sits at the nexus of immigration flows and digital technologies, providing a transnational lens to view the US place in the world. This advanced course, then, will introduce students to the study and practice of Asian American cyktyre as multiple , hybrid, and heterogeneous. It will do so through three sections: section one will introduce students to classical, cultural, and media concepts as well as relevant keywords outlined by Asian American Studies scholars; section two will review the work of Asian American cultural theorists; section three will focus on analyses of particular Asian American cultural productions. In doing so, students will gain an understanding of the shifting and interlocking tensions among the local, the national, and the global that form the cultural geographies of Asian America.
Credit Only Granted for: AAST351, AAST398M or AAST398N.
Formerly: AAST398M, AAST398N.

AAST355 Asian Americans in Film (3 Credits)
Explores how Asian Americans have historically been represented in the U.S. by Hollywood, and in turn, how independent and Hollywood Asian American filmmakers have represented themselves. It covers the history of racial, gendered, and sexualized representations of Asian Americans in Hollywood, as well as Asian American filmic responses within and outside Hollywood. It also introduces how four basic tools of film analysis mise-en-scene, cinematography, editing and sound work together to create meaning in moving images. It examines how these elements are put together in three different types of films by Asian American filmmakers: narrative, documentary, and experimental. How films function in society to circulate ideas that reproduce and challenge stereotypes about Asian Americans.Cross-listed with: AMST328W.
Credit Only Granted for: AAST355, AAST398L or AMST328W.
Formerly: 398L.

AAST363 Filipino American History and Biography (3 Credits)
Focus is placed on Filipino American experiences with an emphasis on identity, community building and organizing to influence public policy We will cover pertinent events from the US and Philippine history in order to understand the impact of colonialism, migration, immigration and assimilation on Filipino Americans.Cross-listed with: AMST323.
Credit Only Granted for: AAST363, AMST323, AAST398D, or AMST328J.
Formerly: AAST398D.

AAST378 Experiential Learning (3 Credits)
Field experience/internship in professional organizations and appropriate private and governmental agencies serving the Asian American community.
Restriction: Permission of UGST-Undergraduate Studies.
Repeatable to: 6 credits.

AAST388 Independent Research (1-3 Credits)
Directed, independent study in Asian American Studies resulting in the completion of an original research paper.
Restriction: Permission of UGST-Undergraduate Studies.
Repeatable to: 6 credits if content differs.

AAST394 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AMST324, IMMR394.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

AAST398 Selected Topics in Asian American Studies (3 Credits)
Study of a specific theme or issue involving the Asian America experience.
Repeatable to: 6 credits if content differs.

AAST420 Asian American Women: The Social Construction of Gender (3 Credits)
Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.
Restriction: Must not have completed WMST420. Cross-listed with: WMST420.
Credit Only Granted for: AAST420 or WMST420.

AAST421 Asian American Public Policy (3 Credits)
Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.Cross-listed with: AMST418N.
Credit Only Granted for: AAST421, AAST498M or AMST418N.
Formerly: AAST498M.

AAST424 Sociology of Race Relations (3 Credits)
Analysis of race-related issues, with a primary focus on American society. The historical emergence, development, and institutionalization of racism; the impact of racism on its victims; and racially based conflict.
Prerequisite: 6 credits in SOCY courses; or permission of UGST-Undergraduate Studies. Cross-listed with: SOCY424.
Credit Only Granted for: AAST424 or SOCY424.

AAST443 Asian American Politics (3 Credits)
Students will gain a greater understanding of 1)the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3)how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AMST498J.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AAST498 Advanced Topics in Asian American Studies (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary Asian American society. Emphasis on the social, political, economic, and behavioral factors affecting Asian Americans and their communities.
Repeatable to: 6 credits if content differs.

AAST499 Senior Thesis (3 Credits)
Under the supervision of faculty, research regarding a specific topic of the Asian American experience will be completed.
Prerequisite: AAST201 and AAST200.
Restriction: Permission of UGST-Undergraduate Studies; and must be in Asian American Studies program.
Repeatable to: 6 credits if content differs.

AGNR - Agriculture and Natural Resources

AGNR100 Agriculture Discovery: An Educational Odyssey Exploring Food, Culture, and the Environment (3 Credits)
Explores the history, cultural impact, and current issues of agriculture. Students are exposed to the wide range of professional opportunities associated with the use of plants and animals in the production and processing of food for human consumption. Students learn from Agriculture and Natural Resources (AGNR) faculty and USDA collaborators through lectures, labs and field trips to facilities in the Baltimore-Washington area.

AGNR200 AGNR 2+2 Program Extended Orientation Seminar (1 Credit)
Introduces AGNR 2+2 students to University and "American" life. Assists with their successful transition to the College and Agriculture and Natural Resources and the University of Maryland. Helps students to understand their place in AGNR at to learn about the resources available to them.
Prerequisite: Must be a first semester international student enrolled in the AGNR 2+2 Program.
Restriction: Must be a first year international student enrolled in the College of Agriculture and Natural Resources 2+2 Program.
Additional Information: It is strongly recommended that AGNR 2+2 students take AGNR 200 during the first semester at the University. One class meeting per week. This courses is initiated by International Programs and will be coordinated in conjunction with the College of AGNR.

AGNR270 Technology Training Seminar (2-3 Credits)
A hands-on training seminar about pedagogical applications of information technology and mastery of several technical skills. Special emphasis is placed on gainfully understanding technological issues such as copyright and intellectual property, accessibility, and usability.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-College of Agriculture & Natural Resources.
Credit Only Granted for: AGNR270 or BSCI279.

AGNR301 Sustainability (3 Credits)
Designed for students whose academic majors would be enhanced by the complementary study of a widely shared but hard-to-operationalize aspiration: that present choices should preserve or improve future options rather than foreclose or degrade them. How should we understand sustainability? How might we achieve it? How would we know if we had achieved it? And how could sustainability activists of a rising generation lead by example?Cross-listed with: PLCY301.
Credit Only Granted for: AGNR301, PUAF301, or PLCY301.
Formerly: PUAF301.

AGNR386 Experiential Learning (3-6 Credits)
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.
Formerly: AGRI386.

AGNR388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be admitted to AGNR Honors program.
Repeatable to: 6 credits if content differs.
Formerly: AGRI388.

AGNR489 Field Experience (1-4 Credits)
Credit according to time scheduled and organization of the course. A lecture series organized to study in depth a selected phase of agriculture not normally associated with one of the existing programs.
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.
Repeatable to: 4 credits if content differs.
Formerly: AGRI489.

AGNR499 Special Problems (1-3 Credits)
Formerly: AGRI499.

AGST - Agricultural Science and Technology

AGST130 Did Yeast Create Civilization? (3 Credits)
Fermented foods have played a major role in the transition from nomadic to settled agrarian societies, the establishment of social and religious customs, the expansion of empires, and modern economies. To what extent are our past and current attitudes towards fermented foods rooted in historical and cultural imprints? Explore the central role of fermentation in human history and culture, the basic microbiological processes underlying fermentation processes, and the processes used to produce and distribute fermented foods. Find out how the fruits, grains, and dairy products used to produce fermented foods are grown and selected. Students will learn about the development and modern use of fermented dairy products, pickles, bread, tea, chocolate, wine, beer, distilled liquors, and pharmaceutical/manufactured products.
Recommended: CHEM103, CHEM131, CHEM135, or CHEM146. Cross-listed with: PLSC130.
Credit Only Granted for: AGST130 or PLSC130.

AGST333 Crafty Beverage Crops (3 Credits)
From soda to wine, a scientific introduction to "crafty beverage crops". Students will expand their horticulture knowledge and gain an appreciation for craft beverages and the plants that made them. Topics include history, biology, production and management techniques, harvest, storage and market potential for crafty beverage crops.
Recommended: PLSC110 or PLSC112; or 1 course in BSCI, BCHM, BIOL.

AGST400 Advanced Crop Science (3 Credits)
Focuses on the study of the agronomic principles and practices required for the production of food, feed, fiber and fuel crops. This is a project-based course where students will develop a farm plan from knowledge gained in previous courses and built upon in this course. Students will learn to integrate data and information from many sources in order to build and operate a successful and sustainable agronomic farm operation using current and new technology. The use of farm management software will be an integral part of the course and farm project.
Prerequisite: PLSC112, PLSC113, BSCI160, BSCI161, and MATH113 or higher.
Recommended: ANSC101.
Credit Only Granted for: PLSC407 or AGST400.
Formerly: PLSC407.
Additional Information: There will be two required Saturday field trips during the semester. Because of the changing nature of agriculture, the dates of these field trips will be decided upon at the beginning of the semester by discussion among the students and based on cooperators availability and environmental factors. Students will have a minimum of two weeks notice as to the dates of the field trips.

AGST401 Tractor and Equipment Operation, Safety and Maintenance (1 Credit)
Provides students with basic skills needed to safely operate and maintain farm equipment, such as tractors and implements used in agronomic production. Students will receive introductory background training in the basic safety and operation of tractors through hands-on learning. Emphasis will also be placed on the mechanical functioning of equipment and the functional similarities and differences between gasoline (two-stroke and four-stroke) and diesel engines as well as electric motors as they relate to farm equipment (mobile and stationary). This knowledge will be used to teach students to safely perform basic care and maintenance of different tractor types as well as various implements. Students will also learn basic implement connection and disconnection, including the safe use of implements that employ a power take-off unit. Included in the course will be an introduction to the equipment and use of satellite navigation systems used in agronomic production.
Prerequisite: PLSC112 and PLSC113; MATH113 or higher MATH course; and must have completed or be concurrently enrolled in AGST400.
Restriction: Must be in the Agricultural Science and Technology major (01010) with priority given to Agronomy students (0101A); and must have earned a minimum of 60 credits; and permission of the Department of Plant Sciences and Landscape Architecture.
Additional Information: Course location will be the University of Maryland Wye Research & Education Center, Queenstown, Maryland. Because students will be working around machinery with moving parts, there is a strict dress code based on information from the United State Department of Agriculture Cooperative States Research, Education and Extension Service's Hazardous Occupations Safety Training for Agriculture (HOSTA), National Safe Tractor and Machinery Operation Program (NSTMOP) standards. YContact instructor for more information?.

AMSC - Applied Mathematics & Scientific Computation

AMSC420 Mathematical Modeling (3 Credits)
The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and minimum grade of C- in STAT400. Cross-listed with: MATH420.
Credit Only Granted for: AMSC420 or MATH420.

AMSC452 Introduction to Dynamics and Chaos (3 Credits)
An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.
Prerequisite: MATH341; or MATH246 and one of (MATH240 or MATH461). Cross-listed with: MATH452.
Credit Only Granted for: AMSC452 or MATH452.

AMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Cross-listed with: CMSC460.
Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

AMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Cross-listed with: CMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC498 Selected Topics in Applied Mathematics (1-3 Credits)
Topics in applied mathematics of special interest to advanced undergraduate students.
Repeatable to: 6 credits if content differs.

AMST - American Studies

AMST101 Introduction American Studies (3 Credits)
Introduces students to the interdisciplinary field of American Studies by examining concepts such as culture, identity, cultural practices, and globalization, as well as theories underlying these concepts. Engages key themes, especially constructions of difference and identity, cultures of everyday life, and America and the world.
Credit Only Granted for: AMST101 or AMST201.
Formerly: AMST201.

AMST120 Race, Gender, and the Global Economy (3 Credits)
An exploration of the building blocks of the global economy (e.g. free trade, financial institutions) in relation to racial and gender difference, hierarchies, and ideologies.

AMST189C Martin Luther King Jr. (3 Credits)
Examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual, who articulated a moral compass of the nation, to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community", the Social Gospel, liberalism, "socially conscious democracy", militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.Cross-listed with: HIST108C, AASP298M.
Credit Only Granted for: HIST108C, AASP298M, or AMST189C.

AMST202 Cultures of Everyday Life in America (3 Credits)
Examine the structures and patterns of everyday life in the U.S., utilizing methods such as ethnography, oral history, survey research, and textual, visual, and material cultural analysis.

AMST203 Popular Culture in America (3 Credits)
An introduction to American popular culture, its historical development, and its role as a reflection of and influence on our culture and society.

AMST204 Film and American Culture Studies (3 Credits)
Exploration of the American film from a historical perspective, illustrating the motion picture's role as an institutional phenomenon, as a form of communication, and as a source of cross-cultural study.

AMST205 Material Aspects of American Life (3 Credits)
Historical survey of American material culture. Ways of describing and interpreting accumulated material evidence (e.g., buildings, town plans) introduced by stressing relationship between artifact and culture.

AMST207 Contemporary American Cultures (3 Credits)
World views, values, and social systems of contemporary American cultures explored through readings on selected groups such as middle-class suburbanites, old order Amish, and urban tramps.

AMST210 Introduction to Ethnography (3 Credits)
A qualitative research method course used to study social worlds communities, cultures, institutions, and other social groups from the perspectives of the people who inhabit those social worlds. Ethnographic research involves understanding cultural traditions from an insider's perspective by studying the everyday lives of people steeped in those traditions.

AMST212 Diversity in American Culture (3 Credits)
Exploration of the role of diversity in the shaping of American culture. Special emphasis will be placed on the multicultural origins of American popular and material culture, such as foodways and entertainment, and on the experience of "Americanization."

AMST213 Heroes and Villains in American Film (3 Credits)
We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.Cross-listed with: CINE282.
Credit Only Granted for: AMST213, HONR219F, CINE282 or FILM298V.
Formerly: HONR219F, FILM298V.

AMST260 American Culture in the Information Age (3 Credits)
Examines the ways in which content and form of public information interact with the culture, families & individuals.
Credit Only Granted for: AMST260 or AMST298I.
Formerly: AMST298I.

AMST262 Houses, Schools, and Prisons in American Life (3 Credits)
This interdisciplinary course explores the role of property, discipline, and punishment in American life. By exploring the ideological underpinnings in property, discipline, and punishment and their manifestations in houses, schools, and prisons we will explore how these entities reflect American society and its values.

AMST269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AMST290 Shifting Sands: Constructing Cultural Mainstreams and Margins in the U.S. (3 Credits)
Examines the construction, operation, and meaning of cultural mainstreams and margins in a range of contexts, spaces, and times in the U.S. Using a variety of primary sources, research methods, and interdisciplinary scholarship, we will explore how Americans make and assign meaning to cultural mainstreams and margins. We will examine how and why cultural margins and mainstreams shift over time and what their consequences have been for social policies, laws, power relations, and national identity.
Credit Only Granted for: AMST289A or AMST290.
Formerly: AMST289A.

AMST298 Selected Topics in American Studies (3 Credits)
Cultural study of a specific theme or issue involving artifacts and documents from both past and contemporary American experience.
Repeatable to: 6 credits if content differs.

AMST298Q U.S. Latinx Literature and Culture (3 Credits)
Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.Cross-listed with: ENGL235.
Credit Only Granted for: ENGL235 or AMST298Q.

AMST310 Introduction to Comparative Ethnic and Racial Studies (3 Credits)
Introduces students to the study of race and ethnicity in the United States. The class is organized according to the following five units: (1) Introduction; (2) Key concepts; (3) Mechanisms of racial formation; (4) Prevailing myths about race; and (5) Contemporary issues related to race and ethnicity. Through readings, film clips, and presentations, we will explore how the concept of race has developed and endured over time and become familiar with key concepts, such as "race" and "intersectionality". We will attempt to better understand how race is associated with other forms of difference, such as class, gender and ethnicity. We will identify and confront the prevailing myths about race and ethnicity in the United States. Finally, we examine the ways in which contemporary issues reveal the dynamics of race and ethnicity.Cross-listed with: AAST310.
Credit Only Granted for: AMST310, AAST398F, AAST310, or AMST328L.
Formerly: AMST328L and AAST398F.

AMST315 Religion in American Culture (3 Credits)
Introduces students to the world's major religious traditions and examines how American culture informs, and is informed by, the variety of religious beliefs and practices in the U.S. This course is primarily concerned with religion as a system of meaning. The focus of the course is not on the history of religion or on analysis of religious texts, but rather on the meaning of a religion to its believers.
Recommended: AMST101.
Credit Only Granted for: AMST315 or AMST328R.
Formerly: AMST328R.

AMST320 (Dis)ability in American Film (3 Credits)
Explores the connection between film and disability through an analysis of independent and mainstream American films in various film genres. Specifically, we will consider how these film representations reflect and/or challenge the shifting social perspectives of disability over the 20th and 21st centuries. Beginning with the presentation of disability as theatrical spectacle in the traveling sideshow and early cinema, we will work our way through film history to develop an understanding of our society's complicated relationship with disability.
Credit Only Granted for: AMST320 or AMST328X.
Formerly: AMST328X.

AMST323 Filipino American History and Biography (3 Credits)
Focus is placed on Filipino American experiences with an emphasis on identity, community building and organizing to influence public policy We will cover pertinent events from the US and Philippine history in order to understand the impact of colonialism, migration, immigration and assimilation on Filipino Americans.Cross-listed with: AAST363.
Credit Only Granted for: AAST363, AMST323, AAST398D, or AMST328J.
Formerly: AAST398D.

AMST324 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AAST394, IMMR394.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

AMST328 Perspectives on Identity and Culture (3 Credits)
Analysis of the cultural aspect of identity formation and the role of individual or community identities in cultural production. Examination of cultural texts such as film, literature, fashion, artifacts, archival records, architecture, monuments, sports, and paintings.
Repeatable to: 9 credits if content differs.

AMST328R Religion in American Culture (3 Credits)
Introduces students to the world's major religious traditions and examines how American culture informs, and is informed by, the variety of religious beliefs and practices in the U.S. This course is primarily concerned with religion as a system of meaning. The focus of the course is not on the history of religion or on analysis of religious texts, but rather on the meaning of a religion to its believers.
Recommended: AMST101.
Credit Only Granted for: AMST315 or AMST328R.
Formerly: AMST328R.

AMST328W Asian Americans in Film (3 Credits)
Explores how Asian Americans have historically been represented in the U.S. by Hollywood, and in turn, how independent and Hollywood Asian American filmmakers have represented themselves. It covers the history of racial, gendered, and sexualized representations of Asian Americans in Hollywood, as well as Asian American filmic responses within and outside Hollywood. It also introduces how four basic tools of film analysis mise-en-scene, cinematography, editing and sound work together to create meaning in moving images. It examines how these elements are put together in three different types of films by Asian American filmmakers: narrative, documentary, and experimental. How films function in society to circulate ideas that reproduce and challenge stereotypes about Asian Americans.Cross-listed with: AAST355.
Credit Only Granted for: AAST355, AAST398L or AMST328W.
Formerly: 398L.

AMST328X (Dis)ability in American Film (3 Credits)
Explores the connection between film and disability through an analysis of independent and mainstream American films in various film genres. Specifically, we will consider how these film representations reflect and/or challenge the shifting social perspectives of disability over the 20th and 21st centuries. Beginning with the presentation of disability as theatrical spectacle in the traveling sideshow and early cinema, we will work our way through film history to develop an understanding of our society's complicated relationship with disability.
Credit Only Granted for: AMST320 or AMST328X.
Formerly: AMST328X.

AMST340 Introduction to History, Theories and Methods in American Studies (3 Credits)
Introduction to the process of interdisciplinary research, including research literatures, questions, first-hand sources and library and analytic methods in American Studies. Each student will craft a prospectus for original research.
Prerequisite: Must have completed AMST201; and 2 courses in AMST.
Restriction: Must be in American Studies program; and sophomore standing or higher.

AMST369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AMST386 Experiential Learning (3-6 Credits)
Restriction: Permission of ARHU-American Studies department; and junior standing or higher.

AMST388 Honors Thesis (3-6 Credits)
Individual research, thesis and oral defense. The research project will be conducted under the supervision of a faculty member.
Restriction: Must be admitted to AMST honors program; and permission of ARHU-American Studies department; and senior standing.
Repeatable to: 6 credits if content differs.

AMST398 Independent Studies (1-3 Credits)
Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.
Restriction: Permission of ARHU-American Studies department.
Repeatable to: 6 credits if content differs.

AMST418 Cultural Themes in America (3 Credits)
Examination of structure and development of American culture through themes such as "growing up American," "culture and mental disorders," "race," "ethnicity," "regionalism," "landscape," and "humor."
Repeatable to: 6 credits if content differs.

AMST418N Asian American Public Policy (3 Credits)
Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.Cross-listed with: AAST421.
Credit Only Granted for: AAST421, AAST498M or AMST418N.
Formerly: AAST498M.

AMST428 American Cultural Eras (3 Credits)
Investigation of a decade, period, or generation as a case study in significant social change within an American context. Case studies include "Antebellum America, 1840-1860" and "American culture in the Great Depression."
Repeatable to: 6 credits if content differs.

AMST429 Perspectives on Popular Culture (3 Credits)
Topics in popular culture studies, including the examination of particular genres, themes, and issues.
Repeatable to: 6 credits if content differs.

AMST450 Seminar in American Studies (3 Credits)
Developments in theories and methods of American Studies scholarship, with emphasis upon interaction between the humanities and the social sciences in the process of cultural analysis and evaluation.
Prerequisite: AMST201 and AMST340; and 1 course in AMST.
Restriction: Senior standing; and must be in American Studies program.

AMST498 Special Topics in American Studies (3 Credits)
Topics of special interest.
Repeatable to: 9 credits if content differs.

AMST498J Asian American Politics (3 Credits)
Students will gain a greater understanding of 1)the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3)how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AAST443.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AMST499 Independent Studies (1-3 Credits)
Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.
Restriction: Permission of ARHU-American Studies department; and must be in American Studies program.
Repeatable to: 6 credits if content differs.

ANSC - Animal Science

ANSC101 Principles of Animal Science (3 Credits)
A comprehensive overview of the application of biology in the care and use of animals that live in close association with humans including food animals, companion animals, lab animals, zoo animals, etc. The role of science in modern food production using animals will be emphasized.

ANSC103 Principles of Animal Science Laboratory (1 Credit)
Laboratory focusing on the application of biology in the care and use of animals that live in close association with humans including livestock and companion animals. Labs will include live animals.
Prerequisite: Must have completed or be concurrently enrolled in ANSC101.
Restriction: Must be in one of the following programs (Environmental Sci & Pol-Environment & Agriculture; Agricultural and Veterinary Medicine; Agricultural Science and Technology) ; or must be in a major within the AGNR-Animal & Avian Sciences department; or permission of department required for students in other College of AGNR programs.

ANSC105 Horse Care Practicum (1 Credit)
This practicum course provides the opportunity for students to be involved in the routine care of the horses housed at the Campus Farm including grooming, feeding, turnout, first aid, record-keeping, and cleaning. Practical skills are supplemented with self-paced online learning.
Restriction: Permission of the instructor.
Credit Only Granted for: ANSC108 or ANSC105.
Formerly: ANSC108.

ANSC108 Horse Care Practicum (1 Credit)
This practicum course provides the opportunity for students to be involved in the routine care of the horses housed at the Campus Farm including grooming, feeding, turnout, first aid, record-keeping, and cleaning. Practical skills are supplemented with self-paced online learning.
Restriction: Permission of the instructor.
Credit Only Granted for: ANSC108 or ANSC105.
Formerly: ANSC108.

ANSC115 Careers in the Animal Sciences (1 Credit)
Discussion of current employment opportunities in Animal Science, primarily by invited speakers. In addition, students will have the opportunity to prepare resumes and improve oral presentation skills while working with their peers.
Prerequisite: ANSC101 and ANSC103.

ANSC120 Introduction to Dairy Judging (2 Credits)
Students will establish an understanding of dairy cattle anatomy and importance in dairy production, while gaining the ability to evaluate dairy cattle for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of evaluation and gain confidence in public speaking.

ANSC121 Introduction to Livestock Judging (2 Credits)
Students will establish a working understanding of the structural anatomy of several livestock species- cattle, sheep, pigs, goats- and their individual importance in the Agricultural Industry, while gaining the ability to evaluate these species for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of based on their evaluations and gain skills in public speaking. The course will include two weekend field trips to farms in order to practice judging skills.

ANSC204 Anatomy of Domestic Animals (2 Credits)
Covering the anatomy of major species of domestic animals. Utilizes a systemic approach to provide a general knowledge of both gross and microscopic mammalian structure. Comparative differences between the major domestic species are covered.
Prerequisite: ANSC101, ANSC103, BSCI170 and BSCI171.
Corequisite: ANSC205.
Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC211 or ANSC204 AND ANSC205.
Formerly: ANSC211.

ANSC205 Anatomy of Domestic Animals Laboratory (2 Credits)
A regional approach is taken to study the gross anatomy of major domestic species in the laboratory portion of this course.
Prerequisite: ANSC101, ANSC103, BSCI170 and BSCI171.
Corequisite: ANSC204.
Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC211 or ANSC204 and ANSC205.
Formerly: ANSC211.

ANSC210 Veterinary Terminology (1 Credit)
Students will learn terminology related to the clinical practice of small and large animal medicine including medical record terminology and a systems-based consideration of common practices and pathologies.
Prerequisite: ANSC204 and ANSC205.
Credit Only Granted for: The course is offered on-line through a series of self-paced modules on ELMS..

ANSC212 Applied Animal Physiology (3 Credits)
The physiology of domesticated animals with emphasis on functions related to homeostasis, and the physiological adaptation to environmental influences.
Prerequisite: ANSC211; or (ANSC204 and ANSC205); or students who have taken courses with comparable content may contact the department.

ANSC214 Applied Animal Physiology Laboratory (1 Credit)
Application of physiological laboratory techniques to domestic and lab animals.
Prerequisite: Must have completed or be concurrently enrolled in ANSC212.

ANSC220 Livestock Management (3 Credits)
Management of meat animals including beef, sheep, and swine. This course will emphasize obtaining optimal efficiency of production through the integration of leading edge breeding, feeding, management, and marketing practices.
Prerequisite: ANSC101 and ANSC103.

ANSC225 Love Me, Hate Me, Use Me, Save Me: Our Conflicting Views of Animals (3 Credits)
Examine the evolution of human-animal relationships and consider some of the major social an scientific debates that have arisen in the last century as a result of our rapidly changing and diverse views about animals.

ANSC226 The Future of Animal Agriculture (3 Credits)
Offers students the opportunity to learn about the history of animal agriculture in the United States and envision what its future might be as it adapts to major challenges such as our growing global population, climate change, food injustice, antimicrobial and insecticide resistance, animal welfare concerns, and farmer distress. The course will examine technological & biotechnological, agroecological, and social innovations that address these issues while providing healthy, safe, nutritious food. Students are invited to learn about these issues and to create and propose their own solutions through weekly "extend your learning" opportunities and a course project in animal agricultural extension.
Additional Information: The course is hosted on ELMS-Canvas and will require students to have reliable access to the internet.

ANSC227 Eating with Eyes Wide Open (3 Credits)
Students will investigate the tension that is created by trade-offs that, knowingly or not, are made by consumers relative to agricultural production methods and dietary choices. Course will inform students about their food supply so they can make informed decisions and practice intentional or informed eating.

ANSC232 Horse Management (3 Credits)
An introductory course on the care, management, and use of horses. Major topics include the industry, breeds, conformation, feeding, health, reproduction, facilities and business.
Prerequisite: ANSC101 and ANSC103.
Credit Only Granted for: ANSC232 or ANSC332.
Formerly: ANSC332.

ANSC233 Equine Behavior (2 Credits)
Both normal and anomalous behavior of horses will be covered. Emphasis will be given to techniques based on knowledge of behavior that are known to be safe and effective in handling horses.
Prerequisite: ANSC101, ANSC103, and ANSC232.
Credit Only Granted for: ANSC489B or ANSC233.
Formerly: ANSC489B.

ANSC235 Applied Small Ruminant Parturition (2 Credits)
Popularly known as "Lamb Watch", the course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning. Covered topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal delivery, management of lambs, qualitative assessment, breeding principles, etc.
Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.
Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/ Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

ANSC236 Equine Business Management (3 Credits)
The study and practice of applying decision-making skills and tools needed for operating a profitable equine boarding or training stable business.
Prerequisite: ANSC232.
Recommended: AREC250.
Credit Only Granted for: ANSC236 or INAG232.

ANSC237 Equine Reproductive Management (3 Credits)
Students learn the fundamental skills necessary to manage an equine breeding herd including anatomy/physiology of genital tracts, estrus detection, manipulation of the estrous cycle, semen collection, pre- and post-foaling techniques, infertility, and health and nutrition of the mare, foal and stallion. Students will be required to spend ~ 30 hours during the spring semester caring for broodmares and foals and attending at least one foaling and estrous detection checks on broodmares outside of regularly scheduled class time.
Prerequisite: ANSC232.
Credit Only Granted for: ANSC237 or INAG233.
Additional Information: Course participation will include nightly checks of mares in the two weeks prior to parturition, and out-of-class time imprinting and working with newborn foals.

ANSC242 Dairy Cattle Management (3 Credits)
All aspects of dairy production, including nutrition, reproduction, mastitis control, milking management, farmstead facilities, financial management and forage production.
Prerequisite: ANSC101 and ANSC103.
Formerly: ANSC240 and ANSC241.

ANSC245 Sheep Management (3 Credits)
Popularly known as "Lamb Watch", this course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning on the campus farm. Course topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal parturition, management of lambs, qualitative assessment, breeding principles, nutrition, products and their marketing, and ram management.
Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.
Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/ Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC235 or ANSC245.

ANSC250 Companion Animal Care and Management (3 Credits)
Care and management of the companion small animals. Species covered include the cat, dog, rodents, lagomorphs, reptiles, amphibians, birds and others as class interest and schedule dictate. Basic description, evolutionary development, breeding, nutritional and environmental requirements, and public health aspects will be presented for each species.
Credit Only Granted for: ANSC250 and ANSC305.
Formerly: ANSC305.

ANSC252 Introduction to the Diseases of Wildlife (3 Credits)
The principal diseases of North American wildlife will be briefly considered. For each disease, specific attention will be given to the following: signs evidenced by the affected animal or bird, causative agent, means of transmission and effects of the disease on the population of the species involved.
Prerequisite: BSCI105; or (BSCI170 and BSCI171); or permission of AGNR-Animal & Avian Sciences department; or students who have taken courses with comparable content may contact the department.

ANSC255 Introduction to Aquaculture (3 Credits)
Introduces the art and science of rearing aquatic animals and the essential principles of aquaculture. Students receive hands-on training in the methods required for successful husbandry and management of aquatic animals in their water environment.
Prerequisite: ANSC101 and ANSC103; or must have completed an introductory biology course.

ANSC260 Laboratory Animal Management (3 Credits)
A comprehensive course in care and management of laboratory animals. Topics covered include regulations governing the use of animals in research, laboratory animal facility design and management, animal research models, animal health management and husbandry, responsibilities of lab animal workers and career opportunities in the field. Hands-on labs focus on lab animal handling, husbandry and common techniques. Field trips are required, and you must attend a minimum number of field trips which will be held during lab time.
Prerequisite: ANSC101 and ANSC103.
Credit Only Granted for: ANSC260 or ANSC413.
Formerly: ANSC413.

ANSC262 Commercial Poultry Management (3 Credits)
Theory and science of rearing poultry and marketing poultry meat and eggs in the commercial sector. Includes current issues, organization of the industry, as well as fundamental biology of the domestic chicken. Students will help raise a flock of broiler chickens. Field trips to commercial poultry operations are required.
Prerequisite: ANSC101 and ANSC103.

ANSC270 Animal Enterprise Management (3 Credits)
General principles of enterprise organization, management, and operation as applicable to food, livestock, and companion animals. Enterprise planning and establishment, management of financial, human, and animal resources, and other related topics will be investigated.
Prerequisite: ANSC101 and ANSC103; or permission of instructor.
Credit Only Granted for: ANSC270 or AREC306.

ANSC275 Introduction to Veterinary Medical Science and Practice (3 Credits)
The fundamentals of clinical veterinary medical practice and the research that supports it. Topics presented will include the histology, gross anatomy and physiology of the musculoskeletal, cardiovascular, respiratory, reproductive, digestive, renal and neurological systems as they relate to the description of specific disease states taught in this course. Additionally, examples of diseases caused by pathologic disturbances to these systems will be discussed, as well as the basic principles of preventative health care, diagnostic testing and pharmacologic intervention. Significant attention will be given to research in veterinary science and the practice of evidence-based medicine. This course is intended for any student interested in veterinary medicine, animal physiology, or medical science.
Prerequisite: BSCI105; or (BSCI170 and BSCI171).

ANSC282 Grazing Animal Management (3 Credits)
For students interested in acquiring knowledge and skills in pasture management, grazing management of livestock (large and small ruminants, horses), and hay production. Fundamental information regarding best management practices for soils, plants, and grazing livestock will be covered
Prerequisite: ANSC101 and ANSC103; or permission of instructor.
Credit Only Granted for: ANSC110, ANSC282, or INAG116.
Formerly: ANSC110.

ANSC314 Comparative Animal Nutrition (3 Credits)
The fundamental role and implications of dietary preference, gastrointestinal physiology and nutrients in animal nutrition. Biochemical roles of nutrients in metabolism, digestion, absorption and assimilation as it relates to various life processes.
Prerequisite: ANSC101 and ANSC103; and (CHEM231 or PLSC275).

ANSC315 Applied Animal Nutrition (3 Credits)
Elements of nutrition, source characteristics and adaptability of various feedstuffs to several classes of livestock. A study of the composition of feeds, nutrient requirements and computerized formulation of economic diets and rations for livestock.
Prerequisite: ANSC314.

ANSC327 Molecular and Quantitative Animal Genetics (3 Credits)
Classical, molecular, and population genetics with specific emphasis on animal systems will be covered. Also, disseminate information on molecular approaches for manipulating genetics at the whole animal level (transgenic and cloning). Other model organisms will be discussed to provide a conceptual framework.
Prerequisite: ANSC101, CHEM131, and ANSC103. And BSCI105; or (BSCI170 and BSCI171).

ANSC330 Equine Science (3 Credits)
Scientific principles of horse behavior, anatomy, physiology, locomotion, nutrition, reproduction, growth, health and disease as applied to horses are emphasized.
Prerequisite: ANSC232; or permission of instructor.
Recommended: ANSC212 and ANSC211.
Credit Only Granted for: ANSC230 or ANSC330.
Formerly: ANSC230.

ANSC340 Health Management of Animal Populations (3 Credits)
A study of common and emerging animal diseases and their prevention and control. The main focus will be on livestock and poultry diseases. However, zoonotic, wildlife, and laboratory animal diseases will also be discussed along with risk assessment, bioterrorism counter-measures, and animal welfare, especially as these topics interface or impact animals used in food production.
Prerequisite: BSCI223; and (ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, or ANSC262).
Recommended: ANSC212.
Credit Only Granted for: ANSC340 or ANSC412.
Formerly: ANSC412.

ANSC359 Internship Experience in Animal and Avian Sciences (3-6 Credits)
Experiential learning is a key component in an animal science education. Through the internship program, you will have the opportunity to develop your expertise in a specific species and discipline within the animal science curriculum. You will arrange an on- or off-campus internship experience related to animal science. You will spend a specified number of hours at the internship site each week and attend biweekly classroom sessions where we will discuss how the study of animal science fits into your specific internship experience as well as understand how to achieve each of the course learning outcomes.
Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, or ANSC262.
Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Students are required to submit an application to the Animal Science Internship Coordinator to enroll in this course.

ANSC379 Animal Science Undergraduate Teaching Assistant Seminar (2 Credits)
Seminar course for undergraduate teaching assistants within ANSC.
Prerequisite: Permission of instructor.
Repeatable to: 8 credits.
Formerly: ANSC390.

ANSC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Animal & Avian Sciences department.
Restriction: Junior standing or higher.

ANSC388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be in the AGNR Honors program.
Repeatable to: 6 credits if content differs.

ANSC389 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Animal & Avian Sciences department.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.
Formerly: ANSC386.

ANSC398 Seminar - Research (1 Credit)
Presentation and discussion of current literature and research work in animal science.
Prerequisite: ANSC101 and ANSC103.
Repeatable to: 2 credits if content differs.

ANSC399 Special Problems in Animal Science (1-2 Credits)
Work assignments are designed to be proportional to the amount of credit. Students are expected to develop an abstract, fact sheet, manuscript, oral presentation, poster, webpage, journal-log, or other scholarly product associated with their study and/or project.
Prerequisite: ANSC101 and ANSC103.
Restriction: Permission of AGNR-Animal & Avian Sciences department; and junior standing or higher.
Repeatable to: 6 credits if content differs.

ANSC410 The Gut Microbiome and its Roles in Health and Disease (3 Credits)
A comprehensive perspective of the role of gut microbiome/microflora in nutrition, metabolism, disease prevention and health issues including farm animal health and food value, and human gastrointestinal health and immunity.
Prerequisite: BSCI223, ANSC212, ANSC327, EPIB301, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC489M or ANSC410.
Formerly: ANSC489M.

ANSC417 Regulatory Issues in Animal Care and Management (3 Credits)
A study of regulatory issues affecting animal care and management in the livestock industry. Guest speakers and classroom discussions will focus on key topics including animal welfare, feed and drug regulations, animal identification, CAFO management, processing and marketing of animal products.
Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, ANSC262, or ANSC282; or permission of instructor.
Additional Information: Field trips may be required for this course.

ANSC435 Experimental Embryology (3 Credits)
Experimental approaches to mammalian embryology with emphasis on domestic livestock systems as applied to research and production systems. Lab will include hands-on experiments and demos of in vitro embryo production, embryo splitting, cell injection and nuclear transfer.
Prerequisite: ANSC212.
Recommended: Completion of one course in reproductive physiology is recommended.
Credit Only Granted for: ANSC435 or ANSC489M.
Formerly: ANSC489M.

ANSC436 Animal Health Policy and Communication (3 Credits)
Intended for upper level students in Veterinary Medicine or Animal Science as well as other students who are interested in understanding how science and politics interact and influence animal health policy and how veterinarians and animal scientists can effectively communicate science to non-scientists such as legislators and policymakers.
Recommended: Completion of ANSC225 and ANSC340 recommend.
Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; or permission of AGNR-VA-MD Regional COL Veterinary Med.
Credit Only Granted for: ANSC489A or ANSC436.
Formerly: ANSC489A.

ANSC437 Animal Biotechnology (3 Credits)
Key concepts and current issues in animal biotechnology are covered. Current techniques and applications systems as well as social, ethical, and regulatory issues associated with biotechnology will be discussed.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

ANSC440 Zoonotic Diseases and Control (3 Credits)
Global perspective of foodborne diseases common to animals and man, specifically those caused by farm animal-originated human pathogens (zoonoses) and their control. A selection of important zoonoses and food safety issues will be specifically covered with an emphasis on the principles of zoonotic disease transmission and control, risk factors to humans, and surveillance methods.
Prerequisite: BSCI223, ANSC212, ANSC327, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC440 or ANSC489R.
Formerly: ANSC489R.

ANSC443 Physiology of Lactation (3 Credits)
A comprehensive survey of lactation in laboratory and domestic animals. Other species are discussed where possible. Emphasis will be placed on physiological aspects of milk synthesis and secretion and on the cellular and molecular biology of mammary gland development.
Prerequisite: ANSC212; and CHEM231 or PLSC275.
Recommended: BCHM463.

ANSC444 Domestic Animal Endocrinology (3 Credits)
Current developments in endocrinology as it relates to animals used in the production of food and other products important to the well being of humans will be covered.
Prerequisite: ANSC212; or permission of instructor.
Restriction: Must not have completed ANSC644.
Credit Only Granted for: ANSC489I, ANSC444, or ANSC644.
Formerly: ANSC489I.

ANSC445 Comparative Digestive Physiology (3 Credits)
Comparative gastrointestinal physiology and the pathophysiology of diseases involved in animal-related research. A comparative approach will be presented for much of this material, using the human, canine, porcine, equine, bovine, and avian when information is available. The ultimate aim of the course is to provide a comprehensive knowledge of comparative gastrointestinal pathophysiology, and to give students an insight into the current field of human and veterinary gastroenterology. Students should feel more comfortable reading cutting edge literature by the end of the course, and should acquire a greater understanding of potential digestive disease areas for their future career such as graduate, medical, and veterinary students.
Prerequisite: ANSC212.

ANSC446 Physiology of Mammalian Reproduction (3 Credits)
Anatomy and physiology of reproductive processes in domesticated and wild mammals.
Prerequisite: ANSC212 or BSCI440.

ANSC447 Physiology of Mammalian Reproduction Laboratory (1 Credit)
Gross and micro-anatomy, artificial insemination, estrous cycle synchronization and invitro-fertilization procedures and analytical techniques useful in animal management and reproduction.
Prerequisite: Must have completed or be concurrently enrolled in ANSC446.

ANSC450 Animal Breeding Plans (3 Credits)
Design of animal breeding programs for the genetic improvement of livestock and companion animal species. Principles of population and quantitative genetics. Genetic evaluations of animals, selection strategies and crossbreeding systems. Incorporation of statistics and biotechnology into animal breeding plans.
Prerequisite: ANSC101; and 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140).
Restriction: Junior standing or higher.

ANSC452 Avian Physiology (3 Credits)
The digestive, excretory, respiratory, circulatory, immune, skeletal muscle, endocrine and nervous systems of avian species will be examined.
Prerequisite: ANSC212.
Restriction: Junior standing or higher.

ANSC453 Animal Welfare and Bioethics (3 Credits)
Ethical concerns related to the use of animals in modern society. Historical and philosophical overview of animal welfare and bioethics. Applied ethical discussions on human/animal interrelationships, physical and genetic manipulation, and other current issues associated with the treatment of animals used in food production, research, zoos, and as pets.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161); or permission of instructor.
Restriction: Junior standing or higher.

ANSC454 Nutritional Aspects of Metabolic Disease (3 Credits)
Biochemical and physiological fundamentals of nutrition. Discussion of protein, fat,carbohydrate, minerals and vitamins and their roles and interrelationships innutrition, metabolism and diseases in humans and animals. The course will use recommended texts for foundation material as well as research papers to provide in-depth coverage and illustrate emerging themes in metabolic aspects of nutrition and disease.
Prerequisite: CHEM131 and ANSC101, or BSCI170; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC4890 or ANSC454.
Formerly: ANSC489O.

ANSC455 Applied Animal Behavior (3 Credits)
Principles of animal behavior applied to production systems in animal agriculture.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161).

ANSC460 Comparative Vertebrate Immunology (3 Credits)
Basic concepts in immunology, and comparing immunity in different vertebrates, including organization of immune systems, innate and adaptive immune responses. Special attention will be paid to how cell-mediated and humoral immune responses are induced in natural infections, and what are the effector mechanisms in both of these processes. Immune response in representative disease models such as infections with viruses and bacteria, cancer, and autoimmune disease will be discussed. Lectures concerning cutting-edge research will also be given.
Prerequisite: ANSC212, BSCI201, or BSCI440.
Credit Only Granted for: ANSC460 or ANSC489I.
Formerly: ANSC489I.

ANSC489 Current Topics in Animal Science (1-3 Credits)
Examination of current developments in the animal sciences.
Repeatable to: 6 credits if content differs.

ANSC497 Animal Biotechnology Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. Current molecular biology techniques used for cloning genes, analyzing the gene products, and modifying the genes of animals will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.
Recommended: ANSC437 and ANSC435.

ANTH - Anthropology

ANTH138 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH210 Introduction to Medical Anthropology and Global Health (3 Credits)
An introduction to the central concepts in medical anthropology and the anthropology of global health. This course is a survey of anthropological notions of health, disease, and the body in cross-cultural and global contexts, including classic and contemporary texts. It will provide an examination of systems of knowledge and practice with regard to illness, healing, and global health inequities.

ANTH221 Introduction to Forensic Sciences (3 Credits)
Provides a brief history of forensic sciences, an introduction to some of the techniques used, and a demonstration of some of the applications of forensic sciences. A survey course designed to give the student some exposure to the kinds of scientific knowledge and techniques applied to the medico-legal investigation of death and other crimes.
Credit Only Granted for: ANTH298A or ANTH221.
Formerly: ANTH298A.

ANTH222 Introduction to Ecological and Evolutionary Anthropology (4 Credits)
An introduction to the evolution of human physiology and human behavior, the relationship between hominid and non-hominid primates, and the study of relationships between a population of humans and their biophysical environment.
Credit Only Granted for: ANTH220 or ANTH222.

ANTH238 Special Topics Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH240 Introduction to Archaeology (3 Credits)
Exploration of the variety of past human societies and cultures through archaeology, from the emergence of anatomically modern humans to the more recent historical past.

ANTH242 Fire, Farming and Climate Change: An Archaeology Take on the History of Human Impacts on our Planet (3 Credits)
An examination of why climate changes, the methods for recording climate change, and case studies of the varied responses of past human societies to climate change in different geographic regions and time periods with varying socio-political and economic systems.

ANTH260 Introduction to Sociocultural Anthropology and Linguistics (3 Credits)
Culture and social relationships in a wide variety of settings from small-scale to complex societies. An overview of how anthropology analyzes human behavior. Particular attention to the relationship between language and culture.

ANTH263 Sexuality and Culture (3 Credits)
An overview of sexuality from an anthropological perspective, looking at aspects of sexuality within our own culture and in cultures around the world. Course topics include the biology and culture of sex, gender, physical attraction, sexual orientation, marriage and mating taboos, fertility control, sexually transmitted diseases, and commercial aspects of sex.
Credit Only Granted for: ANTH298K or ANTH263.
Formerly: ANTH298K.

ANTH264 Immigration Policy, Immigrant Lives (3 Credits)
An examination of the phenomenon of international migration, or immigration. Students develop awareness of how immigration has been framed in the general public and examined by social science disciplines, most prominently anthropology. Examination of case studies of different immigrant groups in distinct geographic contexts will illuminate the varied incorporation experiences of immigrants into U.S. society.Cross-listed with: IMMR219C.
Credit Only Granted for: ANTH264 or IMMR219C.

ANTH265 Anthropology of Global Health (3 Credits)
An overview of the growing field of global health including health care systems, medical practices, ideas about illness in cross-cultural contexts, issues of health development, global health inequity, and human rights issues. The course will focus on the history of global health, the critique of major international health agencies and their development paradigms, and the political economy of social inequalities and health.

ANTH266 Changing Climate, Changing Cultures (3 Credits)
Explore past, present, and future interactions between humans and climate. Discussions, methods-oriented activities, and case study analyses provide students a foundation for appreciating the role of anthropology in understanding, responding to, and preparing for climate change.

ANTH267 Organic, Mechanical, Digital (3 Credits)
Beginning in the middle to late 20th century, human organization and experience has increasingly been influenced by digital forms of communication and production. Do these changes make us new types of people and societies? By putting the digital world in the context of the major periods associated with organic and mechanical technology, this course examines who contemporary people are and whether or not they are unique. The answer to this question will focus on how technological changes the individual, social organization and the relationship with the natural world. Sources from historians, anthropologists, sociologists, philosophers, political scientists and ecologists will be used to reconstruct these worlds.

ANTH298 Special Topics in Anthropology (3 Credits)
Anthropological perspectives on selected topics of broad general interest.
Repeatable to: 6 credits if content differs.

ANTH305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ARTH305, CLAS305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ANTH310 Method & Theory in Medical Anthropology and Global Health (3 Credits)
Provides a critical perspective to global health that encompasses key political, economic, and cultural factors associated with the nature and magnitude of global health issues such as HIV/AIDS, tuberculosis and malaria, paying particular attention to how poverty and inequalities within and between societies has accelerated current global health challenges. Introduces students to how medical anthropologists have contributed to the debates surrounding the globalization of health.
Prerequisite: ANTH210. Jointly offered with ANTH665.
Credit Only Granted for: ANTH310, ANTH465, or ANTH665.
Formerly: ANTH465.

ANTH320 Method and Theory in Biological Anthropology (3 Credits)
Theoretical and methodological overview of biological anthropology, including evolutionary anthropology, anthropological genetics, physiological anthropology, human biology, primatology, paleoanthropology, human biodiversity, and contemporary selective challenges to modern humanity. Emphasis on core concepts and their research applications.
Prerequisite: ANTH220; or permission of BSOS-Anthropology department.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.
Credit Only Granted for: (ANTH320 and ANTH425) or ANTH625.

ANTH322 Method and Theory in Ecological Anthropology (3 Credits)
A theoretical consideration of ecological anthropology, focusing on issues related to cooperation, the management of common property, resilience, and sustainability. Explores the methods of sociocultural anthropology, including ethnology, evolutionary game theory and agent-based modeling; and natural-science approaches including behavioral and systems ecology.
Prerequisite: ANTH220 or ANTH222.
Restriction: Must be in a major within the BSOS-Anthropology department.
Credit Only Granted for: ANTH320, ANTH322, ANTH425, or ANTH625.

ANTH323 Plagues, Pathogens and Public Policy (3 Credits)
The impact of diseases on populations from prehistoric times through the present will be examined, along with public perceptions of disease, scientific breakthroughs on treatment and prevention, and the ways that politics and public health policies can enhance or impede the advancement of disease treatment. The natural history of disease, population structure, and immunity will be discussed. The class will address emerging and re-emerging diseases and the ways that first responders, researchers, and policy makers may affect the outcome of an outbreak.
Credit Only Granted for: ANTH429A or ANTH323.
Formerly: ANTH429A.

ANTH338 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH340 Method and Theory in Archaeology (3 Credits)
Theory, method, and practice which guides modern anthropological archaeology. Includes research design and execution (from survey through excavation and interpretation), the reconstruction of aspects of past cultures, and the understanding of cultural change and meaning.
Prerequisite: ANTH240.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH341 Introduction to Zooarchaeology (3 Credits)
Zooarchaeology is the study of animal remains, especially bones, from archaeological contexts. This course will address both methodology as well as many of the main issues in contemporary zooarchaeology. Zooarchaeology stands at the intersection of a number of social and biological sciences, such as Biology, Osteology, Ecology, History, Anthropology and Economics. We will discuss basic animal osteology and the concepts and practices behind the identification of animal remains from archaeological contexts. We will cover the nature of the data in zooarchaeology, especially issues around using proxy data.
Credit Only Granted for: ANTH298D, ANTH641 or ANTH341.
Formerly: ANTH298D.

ANTH345 Introduction to Laboratory Methods in Archaeology (3 Credits)
The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn the basics of laboratory techniques necessary for the final analysis and interpretation of field data.

ANTH358 Undergraduate Teaching Assistant (1-3 Credits)
Individual instruction course: contact department or instructor to obtain section and index numbers.
Prerequisite: ANTH220, ANTH260, or ANTH240.
Restriction: Junior standing or higher; and must be in Anthropology program.
Repeatable to: 6 credits if content differs.

ANTH360 Method and Theory in Sociocultural Anthropology (3 Credits)
Theoretical approaches and research methods in sociocultural anthropology. Emphasis on current debates, new directions, and their historical antecedents.
Prerequisite: ANTH260.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH368 Regional Ethnography (3 Credits)
Peoples and cultures of a particular region of the world, on the basis of ethnographies, archaeological evidence, and relevant works by social historians and political economists. The regional focus and thematic emphasis will vary by semester.
Prerequisite: ANTH260; or permission of BSOS-Anthropology department.
Repeatable to: 6 credits if content differs.

ANTH380 Culture and Discourse (3 Credits)
Contemporary discourse analysis and pragmatics applied to ethnographic research problems with particular attention to roots in recent linguistic anthropological work in ethnographic semantics and ethnography of speaking.

ANTH386 Experiential Learning (1-6 Credits)
Recommended: Completion of advanced courses in relevant subfield of anthropology recommended.
Restriction: Permission of BSOS-Anthropology department; and junior standing or higher; and must be in Anthropology program.

ANTH398 Independent Study (1-3 Credits)
Independent interdisciplinary research and reading in specific areas of anthropology.
Restriction: Permission of BSOS-Anthropology department.
Repeatable to: 9 credits if content differs.

ANTH411 Global Migration and Health (3 Credits)
The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.Jointly offered with: ANTH611.
Credit Only Granted for: ANTH411 or ANTH611.

ANTH412 Hypermarginality and Urban Health (3 Credits)
Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality--the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.
Credit Only Granted for: ANTH412 or ANTH612.

ANTH413 Health Disparities in the United States (3 Credits)
Powerful economic, political, social, and cultural forces shape who gets sick, what illnesses/diseases they get, how they are treated while seeking care, what treatment options they have, and what their ultimate health outcomes are. The goal of the course is to understand these processes through the lens of critical medical anthropology
Credit Only Granted for: ANTH468Q, ANTH688Q, ANTH413, or ANTH613.
Formerly: ANTH468Q.

ANTH415 Advanced Studies in Global Health (3 Credits)
Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.
Recommended: ANTH210, ANTH310, or ANTH265 or a similar course focused on global health or medical anthropology course. Jointly offered with: ANTH615.
Credit Only Granted for: ANTH415 or ANTH615.

ANTH416 Anthropology of Global Violence (3 Credits)
An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts.Jointly offered with ANTH616.
Credit Only Granted for: ANTH468O, ANTH66 8O, ANTH416 or ANTH616.
Formerly: ANTH468O.

ANTH421 Nutritional Anthropology (3 Credits)
The study of nutrition from an anthropological perspective which includes both biological and cultural aspects of nutrition. We will explore how nutrition can affect culture how culture can affect nutrition. Nutritional anthropology includes the study of cross-cultural variation in diet, nutritional status and subsistence systems as well as variation in these factors over the evolutionary course of human existence, from prehistoric and historic to modem times. Students will be introduced to nutritional anthropology and provided with the basics for assessing reliability and feasibility of nutritional advice and policy encountered in everyday modern life in a global setting.
Credit Only Granted for: ANTH421, ANTH428N, or ANTH621.
Formerly: ANTH428N.

ANTH422 Human-Plant-(Human & Bioactive Plant) Interaction (3 Credits)
This seminar course will discuss the evolutionary, historical, cultural, and ecological aspects of coevolution with respect to humans and their interactions with specific bioactive plants. Case studies of human- plant-(pathogen) interactions will be discussed as well as an inclusive survey of anthropologically important phytochemicals. The seminar incorporates human-plant-(pathogen) interactions into models of human evolution and ecology.
Prerequisite: ANTH220 and ANTH320; or permission of BSOS-Anthropology department.
Credit Only Granted for: ANTH422.
Formerly: ANTH428I.

ANTH424 Human Skeletal Anatomy (3 Credits)
In addition to descriptive information about bone identification, the lectures will address the history of human anatomical studies, the development of analytical techniques, and the application of these techniques in paleoanthropology, comparative anatomy, functional anatomy (and related fields, such as physical therapy), and skeletal analysis in museum, historic cemetery, archaeological, and forensic settings. Emphasis will be on the development of the skeleton and recognition of normal variation in bones. The laboratory sessions will allow the students access to human bones for the purpose of identification, documentation of human variation, and application of techniques to obtain information about the living individual from the skeleton.

ANTH428 Special Topics in Bioanthropology (3 Credits)
Advanced research courses in biological anthropology on changing topics that correspond to new theoretical interests, faculty research interests, or the specialties of visiting scholars. Prerequisites or background knowledge vary with the topic. Check with the department for requirements.
Repeatable to: 6 credits if content differs.

ANTH429 Advanced Special Topics in Biological Anthropology (3 Credits)
Upper level biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH433 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)
Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.Jointly offered with: ANTH633.
Credit Only Granted for: ANTH433 or ANTH633.

ANTH435 Archaeological Ethnography and Heritage Ethnography (3 Credits)
Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit. This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.Jointly offered with: ANTH635.
Credit Only Granted for: ANTH435 or ANTH635.

ANTH438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH440 Theory and Practice of Historical Archaeology (3 Credits)
Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.
Prerequisite: ANTH240. Jointly offered with ANTH640.
Credit Only Granted for: ANTH440 or ANTH640.

ANTH441 Archaeology of Diaspora (3 Credits)
"Diaspora" is defined, theorized, deconstructed, and employed throughout the social sciences. There are context specific relations that define who leaves, when, and how they are received in the new place of settlement. Over the course of the semester the class will actively and critically examine the relevance of historical archaeology and material culture studies in the understanding of the formation, experiences, and transformation of diasporic groups over time and space.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH448A, ANTH688Z, or ANTH441.
Formerly: ANTH448A.

ANTH442 Public Archeology (3 Credits)
Explores the uses and environments for archaeological work through a discussion of museum, electronic media, heritage settings, outdoor history museums, including the legal environment that offers protection for archaeological remains. The course exposes students to the majority of cultural media within which archaeology is currently practiced. The interdisciplinary course is a survey of the progress made within and beyond anthropology in understanding the function of heritage, public memory, tourism, and the other popular uses of materials from the past, including the progress made in linguistics psychology and other cognitive disciplines in understanding the purpose of the past.
Credit Only Granted for: ANTH442, ANTH448V, or ANTH642.
Formerly: ANTH448V.

ANTH444 Theories of the Past (3 Credits)
The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern socieity. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.
Prerequisite: ANTH240. Jointly offered with ANTH740.
Credit Only Granted for: ANTH448P, ANTH444, or ANTH740.
Formerly: ANTH448P.

ANTH445 Laboratory Methods in Archaeology (3 Credits)
The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn that basics of laboratory techniques necessary for the final analysis and interpretation of field data.
Prerequisite: ANTH496.
Recommended: ANTH240.

ANTH447 Material Culture Studies in Archaeology (3 Credits)
An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.
Formerly: ANTH448C.

ANTH448 Special Topics in Archaeology (3 Credits)
Advanced topics in archaeological research, corresponding to new theoretical developments, faculty research interests, or specialties of visiting scholars. Prerequisites may vary with course topic; check with the department for requirements.
Prerequisite: ANTH240.
Repeatable to: 6 credits if content differs.

ANTH449 Advanced Special Topics in Archaeology (3 Credits)
Upper level archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH450 Theory and Practice of Environmental Anthropology (3 Credits)
An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.
Restriction: Junior standing or higher. Jointly offered with ANTH650.
Credit Only Granted for: ANTH450 or ANTH650.

ANTH451 Environmental Archaeology (3 Credits)
An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.
Credit Only Granted for: ANTH451, ANTH651, ANTH448F, ANTH668F.
Formerly: ANTH448F.

ANTH452 Anthropology and Climate Change (3 Credits)
Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.
Prerequisite: ANTH220, ANTH222, ANTH240, or ANTH260.
Credit Only Granted for: ANTH452 or ANTH652.

ANTH453 Archaeology of the Modern City (3 Credits)
An overview of how social scientists, in particular historical archaeologists, approach modern cities as being part of the materiality of the social structure and order.
Prerequisite: ANTH240; or permission of instructor.
Credit Only Granted for: ANTH448Q or ANTH453.
Formerly: ANTH448Q.

ANTH454 Political Ecology (3 Credits)
The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.Jointly offered with: ANTH654.
Credit Only Granted for: ANTH454 or ANTH654.

ANTH456 Conservation and Indigenous People in South America (3 Credits)
Considers indigenous peoples and their relation to the lands on which they live, issues of traditional indigenous knowledge and land management as well as new contributions by indigenous peoples to changing landscapes. Reviews legal mechanisms and instruments through which indigenous peoples have rights to the resources they occupy and utilize. Taking specific cases and examining them through the lens of political and social ecology, the role of indigenous peoples in local and worldwide conservation efforts is considered. Case studies will emphasize the indigenous peoples and conservation policies of Latin America.Jointly offered with: ANTH656.
Credit Only Granted for: ANTH468L, ANTH456, ANTH688L, or ANTH656.
Formerly: ANTH468L.

ANTH461 Language as Practice (3 Credits)
An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.Jointly offered with: ANTH661.
Credit Only Granted for: ANTH461, ANTH468I or ANTH661.
Formerly: ANTH468I.

ANTH462 Amazon Through Film (3 Credits)
An interdisciplinary course that utilizes film to consider the Amazon basin, its history, peoples, and landscapes through cinematic representations. The course places the films in the context of film history and critical theory. The course takes into consideration the Brazilian, North American, Mexican, European and Argentine creators of the films and their visions of Amazonia, as well as the audiences and markets to which the films are intended.
Credit Only Granted for: ANTH468D or ANTH462.
Formerly: ANTH468D.

ANTH464 Anthropology of Cultural Heritage (3 Credits)
A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.
Prerequisite: ANTH260. Jointly offered with ANTH664. Credit only grant ed for: ANTH469T, ANTH689T, ANTH464, ANTH664.
Formerly: ANTH469T.

ANTH466 Anthropology of Work (3 Credits)
Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.Jointly offered with: ANTH666.
Credit Only Granted for: ANTH466 or ANTH666.

ANTH467 Researching Environment and Culture (3 Credits)
In this applied course, students use mixed methods to research a locally-based, environmental sustainability issue. Classroom time will be split between seminar discussions of theory, methods, and relevant case studies, and lab work focused on project development, data analysis, and report write up. Students are expected to spend additional time outside class on data collection, analysis, and writing
Recommended: ANTH322, ANTH360, ENSP101, or ENSP102.

ANTH468 Special Topics in Cultural Anthropology (3 Credits)
Advanced courses in varying specialty areas of cultural anthropology that respond to new theoretical developments, faculty research interests, or specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH469 Advanced Special Topics in Cultural Anthropology (3 Credits)
Upper level cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH472 Medical Anthropology (3 Credits)
An exploration of the cultural, social, economic and political dimensions of health, disease, and illness. These dimensions will be examined through both the health-seeker's and the care-provider's perspectives.
Credit Only Granted for: ANTH472, ANTH468, ANTH672, or ANTH688L.
Formerly: ANTH468L.

ANTH473 Native American Languages and Cultures (3 Credits)
An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the stucture of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.Jointly offered with: ANTH673.
Credit Only Granted for: ANTH473 or ANTH673.

ANTH474 Language Racism & Identity (3 Credits)
An exploration of the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.Jointly offered with: ANTH674.
Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH476 Senior Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of a senior thesis in anthropology.
Restriction: Must be in Anthropology program.
Credit Only Granted for: ANTH476 or ANTH486.

ANTH477 Senior Thesis (3-4 Credits)
Capstone course in which students write a senior thesis on independent research into a current problem in anthropology. The thesis is defined before a committee of faculty.
Prerequisite: ANTH476.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program.
Credit Only Granted for: ANTH477 or ANTH487.

ANTH478 Special Topics in Linguistics (3 Credits)
Advanced courses in specialty areas that respond to new theoretical developments and faculty research interests in linguistics.
Recommended: LING200.
Repeatable to: 6 credits if content differs.

ANTH485 Honors Research Preparation (3 Credits)
Honors Research Preparation is an independent study course during which the Honors candidate will work with their Honors Thesis Advisor to establish not only the structure of the thesis and timeline, but also the formation of Thesis Review Committee.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

ANTH486 Honors Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of an honors thesis in anthropology.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH486 or ANTH476.

ANTH487 Honors Thesis (3-4 Credits)
Capstone course in which students write a thesis on the results of independent research into a current problem in anthropology.
Prerequisite: ANTH486.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH487 or ANTH477.

ANTH491 Applied Urban Ethnography (3 Credits)
The focus is on the use of applied ethnographic field methods in community assessment research in urban settings. Also, it will extend beyond most ethnographic training in which the emphasis is on being there, and relying predominantly on the classical ethnographic methods of recursive observations, participant observations, and a variety of approaches to interviewing.
Prerequisite: ANTH260. Jointly offered with ANTH617. Credit only grant ed for: ANTH468B, ANTH491, or ANTH617.
Formerly: ANTH468B.

ANTH496 Field Methods in Archaeology (6 Credits)
Field training in the techniques of archaeological survey and excavation.

ANTH498 Advanced Field Training in Ethnography (1-8 Credits)
Experience in field research utilizing a variety of ethnographic methods of inquiry.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: ANTH498 or ANTH698.

AOSC - Atmospheric and Oceanic Science

AOSC123 Causes and Consequences of Global Change (3 Credits)
Study of the major components of Earth's climate system and climate change history. Discussion of 21st century climate change prediction, mitigation and adaptation efforts.Cross-listed with: GEOL123.
Credit Only Granted for: AOSC123, GEOG123, GEOL123, or METO123.

AOSC200 Weather and Climate (3 Credits)
What are weather and climate? Most people think they know but if you ask people to explain the differences and similarities you're bound to get a range of answers. Weather affects not just our daily activities but other important aspects of society such as transportation, commerce, security and agriculture. Most people understand what weather is to some extent. Climate and climate change are concepts that evoke strong emotional responses from people but are less well understood. In this class, students examine fundamental issues such as the greenhouse effect, severe weather, and global weather patterns and how they relate to a changing climate. Instruction in the lectures will provide the basic knowledge needed to understand these issues. In the discussion sections, students will be divided into groups to address the implications of these topics through group projects.
Prerequisite: MATH107, MATH110, or MATH115.
Recommended: Concurrent enrollment in AOSC201.

AOSC201 Weather and Climate Laboratory (1 Credit)
Laboratory exercises to supplement AOSC200, including weather observations, weather map analysis, use of the Internet, forecasting practice and climate modeling.
Corequisite: AOSC200.
Formerly: METO201.

AOSC247 Scientific Programming: Python (3 Credits)
A comprehensive introduction to scientific computation and visualization techniques with Python applied to data intensive questions in the Natural Sciences. The class emphasizes real-world applications, providing students with essential hands-on experience using Python for data analysis and visualization, developing analytical skills for observational and modeling data, and performing virtual experiments to distinguish data contributing factors. Students will gain an understanding of the scientific data issues including: signal vs noise, trend vs periodicity, mean vs extreme changes, and accuracy vs uncertainty. Students will gain extensive experience using command line linux. Skills including local and remote file transfer and synchronization, file and directory permission, utilities for diagnosing performance issues, and data compression.
Prerequisite: MATH140.
Recommended: Familiarity with basic descriptive statistics.
Credit Only Granted for: AOSC458J, AOSC247 or CMSC131.
Formerly: AOSC458J.

AOSC347 Computing and Data Analysis: Deciphering Climate Change Clues (3 Credits)
A comprehensive introductory course designed to prepare students to identify, interpret, and visualize Earth's climate variations observed in the past and projected into the future. The class emphasizes real-world applications, providing students with essential hands-on experience using MATLAB for data analysis and visualization, developing analytical skills for observational and modeling data, and performing virtual experiments to distinguish data contributing factors. Students will gain an understanding of the scientific issues concerning the modern global warming debate on detection and attribution including: signal vs noise, trend vs periodicity, natural vs anthropogenic forcing, local vs remote response, mean vs extreme changes, and accuracy vs uncertainty.
Prerequisite: MATH140.
Recommended: Familiarity with basic descriptive statistics.
Credit Only Granted for: AOSC347 or AOSC358L.
Formerly: AOSC358L.

AOSC358 Special Topics in Atmospheric and Oceanic Science (1-4 Credits)
Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Repeatable to: 12 credits.

AOSC375 Introduction to the Blue Ocean (3 Credits)
The global ocean is a major component of the Earth System that shapes life on earth, including our weather and climate. We explore the observation-based interdisciplinary science of oceanography, identifying its strong connections to related sciences like meteorology, and geography. We apply this developing understanding to environmental issues such as marine pollution, fish and fisheries, as well as to climate variability and to the changes to the marine environment that are resulting from steadily rising levels of atmospheric greenhouse gasses. Focusses include the biogeochemical and physical changes we can observe in the nearby Chesapeake Bay and the coastal waters of Eastern Shore, Maryland.
Prerequisite: MATH120 or higher.
Recommended: MATH121, MATH141, PHYS161, or PHYS171. Cross-listed with: GEOL375.
Credit Only Granted for: AOSC375, GEOL375 or METO375.

AOSC386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor and student's internship sponsor.
Formerly: METO386.

AOSC399 Independent Study in Academic Peer Mentoring (1-3 Credits)
Earn academic credit for the time spent supporting an AOSC course in the Academic Peer Mentoring Program (AMP).
Corequisite: TLTC333.
Repeatable to: 6 credits.

AOSC400 Physical Meteorology of the Atmosphere (3 Credits)
The application of basic classical physics, chemistry and mathematics t the study of the atmosphere. Composition of the atmosphere; energy sources and sinks (radiation in the atmosphere; radiative balance and radiative forcing of atmospheric processes); atmospheric thermodynamics; clouds and precipitation physics; atmospheric electricity and optics; mesoscale processes (e.g., orographic mesoscale phenomena and instabilities); air mass boundaries; severe weather, tropical cyclones; storms; global circulation.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of CMNS-Atmospheric & Oceanic Science department.
Formerly: METO400.

AOSC401 Climate Dynamics and Earth System Science (3 Credits)
Introduction of the earth and global climate systems and their major components: atmosphere, land, ocean, biosphere and cryosphere. Key processes governing the function of the earth's climate: Global energy balance and water cycle, climate dynamics (general circulation of the atmosphere and ocean) and climate physics (aerosol, cloud and rain), as well as climate variability and climate changes. Phenomena resulting from this coupled system including El Nino-Southern Oscillation, monsoons, and the hydrological cycle will be discussed, with a focus on how the Earth System responds to global warming.
Prerequisite: AOSC400 or AOSC200; and MATH141; and (PHYS161 or PHYS171). Or permission of instructor.

AOSC420 Physical Oceanography (3 Credits)
Ocean observations. Water masses, sources of deep, intermediate, and surface water. Mass, heat, and salt transport, and the meridional overturning circulation. Geochemical tracers and cycles, including carbon. Western boundary currents, mixed layers, and processes maintaining the thermocline. Coastal and estuarine processes. Surface waves and tides. the ocean's role in climate.
Prerequisite: MATH141 and PHYS141.
Recommended: AOSC200. Also offered as: GEOL670, AOSC670.
Credit Only Granted for: AOSC420, AOSC670, or GEOL670.

AOSC424 Remote Sensing of the Atmosphere and Ocean (3 Credits)
Many of the properties of the atmosphere, ocean, and land surface are most easily observed from satellite remote sensing. This course will provide students with a hands-on introduction to a variety of passive and active sensing techniques and sensors observing our changing environment. Topics include: orbital dynamics and electromagnetic properties of the atmosphere and surface; atmospheric emission characteristics and scattering; chemical composition and spectroscopy; temperature retrievals; detection and retrieval of aerosol, cloud and rain; ocean surface properties; sea surface temperature and color; active sensing of wind stress, sea level, and internal waves; time-dependent gravity; properties of vegetation and ice.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of instructor.

AOSC431 Atmospheric Thermodynamics (3 Credits)
Classical thermodynamics applied to both the dry and the moist atmosphere. Composition; phase changes of water; stability concepts; Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141).
Recommended: MATH246.
Credit Only Granted for: AOSC431 or METO431.
Formerly: METO431.

AOSC432 Dynamics of the Atmosphere and Ocean (3 Credits)
Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Geostrophic/balanced and ageostrphic/unbalanced motion. Circulation, vorticity, and potential vorticity. Introduction to the boundary layer.
Prerequisite: AOSC431.
Corequisite: MATH246.
Credit Only Granted for: AOSC432, METO432, or AOSC632.
Formerly: METO432.

AOSC434 Air Pollution (3 Credits)
Production, transformation, transport and removal of air pollutants. The problems of photochemical smog, the greenhouse effect, stratospheric ozone, acid rain and visibility. Analytical techniques for gases and particles.
Prerequisite: MATH241; or permission of CMNS-Atmospheric & Oceanic Science department.
Formerly: METO434.

AOSC436 Principles of Biogeochemistry (3 Credits)
An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with: GEOL436.
Credit Only Granted for: GEOL436 or AOSC436.

AOSC437 Global Climate Change: Past and Present (3 Credits)
A highlight to the fact that global climate change is part of the Earth's past as well as of its present and future. Changes in climate that have occurred in the geologic past can be viewed as the Earth's natural climate variability. These changes are different from, though could be linked with, historical and present anthropogenically-induced climate change. We will discuss the modern climate system, the factors capable of forcing climate change on various time scales, the geologic proxies of past climate change and what these proxies tell us. Finally, we will compare and contrast past climate change with what is understood (and not understood) about modern climate change.
Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).
Restriction: Non-degree seeking students require permission of the instructor.

AOSC447 Machine Learning in Earth Science (3 Credits)
A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.
Prerequisite: Must have completed MATH140.

AOSC458 Advanced Topics in Atmospheric and Oceanic Science (1-4 Credits)
Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Repeatable to: 12 credits.

AOSC462 Ecohydrology (3 Credits)
Focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC662.
Credit Only Granted for: AOSC462 or AOSC662.

AOSC463 Water and Climate Systems (3 Credits)
Focuses on exploring the relationships between water, climate, land, energy, and the economy (the so called "nexus") through an interwoven understanding of the physical, economic, and institutional relationships and constraints that influence management and decision-making process in water supply, energy generation and food production. The course emphasizes the use of integrated assessment (IA) modeling tools as a way to formalize these relationships and explore their implications. Lectures will be complemented with online discussion sessions and applied modeling exercises to get hands-on knowledge of practical solutions to nexus challenges.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC663.
Credit Only Granted for: AOSC463 or AOSC663.
Additional Information: This course is offered through a joint effort of the Earth System Science Interdisciplinary Center (ESSIC, part of UMDb Sciences) and the Joint Global Change Research Institute (a collaboration between UMD and the US Dept of Energyb Northwest National Laboratory).

AOSC470 Synoptic Meteorology (3 Credits)
Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitiude and mesoscale weather systems. Tropical meteorology. Weather forecasting using numerical and statistical models. Prediction of weather phenomena on the global, syoptic, meso, and local scales. Analysis of surface and upper air data; Norwegian cyclone model; introduction to weather forecasting.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.
Credit Only Granted for: AOSC470, AOSC600, or METO600.

AOSC472 Mesoscale Meteorology (3 Credits)
Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.
Prerequisite: AOSC432, AOSC600, AOSC610, or AOSC470.
Restriction: Non-degree-seeking students require the permission of the instructor. Jointly offered with AOSC602.
Credit Only Granted for: AOSC472 or AOSC6 02.

AOSC475 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)
The fundamentals of the Earth's carbon cycle, a key biogeochemical cycl that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO2 and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.Jointly offered with AOSC675.
Credit Only Granted for: AOSC475 or AOSC6 75.

AOSC480 Introduction to Earth System Science (3 Credits)
Focuses on exploring the relationships between the atmosphere, the oceans, water, climate, land, vegetation, energy, and human systems through an interwoven understanding of the physical, biogeochemical and socioeconomic relationships and constraints that influence management and decision-making processes in societal issues such as water supply, power generation, food production, ecosystem services and others. The course introduces integrated assessment (IA) science as a framework to formalize these relationships and explore their implications.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC680.
Credit Only Granted for: AOSC480 or AOSC680.
Additional Information: This course is offered through a joint effort of the Department of Atmospheric and Oceanic Science (AOSC) and the Earth System Science Interdisciplinary Center (ESSIC).

AOSC484 Climate System Modeling (3 Credits)
Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Nino and global warming.Jointly offered with AOSC684.
Credit Only Granted for: AOSC484 or AOSC6 84.

AOSC493 Senior Research Project I (3 Credits)
Technical writing and oral presentation skills. Planning, writing, and presenting a plan for research in the geosciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Restriction: Must be in Atmospheric and Oceanic Science program; or permission of instructor.

AOSC494 Atmospheric and Oceanic Science Seminar (1 Credit)
Exposure to a wide range of contemporary topics in atmospheric, oceanic, and climate sciences, to foster research interests and promote critical thinking through the weekly AOSC departmental seminar series.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.
Restriction: Permission of the Atmospheric and Oceanic Science Department.

AOSC498 Senior Research Project II (3 Credits)
The project will be based on the research or development plan created in AOSC493. It may be completed with the approval of a faculty advisor in conjunction with an internship. Final written thesis and oral defense will be expected.
Prerequisite: AOSC493.

AOSC499 Special Problems in Atmospheric Science (1-3 Credits)
Research or special study in the field of meteorology and the atmospheric and oceanic sciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Repeatable to: 6 credits.
Formerly: METO499.

ARAB - Arabic

ARAB101 Elementary Arabic I (3 Credits)
Introduction to modern standard Arabic in both its spoken and written form. Equal emphasis on all four skill areas: speaking, listening, reading, and writing.

ARAB104 Elementary Modern Standard Arabic I-II (6 Credits)
An intensive course focusing on developing functional proficiency in the standard Arabic language, both written and formal spoken. Begins with script and phonology, and develops into a limited range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB105 Elementary Modern Standard Arabic III-IV (6 Credits)
Continuation of ARAB104, developing further linguistic proficiency in Standard Arabic, both written and formal spoken. Covers an extended range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.
Prerequisite: ARAB104; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB204 Intermediate Modern Standard Arabic I (6 Credits)
Covers topics related to contemporary Arabic society, literature and culture in standard written and formal spoken Arabic. Acquisition of more complex grammatical structures, expanding vocabulary, and reading, to develop a better understanding of the formal aspects of using MSA.
Prerequisite: ARAB105; and must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB205 Intermediate Modern Standard Arabic II (6 Credits)
Continuation of ARAB204, with exposure to a wide range of Arabic texts from different domains. Focus on vocabulary, more complex grammatical forms, and a better understanding of the formal aspects of using MSA as well as the cultural aspects of using the language.
Prerequisite: ARAB204; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB206 Egyptian Colloquial Arabic I (3 Credits)
Develops communicative skills and cultural knowledge in Egyptian Arabic. Focuses on various social interactions, work and school situations, as well as specifics of pronunciation and grammar of the Egyptian dialect. Designed for students who have completed two years of the regular Arabic sequence classes (104-105 and 204-205) or equivalent.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB207 Egyptian Colloquial Arabic II (3 Credits)
Further develops communicative skills and cultural knowledge in Egyptian Arabic, extending range of contexts and types of social interaction. Focuses on various aspects of Egyptian popular culture.
Prerequisite: ARAB206; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB253 The Arabian Nights and the Art of Storytelling (3 Credits)
One Thousand and One Nights (Arabic Kitab alf laylah wa laylah; English The Arabian Nights) is a collection of stories and folk tales compiled in Arabic during the Islamic Golden Age, and explores how this text has shaped Western perceptions of the Arabic-Islamic world as well as its impact on the literary production of similar works in Europe and the Middle East. Taught in English.

ARAB269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB282 The Arab-Israeli Conflict through Readings in Translation (3 Credits)
Literary works by both Arab and Jewish authors depicting the impact of the conflict on society and individuals. In English.

ARAB298 Special Topics in Arabic Studies (1-3 Credits)
Language and content to be announced when course is offered.
Repeatable to: 9 credits if content differs.

ARAB304 Advanced Modern Standard Arabic I (3 Credits)
Advanced grammar, reading, writing, speaking in Arabic; study of contemporary Arabic society, politics, and culture.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.
Formerly: ARAB301.

ARAB305 Advanced Modern Standard Arabic II (3 Credits)
Further advanced grammar, reading, writing, speaking in Arabic; study of current issues within the Arab World.
Prerequisite: ARAB304; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB315 Intensive Advanced Arabic I (6 Credits)
Intensive training in written and spoken Arabic at the Advanced-low level of proficiency. Additional intensive training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed ARAB304.

ARAB316 Intensive Advanced Arabic II (6 Credits)
Intensive training in written and spoken Arabic at the Advanced-mid level of proficiency. Additional training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.
Prerequisite: ARAB304 or ARAB315; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed ARAB305.
Credit Only Granted for: ARAB305 or ARAB316.

ARAB321 Arabic Media (3 Credits)
Examines the role of the Arabic media in shaping public opinion and influencing relations between the Arab world and the non-Arab world. Focus on content and acquistion of Modern Standard Arabic. Taught in Arabic.
Prerequisite: ARAB305; or permission of instructor.

ARAB341 Filming War Zones: Representations of Wars in Iraq & Chechnya (3 Credits)
Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.Cross-listed with: CINE341.
Credit Only Granted for: ARAB341, CINE341 or FILM341.
Formerly: FILM341.

ARAB369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB386 Experiential Learning (3-6 Credits)
Pre-professional experience in research, analysis and writing in a work setting. Project proposal approved by faculty and internship sponsor. Junior standing.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB398 Special Topics in Arabic Studies (3 Credits)
In-depth study of a particular aspect of Arabic culture, literature, and language. Specific topic to be announced when offered. Taught in Arabic.
Prerequisite: ARAB304.
Repeatable to: 6 credits if content differs.

ARAB399 Independent Study In Arabic (1-3 Credits)
Research and writing or specific readings on a topic selected by the student and supervised by a faculty member on the Department of Arabic Studies. To be planned during semester preceding registration.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB401 Readings in Arabic Literature (3 Credits)
A survey of Modern Arabic literature is given through a range of selected texts. Texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB410 Ideology of Stereotyping: American and Middle Eastern Film and Television (3 Credits)
Exploration of cultural stereotyping, using examples from American and Middle Eastern cinema and television. Students will examine ideological constructs of Otherness and its history, including Orientalism; propaganda techniques; and audiovisual aspects of stereotyping. While the focus is on American and Middle Eastern cultural production, the course will engage broader issues of stereotyping in contemporary society and media. Readings include theories of propaganda and cultural ideology.
Credit Only Granted for: ARAB410, ARAB499Q, FILM429Q.
Formerly: ARAB499Q.

ARAB489 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic language and culture. Specific topics to be announced when course is offered. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB499 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic culture, literature and language. Specific topic to be announced when course is offered.
Repeatable to: 6 credits if content differs.

ARCH - Architecture

ARCH150 Discovering Architecture (3 Credits)
Introduction to architecture and design studio education. The course examines fundamental design principles and skills related to architecture. The design studio projects apply ideas and concepts introduced in lectures, readings and on site visits. The design studio projects are both analytic and synthetic in nature. The explicit goals of the course are: To explore the discipline of architecture; To promote visual thinking and representational skills; To develop analytic design thinking skills; To learn some of the conventions of architectural representation; To enhance cultural awareness of architecture and design.
Prerequisite: Permission of ARCH-Architecture Program.

ARCH170 Design Thinking and Architecture (3 Credits)
Examines conceptual, perceptual, behavioral, and technical aspects of the built environment, and methods of analysis, problem-solving, and design implementation.

ARCH171 Design Thinking and Making in Architecture (3 Credits)
Examines iterative design processes and critical thinking skills through active learning and design thinking methodologies to solve problems and apply design as a lens of inquiry and exploration. Students will understand Design Thinking through interactive and experiential learning.
Restriction: Must be a major in ARCH-Architecture Program; and must be a freshman; or have permission of the School of Architecture, Planning and Preservation.

ARCH200 Design Media and Representation I (3 Credits)
Study of architectural representation in physical and digital design media. Examine visual literacy and visual communications through applied drawing, modeling and visual making to explore the role of design media and representation in design and design thinking.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH201 Elements and Principles of Architecture (1 Credit)
Survey of fundamental elements and principals of architecture and architectural education. Frames study of architecture as a profession, discipline and critical practice.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH225 History of World Architecture I (3 Credits)
Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture

ARCH226 History of World Architecture II (3 Credits)
Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture

ARCH242 Basic Architectural Drawing (3 Credits)
Study of drawing as a learned skill with emphasis on observation, documentation, analysis, and synthesis. This introductory course immerses students in visual thinking and learning how to see through drawing. The course explores the traditional conventions of architectural drawing (orthographics, isometrics, axonometrics, and linear perspective) as well as abstract and pictorial visualization techniques primarily through freehand drawing and sketching.
Prerequisite: ARCH170; or ARCH171.

ARCH270 Design in Practice (3 Credits)
Case studies and hands-on design projects ranging in scale from a product to a building to give students insight into the process by which architects work both individually and collaboratively to put disciplinary knowledge and expertise into practice to shape our built environment.

ARCH271 People, Planet, and Profit: Building Sustainable Places (3 Credits)
An introduction to the four disciplines represented in the School: architecture and urban design, community planning, historic preservation, and real estate development, that work to create a more sustainable environment for the future to create a more sustainable environment for the future using our interpretation of the quadruple bottom line: socio-cultural, economic, environmental, and design sustainability. Students will be provided with an understanding of the fundamental scholarship and processes of each of these disciplines and examine the intersections between them. Additionally, they will learn by applying the approaches of the four disciplines through a series of field studies.Cross-listed with: RDEV250.
Credit Only Granted for: ARCH271 or RDEV250.

ARCH272 Sustainability at College Park (3 Credits)
Explore the ways and the degrees to which University of Maryland, College Park campus master planning and operations incorporate principles of sustainability including smart growth, LEED and other building rating systems, higher education rating systems, sustainable agriculture and transportation planning. Among other subjects, students will learn about the Campus and the City of College Park and survey the relationship between local, national and global sustainability concerns. Students will learn about the University's Climate Action Plan and the roles, and extent to which, the UMD Office of Sustainability and other campus units are helping develop a carbon-neutral and resource-efficient campus infrastructure.

ARCH288 Selected Topics in Sustainability (3 Credits)
Selected Topics in Architectural Sustainability
Restriction: Must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits.

ARCH289 Independent Studies in Architectural Sustainability (1-4 Credits)
Independent Studies in Architectural Sustainability. Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH300 Design Media and Representation II (3 Credits)
Study of architectural representation in physical and digital design media. Examine visual communications and speculative visual studies through applied drawing, modeling and making to explore expanded roles of representation in design and design thinking.
Prerequisite: ARCH200; or permission of ARCH-Architecture Program.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH343 Intermediate Architectural Drawing (3 Credits)
Development of media technique (including color pencil, pastel, graphite, ink, and watercolor) as vehicles for investigating color, composition, and abstraction. Exploration of historical and contemporary issues of representation in architectural visual communication.
Prerequisite: ARCH242; or permission of ARCH-Architecture Program.

ARCH386 Experiential Learning (1-6 Credits)
Learning experience tied to internship of specified duration with targeted learning outcomes.
Restriction: Must have learning proposal approved by faculty sponsor and student's internship sponsor; and sophomore standing or higher; and permission of ARCH-Architecture Program.

ARCH400 Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

ARCH401 Architecture Design Studio II (6 Credits)
Continuation of ARCH 400 with introduction to building typology, urban and contextual issues, design of the vertical surface, and architectural interiors.
Prerequisite: Minimum grade of C- in ARCH400.
Restriction: Must be in Architecture (B.S.) program.

ARCH402 Architecture Design Studio III (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical.
Prerequisite: Minimum grade of C- in ARCH401.
Restriction: Must be in Architecture (B.S.) program.

ARCH403 Architecture Design Studio IV (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH402.
Restriction: Must be in Architecture (B.S.) program.

ARCH404 Graduate Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture , visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses. Offered fall only.
Recommended: For 3 1/2 year graduate students only.
Restriction: Must be in Architecture (Master's) program.

ARCH405 Graduate Architecture Design Studio II (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical. Offered spring only.
Prerequisite: Minimum grade of C- in ARCH404.
Restriction: Must be in Architecture (Master's) program.

ARCH406 Graduate Architecture Design Studio III (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH405.
Restriction: Must be in Architecture (Master's) program.

ARCH407 Graduate Architecture Design IV (6 Credits)
Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high-density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit Oriented Development, density, sustainable development, building typology, and street design.
Prerequisite: Minimum grade of C- in ARCH406.
Restriction: Must be in Architecture (Master's) program.

ARCH408 Special Topics Architecture Design Studio (6 Credits)
Design Studio course to examine topical problems in architecture and urban design.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 12 credits if content differs.
Additional Information: May also be taken for repeat credit for ARCH400, ARCH401, ARCH402, or ARCH403 only by permission of Architecture Program Director.

ARCH410 Architecture Technology I (4 Credits)
First course in a four course sequence which develops the knowledge and skills of architectural technology. Addresses climate, human responses to climate, available materials, topography and impact on culture. Principles of assembly, basic structural principles and philosophies of construction.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And PHYS121; and (GEOG140, GEOG123, GEOL120, AOSC123, GEOL123, or BSCI205).
Corequisite: ARCH400.
Restriction: Must be in Architecture (B.S.) program.

ARCH413 Architecture Technology IV (4 Credits)
Final course in a four course sequence. Theory, quantification, and architectural design applications for HVAC, water systems, fire protection electrical systems, illumination, signal equipment, and transportation systems.
Prerequisite: ARCH412.
Corequisite: ARCH403.
Restriction: Must be in Architecture (B.S.) program.

ARCH418 Selected Topics in Architectural Technology (3 Credits)
Selected Topics in Architectural Technology
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH419 Independent Studies in Architectural Technology (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH420 History of American Architecture (3 Credits)
American architecture from the late 17th to the 21st century.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture program.

ARCH422 History of Greek Architecture (3 Credits)
Survey of Greek architecture from 750-100 B.C.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH423 History of Roman Architecture (3 Credits)
Survey of Roman architecture from 500 B.C. To A.D. 325.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH425 History of Architecture I (3 Credits)
Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH225 or ARCH425.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH426 History of Architecture II (3 Credits)
Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH226 or ARCH426.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH427 Theories of Architecture (3 Credits)
Survey of architectural theories - theories of architectural design, representation and urban design from antiquity to the present day.
Prerequisite: ARCH426; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH428 Selected Topics in Architectural History (1-4 Credits)
Selected Topics in Architectural History
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH429 Independent Studies in Architectural History (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH430 Measuring Sustainability in Architecture (3 Credits)
Studies metrics of sustainability as included in rating standards, including LEED. All students will take the LEED GA test.
Credit Only Granted for: ARCH430 or ARCH418M.
Formerly: ARCH418M.

ARCH433 History of Renaissance Architecture (3 Credits)
Renaissance architectural principles and trends in the 15th and 16th centuries and their modifications in the Baroque period.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH435 History of Contemporary Architecture (3 Credits)
Architectural history from World War II to the present.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH443 Visual Communication For Architects (3 Credits)
Investigation of the relationship between drawing from life and architectural drawing, the conventions of architectural drawing and the role of architectural drawing as a means to develop, communicate, and generate architectural ideas.
Corequisite: ARCH400.
Restriction: Must be in Architecture (Master's) program; and must be in the 3.5 year M. ARCH program.

ARCH445 Visual Analysis of Architecture (3 Credits)
Study of visual principles of architectural and urban precedents through graphic analysis. Exercises include on-site observation, documentation and analysis. Focuses on the development of an architect's sketchbook as a tool for life-long learning.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH448 Selected Topics in Visual Studies in Architecture (3 Credits)
Selected Topics in Visual Studies in Architecture
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH449 Independent Studies in Visual Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH456 Great Cities (3 Credits)
Case studies from a selection of the great cities of the world.
Prerequisite: Permission of ARCH-Architecture Program.

ARCH458 Selected Topics in Urban Design (3 Credits)
Selected Topics in Urban Design
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH459 Independent Studies in Urban Design (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH460 Site Analysis and Design (3 Credits)
Principles and methods of site analysis; the influence of natural and man-made site factors on site design and architectural form.
Restriction: Must be in the Master of Architecture program; or permission of the School of Architecture, Planning and Preservation.

ARCH461 Sustainability in Architecture (3 Credits)
Strategies of sustainability as related to the broader context of architectural problem solving.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH418S or ARCH461.
Formerly: ARCH418S.

ARCH462 Methods & Materials of Building Construction (3 Credits)
Building Construction methods and materials are examined through case studies to explore the means and techniques applied to the material execution of buildings and BIM. Focus on an understanding of the organization of the design and construction process and awareness of building and zoning codes, material systems and types.
Prerequisite: PHYS121 or equivalent; and MATH120 or MATH140 or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in a major in undergraduate or graduate ARCH program or Construction Project Management Minor.
Credit Only Granted for: ARCH410 or ARCH462.

ARCH463 Sustainable Systems in Architecture (3 Credits)
Sustainable systems in architecture examines the nature of the global problem, environmental economics, understanding the local environment, bioclimatic design, solar control and shading, solar access zoning, residential scale energy design issues, commercial scale energy design issues, and urban scale energy design issues.
Prerequisite: ARCH462.
Restriction: Must be in a major in undergraduate or graduate ARCH program.

ARCH464 Architectural Structures I (3 Credits)
This course covers the basic principles of architectural structures, including the influence of geometric, sectional, and material properties related to flexure and shear in beam and framed systems; vector mechanics with application to analysis of trusses, catenaries, and arches; diagrammatic analysis of beams for bending moment, shear, and deflection as well as the study of structural framing systems for vertical and lateral loads.
Prerequisite: ARCH462, ARCH463, and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Corequisite: ARCH401 or ARCH406.
Restriction: Must be in either BS in Architecture or M.Architecture Program.
Credit Only Granted for: ARCH411 or ARCH464.

ARCH465 Architectural Structures II (3 Credits)
The basic principles of elastic behavior for different materials such as wood, steel, concrete, and composite materials and compares the properties and applications of materials generally will be covered. It investigates cross sectional stress and strain behavior in flexure and in shear, and torsion as well as the stability of beams and columns. The qualitative behavior of combined stresses and fracture in materials is also covered.
Prerequisite: ARCH464 and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH412 or ARCH465.

ARCH466 Environmental Systems in Architecture (3 Credits)
Environmental systems in architecture presents the theory, quantification, and architectural design implications for heating ventilating and air conditioning, water and waste, fire protection, electricity, illumination, acoustics, and vertical transportation.
Prerequisite: ARCH462 and ARCH463.
Corequisite: ARCH403 or ARCH406.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH413 or ARCH466.

ARCH467 Integrated Project Delivery (3 Credits)
Integrated Project Delivery is examined from design to implementation through an exploration of building construction, architectural design and construction management perspectives.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in Construction Project Management Minor.

ARCH470 Computer Applications in Architecture (3 Credits)
Introduction to computer utilization, with emphasis on architectural applications.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH472 Building Information Modeling Communication and Collaboration (3 Credits)
Building Information Modeling is explored as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in the Construction Project Management Minor.
Credit Only Granted for: ARCH678I or ARCH472.
Formerly: ARCH678I.

ARCH474 Integrated Education in Architecture NAAB/IDP (1 Credit)
Examine National Architectural Accrediting Board (NAAB) student performance criteria in the context of architectural education. Contextualize NAAB accredited curricula and examine the relationship to graduate study and professional practice, including the Intern Development Program (IDP) of the National Council of Architectural Registration Boards (NCARB).
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH478 Selected Topics in Architecture (1-4 Credits)
Selected Topics in Architecture
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH479 Independent Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH481 The Architect in Archaeology (3 Credits)
The role of the architect in field archaeology and the analysis of excavating, recording, and publishing selected archaeological expeditions.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH482 The Archaeology of Roman and Byzantine Palestine (3 Credits)
Archaeological sites in Palestine (Israel and Jordan) from the reign of Herod the Great to the Moslem conquest.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH483 Field Archaeology (3 Credits)
Participation in field archaeology with an excavation officially recognized by proper authorities of local government.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH488 Selected Topics in Architectural Preservation (1-4 Credits)
Selected Topics in Architectural Preservation.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH489 Independent Studies in Architectural Preservation (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

AREC - Agricultural and Resource Economics

AREC200 The Chesapeake Bay Ecosystem: Intersection of Science, Economics, and Policy (3 Credits)
The Chesapeake Bay is one of the most studied and monitored ecosystems in the world. To develop effective policies to restore this system to a healthier status requires integrating what we know about the biological and physical properties of the system with our understanding of the human dimension. Issues such as achieving nutrient reduction goals, restoring healthy blue crab and oyster fisheries in the bay will be used to demonstrate how economics interacts with science to guide policies that can be effective in achieving Bay restoration goals.

AREC210 The Food Chain: What Happens As Your Food Goes From Farm to Table (3 Credits)
Food supply chains link farms, input providers, traders, food processors, and retailers. We assess how supply chains are organized, how they use technologies, and how they are adapting their organization and technologies to meet the challenges facing the food system and society. The challenges include: 1) Producing enough food to meet a growing global population, while reducing damages to air, water, and soil resources; (2) Meeting the health challenges posed by obesity and food insecurity, while also meeting consumer preferences for how food should be produced; and (3) Doing all this in the face of climate change.

AREC240 Introduction to Economics and the Environment (3 Credits)
Costs and social impacts of pollution and human crowding in the modern environment. The economic, legal and institutional causes of these problems. Public policy approaches to solutions and the costs and benefits of alternative solutions.
Credit Only Granted for: ECON200, AREC240, or AREC250.

AREC241 Environment, Economics and Policy (4 Credits)
Studies the relationship between the economy, environment and policy. Causes of modern environmental problems and policies to address them. Importance of production, consumption, externalities, property rights and public goods in environmental issues. Technological and incentive-based solutions to environmental problems.
Credit Only Granted for: AREC240 or AREC241.

AREC250 Elements of Agricultural and Resource Economics (3 Credits)
An introduction to economic principles of production, marketing, agricultural prices and incomes, farm labor, credit, agricultural policies, and government programs.
Credit Only Granted for: ECON200, AREC240 or AREC250.

AREC260 The Science of Gender in Economics and Development (3 Credits)
Describes the process by which various scientific disciplines, including anthropology, evolutionary biology, psychology and economics do research on the topic of gender. We will examine the current state of the literature on the reason why different sexes exist and how sex translates into gender across different societies today. With a better understand of the source of gender, we will examine how researchers are learning about the reasons behind the highly divergent economic outcomes for men and women today. The class will discuss these issues in the context of the labor market in developed countries like the US (why are there fewer women in high paying STEM jobs?, for example) and in the context of a wide variety of markets in developing countries (what role do women play in agriculture, health and politics?, for example). A particular focus of the class will be on techniques for learning more about the underlying reasons for these differences, how they can be overcome and whether women play a special role in improving economic outcomes in the poorest parts of the world.
Recommended: Completion of introductory statistics recommended but not required.

AREC306 Farm Management and Sustainable Food Production (3 Credits)
The organization and operation of farm businesses are explored through principles of management, financial analysis, production economics, marketing, and business planning. These farm management principles are presented in the context of a sustainable food production system.

AREC326 Intermediate Applied Microeconomics (3 Credits)
Deepens and broadens your ability to apply rigorous economic analysis skills to a broad range of problems.
Prerequisite: ECON200, AREC250, or AREC240; and ECON201. And MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.
Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.
Formerly: AREC489M.

AREC345 Global Poverty and Economic Development (3 Credits)
This interdisciplinary course explores social and economic development around the world. Topics include geography, democratization, political instability and conflict, health and education, agricultural development, micro-entrepreneurship, and an introduction to impact evaluation methods used to evaluate the efficacy of public policy aimed at alleviating poverty.

AREC357 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)
Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.Cross-listed with: GERS457.
Credit Only Granted for: AREC357, GERM457, or GERS457.

AREC360 Global Agriculture: Developing Extension Education & Agriculture Technologies in Africa (3 Credits)
Identifies challenges faced by farmers in Nimba County, Liberia, and works collaboratively across borders to discuss these challenges and develop extension education programming that will be implemented in the region in order to empower local farmers. The course is designed to create a paradigm shift for both cohorts of students who will educate and learn from each other in what is now becoming a critical context - the globalized workspace. UMD and LICC students will be grouped together to identify and develop particular thematic areas most needed by local farmers, and then as a cohort create a week-long extension program to be implemented on the ground.

AREC365 World Hunger, Population, and Food Supplies (3 Credits)
An introduction to the problem of world hunger and possible solutions to it. World demand, supply, and distribution of food. Alternatives for leveling off world food demand, increasing the supply of food, and improving its distribution. Environmental limitations to increasing world food production.

AREC380 Data Science for Environmental and Resource Economics (3 Credits)
An introduction to principles of data science using modern, open source software tools with applications to important problems in environmental, energy and resource economics. Topics include data wrangling, exploratory data analysis and visualization, modeling, forecasting, practices for reproducible research, and communication of results.
Prerequisite: AREC240, AREC241, AREC250, or ECON200.

AREC382 Computer-Based Analysis in Agricultural and Resource Economics (3 Credits)
Analysis of economic data using computer spreadsheets. Exercises include analyses of forest land shares, farmer willingness to pay, farm production planning, fisheries management, corn prices, and index numbers. Analyses features use of cell formulas, spreadsheet functions, Excel's Data Analysis Tool and Solver. This is a lab course featuring experimental learning.
Prerequisite: STAT100, MATH107, or MATH111; or students who have taken courses with comparable content may contact the department. And AREC240, AREC250, or ECON200; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC182 or AREC382.
Formerly: AREC182.

AREC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Agricultural & Resource Economics department.
Restriction: Junior standing or higher.

AREC388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be in the AGNR Honors program.
Repeatable to: 6 credits if content differs.

AREC399 Special Problems (1-3 Credits)
Concentrated reading and study in some phase of a problem in agricultural and/or natural resource economics.
Repeatable to: 6 credits if content differs.

AREC405 Economics of Production (3 Credits)
The use and application of production economics in analysis of firm and policy decisions. Production functions, cost functions, multiple product and joint production, and production processes through time.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC422 Econometric Analysis in Agricultural and Environmental Economics (3 Credits)
This course offers a hands-on introduction to econometrics. Students will explore the linear regression model from the ground up by analyzing real-world datasets and learning how to distinguish causation from correlation. They will gain practical experience using econometrics to address important questions in agricultural economics and environmental economics.
Prerequisite: 1 course from (AREC326 or ECON326); and 1 course from (ECON230, ECON321, or BMGT230).
Credit Only Granted for: ECON422, ECON424, or AREC422.

AREC426 Economic Methods and Food Consumption Policy (3 Credits)
An overview of major econometric tools used by policy makers, economists and social scientists to analyze the effects of food consumption policy. Major food assistance programs in the United States such as SNAP, the School Lunch Program and the School Breakfast Program will be discussed.
Prerequisite: AREC326; or ECON326.
Credit Only Granted for: AREC489O or AREC426.
Formerly: AREC489O.

AREC427 Commodity Pricing and Markets (3 Credits)
Economic theory as applied to the marketing of agricultural commodities. How commodity prices vary with current demand and production, and how prices are linked over time, across space, and across grades.
The role played by contractual arrangements, cooperative marketing, vertical integration, and governmental policies in commodity marketing strategies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC430 Introduction to Agricultural and Resource Law (3 Credits)
Survey of law with emphasis on problems and applications related to agricultural and natural resource economics. The course emphasizes strategies for managing legal risk arising from ownership, management, and use of agricultural resources. Students will get practical information to utilize in personal or professional settings. Contract law, constitutional law, tort law, property law, real estate transactions, business organization, estate planning, and debtor.
Prerequisite: ECON326 or AREC326.
Credit Only Granted for: AREC430 or AREC489K.
Formerly: AREC489K.

AREC431 Agricultural Water Quality: Policy and Legal Issues (3 Credits)
An overview of the American and Maryland legal systems and sources of legal information as it pertains to water quality and agriculture.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC489L or AREC431.
Formerly: AREC489L.

AREC433 Food and Agricultural Policy (3 Credits)
Economic and political context of governmental involvement in the farm and food sector. Historical programs and current policy issues. Analysis of economic effects of agricultural programs, their benefits and costs, and comparison of policy alternatives. Analyzes the interrelationship among international development, agricultural trade and general economic and domestic agricultural policies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC435 Commodity Futures and Options (3 Credits)
The economics and institutional features of commodity futures and options markets. Students will develop a basic understanding of the underlying price relationships between cash and futures markets and will apply this information to business risk management decision making.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

AREC445 Agricultural Development, Population Growth and the Environment (3 Credits)
Development theories, the role of agriculture in economic development, the agricultural policy environment, policies impacting on rural income and equity, environmental impacts of agricultural development.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC446 Sustainable Economic Development (3 Credits)
Examine why socially equitable and environmentally sustainable economic growth is difficult to achieve. It explores the interactive dynamics of environmental degradation, human capital, inequality and institutions. Emphasis is on the role of market imperfections and political failure in explaining the persistence of extractive economic institutions that hinder sustainable development.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC446 or AREC489G.
Formerly: AREC489G.

AREC447 The Economy of China (3 Credits)
An introductory survey course of economic development in China with emphasis on understanding the process of economic reform in mainland China since 1978.
Prerequisite: AREC326, ECON306, or ECON326.
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness).

AREC453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with: ECON453.
Credit Only Granted for: AREC453 or ECON453.

AREC454 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON484.
Credit Only Granted for: AREC454 or ECON484.

AREC455 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON485.
Credit Only Granted for: AREC455 or ECON485.

AREC456 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON486.
Credit Only Granted for: AREC456 or ECON486.

AREC457 Energy, Climate Change, and Options for a Low-Carbon Economy (3 Credits)
Provides a primer in the physics and atmospheric chemistry of climate change, describes what the effects of climate change may be and explains how energy generation and use in various sectors of the economy contribute to greenhouse gas. It presents policy options meant to curb the use of fossil fuels (e.g., carbon taxes), improve energy efficiency (e.g., standards and incentives), and identifies possible drawbacks or unintended effects of such policies. Students will also study adaptation from the engineering, policy and anthropology points of view. The course further covers other aspects of climate change, as the potential effect of climate change on human health, cultural artifacts and the built environment, and sensitive ecological systems, and the legal implications of carbon storage options.
Recommended: ECON200. And AREC326; or ECON326.
Restriction: Junior standing or higher.

AREC481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: ECON481.
Credit Only Granted for: ECON481 or AREC481.

AREC489 Special Topics in Agricultural and Resources Economics (3 Credits)
Repeatable to: 9 credits.

ARHU - Arts and Humanities

ARHU158 Explorations in Arts and Humanities (3 Credits)
A first-year innovation and research experience. It introduces multiple disciplinary perspectives within a given theme to understand human beings, cultures and societies. Students will learn about key questions, concepts, methods, and practices within ARHU and will engage in original humanistic research while working with campus and college tools and resources.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and freshman standing.

ARHU230 Introduction to Humanities, Health, and Medicine (3 Credits)
An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: ENGL254, HIST219N, WGSS230.
Credit Only Granted for: ARHU230 , ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

ARHU240 Cultural Institutions of the United States (3 Credits)
An introduction to cultural institutions in the United States, while providing student exposure to the professional environment artist find themselves in. In order for artist and arts administrators to succeed after their educational experience it is critical to understand the history of their respective field, and which events and questions have shaped, and are shaping, their industry. This course is very much an interdisciplinary initiative. Over the past century the arts have become ever-more integrated with one another resulting in a requirement of not only understanding one discipline, but how other disciplines affect a particular practice.

ARHU269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARHU269A Morocco: In the Footsteps of the Beat Generation (3 Credits)
Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the "orient" has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppressionCross-listed with: ENGL269M.
Credit Only Granted for: ARHU269A or ENGL269M.

ARHU275 Scriptwriting for Theater, Film, and Television (3 Credits)
Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.Cross-listed with: ENGL275.
Credit Only Granted for: ENGL275 or ARHU275.

ARHU286 Experiential Learning (3-6 Credits)
Designed for students who have completed fewer than 60 credits, students who are in their first semester at the University of Maryland, and/or students who wish to complete legislative internships, research-based internships, some start-up internships and some remote internships. All students must be enrolled in an ARHU major or minor and the internship must be in one of the academic fields covered within the College of Arts and Humanities. In addition to completing their required hours on site, students with fewer than 60 credits and students who are in their first semester at the University of Maryland will be required to attend three bi-weekly seminars at the beginning of the semester to help develop their para-professional goals and understandings.
Prerequisite: Permission of ARHU-College of Arts & Humanities.
Restriction: Minimum cumulative GPA of 2.5; and must be in a major or minor in ARHU - College of Arts and Humanities; and must have earned a minimum of 12 credits; and must not have earned more than 60 credits.

ARHU298 Special Problems in Arts and Humanities (3 Credits)
Repeatable to: 6 credits if content differs.

ARHU298L "Are you - Nobody - too?" Why we create and share stories, poems, comics and zines (3 Credits)
Our ability to create and maintain meaningful social connections tells us that we are not alone; it reminds us that we are connected to something larger, a community, a group of people willing to celebrate our triumphs and help us cope during difficult times. Emphasizing the principles of participation, connection, and collaboration, this course explores how various traditionally marginalized people form their own cultural communities and develop a sense of reciprocal belonging through the creation (and independent distribution) of stories, poems, spoken word poetry, comics and zines.In spite of intersectional obstacles such as the lack of political power, access to resources and economic opportunities, these communities may find it possible to redefine their place in society by demonstrating originality, resilience, and talent.

ARHU299 Studies in Humanities Technology (1-3 Credits)
Selected topics in the use of Information Technology in the Humanities.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

ARHU308 Critical Eras: An Interdisciplanary View (3 Credits)
An interdisciplinary exploration of a critical period, ranging from a year to an era, stressing the relationship between different forms of human expression and the social milieu.
Repeatable to: 6 credits if content differs.

ARHU309 Writers' House Colloquium: Creative Writing in Community (1-3 Credits)
Colloquium designed to improve students' skills in literary and communication arts through lectures, workshop and discussions on the history and craft of writing across cultures. Topics include poetry and fiction in translation, and exploration of modes of critique, elements of craft of fiction and poetry, writing for different media, genre writing, writing for performance, screen or scriptwriting and creative non-fiction.
Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.
Repeatable to: 6 credits if content differs.

ARHU318 Writers' House Colloquium: Creative Writing Across Languages and Cultures (1-3 Credits)
Colloquium designed to improve students' skills in literary and communication arts through lectures and discussions on the history and craft of writing across cultures. Topics for the different versions of ARHU 318 include poetry, fiction, writing for different media, autobiography and memoir, scriptwriting, screenwriting, and community engagement projects.
Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.
Repeatable to: 6 credits if content differs.

ARHU319 Writers' House Second Year Colloquium: Form and Theory of Creative Writing (1-3 Credits)
Required course for Writers' House students pursuing the notation program. Offered in either poetry or imaginative prose writing. Students work at the intermediate level, refining creative writing skills through cross-cultural reading and writing exercises. As part of the course, students attend a series of lectures and readings given by professional writers.
Restriction: Must be in the Jimenez-Porter Writer's House program.
Repeatable to: 6 credits if content differs.

ARHU320 Writers' House Second Year Colloquium: Writing for Publication (3 Credits)
Students write, discuss and revise for multiple forms of publication: reading their own work at least once in public, sending work out for publication to literary journals, and producing a chapbook of high quality by end of semester.
Recommended: Completion of ARHU318 and ARHU319 recommended.
Restriction: Currently enrolled in Writers' House or permission of program.
Credit Only Granted for: ARHU319A or ARHU320.
Formerly: ARHU319A.

ARHU338 Undergraduate Teaching Assistantship in a Living Learning Program (1-3 Credits)
Offers exceptional students the opportunity to work closely with a faculty member and gain valuable experience. ARHU Living learning program UTAs also serve as peer mentors and program leaders. They assist with course planning, research, and student advising (as appropriate). We are also allowing for variable credit (1-3 cr hrs).
Restriction: Sophomore standing or higher; and must be in an ARHU Living Learning Program or be a graduate of the program; and must have permission of the Living Learning Program to enroll.
Repeatable to: 6 credits if content differs.

ARHU340 Financial Entrepreneurship for Arts Leaders (3 Credits)
An introduction to financial entrepreneurship for the arts leader in order to prepare students for diverse and ever-changing careers in the arts and creative fields. Topics explored will include Professional Paperwork (resumes, cover letters, biographies, job searches), Financial Literacy (taxes, budgets, boards, tickets sales, musicians unions), Marketing (website development, social media, press packets, record labels vs. online distribution, headshots, audience development, community engagement, branded content), Communication (public speaking, writing), and Technology (online tools, computer software, peripherals, recording, photography/videography, on campus resources).Cross-listed with: MUSC448E.
Credit Only Granted for: ARHU340 or MUSC448E.

ARHU350 Chilean Culture, Democracy, and Social Change (3 Credits)
Short term education abroad course offered in Summer term, in Santiago and Valparaiso, Chile. An exploration of both the conditions that led to the 1973 coup d'etat in Chile, and the complex legacy left by the following dictatorship, including competing economic philosophies that are underpinned by religious, historical, and ideological components. This course focuses on how the arts and literature continued to flourish during the dictatorship, and how they have played a continuing role in the country's recovery from its traumatic past.
Credit Only Granted for: ARHU350, ARHU369C, CMLT498C, GVPT309F, HIST329N, HONR349C.
Formerly: ARHU369C.

ARHU351 James Joyce's Dublin: A multi-media Odyssey (3 Credits)
Chapter by chapter analysis of the text with in situ tours to settings important to the book, and examination of the culture and circumstances from which it arose; review of the impact of Ulysses, and continuing controversies around the text. Multi-media explorations and creative projects will be included in course activities: collaborations on tumblr, and the use of such technologies as vine, instagram, twitter, etc., in an exploration of how our subjective experiences and the expressions they inspire are impacted by new technologies.
Credit Only Granted for: ARHU369I, ARHU351, ENGL369J, or HONR349L.
Formerly: ARHU369I.

ARHU369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARHU375 The TV Writers Room Screenwriting for Television and Video (3 Credits)
Students engage with the theory and practice of screenwriting for television and video. Students read and watch teleplays designed to teach advantages of the television format. Students apply what they learn to prepare frequent writing exercises, share and provide feedback for peers scripts in a workshop format, and work together as a Writers Room to prepare an original pilot episode.
Prerequisite: ARHU275, ARHU318, or FILM370; and permission of instructor.
Additional Information: Priority in enrollment will be given to students participating in the Jimenez-Porter Writers' House and FILM studies programs.

ARHU380 Arts & Humanities in Social Innovation, Change, and Justice: Do Good Now (3 Credits)
The course serves as the core course for the Arts-and-Humanities track in PLCY's minor in "Nonprofit Leadership and Social Innovation." Students will be introduced to the role that the Arts and Humanities can play in social innovation and social change, while exploring various mechanisms for achieving impact with a focus on advancing social justice, equity and systems change. This course deepens understandings of nonprofit leadership, entrepreneurship and social innovation by guiding students through the creation and implementation of social change projects and ventures of their choice.
Credit Only Granted for: ARHU380, BSOS388B, or PLCY388D.

ARHU386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-College of Arts & Humanities.
Restriction: Junior standing or higher.

ARHU398 Special Topics in Arts and Humanities (3 Credits)
An in-depth exploration of thematic topics in Arts and Humanities.
Repeatable to: 9 credits if content differs.

ARHU439 Interdisciplinary Studies in Arts and Humanities (3 Credits)
An interdisciplinary exploration of chronological, geographical or thematic topics in Arts and Humanities.
Repeatable to: 6 credits if content differs.

ARHU440 Arts Leadership Seminar (3 Credits)
An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.Cross-listed with: TDPS440.
Credit Only Granted for: TDPS4440 or ARHU440.

ARHU458 Graduate School Preparation (1 Credit)
Designed for Juniors and Seniors who are interested in applying to graduate school. Topics include skills needed for the graduate school search and application process, evaluation and reflection of application materials, preparation for GRE exam, and exploration into career options after graduate school. Focus on the Humanities fields.
Restriction: Must have earned a minimum of 45 credits.
Repeatable to: 3 credits if content differs.

ARHU468 Peer Mentoring Program (1 Credit)
A workshop for sophomore, junior or senior students who wish to serve as peer mentors helping first-year students to cope with the numerous issues which often arise in the transition to the university.
Restriction: Sophomore standing or higher; and permission of ARHU-College of Arts & Humanities.
Repeatable to: 3 credits if content differs.

ARHU486 Internship Practicum in Arts and Humanities (3-6 Credits)
An internship intended for students who have already completed an internship for credit. ARHU486 must be a different experience from the internship students have already taken for credit. Generally students intern with a different company, but they may continue working for the same company if the job is significantly different. See ARHU internship coordinator for details.
Prerequisite: Have completed previous internship at U of MD.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and permission of ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits; and completed 12 credits at U of MD.

ARHU489 Advanced Internship Practicum in ARHU (3-6 Credits)
Designed for students who have already completed at least 2 upper level internship courses for academic credit. It is an advanced practicum to assist students in continuing to develop and hone their professional writing, presentation and analytical skills.
Prerequisite: ARHU486.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Course is designed to follow ARHU486.

ARHU498 Special Topics in Arts and Humanities (3 Credits)
Repeatable to: 6 credits if content differs.

ARHX - Art History & Archaeology Education Abroad

ARHX100 Art of Rome (3 Credits)
An introductory course in the history of art. The course focuses on Rome, from its origin to contemporary times. Masterpieces of painting, sculpture, architecture and urban planning are examined within their historical contexts. The course hones a method of description, critical analysis and interpretation of art and builds an understanding of traditional forms and cultural themes useful in the comprehension of all western art.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX201 Media, Art and Social Activism (3 Credits)
Focuses on media that have been created expressly for communicating and/or promoting positive social change, blending social theory with aesthetics and civics. The course investigates current trends in visual communication, as well as the methods for how to analyze and contextualize these, with an emphasis on politics in art and new media.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX300 The Art of Florence: Exploring Visual Culture (3 Credits)
During the Renaissance, the city of Florence was the site of some of the most remarkable artistic experiences in European history. Why, though, should one city have contributed so much to the course of the arts? Why should so many of the city's works of art, monuments, and buildings have played a major rule in the development of the visual arts? What set of circumstances and conditions made this possible? This course is designed to explore these questions through an examination of historical factors that made Florence the birthplace and point of reference for what we now call "Renaissance art."
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX301 New Perspectives: Visual Technology in Renaissance and Baroque Art (3 Credits)
This interdisciplinary course explores the depiction of visual space in Renaissance and Baroque Art through the medium of modern technologies. The visual theories of authors including Leon Battista Alberti, Piero della Francesca and Leonardo da Vinci will be given practical application through the use of the digital design software Autodesk Autocad.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX302 Raphael and The High Renaissance in Florence and Rome (3 Credits)
This course will examine the career and achievements of Raphael (1483-1520), and will consider the artist in the context of the High Renaissance in Florence and Rome. It will consider the sources and documents for his career, as well as the later historiography, and it will include study of the many works by Raphael in Rome and in the Vatican Museums.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX303 Nordic Contemporary Art (3 Credits)
Focuses on current trends and the dynamics of regional identity in contemporary art, art history, and curating. The Stockholm art scene is used as an entry-point to analyze artworks, exhibitions and texts: What is contemporary, and what is Nordic, about the art and issues that surface here?
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARHX304 Contemporary Spanish Art (3 Credits)
A dynamic, multi-disciplinary introduction to Contemporary Art in Spain. We will discuss recent classics as well as emerging artists, and we will cover a wide range of artistic practices, from photography to afterpop music, including installation art, performance art and comic art.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ARHX310 The Business of Art: The Economics and Management of Culture (3 Credits)
Markets for visual arts provide a particularly fertile ground for those concerned with the economics of culture. The study of the past and current structure of the market for visual art, the mechanisms that fuel this flourishing market and the involvement of public and private institutions in the context of the current globalization of the arts, provides significant instruments for the development of museum management studies, as well as a different methodological approach to art history and history of culture management.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARMY - Army

ARMY101 Basic Military Science I (1 Credit)
An exploration of leadership application through classroom instruction, leadership training and mentorship, adventure exercises and camaraderie. Hands on experience in managerial operations and military techniques. Applied military customs and techniques through physical and mental training.

ARMY103 Basic Army Physical Fitness (2 Credits)
This course allows beginners to learn the basic Army Physical Fitness program. Through a series of rigorous progressive workouts, the student advances from novice status to meet the requirements of the Army Physical Fitness Test. Course content also introduces students to Army managerial skills and basic military tactics and techniques.
Recommended: ARMY101.

ARMY105 Basic Military Science II (3 Credits)
Exploration of the Army Leadership Model through classroom instruction, leadership training and mentorship. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.
Credit Only Granted for: ARMY119 or ARMY105.

ARMY106 Basic Military Science I (3 Credits)
Introduction to the personal challenges and competencies that are critical for effective leadership and communication. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.
Restriction: Students must meet Officer candidate criteria to participate in field training.

ARMY119 ARMY ROTC INDEPENDENT STUDY (1 Credit)
Exploration of the Army Leadership Model through group discussion, leadership exercises and research.
Restriction: Permission of UGST-Army ROTC.
Repeatable to: 2 credits.
Credit Only Granted for: ARMY119 or ARMY105.
Additional Information: -Intended to impart the lecture curriculum of ARMY105 without the labs.

ARMY201 Army Leadership Development (3 Credits)
This course is an intensive examination of the Army Leadership Model in practice. The model is compared to leadership styles and techniques from government and industry and the comparative effectiveness of each. Students form their own personal leadership styles.
Restriction: Sophomore standing or higher.

ARMY202 Military Leadership in Practice (3 Credits)
This course uses the case study method to examine the Army Leadership Model as applied to assigned missions in U.S. history. Students learn to evaluate and assimilate effective leadership methods and techniques. Includes a laboratory period in which case studies are worked out and presented by individuals and groups.

ARMY301 Advanced Military Leadership I (3 Credits)
Reinforces understanding and application of Army leadership strategies, critical decision making methodologies, physical and mental fitness excellence. Includes a laboratory period in applied leadership, common military tasks and physical fitness.

ARMY302 Advanced Military Leadership II (3 Credits)
Prepares contracted students for certification at the Army National Advance Camp, a prerequisite for commissioning as an officer in the U.S. Army. Focus is directed to military tactics, squad and platoon drills, marksmanship, land navigation and fitness excellence. Includes a laboratory period in applied leadership skills as well as a three day field exercise.

ARMY401 Advanced Military Leadership III (3 Credits)
Introduces contracted students to the study of Army structure, practices and processes exercised by Army Commanders and Staff in completing personnel, logistics, training and combat operations. Includes a laboratory in applied leadership skills and two field exercises.

ARMY402 Advanced Military Leadership IV (3 Credits)
The military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

ARSC - Air Science

ARSC100 The USAF Today I (1 Credit)
Freshman course for AFROTC cadets. Introduces students to the United States Air Force and encourages participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC101 The USAF Today II (1 Credit)
Freshman course for AFROTC. Continuation of ARSC100 for freshmen AFROTC cadets. Study of topics relating to the Air Forces and defense. Focuses on organizational structure and missions of the Air Force; officership and an introduction to both written and oral communication skills.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC200 The Development of Air Power I (1 Credit)
Sophomore course for AFROTC cadets. Study of factors contributing to the development of air power from its earliest beginnings through two world wars; the evolution of air power concepts and doctrine; introductory leadership; and assessment of communicative skills.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC201 The Development of Air Power II (1 Credit)
Continuation of ARSC 200 for sophomore AFROTC cadets. The study of historical events, leaders, and technical developments which surrounded the growth of air power; the basics of leadership; environment of an Air Force officer; and concepts of ethical behavior.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC300 Management and Leadership I (3 Credits)
The study of leadership and management fundamentals, professional knowledge, Air Force doctrine, and written and oral communication skills. Case studies are used to examine leadership and management situations. This course will satisfy credit toward a minor in military studies.
Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Junior standing or higher.

ARSC301 Management and Leadership II (3 Credits)
Continuation of ARSC300. Study of leadership and management skills and leadership ethics as well as written and oral communication skills required of Air Force officers. This course will satisfy credit towards a minor in military studies.
Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Junior standing or higher.

ARSC399 Independent Study in Air and Space Power Implementation (1-3 Credits)
Independent study to broaden understanding of the implementation of air and space power. Topics of research are selected by the student and instructor to focus the student on a particular aspect of air and space power implementation during a particular campaign or conflict.
Prerequisite: Permission of UGST-AFROTC-Air Science.
Recommended: ARSC401 and ARSC400.

ARSC400 National Security Forces in Contemporary American Society I (3 Credits)
Study of American national security policy and processes to include information and implementation, impact of major national and international actors, and development of major policy issues. This course will satisfy credit towards a minor in military studies.
Prerequisite: Permission of UGST-AFROTC-Air Science; or (ARSC300 or ARSC301).
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARSC401 National Security Forces in Contemporary American Society II (3 Credits)
This course examines various subjects including: military law/justice, preparation for active duty, and current issues affecting military professionalism. This course will satisfy credit towards a minor in military studies.
Prerequisite: ARSC300 or ARSC301; or permission of UGST-AFROTC-Air Science.
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARTH - Art History & Archaeology

ARTH169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTH200 Art and Society in Ancient and Medieval Europe and the Mediterranean (3 Credits)
Examines the material culture and visual expressions of Mediterranean and European societies from early times until ca. 1300 CE, emphasizing the political, social, and religious context of the works studied, the relationships of the works to the societies that created them, and the interrelationship of these societies.

ARTH201 Art and Society in the West from the Renaissance to the Present (3 Credits)
Examines representative European and American works of art from the later Middle Ages to the present, highlighting the dynamic exchange between artistic and cultural traditions both within periods and across time.

ARTH221 Color: Art, Science, and Culture (3 Credits)
An interdisciplinary exploration of the intersections of art, science, and culture. Using research on human vision, neurobiology, and cognitive psychology, examines how vision works, why we see color, and how we respond to color. Investigates the cultural significance of color: how artists across time and cultures have had access to and used color; how cultures have created specific language to describe color; and how cultures have imbued color with profane, sacred, and/or symbolic meanings.

ARTH230 Symbolic Images: The Theory and Practice of Iconography in European Art, 1400-1850 (3 Credits)
Iconographic interpretation of visual narratives, signs and symbols has long been a topic of art-historical inquiry. In early modern European art, images were often conceived with the deliberate intent of posing a 'puzzle' or 'problem' for the beholder to solve; yet in most cases we have little or no evidence of how contemporary beholders solved such enigmas. Provides students with the opportunity to take command of these research methods and source materials, addressing a genuine iconographic problem, researching the relevant literature, identifying the essential primary source evidence, making contextually appropriate assumptions, and producing a valid result.

ARTH240 Humanists on the Move (3 Credits)
Introduces students to the practices of a field that is only about twenty years old: the Digital Humanities. We will explore how humanities scholars can reexamine their materials, configuring them as "data" that can be gathered and visualized in order to ask new questions about the past. Using traditional humanities source materials from this different perspective, students will produce entirely new data; using new digital platforms, they will create visualizations of that data; and using humanistic methods, they will interpret those visualizations. Focusing on the original Humanists from the Renaissance period, this course will teach students to engage closely with the most traditional materials of the humanities - primary texts produced in an historical period - and with the newest tools to work with humanities data. Students will complete two major projects by collecting data on the same humanist figures: mapping their travels, and tracing their networks. We will also consider how texts can be treated as data.

ARTH250 Art and Society in the Ancient American World (3 Credits)
Surveys major arts and architecture of the pre-Columbian world, including Mesoamerican and Andean cultures from the earliest known civilizations through European contact and conquest. Acquaints students with the monumental architecture, urban planning, painting, sculpture, and portable arts of the ancient Americas.

ARTH255 Art and Society in the Modern American World (3 Credits)
Explores the origins and evolution of art in the modern American world, from the late colonial era to the present, comparing major artistic movements and their historical contexts. Considers the diversity of art across Latin America and the United States, and the ways in which artworks mediate social, ethnic, political, and national identities.

ARTH260 Art and Activism (3 Credits)
Can art effect social change? How may we use the history of radical and avant-garde art to inform present-day movements and models of artistic and creative activism? This course explores the modern and contemporary history of political art and arts activism on local, national, and global scales.

ARTH261 Monuments, Monumentality, and the Art of Memorial (3 Credits)
Why do societies create monuments? And why do they preserve and destroy, change and remove them? How do monuments embody cultural values, shape historical narratives, and become sites of mourning and memory? This course investigates the political and cultural work of monuments across time and space, from the ancient world to European empires to the contemporary United States. The issues we consider include intercultural exchange and religious contexts, race and representation, and appropriation and iconoclasm.

ARTH262 Public Art (3 Credits)
How does public art function on a university campus, in major cities, and across the United States? Can emerging technologies support the interpretation, experience, and reception of public art in new, and imaginative, ways? This course invites students to empirically study the modern history and civic values of public art spanning sculpture, painting, mixed-media, and installation. We consider the nature of public space, the politics of representation and community, and the civic and memorial functions of art. Leveraging a panoply of digital tools, students generate metadata, prototype creative interventions and experiences, and collectively write a community-sourced history of public art.

ARTH263 Art and Difference (3 Credits)
A comparative and thematic approach to studying the representation of otherness in art and visual culture from the eighteenth century to the present. Students will work to expand the definition of otherness, and consider the roles that ethnicity, nationality, and politics play in representations of otherness across various continents and chronologies.

ARTH265 How (and Why) to Look at Art in the Era of Climate Change (3 Credits)
How can art help us build the mindset necessary for fashioning a sustainable civilization? Paintings, photographs, films, novels, songs, and other creative works as they shape beliefs related to sustainability and justice.
Credit Only Granted for: ARTH265 or ARTH465.
Formerly: ARTH465.

ARTH269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.
Additional Information: No more than 3 credits total of ARTH 269 or ARTH 289 can be used to satisfy the art history major requirement.

ARTH275 Art and Society in Africa (3 Credits)
A comparative study of art and material culture from various regions of the African continent. Looking across ethnic and national boundaries, considers the many relevant political, social, and religious contexts.

ARTH289 Special Topics in Art History and Archaeology (3 Credits)
Selected topics in the visual arts to introduce students to the history of various modes of visual expression and communication.
Repeatable to: 6 credits if content differs.
Additional Information: No more than 3 credits total of ARTH269 or ARTH289 can be used to satisfy the art history major requirement.

ARTH290 Art and Society in Asia (3 Credits)
A comparative, interrelational study of the different visual arts and material cultures produced by societies in Asia. An examination of the historical traditions and forms in political, social, and religious contexts.

ARTH292 Discovering Japan: How the Arts Shaped a Nation (3 Credits)
Explores the origins and creation of Japan from ancient to contemporary times through East Asian and European exchange. Acquaints students with painting, sculpture, architecture, ceramics, gardens, and other art forms in relation to the various cultural contexts within which they were produced and used.

ARTH300 Egyptian Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts of ancient Egypt from earliest times through the Roman conquest. Emphasis on the pharaonic period.

ARTH301 Aegean Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts of Crete, the Cycladic islands, and the Greek mainland from the earliest times to the downfall of the Mycenaean empire.

ARTH302 Greek Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts from the Geometric through the Hellenistic period with emphasis on mainland Greece in the Archaic and Classical periods.

ARTH303 Roman Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts from the earliest times through the third century A.D. with emphasis on the Italian peninsula from the Etruscan period through that of Imperial Rome.

ARTH305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ANTH305, CLAS305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ARTH307 Late Roman and Early Christian Art and Archaeology (3 Credits)
Painting, sculpture, architecture, and the minor arts from the early third century through the sixth century A.D.

ARTH313 Medieval Art: Cultural Exchanges in the Byzantine World (3 Credits)
Focuses on the art and architecture from the eastern Mediterranean, specifically, the Byzantine empire. Our broad focus will be on the formation and evolution of the visual arts in Byzantium as a result of exchanges with various cultural, ethnic, and religious entities and traditions. In this context, we will be looking at the legacy of the Graeco-Roman past, contacts with Islamic world, as well as with people and cultures along the periphery of Byzantium: from the Balkan peninsula, to Sicily and Russia.
Recommended: ARTH200 or ARTH201.

ARTH314 Gothic Art (3 Credits)
Painting, sculpture and architecture in Western Europe, ca. 1150-1400.

ARTH320 Fourteenth and Fifteenth-Century Northern European Art (3 Credits)
The art of northern Europe with an emphasis on painting in the Netherlands and France.

ARTH321 Northern European Art of the 16th Century: Art in the Age of Renaissance and Reformation (3 Credits)
Painting in France, Germany, England, and the Low Countries during the Renaissance and Reformation.

ARTH322 Van Eyck to Bruegel: The Renaissance in Northern Europe (3 Credits)
The tradition of pictorial art in the Netherlands from its flowering in the courts and cities of the early 15th century to the cataclysmic moment of iconoclasm in 1566. It will feature works by famous masters like Jan van Eyck, Hieronymus Bosch, Albrecht Durer, and Pieter Bruegel, but also objects created by lesser-known and anonymous makers. It will treat artworks -- illuminated books, tapestries, paintings, and printed images -- as complexly embedded in the great economic, social, and religious upheavals of this period, particularly considering the transition from feudalism to capitalism, the Reformation, and the sense of "discovery" of new worlds.

ARTH323 Fifteenth-Century Italian Renaissance Art (3 Credits)
Painting, sculpture, architecture, and the decorative arts of the fifteenth century in Italy.

ARTH324 Leonardo's World: Art and Experience in Renaissance Italy (3 Credits)
Painting, sculpture, architecture, and the decorative arts of the sixteenth century in Italy.

ARTH330 Seventeenth-Century European Art (3 Credits)
Painting, sculpture and architecture concentrating on Italy, Spain, France, and England.

ARTH335 Seventeenth-Century Art in the Netherlands (3 Credits)
Painting, sculpture and architecture in seventeenth-century Netherlands.

ARTH337 Cities and the Arts (3 Credits)
Cities and the Arts, as taught by different faculty members in the Department of Art History and Archaeology, will investigate the urban environment and visual culture(s) of one or several major centers. The class will consider how a large city's culture absorbs, transforms, and utilizes multiple external sources in developing a particular local brand defined as its "identity." It examines the visualization of ideals of local coherence as well as the arts of fragmentation and competing internal cultures. Cities and the Arts considers how a large city's interface with an expanding external world, even a global one, allows for appropriations and the rise of discrimi-nations; it examines how exclusions form within the city itself, and how social groups visually articulate identities that may run counter to the larger urban mythology.

ARTH345 Nineteenth-Century European Art to 1850 (3 Credits)
Major trends from Neo-Classicism to Romanticism through an interdisciplinary perspective with an emphasis on historical context.

ARTH346 Nineteenth-Century European Art from 1850 (3 Credits)
Major trends from Realism and Impressionism to Symbolism, exploring the historical context, in which concepts of gender, class, and race are integral to the transformation of Western art.

ARTH350 Twentieth-Century Art to 1945 (3 Credits)
Painting, sculpture, and architecture in Europe and America from the late nineteenth century to the end of World War II.
Prerequisite: ARTH201.

ARTH351 Picturing Contemporary Life: Art Since 1945 (3 Credits)
Visual art since 1945, with an emphasis on North America and Europe.

ARTH357 History of Photography (3 Credits)
An exploration of the historical, social, aesthetic, and technological developments of the photographic medium and its relationship to other modes of visual representation in the creation of the modern world.
Credit Only Granted for: ARTH357 or ARTH457.

ARTH359 Film as Art (3 Credits)
The study of film as a visual art, from theoretical, cultural and aesthetic perspectives. Content varies by semester.
Repeatable to: 6 credits if content differs.

ARTH360 History of American Art to 1876 (3 Credits)
Painting, sculpture, architecture, and decorative arts in North America from the colonial period to 1876.

ARTH361 American Art from Civil War to Civil Rights (3 Credits)
Explores diverse artistic movements and makers in the United States, beginning at the end of the Civil War in 1865 and concluding with the art of Civil Rights era in the 20th century. We will ask how the visual arts construct and challenge formations of race, class, gender, and citizenship in the context of political transformations and social movements over a century of US history. This course emphasizes the practice of close looking as we encounter works art across a range of media--photography, painting, sculpture, film, material culture, performance art and public art.

ARTH362 Presently Black: Contemporary African American Art (3 Credits)
Looks critically at African-American and African diaspora art, focusing particularly on works made in the 20th and 21st centuries. Organized chronologically, this class will provide students with a more thorough understanding of this period of art, as well as the overall connection of visual material to the social, the political, and the aesthetic frames of its production. We will study the ways in which African-American visual production has been shaped by larger discourses about American art, but has also responded to the very real circumstances of racial exclusion in both the mainstream art world and larger society. Students will also have a chance to interact directly with the collection of the David C. Driskell Center throughout the semester.

ARTH369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.
Additional Information: No more than 6 credits of ARTH 369 can be used to satisfy the art history major requirements.

ARTH370 Latin American Art and Archaeology before 1500 (3 Credits)
Pre-Hispanic painting, sculpture, and architecture, with a focus on the major archaeological monuments of Mexico.

ARTH372 Modern Latin American Art to 1945 (3 Credits)
Painting and sculpture in Latin America, with an emphasis on avant-garde movements in Mexico City, Havana, Buenos Aires, Sao Paulo, and Rio de Janeiro.

ARTH373 Latin American and Latinx Art Since 1945 (3 Credits)
Visual arts and architecture in Latin America from local and international perspectives. Emphasis on late modernist and post-modern practices including geometric abstraction, pop, conceptualism, performance art, and installation art.

ARTH376 Living Art of Africa (3 Credits)
Art styles among the segmentary, centralized, and nomadic people of Africa. The iconography and function of their art and its relationship to their various societies, cults and ceremonies.

ARTH377 Global African Art (3 Credits)
A survey of the African-inflected arts around the world, focusing on such countries as Brazil, Haiti, Cuba and the United States

ARTH378 Special Topics for Honors Students (3 Credits)
Writing of a research paper. With an instructor's permission work may be done in conjunction with a graduate colloquium or seminar.
Prerequisite: Must be admitted to art history honors; and permission of ARHU-Art History & Archaeology department.
Restriction: Must be in Art History program.
Repeatable to: 6 credits.

ARTH382 Art of Japan before 1500 (3 Credits)
Thematically-focused topics in painting, sculpture, architecture and decorative arts of early and medieval Japan, from 5000 BC to 1500 AD.

ARTH383 Art of Japan after 1500 (3 Credits)
Thematically-focused topics in the painting, sculpture, architecture, gardens and decorative arts of early modern, modern and contemporary Japan, from 1500 to present.

ARTH385 Art of China (3 Credits)
A chronological survey of Chinese painting, sculpture, and the applied arts.

ARTH386 Experiential Learning (3-6 Credits)
Supervised internship experience in diverse areas of art historical, archaeological, and museological work.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Junior standing or higher.

ARTH389 Special Topics in Art History and Archaeology (3 Credits)
Repeatable to: 6 credits if content differs.

ARTH391 Transnational Chinese Cinema (3 Credits)
Chinese cinema has made a big impact on contemporary world film culture. This course will introduce students to the films directed by some of the most representative filmmakers working in different geopolitical locations (mainland China, Taiwan, Hong Kong) and the Chinese diaspora. The films of these directors, in a spectrum of genres, themes, and styles, have inspired global scholarship, not only in visual culture and cinema, but also in the study of women's issues, gender and ethnic studies, as well as the fields of adaptation and intermedia studies. Students will explore these films in their socio-historical and artistic contexts, considering the influences and innovations that have shaped them and analyzing their reception by audiences and critics. After reading about the films they view, and participating in class discussions, students will be ready to complete their analytical written assignments, for which they will critically examine the films by applying key concepts such as gender, sexuality, race, gaze, style, representation, power, diaspora, etc.Cross-listed with: CINE335.
Credit Only Granted for: ARTH391 or CINE335.

ARTH392 Contemporary Chinese Art and Film (3 Credits)
Contemporary Chinese art and film are arguably the most vibrant of all national arts at the turn of the millennium and have become the face - both figuratively and literally - of contemporary China, a complex society with historic overlays of Confucianism, Taoism, Buddhism, Communism, Post-socialism, and state capitalism. Students will consider a wide range of art forms (painting, photography, video, installation, web-based media, and film) in four broad themes (uses of the past; critiques of power; representations of race, gender, and sexuality; socially engaged art) and explore the complex intertwining of the political, historical, and aesthetic aspects in Chinese contemporary art and film, as well as the multiple contexts in which these artworks are created and circulated.Cross-listed with: CINE337, FILM329L.
Credit Only Granted for: ARTH392, FILM329L or CINE337.

ARTH418 Special Problems in Italian Renaissance Art (3 Credits)
Focus upon aspects of painting, sculpture, and architecture of Renaissance.
Repeatable to: 6 credits if content differs.

ARTH426 Renaissance and Baroque Sculpture in Northern Europe (3 Credits)
Sculpture in France, Germany, England, and the Low Countries from the fourteenth to the seventeenth century.

ARTH456 Photography Since World War II (3 Credits)
An exploration of the many uses and meanings of photography since 1945.

ARTH466 Feminist Perspectives on Women in Art (3 Credits)
Principal focus on European and American women artists of the 19th and 20th centuries, in the context of the new scholarship on women.

ARTH472 Ecuador: Andean Spaces-Traversing the Colonial City and the Natural World (3 Credits)
Introduces students to the history and cultures of Ecuador from the colonial period to the beginning of the 19th century. By studying the socio-spatial configuration of the colonial city as exemplified by Quito, students will be immersed in the art, architecture, and other rich cultural legacies of Ecuador. Quito, a World Heritage site, offers students visually stunning churches, monasteries, colonial squares, a famed tradition of Baroque painting and sculptures, and vibrant indigenous and mestizo communities. As a contrast, students will explore also travel narratives that represent the natural Andean world while visiting Quito's surrounding areas. This course will interrogate the European influence on urban design and representations of the landscape of the Americas. Understanding this colonial past enhances the understanding of the modern history of the Andean region and Latin America as a whole. The students will gain a full appreciation of the European and Indigenous living heritage that composes the region today. Taught in English.Cross-listed with: SPAN435.
Credit Only Granted for: SPAN435, SPAN448E, ARTH472 or ARTH369E.
Formerly: SPAN448E and ARTH369E.

ARTH484 Modern Chinese Film and Visual Culture (3 Credits)
Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.Cross-listed with: CINE426.
Credit Only Granted for: ARTH484, CINE426 or FILM426.
Formerly: FILM426.

ARTH485 Chinese Painting (3 Credits)
Chinese painting history from the second century B.C. through the twentieth century, covering cultural, stylistic and theoretical aspects.

ARTH486 Japanese Painting (3 Credits)
Japanese painting from the sixth through the nineteenth century, including Buddhist icon painting, narrative scrolls, and Zen-related ink painting.

ARTH488 Colloquium in Art History (3 Credits)
Colloquium to investigate a specific topic in depth.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH489 Special Topics in Art History (3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH496 Methods of Art History and Archaeology (3 Credits)
Methods of research and criticism applied to typical art-historical/archaeological problems, familiarizing the student with bibliography and other research tools. Introduction to the historiography of art history and archaeology, surveying the principal theories, encouraging methodological debates within the discipline. Course for majors who intend to go on to graduate school.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Must be in Art History program.

ARTH498 Directed Studies in Art History I (2-3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Junior standing or higher.
Repeatable to: 99 credits if content differs.

ARTH499 Honors Thesis (1-6 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 6 credits if content differs.

ARTT - Art Studio

ARTT100 Two-Dimensional Design Fundamentals (3 Credits)
Principles and elements of two-dimensional design. Introduction to visual communication.

ARTT110 Elements of Drawing I (3 Credits)
Fundamental concepts, media, and processes of drawing. Emphasis on observation and representation in combination with individual expression. Subject matter includes still life, human figure, nature, the built environment, and conceptual projects.

ARTT150 Introduction to Art Theory (3 Credits)
Fundamental concepts of global, philosophic, and critical art theory examined through various historic and contemporary texts, and the analysis of works of art.

ARTT169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT200 Three-Dimensional Art Fundamentals (3 Credits)
Fundamental concepts of three-dimensional form and space examined through the manipulation and organization of various materials.
Prerequisite: ARTT100 and ARTT110.

ARTT208 Intermediate Special Topics in Art (3 Credits)
Intermediate special topics in Art.
Repeatable to: 6 credits if content differs.

ARTT210 Elements of Drawing II (3 Credits)
Continuation of ARTT110 with additional emphasis on color, figure drawing, and contemporary issues.
Prerequisite: ARTT110.

ARTT255 Introduction to Digital Art and Design Processes (3 Credits)
Introduction to basic software and principles of digital imaging, and how they are applied to art and design. Topics covered: Digital image construction and manipulation, Vector-Based digital techniques layout, typography, etc), time-based digital techniques (video and audio composition and manipulation), and basic interactivity (web-design). Digital media used to explore visual principles established in ARTT100.
Prerequisite: ARTT100 and ARTT110.
Credit Only Granted for: ARTT255 or ARTT354.
Formerly: ARTT354.

ARTT260 Dangerous Art: Censorship or Subsidy (3 Credits)
Combines a broad historical analysis of the relationship between art and authority with an examination of contemporary culture criticism and art practice. Explores the uses and abuses of art and culture in totalitarianand theocratic states as a prelude to a review of the role of official culture in the United States. Examines art and culture in the public arena and many related areas where the arts and policy interact.

ARTT269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT320 Elements of Painting (3 Credits)
Concepts and fundamental processes of oil and/or acrylic painting.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT330 Elements of Sculpture: Metal Casting (3 Credits)
Sculptural concepts and fundamental processes related to metal casting.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT331 Elements of Sculpture: Steel (3 Credits)
Sculptural concepts and fundamental processes related to steel fabrication; torch cutting, welding, hot forging, and finishing.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT333 Elements of Sculpture: Wood and Mixed Media (3 Credits)
Sculptural concepts and fundamental processes using wood and mixed media.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT340 Elements of Printmaking: Intaglio (3 Credits)
Concepts and fundamental processes related to etching, aquatint, and drypoint.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT341 Elements of Printmaking: Woodcut and Relief (3 Credits)
Concepts and fundamental processes related to woodcuts, linocuts, and other relief printing media.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT343 Elements of Printmaking: Screen Printing (3 Credits)
Concepts and fundamental processes related to silkscreen printing.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT353 Elements of Photography (3 Credits)
Introduction to digital photographic image-making. With an emphasis on technical, aesthetic and conceptual understanding of the photographic medium, camera operation, and photographic composition. Students must have access to a Digital SLR or mirrorless camera capable of interchangeable lenses for this class.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT355 Intermediate Graphic Design Principles (3 Credits)
Investigation of basic concepts, history, techniques, and materials used by professional graphic designers, focusing on typography. Explores various aspects of design related to typography through examination and production of many types of finished work.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must be admitted to the Graphic Design Concentration (Track 3).
Credit Only Granted for: ARTT350 or ARTT355.
Formerly: ARTT350.

ARTT356 Graphic Design Processes (3 Credits)
Explores computer graphics and visual communcation principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must have been admitted to Graphic Design Concentration (Track 3).
Credit Only Granted for: ARTT351 or ARTT356.
Formerly: ARTT351.

ARTT357 Interactive Design (3 Credits)
In-depth exploration of interactive design and website construction. Emphasis on concept-driven and community-based projects using variety of interactive software programs.
Prerequisite: ARTT355 and ARTT356.

ARTT360 African American Art Theory: Exploration/Expression of Identity (3 Credits)
Examines how African American artists have used their work to represent, reinvent, and subvert racial identity. By examining changes in modes of expression, formal concerns, and pictorial themes, it will explore the impact of black aesthetics in American art.
Prerequisite: ARTT150.
Credit Only Granted for: ARTT360 or HONR279C.

ARTT361 Design Literacy: Decoding Our Visual Culture (3 Credits)
Holistic presentation of design history and theory from pre-history to present. Covers primarily visual communication design and includes the interrelationship of interior-, furniture-, industrial-, fashion-design, and architecture.
Prerequisite: ARTT355 and ARTT356.
Credit Only Granted for: ARTT361 or ARTT489L.
Formerly: ARTT489L.

ARTT369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT370 Elements of Digital Media (3 Credits)
Exploration of image creation and manipulation, interactivity, and linkages between digital audio and video. Emphasis on issues in contemporary digital art.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; or permission of ARHU-Art department.

ARTT386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-Art department.
Restriction: Junior standing or higher.

ARTT389 Department of Art Undergraduate Teaching Assistantship (3 Credits)
Individual contractual agreement with faculty/mentor. Individualized assistantship in the teaching of a specified department course offering. Must have previously received an "A" grade for the class to be assisting.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT399 Department of Art Research Assistantship (1-3 Credits)
Individual contractual agreement with faculty/mentor. Individualized experiential learning developed in relation to art-related research issues.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT418 Advanced Drawing Studio (3 Credits)
Multi-level drawing studio emphasizing advanced concepts and processes related to drawing; emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT200, ARTT210, and ARTT150; and must have completed one 300-level studio course. Or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT428 Advanced Painting Studio (3 Credits)
Multi-level painting studio emphasizing advanced concepts and processes related to oil and acrylic painting; emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: ARTT320.
Repeatable to: 12 credits.

ARTT438 Advanced Sculpture Studio (3 Credits)
Multi-level sculpture studio; continuation of media-specific sculpture courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have completed one 300-level sculpture course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT448 Advanced Printmaking Studio (3 Credits)
Multi-level printmaking studio; continuation of media-specific printmaking courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have one 300-level printmaking course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT449 Advanced Photography Studio (3 Credits)
Advanced photographic processes and theory. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT353; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT454 Advanced Graphic Design Principles: Design in Society (3 Credits)
Focus on social responsibility and community activism. History and theory of propaganda and advocacy-based design. Students explore current design practices, work individually, and collaborate in teams with non-profits or other clients with community-based or socio-cultural agendas. Research and writing-intensive course.
Prerequisite: ARTT355 and ARTT356.

ARTT455 Three Dimensional Graphic Design (3 Credits)
Continued exploration of advanced graphic design practices with primary emphasis on 3-D object and packaging design. Includes research, course reading discussion, oral presentations, and specific project assignments which will require a proficient level of hand-skills (craft) and computer skills.
Prerequisite: ARTT355, ARTT356, and ARTT357.
Recommended: ARTT333.
Credit Only Granted for: ARTT352 or ARTT455.
Formerly: ARTT352.

ARTT456 Motion Design (3 Credits)
Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.
Prerequisite: ARTT355, ARTT356, and ARTT357; or permission of ARHU-Art department.

ARTT457 Advanced Interactive Design (3 Credits)
Advanced concepts and techniques of interactive design and interactive software. Examination of corporate, client-based, and public service-based interactive graphic design. Emphasis on web-based interactive design structures.
Prerequisite: ARTT357.

ARTT458 Graphic Design Portfolio (3 Credits)
Creation of a comprehensive professional portfolio. Curriculum includes portfolio preparation and presentation, contracts, copyright issues, interviewing skills, resume and cover-letter writing, design briefs and proposals, and freelance business issues. Portfolio presentation includes basics of book arts.
Prerequisite: ARTT454.
Repeatable to: 9 credits if content differs.

ARTT459 Advanced Graphic Design Studio (3 Credits)
Student-run design firm working with non-profits and other organizations. Organizations act as clients; the students as a creative firm. Under guidance and supervision of faculty, students learn first-hand about working with clients, working within a budget, working with printers and press runs, and working under real deadlines.
Prerequisite: ARTT454; or permission of ARHU-Art department.
Repeatable to: 9 credits if content differs.

ARTT460 Seminar in Art Theory (3 Credits)
Exploration of relationship between content and processes of art in a contemporary multi-cultural context.
Restriction: Senior standing.

ARTT468 Seminar on the Interrelationship Between Art and Art Theory (3 Credits)
The relationship between a student's work and the theoretical context of contemporary art.
Restriction: Junior standing or higher; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT469 Professional Practice (3 Credits)
Business aspects of being an artist, with an emphasis on starting and maintaining a professional career.
Restriction: Senior standing; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.
Formerly: ARTT462.

ARTT479 Advanced Digital Media Studio (3 Credits)
Variable multi-level studio emphasizing advanced concepts and processes related to time-based, projection, installation, interactive, and audio/visual integrated digital art. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT370; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT481 Advanced Specialization Seminar (3 Credits)
Seminar combines contemporary art theory, criticism, professional practice and career preparation in relation to students works from all areas of specialization.
Prerequisite: Permission of ARHU-Art department.

ARTT487 Capstone for Citation in Interdisciplinary Multimedia and Technology (1 Credit)
Independent study: a paper or website synthesizing the various citation learning experiences.
Prerequisite: Permission of ARHU-Art department.

ARTT488 Advanced Special Topics in Graphic Design (1-3 Credits)
Variable topics in Graphic Design theory and practice.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT489 Advanced Special Topics in Art (1-3 Credits)
Advanced studio art and theory within the context of a special topic.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT498 Directed Studies in Studio Art (1-3 Credits)
Advanced independent work in Studio Art. Meeting with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT499 Directed Studies in Graphic Design (1-3 Credits)
Advanced independent studies in Graphic Design. Meetings with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTX - Art Studio Education Abroad

ARTX201 Historic Artistic Techniques (1 Credit)
This intensive one-credit course introduces students to the materials and techniques of the past through a practical workshop. The course also introduces the history of the ancient technique, with examples from Rome and the Mediterranean world. Techniques for the conservation and restoration of mosaics will also be covered through relevant case-studies.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX203 Photo Documentary and Discovery (3 Credits)
In this course, you learn to research and tell your individual story through photography. Utilizing workshops and excursions outside the classroom, you develop the skills to dive into different cultures and use your camera as a medium for understanding a community and telling your story through photographs.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX204 Ways of Seeing: Storytelling Through Photography (3 Credits)
This class is an effort to make sense of your study abroad stay: rather than creating photographs as mementos, you will make pictures that are unique to your stay in Stockholm, but still refer back to your life in general. This class combines a studio critique and a survey of the history and theory of photography.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX301 Painting Workshop (3 Credits)
This is an advanced course in painting techniques, which may include other media, such as photography and printmaking as research aids. Students will further develop and explore personal concepts in the painting medium to produce a coherent body of work.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX302 Printmaking Workshop (3 Credits)
This is an advanced course in printmaking techniques. Students will further develop and explore personal concepts in the printmaking medium to produce a coherent body of work.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ASTR - Astronomy

ASTR100 Introduction to Astronomy (3 Credits)
An elementary course in descriptive astronomy, especially appropriate for non-science students. Topics include the Sun, Moon, planets, stars, and nebulae, galaxies, and evolution of the Universe.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR101 General Astronomy (4 Credits)
Descriptive astronomy, appropriate for non-science majors. Sun, moon, planets, stars, nebulae, galaxies and evolution. Laboratory exercises include use of photographic material, computer simulations, and standard laboratory equipment.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR120 Introductory Astrophysics - Solar System (3 Credits)
For students majoring in astronomy or with a strong interest in science. Topics include development of astronomy, planetary orbits, electromagnetic radiation, telescopes as well as constituents and origin of the solar system (planets, satellites, comets, asteroids, meteoroids, etc.).
Prerequisite: Must have completed or be concurrently enrolled in MATH140.
Restriction: Must not have completed ASTR101 or ASTR100.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR121 Introductory Astrophysics II - Stars and Beyond (4 Credits)
For students majoring in astronomy or with a strong interest in science. Includes instrumentation, stellar properties, stellar evolution, structure of the galaxy, other galaxies, large scale structure, Big Bang Theory, and future of the universe.
Prerequisite: ASTR120 and MATH140; or permission of CMNS-Astronomy department.

ASTR220 Collisions in Space - The Threat of Asteroid Impacts (3 Credits)
How can we defend our planet against a possible asteroid impact? Collisions in Space will evaluate the threat of asteroid impacts with the Earth using knowledge of asteroid characteristics and orbits. The merits of possible defense plans will be discussed, as well as the budgetary and political concerns associated with implementing any such plan. Appropriate for non-science majors.
Restriction: Must not be in Astronomy program.
Additional Information: Course is open to Astronomy and Planetary Sciences minors.

ASTR230 The Science and Fiction of Planetary Systems (3 Credits)
Have you ever wondered if humans will ever terraform Mars or Europa so we could live there without a spacesuit? Has it ever crossed your mind how lucky you are that you live on a water-rich planet with an oxygen-rich atmosphere? Have you ever suspected novelists and scriptwriters of creating ridiculous planets that violate scientific laws? Does the fate of our planet's thin biosphere keep you up at night? How common is life in the Universe? These are difficult questions, but armed with the right information, you can answer all of them. The Science and Fiction of Planetary Systems will help you develop a deeper understanding of why planets are the way they are. Along the way, you'll see examples of mistakes made in classic science fiction movies, novels and short stories and get the chance to invent your own plausible planets!
Prerequisite: Must have math eligibility of MATH115 or higher; or MATH113.

ASTR288 Special Projects in Astronomy (1-3 Credits)
Independent study, short research projects, tutorial reading, and assisting with faculty research and teaching under special supervision.
Prerequisite: Permission of CMNS-Astronomy department.
Repeatable to: 6 credits.

ASTR300 Stars and Stellar Systems (3 Credits)
Designed primarily for non-science majors. Study of stars-types, properties, evolution, and distribution in space; supernovae, pulsars, and black holes.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR310 Observational Astronomy (4 Credits)
Introduction to current optical observational techniques, with brief coverage of infrared, ultraviolet, and x-ray techniques. Statistics, spherical trigonometry time, catalogs, geometrical and physical optics, telescopes, and optical instruments. Effects of the atmosphere. Practical work at the observatory using a CCD camera. Some nighttime observing sessions.
Prerequisite: ASTR121; and (PHYS171 or PHYS161). Or permission of CMNS-Astronomy department.
Restriction: Must be in Astronomy program.

ASTR315 Astronomy in Practice (4 Credits)
Students learn astronomy research techniques and contribute significantly to the existing body of astronomical knowledge. Students apply methods and tools such as celestial coordinates, telescopes and CCD cameras, and appropriate analysis software to a specific observational goal. Students produce a work detailing their scientific result which will be submitted for publication in a professional venue. Each semester, the course focuses on a specific astronomical topic or type of object, such as asteroids, extrasolar planets, supernovae in other galaxies, quasars, etc.
Restriction: Must not be in Astronomy program.
Additional Information: Appropriate for non-science majors.

ASTR320 Theoretical Astrophysics (3 Credits)
Application of selected physics concepts in an astrophysical context. Topics would include gravity (Keplerian motion, Virial theorem, Roche limit, dynamical friction); gas dynamics (hydrostatic equilibrium, stellar models, spiral density waves), thermodynamics and statistical physics (Boltzmann distribution, Wien displacement, convective instability, degenerate gas); atomic physics (quantum principles, H atom, permitted and forbidden lines); radiation processes (line radiation, opacity).
Prerequisite: ASTR121; and (PHYS270 and PHYS271; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR330 Solar System Astronomy (3 Credits)
Designed primarily for non-science majors. The structure of planets and of their atmospheres, the nature of comets, asteroids, and satellites. Comparison of various theories for the origin of the solar system. Emphasis on a description of recent data and interpretation.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or the General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR330 or GEOL212.

ASTR340 Origin of the Universe (3 Credits)
Designed primarily for non-science majors. A study of our progression of knowledge about the universe. Topics include: early cosmological models, geocentric vs. heliocentric theory, curvature of space, Hubble's Law, Big Bang Theory, microwave background radiation, evolution of stars and galaxies, dark matter, active galaxies, quasars and the future of the universe.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR350 Black Holes (3 Credits)
Black holes are the most exotic prediction of Einstein's Theory of General Relativity and, amazingly, the Universe seems to manufacture these bizarre objects in copious numbers. As well as being the ultimate laboratory for studying the nature of space and time, they drive some of the most energetic and extreme phenomena known to astronomers (with quasars and gamma-ray bursts being just a couple of examples). In this introduction to the physics and astrophysics of black holes, we start by examining the basic physics of black holes, which fundamentally means understanding gravity. We then look at the nature of stellar-mass black holes and supermassive black holes. We will discuss the fairly recent realization that black holes may be crucial agents for regulating the growth of galaxies. Finally, we dive into the realm of theoretical physics and probe how black holes may provide a route for uncovering new laws of physics governing the structure of space and time.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR398B or ASTR350.
Formerly: ASTR398B.

ASTR380 Life in the Universe - Astrobiology (3 Credits)
Designed primarily for non-science majors. Study of the astronomical perspective on the conditions for the origin and existence of life in the universe.

ASTR386 Experiential Learning (1-3 Credits)
Restriction: Junior standing or higher; and permission of CMNS-Astronomy department.

ASTR398 Special Topics in Astronomy (3 Credits)
This course is designed primarily for students not majoring in astronomy and is suitable for nonscience students. It will concentrate study in some limited field in astronomy which will vary from semester to semester. Possible subjects for study are the solar system, extragalactic astronomy and cosmology, the inconstant universe.
Restriction: Junior standing or higher; or permission of CMNS-Astronomy department.
Repeatable to: 6 credits if content differs.

ASTR399 Honors Seminar (1-16 Credits)
Credit according to work done.
Restriction: Must be admitted to the departmental honors program in astronomy.

ASTR406 Stellar Structure and Evolution (3 Credits)
Study of stellar internal structure, nuclear reactions, and energy transport. Study of stellar evolution of both low-mass and high-mass stars, including the stellar end states of white dwarfs, neutron stars, and black holes.
Prerequisite: ASTR320; or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR498N or ASTR406.
Formerly: ASTR498N.

ASTR410 Radio Astronomy (3 Credits)
Introduction to current observational techniques in radio astronomy. The radio sky, radiophysics, coordinates and catalogs, antenna theory, Fourier transforms, interferometry and arrays, aperture synthesis, and radio detectors.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR415 Computational Astrophysics (3 Credits)
Introduction to the most important computational techniques being used in research in astrophysics. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department. Jointly offered with ASTR615.
Credit Only Granted for: ASTR415 or ASTR615.

ASTR421 Galaxies (3 Credits)
Introduction to structure, kinematics, and dynamics of normal and peculiar galaxies. Quantitative descriptions of normal spiral galaxies (like our Milky Way) and elliptical galaxies will be followed by more exotic considerations such as interacting and merging galaxies, and active galactic nuclei.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR422 Cosmology (3 Credits)
Introduction to modern cosmology. Topics include large scale structure of universe, the intergalactic medium, the nature of dark matter cosmological models and galaxy formation.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR430 The Solar System (3 Credits)
Formation and evolution of the Solar System. Planetary surfaces, interiors, atmospheres, and magnetospheres. Asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the Solar System. Intended for students majoring in the physical sciences.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR435 Astrophysics of Exoplanets (3 Credits)
Introduction to exoplanets. Topics include historical development, advantages, and limitations of detection methods, the statistics of exoplanet characteristics, the bulk properties of known expolanets, and remote sensing for characterization of exoplanets.
Prerequisite: ASTR121; and (PHYS273; or (PHYS270 and PHYS271)). Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR498X or ASTR435.
Formerly: ASTR498X.

ASTR450 Orbital Dynamics (3 Credits)
Vectorial mechanics, motion in a central force field, gravitational and non-gravitational forces, the two-body and three-body problems, orbital elements and orbital perturbation theory, resonances in the solar system, chaos. Intended for students majoring in any of the physical sciences.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR480 High Energy Astrophysics (3 Credits)
The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined. Phenomena such as supernovae and high-energy particles are also covered.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR498 Special Problems in Astronomy (1-6 Credits)
Research or special study. Credit according to work done.
Restriction: Must be in one of the following programs (Physics; Astronomy) ; and permission of CMNS-Astronomy department.

BCHM - Biochemistry

BCHM377 Biomolecular Measurement and Data Analysis (3 Credits)
Covers a range of classic and modern biochemical assays and techniques as well as introducing data science approaches to "omics" data. Upon successful completion of this course, students should have the necessary preparation and experience to collaborate productively with research scientists in industrial, clinical or academic contexts.
Prerequisite: CHEM271 or CHEM276; and (CHEM277 or CHEM272).
Restriction: Must be in the Chemistry or Biochemistry major.

BCHM386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BCHM461 Biochemistry I (3 Credits)
First semester of a comprehensive introduction to modern biochemistry. Structure, chemical properties, and function of proteins and enzymes, carbohydrates, lipids, and nucleic acids. Basic enzyme kinetics and catalytic mechanisms.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461 or BCHM463.

BCHM462 Biochemistry II (3 Credits)
A continuation of BCHM 461. Metabolic pathways and metabolic regulation, energy transduction in biological systems, enzyme catalytic mechanisms.
Prerequisite: Minimum grade of C- in BCHM461.
Credit Only Granted for: BCHM462 or BCHM463.

BCHM463 Biochemistry of Physiology (3 Credits)
A one-semester introduction to general biochemistry. A study of protein structure, enzyme catalysis, metabolism, and metabolic regulation with respect to their relationship to physiology.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461, BCHM462 or BCHM463.

BCHM464 Biochemistry Laboratory (3 Credits)
Biochemical and genetic methods for studying protein function. Site-directed mutagenesis and molecular cloning, protein purification, enzyme activity assays, computer modeling of protein structure.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for all College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: BCHM465.
Restriction: BCHM, CHEM, and Nutritional Sciences majors have first priority, followed by other life science majors.

BCHM465 Biochemistry III (3 Credits)
CORE Capstone (CS) Course. An advanced course in biochemistry. Biochemical approach to cellular information processing. DNA and RNA structure. DNA replication, transcription, and repair. Translation of mRNA to make proteins.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Recommended: BCHM462.

BCHM485 Physical Biochemistry (3 Credits)
Physical Chemistry with applications to biological systems. Principal topics: quantum chemistry, spectroscopy, structural methods for biological macromolecules, statistical thermodynamics, transport processes in liquid phase, chemical and biochemical kinetics, modeling and simulation, polymer dynamics.
Prerequisite: Minimum grade of C- in CHEM481.
Restriction: Must be in Biochemistry program; or permission of instructor.
Credit Only Granted for: CHEM482 or BCHM485.

BIOE - Bioengineering

BIOE120 Biology for Engineers (3 Credits)
Introduction to the functions and interactions of biological systems from a quantitative perspective. Introduction to the modern experimental techniques and methods of data analysis. Roles for bioengineers in biology, and the role of biology in bioengineering will be elucidated.
Prerequisite: Must have completed or be concurrently enrolled in MATH140.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE121 Biology for Engineers Laboratory (1 Credit)
Bioengineering encompasses numerous sub-disciplines that apply engineering principles to analyze biological systems and that utilize engineering design strategies to solve biological and biomedical problems. This course is aimed at providing students with the opportunity to learn how biology and engineering can synergistically contribute to our understanding of such problems, and to gain hands-on experience in basic techniques relevant to Bioengineering.
Prerequisite: Must have completed or be concurrently enrolled in BIOE120.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE160 Biopharmaceutical Production (3 Credits)
Focuses on the basics of recombinant DNA technology as applied to biopharmaceutical manufacturing in a classroom setting. Students will work through a "production campaign" including all key steps of manufacturing a protein product.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Young Scholars Program.

BIOE221 Academic and Career Planning (1 Credit)
Provides practical tools to help Bioengineering majors think critically about their goals and career paths. Guides Bioengineering students through accessing useful resources both on- and off-campus.
Prerequisite: BIOE120 and BIOE121.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE232 Bioengineering Thermodynamics (3 Credits)
A quantitative introduction to thermodynamic analysis of bioengineering systems. Bioengineering encompasses a wide range of applications from nanoscale interactions (e.g. reactions between molecules), to cellular interactions (e.g. membrane electrical currents), to overall balances on organisms, all the way to large scale manufacturing. Each of these applications (and many others not mentioned) involve energy interactions which is the domain of thermodynamics. The basic laws of thermodynamics will be introduced and explained through a series of examples related to bioengineering systems.
Prerequisite: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE232, ENES232, ENME232, or ENME320.

BIOE241 Biocomputational Methods (3 Credits)
Application of computer technology to biological and natural resource systems considering engineering aspects. Designed to help students in the use of computer technology for problem solving. The course will cover 4-5 software packages important for later use by the student.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE331 Biofluids (3 Credits)
Principles and applications of fluid mechanics with a focus on bioengineering topics. Content includes conservation of mass, momentum, and energy, as well as the application of these fundamental relations to hydrostatics, control volume analysis, internal and external flow, and boundary layers. Applications to biological and bioengineering problems such as tissue engineering, bioprocessing, imaging, and drug delivery.
Prerequisite: MATH246, BIOE120, BIOE121, BIOE241, and BIOE371; and must have completed or be concurrently enrolled in BIOE232.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300 or ENME331.

BIOE332 Transport Process Design (3 Credits)
Fluid flow, heat transfer, and mass transfer with applications in medicine, environment, biotechnology, food, agriculture, and other biosystems. Design of solutions to current problems in biological engineering is emphasized.
Prerequisite: BIOE331.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE340 Modeling Physiological Systems and Lab (4 Credits)
Topics covered will include cell and general physiology, membrane physiology, blood cells and clotting, circulation, metabolism, respiration, and the nervous system. A lab component will also be included.
Prerequisite: BSCI330, BIOE120, BIOE121, BIOE241, and MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE340 or (BSCI440 and BSCI441).

BIOE371 Linear Systems and Ordinary Differential Equations for Bioengineering Applications (3 Credits)
This class utilizes fundamentals in linear systems, including eigenvalues and eigenvectors, as well as linear differential equations, to study various problems in bioengineering and biological systems, with a particular emphasis on feedback, stability, controllability, and control design.
Prerequisite: BIOE241; and must have completed or be concurrently enrolled in MATH246.
Restriction: Permission on ENGR-Fischell Department of Bioengineering department.

BIOE372 Biostatistics for Experimental Design and Data Analysis (3 Credits)
This course will instruct students in the fundamentals of probability and statistics through examples in biological phenomenon, the design of bioengineering experiments, and clinical data analysis. Fundamentals covered in the course include probability distributions, hypothesis testing, power analysis, regression analysis, and correlation analysis.
Prerequisite: BIOE120, BIOE121, and BIOE241.
Recommended: MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE372 or STAT464.

BIOE389 Special Projects in Bioengineering (1-3 Credits)
Exploring a variety of projects in Bioengineering.
Restriction: Permission of instructor; and permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits.

BIOE399 Independent Study in Bioengineering (1-3 Credits)
Independent study.
Prerequisite: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 12 credits if content differs.

BIOE404 Biomechanics (3 Credits)
Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.
Prerequisite: MATH246, BIOE120, ENES102, BIOE121, and BIOE241; and must have completed or be concurrently enrolled in BIOE371.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE411 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and (BIOE120, BIOE121, BIOE241, MATH246, and MATH241). Or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: BSCI330 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE411 or CHBE487.

BIOE413 Stem Cell Engineering (3 Credits)
Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.
Prerequisite: BIOE241, BIOE120, BIOE121, MATH246, and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department. Jointly offered with: BIOE613.
Credit Only Granted for: BIOE489J, BIOE413, BIOE689J or BIOE613.
Formerly: BIOE489J.

BIOE414 Macroscale Biomechanics (3 Credits)
An overview of current problems in movement biomechanics. After taking this course, students will be able to 1) Describe the engineering tools needed to study human movement 2) Recognize a variety of clinical research and practice, and 3) Use the framework provided by the course to pursue their own self-teaching and research on these topics. Topics covered include muscle mechanics, joint mechanics, EMG and EEG signal applications, ultrasonography and elastography, anthropometry, human movement 3-D kinematics, inverse dynamics, forward dynamics, work, power and energy. Biomechanics tools will be used to investigate clinical problems. Students will also do research projects on related topics.
Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and ENES102.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE414 or BIOE489Z.
Formerly: BIOE489Z.

BIOE416 Cardiovascular Engineering (3 Credits)
An overview of engineering applications in the cardiovascular system. Covers cardiovascular anatomy, physiology and pathophysiology in the context of cell and tissue mechanics, fluid mechanics, thermodynamics, biotransport, neurovascular coupling, and imaging. Includes design of cardiovascular devices, sensors, biomaterials, and tissue engineered constructs.
Prerequisite: BIOE331 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE416 or BIOE489V.
Formerly: BIOE489V.

BIOE420 Bioimaging (3 Credits)
Examines the physical principles behind major biomedical imaging modalities and new ways of using images for bio-related applications.
Prerequisite: MATH246, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE431 Fundamentals of Biosensor Techniques, Instrumentation, and Applications (3 Credits)
A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.
Prerequisite: CHEM135, PHYS260, PHYS261, BSCI330, BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE433 Optical Microscopy (3 Credits)
Includes a large variety of techniques central in many fields of biological and engineering research as well as clinical medicine. This course will provide a comprehensive overview of the fundamentals of optical microscopy. At a fundamental level, the course will cover the interaction of light with tissue, cells and biomaterials, and the mathematical foundations that describe optical systems.
Prerequisite: BIOE120, BIOE121, BIOE241, BIOE371, and MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489I or BIOE433.
Formerly: BIOE489I.

BIOE434 Image Signal Processing (3 Credits)
An introduction to fundamentals of signal and image processing, including machine learning, and their applications in biomedicine. Students will be introduced to the basic set of skills to analyze biomedical signals and images and convert them into useful diagnostic information. Students will also explore current research in the area of biomedical signal imaging and discuss how those technologies help to improve the efficiency, accuracy, and patient experience of conventional medical and diagnosis procedures.
Prerequisite: BIOE241, BIOE371, and BIOE372; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE434 or BIOE489K.
Formerly: BIOE489K.

BIOE437 Computer-Aided Design in Bioengineering (3 Credits)
Introduction to Computer-Aided Design (CAD). Lecture topics will summarize design methodology, review best-practices in hardware development, and discuss engineering applications. The course will culminate in a student-selected project leveraging CAD.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE437, BIOE689V, ENME414, ENME272, or ENAE488D.
Formerly: BIOE689V.

BIOE442 Python: Introduction to Programming and Data Analysis (3 Credits)
Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.
Prerequisite: BIOE241, BIOE120, BIOE121, and MATH241; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489A or BIOE442.
Formerly: BIOE489A.

BIOE447 Clinical Experiences in Bioengineering (3 Credits)
An immersion experience in the clinical settings in which biomedical engineering strategies, technologies, and practices are applied. An emphasis will be placed on both clinical problems and engineering solutions.
Prerequisite: BIOE221.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489O or BIOE447.
Formerly: BIOE489O.

BIOE453 Biomaterials (3 Credits)
Examination of the structure and function of natural biomaterials, and cell-extracellular matrix interactions. Study physical properties of synthetic biomaterials for biomedical applications. Understanding molecular level interactions between biomolecules and biomaterials to design novel biomaterials with desirable characteristics. Application of biomaterials as implants, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds will be covered.
Prerequisite: CHEM231, MATH246, CHEM232, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

BIOE457 Biomedical Electronics & Instrumentation (4 Credits)
Students learn fundamental concepts of electronics, assembly of electronic components into functional circuits, and integration of functional electronic devices and circuits into a system. In the lab component, students will learn to assemble and evaluate circuits and systems.
Prerequisite: BIOE120, BIOE121, BIOE241, PHYS261, MATH246, and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE460 Biotechnology and Bioproduction (3 Credits)
Basics of recombinant DNA technology and biopharmaceutical manufacturing.
Restriction: Junior standing or higher.
Credit Only Granted for: BIOE460, BIOE468B, or ENES489Q.
Formerly: BIOE468B.

BIOE461 Synthetic Biology and Biological Engineering (3 Credits)
Students are introduce to the scientific foundation and concepts of synthetic biology and biological engineering. Current examples that apply synthetic biology to fundamental and practical challenges will be emphasized. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: Completion of BSCI222 and/or BSCI330 recommended.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE462 Therapeutic Development and Delivery (3 Credits)
The ultimate purpose of the pharmaceutical and biotechnology industries is the development and delivery of therapeutics. This course covers fundamentals of engineering and the pharmaceutical sciences related to therapeutics, including basic pharmaceutics/drug delivery, pharmacokinetics, biomolecular kinetics, and regulatory issues. Specific focus is placed on biotherapeutics, including antibodies and protein engineering,RNA and DNA therapeutics (gene therapy and RNAi), extracellular vesicle biotechnology (exosomes), and cell-based therapies, including stem cells. The use of delivery technologies to enable therapeutics (e.g. nanomedicine) will also be discussed.
Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489P or BIOE462.
Formerly: BIOE489P.

BIOE463 Spatial Control of Biological Agents (3 Credits)
Description and solution of the movement of passive and active biological agents in homogeneous and heterogeneous bioenvironments using partial differential equations and numerical methods. Identification and diagnosis of hot spots. Prescription of control strategies using techniques from Artificial Intelligence (AI) and verification of effectiveness. Applications environments may include landscapes and tissues.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; and must have completed or be concurrently enrolled in BIOE332.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE464 Introduction to Computational Molecular Bioengineering (3 Credits)
Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.
Prerequisite: BIOE120, BIOE241, MATH246, BIOE232, and BIOE372; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489N or BIOE464.
Formerly: BIOE489N.

BIOE468 Selected Topics in Bioengineering (3 Credits)
Selected topics in Bioengineering will be covered and taught by a variety of department faculty.
Prerequisite: BIOE120 and BIOE121.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 9 credits if content differs.

BIOE485 Capstone Design I: Entrepreneurship, Regulatory Issues, and Ethics (3 Credits)
This is the first part of a two-semester senior capstone design course which covers principles involved in engineering design, design approaches, economics of design, ethics in engineering, and patent regulations. It also helps students learn team work and write design project proposals under the mentorship of a faculty advisor.
Prerequisite: 21 credits in BIOE courses.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and senior standing; and must be in Engineering: Bioengineering program.
Credit Only Granted for: BIOE485 or ENBE485.
Formerly: ENBE485.

BIOE486 Capstone Design II (3 Credits)
This is the second part of the senior capstone design course. This part is independent instruction where faculty mentoring each project team works with students to order supplies, fabricate their proposed design under BIOE485, test the design, write the report and present it to their fellow seniors and board of faculty mentors. Students are taught to convert the blue print of a design to actual device and test it.
Prerequisite: Must have completed BIOE485 in the immediately preceding semester.
Restriction: Senior standing; and must be in Engineering: Bioengineering program; and permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE486 or ENBE486.
Formerly: ENBE486.

BIOE488 Research Methods in Bioengineering (1-3 Credits)
Exploring a variety of research methods in the field of Bioengineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 9 credits if content differs.

BIOE489 Special Topics in Bioengineering (1-3 Credits)
Exploring a variety of topics with Bioengineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits.

BIOM - Biometrics

BIOM301 Introduction to Biometrics (3 Credits)
Descriptive statistics, introduction to probability, sampling, confidence interval estimation, hypothesis testing, simple regression and correlation. Emphasis on simple applications of statistical techniques and interpretation of statistical results.
Prerequisite: MATH113 or MATH115.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

BIOM386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BIOM405 Computer Applications in Biometrics (1 Credit)
An introduction to computer applications for data analysis. This is equivalent to the computer lab of 601 and is required for students that have taken BIOM301 and BIOM402 and wish to go directly into BIOM602.

BMGT - Business and Management

BMGT110 Introduction to the Business Value Chain (3 Credits)
Students are provided with an introduction to the business value chain with an emphasis on inter-organizational and intra-organizational coordination of core business processes. Emphasis is on cross-functional integration and the efficient and effective management of core processes with an emphasis on marketing, operations and supply chain management.

BMGT160 The Intentional Self (3 Credits)
As you navigate adulthood, you will constantly be making decisions that impact your personal and professional well being and success. Making these life choices with intention and a perspective of your whole self will increase your life satisfaction. In this course, you will examine who have been, who you are, and who you want to become. We will be exploring the six pillars of the whole self including purpose/character, relationships, wellness, community, prosperity, and nature and creating a vision for your future self.
Credit Only Granted for: BMGT160, BMGT198A, or BMGT198B.

BMGT190 Introduction to Design and Quality (4 Credits)
QUEST students learn and apply design practices to design new products and services. Working in multidisciplinary teams, students use quality and process improvement methods to identify, analyze, and recommend solutions to real-world problems.
Restriction: Must be in the Quest program. Cross-listed with: ENES190.
Credit Only Granted for: BMGT190 or ENES190.

BMGT198 Special Topics in Business and Management (1-3 Credits)
Introductory special topics in business and management.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT207 Technology, Society and the Future of Humanity (3 Credits)
New emerging and converging technologies (such as blockchain, AI, and synthetic biology) are disrupting business-as-usual in fields as diverse as finance, supply chain, medicine and the creative industries. This course deals with the question of how we should use technology to create ethical economic and social systems that reflect the kind of world we want to exist in 25, 50, 100 years from now. Our ideas of what humanity considers to be a "good life" will influence and govern how disruptive technologies can either contribute to it or lead to a dystrophic future.

BMGT210 Foundations of Accounting for Non Business Majors (3 Credits)
Provides an understanding of the common statements that report a company's profitability and financial health, and are useful to all economic agents who are engaged with the firm. Students will also recognize and understand managerial accounting as a system for accumulating and modeling information to support decision-making.
Restriction: Must not have completed BMGT221; and must not be in a major in the R.H. Smith School of Business.
Credit Only Granted for: (BMGT220 and BMGT221) or BMGT210.
Additional Information: Does not apply to a Smith School degree. Students pursuing a Smith School minor who have completed both BMGT220 and BMGT221 may substitute these courses for BMGT210. Credit will not be given for both BMGT210 and the combination of BMGT220 and BMGT221.

BMGT220 Principles of Accounting I (3 Credits)
Basic theory and techniques of contemporary financial accounting. Includes the accounting cycle and the preparation of financial statements for single owner and partnership forms of business organizations operating as service companies or merchandisers.

BMGT221 Principles of Accounting II (3 Credits)
Basic theory and techniques of accounting for managerial decision making. Involves the introduction of the corporation and manufacturing operations. Includes cost-volume-profit analysis and capital budgeting. Introduces the topics of income taxation and international accounting.
Prerequisite: BMGT220.

BMGT230 Business Statistics (3 Credits)
Introductory course in probabilistic and statistical concepts including descriptive statistics, set-theoretic development of probability, the properties of discrete and continuous random variables, sampling theory, estimation, hypothesis testing, regression and decision theory and the application of these concepts to problem solving in business and management.
Prerequisite: MATH113 or MATH115; or must have math eligibility of MATH120 or higher.
Restriction: Must not have completed ENCE302, ENME392, STAT400, BMGT231, or ENEE324.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

BMGT289A Social Enterprise: Changing the World through Innovation and Transformative Action (3 Credits)
In this course, students will hear from real-life social entrepreneurs, explore current day social issues of sustainability, climate change, leadership, disruptive innovations, and create or blueprint business plans to generate positive social change. This class will focus on innovative thinking skills, personal narratives, and social interaction strategies and plans.

BMGT289B How Do Innovators Think? (3 Credits)
In this course, students will learn about: a) the innovation process and the role of the individual in generating innovations and b) the attributes, habits, and skills of individuals who have successfully started innovative new businesses or significantly added value to an existing company.

BMGT289D Frauds, Scams, and Thefts: What, How and Why? (3 Credits)
The primary objective of this course is for students to gain a conceptual understanding of how fraud occurs, how it can be prevented, and how fraud can be detected through practical application of skills and tools. This course provides general background relating to fraud (e.g. history, prevalence, psychology), and it delves into the myriad types of fraud, scams and theft. This course also examines the trends in fraud detection and investigation; and introduces and explores with students the constant tension between public order and civil liberties in white collar crime, forensics, and hacking.

BMGT289E Entrepreneurial Thinking for Non-Business Majors: How Not to Miss Great Opportunities Your Life Throws at You (3 Credits)
In this course, students learn how to analyze the world around them and then notice and define new trends, emerging problems, impending gaps, and how to turn these into exciting opportunities by providing creative solutions. Students will have a chance to not only sharpen their critical thinking skills, but also learn how to take initiative, develop a working solution, identify and resolve conflicts, and be confident and persistent, yet flexible enough to respond to changes. Student teams identify a compelling problem in present day life and then propose a creative solution taking into account possible difficulties in implementation. In addition, students will also be given problems on a much smaller scale and asked to create and present a workable solution. Students will be exposed to how a visionary's mind works and the creative solution process. In addition, students will also learn how entrepreneurial thinking can improve their day-to-day life.

BMGT289I Why Good Managers Make Bad Decisions (3 Credits)
This course provides an overview of the concepts, approaches, and vocabulary of evidence-based management (EBM) and provides an understanding of how experts in many disciplines can employ evidenced based decision making. EBM is an emerging movement in business to explicitly use the current best information in management decision making with special emphasis on relevant scientific findings and unbiased organizational facts. The course stresses how individuals practicing EBM learn how to rethink their approaches to data and knowledge in order to make more effective decisions.

BMGT289L The Proper Role of Government in a Free Enterprise System (3 Credits)
This course examines the proper role of the government in overseeing, promoting, or regulating various business activities in a free market system. Areas that warrant government involvement are identified and appropriate government responses are evaluated. The course identifies causes of market failure and discusses when, how and to what extent the government should act to remedy those failures. Finally, varieties of capitalism and the role of the government in other free enterprise counties are evaluated.

BMGT289M European Debt Crisis: More Integration or Withering of a Dream? (3 Credits)
This course explores the developments and events that led to the formation of the Economic and Monetary Union (EMU) and analyzes the causes for the eruption of the debt crisis. In addition, the course evaluates the policy steps taken to stabilize the crisis (monetary, banking, fiscal and institutional measures), and it discuss policy options to overcome in a lasting manner the design flaws and strengthen the governance of the EMU, so as to improve its overall economic growth performance.

BMGT298 Special Topics in Business and Management (1-3 Credits)
Introductory special topics in business and management.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT299 Student Initiated Special Topics (1 Credit)
Student initiated special topics in business and management.
Repeatable to: 3 credits if content differs.

BMGT300 Information Systems for Non Business Majors (2 Credits)
Introduces students to the transformative potential of emerging and existing information technologies and their impacts on the structure and competitive dynamics of various industries.
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not have completed BMGT301; and must not be in a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT300 or BMGT301.
Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT301 for General Business or Innovation and Entrepreneurship minor students only.

BMGT301 Introduction to Information Systems (3 Credits)
Comprehensive overview of information systems (IS), which explores the strategic and tactical nature of IS. The basic concepts in analyzing and designing information systems for business applications will be presented. Aspects of data management such as databases, data warehousing, data analysis, and data mining will be analyzed, and the basics of web page and web site design will be outlined. Students will also be introduced to modern information systems infrastructure such as telecommunications, networks, and information systems security. Knowledge of Excel or a similar spreadsheet tool.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major. All BMGT majors, including students who are a double major in CMSC, must complete BMGT301 for their BMGT degree.

BMGT302 Essential Programming Skills for Business Analytics (3 Credits)
The course introduces structured and object-oriented programming and its applications in business functions and analytics. Students will apply problem-solving skills to create software solutions using programming logic and data structures. The course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.
Prerequisite: BMGT301; or permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must not be in the Computer Science major.

BMGT310 Intermediate Accounting I (3 Credits)
Comprehensive analysis of financial accounting topics related to financial statement preparation and external reporting.
Prerequisite: BMGT221.

BMGT311 Intermediate Accounting II (3 Credits)
Continuation of BMGT310.
Prerequisite: BMGT310.

BMGT313 Financial Statement Analysis (3 Credits)
Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. Involves understanding and using the information that financial statements are communicating to users.
Prerequisite: BMGT221.

BMGT321 Managerial Accounting (3 Credits)
A study of the basic concepts of product costing and cost analysis for management planning and control. Emphasis is placed on the role of the accountant in organizational management, analysis of cost behavior, standard cost budgeting, responsibility accounting and relevant costs for decision-making.
Prerequisite: BMGT221.

BMGT323 Taxation of Individuals (3 Credits)
Federal taxation of individuals focusing on income, exclusions, deductions, depreciation, credits and capital transactions. Property coverage includes the tax consequences of sales and dispositions of investment and business assets. Both tax planning and compliance issues are covered.
Prerequisite: BMGT221.

BMGT326 Accounting Systems (3 Credits)
A study of accounting systems and computer and communications technology.
Prerequisite: BMGT221; and (BMGT201 or BMGT301).

BMGT332 Quantitative Models for Management Decisions (3 Credits)
The aim of this course is to introduce management science techniques for informed decision-making that can be applied in spreadsheet models to assist in the decision-analysis process. Models include Linear Programming, Transportation and Assignment problems, network flow models, Integer and non-linear programming, Simulation and Decision Trees.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.

BMGT340 Business Finance (3 Credits)
Topics include: the principles and practices involved in the organization, financing and rehabilitation of business enterprises; the various types of securities and their use in raising funds, apportioning income, risk and control; intercorporate relations; and new developments. Emphasis on solution of problems of financial policy faced by management.
Prerequisite: BMGT220; and (BMGT231 or BMGT230).

BMGT341 Financial Markets (3 Credits)
Shows the interconnectedness of the markets. The role of the Central bank and monetary policy is included in this context. Students develop an understanding of: (i) the determination of interest rates; (ii) financial instruments, markets and institutions; (iii) the impact of monetary policy on institutions; and (iv) how financial innovations create markets.
Prerequisite: Must have completed or be concurrently enrolled in BMGT340.
Formerly: BMGT498G.

BMGT342 Wall Street Finance (3 Credits)
Using concepts and tools of finance, students will examine a wide range of business problems and explore possible solutions. The course is designed to improve a student's problem solving capabilities, business writing and communication skills, teamwork, and planning skills. Students will also gain experience in analyzing issues frequently faced by financial decision-makers.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT448F or BMGT342.
Formerly: BMGT448F.

BMGT343 Investments (3 Credits)
An introduction to financial investments. Topics include: securities and securities markets; investment risks, returns and constraints; portfolio policies; and institutional investment policies.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT343 or ECON435.
Additional Information: This course cannot be used to fulfill any requirements for majors in Economics.

BMGT345 Foundations of Financial Management for Non Business Majors (3 Credits)
Provides students an overview of financial management. Students will understand how a business allocates financial resources in an uncertain environment to maximize shareholder value. In addition students will learn the following: how to apply accounting principles to corporate finance; how to value assets, projects, companies and investment securities; understand the relationship between risk and return and how it impacts investment and corporate decisions; how to calculate a company's cost of capital, and develop an intuitive comprehension of financial concepts and analysis.
Prerequisite: BMGT210 or BMGT220.
Restriction: Must not have completed BMGT340; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT345 or BMGT340.
Additional Information: Course does not apply to a Smith School degree. BMGT340 may substitute for BMGT345.

BMGT347 Quantitative Financial Analysis (3 Credits)
Introduces students to data science for financial applications using an industry-standard programming language. Students will use tools ranging from regression models to machine learning to investigate questions across a variety of areas within finance including asset management, corporate finance and FinTech. The course will illustrate how big data and data analytics can improve financial decision-making by focusing on problems facing finance professionals.
Prerequisite: BMGT340; must have completed or be concurrently enrolled in BMGT343.
Credit Only Granted for: BMGT347 or BMGT448G.
Formerly: BMGT448G.

BMGT349 Private Equity and Venture Capital (3 Credits)
The New Markets Private Equity/Venture Capital Clinic allows students to gain professional experience commensurate with that of an Associate in a Venture Capital Firm. Students are trained to buy, own, actively manage and sell high growth technology companies in private transactions. The class format includes: lectures; presentations from guest speakers, including the regions leading CEOs, private equity and service providers; and a series of facilitated exercises that simulate buying, owning and selling businesses. The course exposes students to real life activities covering the entire deal process from market research, diligence, selection, negotiation valuing, and structuring an investment, as well as management, growth and exit of portfolio companies.
Prerequisite: Must have completed or be concurrently enrolled in BMGT313 and BMGT340.
Repeatable to: 6 credits.
Formerly: BMGT448B.

BMGT350 Marketing Principles and Organization (3 Credits)
An introduction to the concepts and principles of marketing including the marketing of service and nonprofit organizations. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.
Recommended: ECON200.

BMGT352 Customer-Centric Innovation (3 Credits)
Addresses the management of new products and services with a focus on the innovation process, specifically the development and launching of new products or services: Opportunity Identification, Concept Generation, Design, Testing and Launch.
Prerequisite: BMGT350.
Credit Only Granted for: BMGT352 or BMGT382.

BMGT353 Retail Management (3 Credits)
Planning and implementing retail marketing strategy. Store and nonstore (catalog, internet) retailing. Evaluation of how environmental trends in the consumer market, competition, the economy and technology affect retail strategy in the U.S. and global market.
Prerequisite: BMGT220 and BMGT350.

BMGT355 Foundations of Marketing for Non Business Majors (3 Credits)
Introduces the concepts and principles of marketing. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.
Restriction: Must not have completed BMGT350; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT355 or BMGT350.
Additional Information: Course does not apply to a Smith School degree. BMGT350 may substitute for BMGT355.

BMGT357 Retailing and Marketing Internship (3-6 Credits)
Supervised work experience with a firm engaged in marketing goods or services. Students apply concepts learned in marketing classes and analyze the firm's organizational structure, environment and marketing strategy.
Prerequisite: BMGT350.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT360 Strategic Management of Human Capital (3 Credits)
Provides students with the basic knowledge needed to help organizations attract, select, develop, engage, evaluate, and retain talent. Topics covered may include strategic HRM, the role of globalization, legal issues in HRM, work analysis, HR planning, recruitment, personnel selection, performance management and appraisal, training and development, career development, compensation systems, motivating and rewarding performance, labor relations, and employee health and safety.

BMGT361 Entrepreneurship: Starting and Managing the Entrepreneurial Venture (3 Credits)
Focuses on the early development of a new venture. Topics include: idea-getting, opportunity recognition, feasibility studies, new venture financing and startup. Guests speakers and practicing entrepreneurs offer real world guidance. Restricted to students admitted to the Smith Entrepreneurship Fellows Program.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must be in the Smith Entrepreneurship Fellows Program; and must not have completed BMGT461.
Credit Only Granted for: BMGT261, BMGT361, or BMGT461.
Formerly: BMGT261.

BMGT362 Negotiations (3 Credits)
By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, this experiential course is designed to enhance students' negotiating self-confidence and improve students' analytical skills, interpersonal skills, creativity and persuasive abilities.
Restriction: Must not have completed COMM425.
Credit Only Granted for: BMGT362 or COMM425.

BMGT363 Leadership and Teamwork in Organizations (3 Credits)
Provides a comprehensive understanding of fundamental leadership concepts, theories, and skills in organizations and applies to assessing and developing effective leadership practices in organizations.

BMGT364 Managing People and Organizations (3 Credits)
An introduction to selected aspects of human behavior in organizations generally known as organizational behavior (OB). This course is designed to help students develop systematic and fundamental understanding of people and their behaviors in organizations, as well as useful abilities and skills required to effectively and ethically manage various individual, interpersonal, group, and organization-level processes.

BMGT365 Entrepreneurial Finance and Private Equity (3 Credits)
Studies venture capital and private equity using a combination of cases, lectures and guest speakers. Addresses how venture capitalists provide capital to start-up firms in growing industries and how private equity markets provide capital to help established medium-sized firms (often family businesses) grow and restructure. Focuses on how financial, legal, and economic issues are dealt with in the financial contracts between venture capitalists and their limited partners and between capitalists (or other private equity investors) and the firms in which they invest.
Prerequisite: BMGT461 or BMGT361.
Restriction: Junior standing or higher.
Credit Only Granted for: BMGT365, ENES466, SMLP471 or HLMN471.

BMGT366 Growth Strategies for Emerging Companies (3 Credits)
Offers practical management tools that are needed to build a new venture into a significant enterprise. The competencies, strategies and structures of successful high performance businesses are studied through cases, videos and guest lecturers. Topics include leadership, internal growth strategies, merger, acquisition and franchising.
Prerequisite: BMGT461 or BMGT361.
Restriction: Junior standing or higher.

BMGT367 Career Search Strategies in Business (1 Credit)
An overview and opportunity to practice job search skills critical to obtaining internships and full-time positions. Course will cover strategies for exploring career options, preparing job search materials, development of job search skills such as interviewing and networking. Students are encouraged to take this course in the sophomore or junior year.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT369 Experiential Learning in Business Innovation and Entrepreneurship (1-3 Credits)
Selected experiential learning opportunities in business innovation and entrepreneurship
Repeatable to: 15 credits if content differs.
Additional Information: Priority will be given to students enrolled in the Management Major, Innovation and Entrepreneurship Minor, and the General Business Minor.

BMGT370 Introduction to Transportation (3 Credits)
An overview of the transportation field with an emphasis on freight movements from the perspective of both providers of capacity and users of freight services. Examines the characteristics of the freight modes and the role of each mode as a major component of logistics and supply chain management. Explores the economics, energy use, and finances of each mode as well as the impact of government policies on each mode's future. Discussion of infrastructure and capacity needs of the transportation system and its ability to support the economy.

BMGT372 Introduction to Logistics and Supply Chain Management (3 Credits)
Supply chain management involves the coordination of suppliers, manufacturers, distributors, and retailers to ensure that products and services are available to the final consumer in a timely and cost-effective fashion. Logistics management is the subset of supply chain management dealing with the physical flows of product and includes such activities as transportation management, warehousing, materials handling, inventory management, and order fulfillment. Attention is paid to the logistics cost trade-offs within the firm and between members of the supply chain.

BMGT373 Supply Chain Management Internship (3-6 Credits)
Involves supervised work experience in supply chain management, logistics and/or transportation. Students will be expected to relate course material to work experience in an analysis of a firm's operations.
Prerequisite: BMGT370 or BMGT372.
Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT374 Supply Chain Risk Management (3 Credits)
Since supply chain risk is increasingly more recognized as an organizational threat, and therefore a critical part of corporate strategy; this course examines a wide range of supply chain risk and develops a process to identify, assess, and prioritize this risk. Through a series of readings and case studies, the course focuses on factors that contribute to supply chain risk within the firm as well as the supply chain. Strategies to mitigate risk are explored.
Credit Only Granted for: BMGT478C or BMGT374.
Formerly: BMGT478C.

BMGT380 Business Law I (3 Credits)
Legal aspects of business relationships. Examination of torts and business crimes, contracts and agency. The law of personal property and bailment relationships. Survey of public policy issues.

BMGT381 Business Law II (3 Credits)
The Uniform Commercial Code, including sales, commercial paper, secured transactions, bulk sales and documents of title. The law of partnerships and corporations. Reorganization and liquidation under the bankruptcy laws. The law of real property, landlord and tenant relationships and decedents' estates.
Prerequisite: BMGT380; or permission of BMGT-Robert H. Smith School of Business.

BMGT382 Marketing and Innovation for Entrepreneurs (3 Credits)
Marketing and Innovation are two critically important activities that determine success in any business venture. This course will focus on understanding the fundamentals of marketing and innovation from the perspective of an entrepreneur. At a broad level, we will apply proven marketing frameworks (STP and 4Ps) to effectively deliver innovation in an entrepreneurial context.
Restriction: Must not have completed BMGT352.
Credit Only Granted for: BMGT352 or BMGT382.
Additional Information: Course will not satisfy a Marketing major requirement.

BMGT385 Operations Management (3 Credits)
Studies the design, management and improvement of a firm's processes and systems for creation and delivery of products and services. Includes strategic and operational views of supply chain, product development, and capacity analysis, highlighting the competitive advantages that operations management can provide the firm.
Credit Only Granted for: BMGT385 or ENME426.

BMGT386 General Business Internship (3-6 Credits)
Supervised work experience in business. Students will be expected to relate course material to work experience in an analysis of a firm's operations.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT390 Designing Innovative Systems (3 Credits)
QUEST students develop an understanding of complex systems that incorporate elements of business and technical design and analyze how these systems evolve over time and may be shaped by technology disruptions, internal decisions, and external forces. Students apply these concepts to real-world complex systems in a team environment.
Prerequisite: ENES190 or BMGT190.
Restriction: Must be in the QUEST program. Cross-listed with: ENES390.
Credit Only Granted for: BMGT390 or ENES390.

BMGT392 Introduction to International Business Management (3 Credits)
A study of the domestic and foreign environmental factors affecting the international operations of U.S. business firms. The course also covers the administrative aspects of international marketing, finance and management.
Prerequisite: ECON200.

BMGT397 Mentoring Multidisciplinary Teams (3 Credits)
QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: ENES397.
Credit Only Granted for: BMGT397 or ENES397.

BMGT398 Individual Study in Business and Management (1-3 Credits)
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits.

BMGT402 Database Systems (3 Credits)
The fundamentals of database management systems (DBMS), data models, query processing, and data warehouses, and their application in the development of business information systems will be covered. An important goal of this course is to understand the value of information resources and information management challenges within an organization.
Recommended: BMGT302.
Credit Only Granted for: INST327 or BMGT402.

BMGT403 Systems Analysis and Design (3 Credits)
Techniques and tools applicable to the analysis and design of computer-based information systems. System life cycle, requirements analysis, logical design of databases and performance evaluation. Emphasis on case studies. Project required that involves the design, analysis and implementation of an information system.
Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.
Recommended: BMGT302.

BMGT404 Essential Data Skills for Business Analytics (3 Credits)
Building on prior programming knowledge, this course introduces principles of data science to collect, analyze, and visualize business data. Students will explore application of business analytics in areas such as finance, accounting, marketing, and operations. This course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.
Prerequisite: BMGT302.
Credit Only Granted for: BMGT404 or CMSC320.
Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major.

BMGT405 Data Communications and Networking (3 Credits)
Concepts of business data communications and data processing. Application of these ideas in computer networks, including basic principles of telecommunications technology, computer network technology, data management in distributed database systems and management of the technical and functional components of telecommunications technology.
Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: INST346 or BMGT405.

BMGT406 Developing Applications for the Web and Social Media (3 Credits)
The design and development of Web applications and the underlying platforms and standards for Web application development will be covered. It will examine the phenomenon of social media, social networking and crowdsourcing and understand their use within organizations.
Prerequisite: BMGT402 and BMGT302.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: INST377 or BMGT406.

BMGT407 Information Systems Projects (3 Credits)
Senior capstone course for the decision and information sciences major. Collected knowledge from the DIS courses and application to significant problems of size and complexity. State-of-the-art research ideas and current business and industrial practices in information systems.
Prerequisite: BMGT402 and BMGT403.
Restriction: Senior standing.

BMGT408 Emerging Topics in Information Systems (3 Credits)
Selected advanced topics covering emerging developments in the field of decision and information technologies.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.

BMGT410 Government Accounting (3 Credits)
An introduction to the theory and practice of accounting and financial reporting as applied in both federal and state/local governments, with a focus on generally accepted accounting principles applicable in each. Topics include analyzing transactions; recognizing transactions in the accounting cycles; and preparing and analyzing financial statements and the overall financial reports at both the federal and state/local government levels.
Prerequisite: BMGT221.

BMGT411 Ethics and Professionalism in Accounting (3 Credits)
Analysis and discussion of issues relating to ethics and professionalism in accounting.
Prerequisite: BMGT311.
Restriction: Must be in Accounting program.

BMGT417 Taxation of Corporations, Partnerships and Estates (3 Credits)
Federal taxation of corporations using the life-cycle approach-formation, operation, assessment, merger, reorganization and liquidation. Overviews of pass-through entities - partnerships and s-corporations -using the life-cycle approach, and the tax consequences of wealth transfers by individuals - gift and estate taxation. Both tax planning and compliance issues are addressed.
Prerequisite: BMGT221.

BMGT422 Auditing Theory and Practice (3 Credits)
A study of the independent accountant's attest function, generally accepted auditing standards, compliance and substantive tests and report forms and opinions.
Prerequisite: BMGT310; and must have completed or be concurrently enrolled in BMGT311.

BMGT423 Fraud Examination (3 Credits)
Covers fraud prevention, detection and investigation techniques. The traditional accounting areas of fraud-fraudulent financial accounting and misappropriation of assets as well as recent and historical cases of fraud will also be examined. Current fraud topics will be discussed.
Prerequisite: BMGT310.

BMGT424 Advanced Accounting (3 Credits)
Advanced accounting theory applied to specialized topics and current problems. Emphasis on consolidated statements and partnership accounting.
Prerequisite: BMGT311.

BMGT428 Special Topics in Accounting (3 Credits)
Selected advanced topics in Accounting.
Prerequisite: BMGT310.
Restriction: Must be in Accounting program.
Repeatable to: 9 credits if content differs.

BMGT430 Data Modeling in Business (3 Credits)
Explores the role of statistical models in business analytics to drive managerial decision-making and improve performance through the use of relevant data-motivated examples. Topics include regression models (both simple and multiple regression, as well as logistic regression for binary data), model validation, variable transformation, variable selection, discriminant analysis, and forecasting. These topics are modeled using state-of-the-art data analytics software.
Prerequisite: BMGT231 or BMGT230; or permission of BMGT-Robert H. Smith School of Business.

BMGT431 Data Analytics (3 Credits)
An introduction to the tools and techniques that are central to the analysis of abundant data that is being collected in many forms including web traffic, social network data, and reviews and comments on websites.
Prerequisite: BMGT430.

BMGT434 Analytics Consulting: Cases and Projects (3 Credits)
This course assumes that students have already been introduced to the concepts and techniques of operations research/business analytics (OR/BA). Published papers, short cases, and projects in OR/BA will be analyzed and discussed in a thoughtful way, taking into account the soft (people-related) issues and the hard (mathematical/optimization) issues.
Prerequisite: BMGT332 and BMGT385.

BMGT435 Business Process Simulation (3 Credits)
Covers the methods for computer simulation modeling and analysis of complex systems. Students are assumed to have been introduced to the basic techniques and applications in the field of operations management and business analytics. Course emphasis is on modeling of real-world systems (for example, inventory or queueing systems), implementing simulations in special purpose software, and analyzing simulation results.
Prerequisite: BMGT332 and BMGT385.

BMGT438 Special Topics in Operations Management (1-3 Credits)
Selected advanced topics in operations management.
Repeatable to: 6 credits if content differs.

BMGT440 Advanced Financial Management (3 Credits)
Analysis and discussion of cases and readings relating to financial decisions of the firm. The application of finance concepts to the solution of financial problems is emphasized.
Prerequisite: BMGT340.

BMGT441 Fixed Income (3 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT448A or BMGT441.
Formerly: BMGT448A.

BMGT442 Advanced Portfolio Management (3 Credits)
An in-depth coverage of statistical methods for choosing stocks is provided. Financial markets data is used in the class. Students are also expected to learn and use an industry-standard programming language during the class to implement the concepts of the class.
Prerequisite: BMGT343 and BMGT347.

BMGT443 Applied Equity Analysis and Portfolio Management (3 Credits)
Study and application of the concepts, methods, models, and empirical findings to the analysis, valuation and selection of securities, especially common stock.
Prerequisite: BMGT343.

BMGT444 Futures and Options Contracts (3 Credits)
The institutional features and economic rationale underlying markets in futures and options. Hedging, speculation, structure of futures prices, interest rate futures, efficiency in futures markets and stock and commodity options.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT444 or MATH424.

BMGT445 Banking and Financial Institutions (3 Credits)
Analysis and discussion of cases and readings in commercial bank management. The loan function is emphasized; also the management of liquidity reserves, investments for income and source of funds. Bank objectives, functions, policies, organization, structure, services and regulation are considered.
Prerequisite: BMGT340.
Recommended: ECON330 or BMGT341.

BMGT446 International Finance (3 Credits)
Financial management from the perspective of the multinational corporation. Topics covered include the organization and functions of foreign exchange and international capital markets, international capital budgeting, financing foreign trade and designing a global financing strategy. Emphasis of the course is on how to manage exchange and political risks while maximizing benefits from global opportunity sets faced by the firm.
Prerequisite: BMGT340.

BMGT447 Computational Finance (3 Credits)
Students will be introduced to tools for solving financial problems, specifically Excel functions and techniques, Visual Basic (VBA) Programming and Monte Carlo method & variations. Students will then apply these tools to solve problems related to options valuation, portfolio management, and risk management.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT447 or BMGT448E.
Formerly: BMGT448E.

BMGT448 Special Topics in Finance (1-3 Credits)
Selected advanced topics in finance.
Repeatable to: 9 credits if content differs.

BMGT449 Investment Fund Management: Lemma Senbet Fund (3 Credits)
The Lemma Senbet Fund is a year-long, advanced finance course available to undergraduate finance majors in their senior year. Ten to twelve students will be selected in the spring of their junior year to participate on the fund, two as portfolio managers and eight to ten as equity analysts. The course provides students with the opportunity to apply what they have learned in finance classes to actual investment decisions, through researching real companies and managing a portfolio of real money.
Prerequisite: BMGT343.
Corequisite: BMGT443.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT450 Integrated Marketing Communications (3 Credits)
In-depth study of coordinated marketing activities including advertising, sales promotion, Internet marketing, direct marketing and personal selling. Emphasizes strategic planning to effectively use these promotional tools to communicate with customers and meet marketing goals. Blends theory and current practice to provide managerial orientation.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT354 or BMGT450.
Formerly: BMGT354.

BMGT451 Consumer Analysis (3 Credits)
Identifying buyer behavior concepts relevant to a specific marketing problem so that appropriate marketing decisions can be made. Conceptual frameworks are drawn from psychology, sociology, economics, and other social sciences to aid in understanding the behavior of ultimate and industrial buyers.
Prerequisite: BMGT350.
Recommended: PSYC100; and PSYC221.

BMGT452 Marketing Research Methods (3 Credits)
Focuses on aiding marketing decision-making through exploratory, descriptive and casual research. Develops student skills in designing market research studies, including selection of data collection method, development of data collection instrument, sample design, collection and statistical analysis of data and reporting the results.
Prerequisite: BMGT350 and BMGT230.

BMGT454 Global Marketing (3 Credits)
Marketing functions from the global executive's viewpoint, including coverage of global marketing policies relating to product adaptation, data collection and analysis, channels of distribution, pricing, communications and cost analysis. Consideration is given to the cultural, legal, financial and organizational aspects of global marketing.
Prerequisite: BMGT350.

BMGT455 Sales Management (3 Credits)
The roles of the sales executive as a planner, manager of resources and marketing functions and recruiter, trainer, motivator and leader of field sales personnel. Techniques and sequence of problem analysis for selling and sales management decisions and to the practical framework in which these decisions take place. Teaching vehicles feature strong classroom interactions, cases, journal articles, research findings, guest sales managers, debates, and modern company practices.
Prerequisite: BMGT350.

BMGT457 Marketing Policies and Strategies (3 Credits)
This capstone course ties together various marketing concepts using the fundamentals of strategic market planning as the framework. Application of these principles is accomplished by analyzing and discussing cases and by playing a marketing strategy computer simulation game. Analysis of current business articles to understand the link between theory and real-world problem solving.
Prerequisite: BMGT350.

BMGT458 Special Topics in Marketing (1-3 Credits)
Selected advanced topics in marketing.
Repeatable to: 6 credits if content differs.

BMGT461 Entrepreneurship (3 Credits)
Process of creating new ventures, including evaluating the entrepreneurial team, the opportunity and the financing requirements. Skills, concepts, mental attitudes and knowledge relevant for starting a new business.
Restriction: Must not have completed BMGT361.
Credit Only Granted for: BMGT261, BMGT361, BMGT461, ENES460, SMLP470 or HLMN470.

BMGT463 Cross-cultural Challenges in Business (3 Credits)
Examines in depth the nature of international cultural value-differences and their behavioral-related effects in the workplace. Topics include decision-making and leadership styles and reactions to various work assignments and reward structures.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT465 Business Plan For The New Venture (3 Credits)
Each student focuses on the production of a business plan that will be accepted for an annual business plan competition. Business plans of sufficient quality may be submitted to attract financing. Topics include a deep review of business construction and its derivative short forms.
Prerequisite: BMGT461 or BMGT361.

BMGT466 Global Business Strategy (3 Credits)
Focuses on the strategic challenges that directly result from and are associated with the globalization of industries and companies. Topics include drivers of industry globalization, difference between global and multi-domestic industry, global expansion strategies, sources of competitive advantage in a global context, and coordination of a company across a global network.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT467 Strategic Innovation and Entrepreneurship (3 Credits)
Provides an understanding of how innovation affects the competitive dynamics of markets, how firms can strategically manage innovation, and how firms can create and implement strategies to maximize their likelihood of success.
Credit Only Granted for: BMGT467, ENES463 or HLMN472.

BMGT468 Special Topics in Management and Organization (1-3 Credits)
Selected advanced topics in management and organization.
Repeatable to: 6 credits if content differs.

BMGT469 Management and Organization Short-term Study Abroad (3 Credits)
Selected short-term study abroad topics in management and organization.
Repeatable to: 9 credits if content differs.

BMGT471 Supply Chain Consulting Fellows I (3 Credits)
Prepares students for a career in Intermodal/Logistics/and Supply Chain Management. Designed to enhance student analytical skills in tackling issues of direct relevance to the operating efficiency and profitability of individual firms. Student will have direct exchanges with executive leaders in this field through participation in national conferences and in-class visits. Students will participate in a national student case competition that focuses on a critical issue facing the industry leaders. Under the direction of the instructor, students conduct academic research on key topics that represent real-world consulting engagements designed to address critical issues faced by the individual companies and result in research-based solutions to these current challenges.
Prerequisite: BMGT372.

BMGT472 Purchasing and Inbound Logistics (3 Credits)
Analysis of the resupply activities of logistics management, including purchasing policies, transportation planning, and inventory control. Attention is directed toward total cost minimization and the establishment of a sustainable competitive advantage based on procurement.
Prerequisite: BMGT372.

BMGT473 Supply Chain Consulting Fellows II (3 Credits)
This second course of the Supply Chain Consulting Fellows program is designed to build upon the skills and concepts learned in the initial course to produce polished, skilled consultants who can build a consulting project from its initial stages and carry it through to a set of actionable initiatives and conclusive results. The initial component of this course will be to enhance and complete the started projects in the previous semester's course so that each research project can be formally presented to the project sponsor, i.e., the Board of Advisors for the Intermodal Association of North America. Student teams will serve as project consultants and tackle a real-world problem presented by a designated firm. Students will also participate in a national conference devoted to Intermodal/Logistics/Supply Chain issues. The conference will involve individual academic sessions and reports by the students based on the content provided. The class will also include several Executive Leader sessions.
Prerequisite: BMGT370, BMGT372 and BMGT471.
Credit Only Granted for: BMGT478D or BMGT473.
Formerly: BMGT478D.

BMGT475 Supply Chain Strategy and Network Design (3 Credits)
Analysis of the strategic aspects of supply chain management. Emphasis on the creation of end-user value through supply chain cost reductions, service improvements or both. Attention is directed toward the enabling role of technology in support of strategy evaluation and implementation.
Prerequisite: BMGT372.

BMGT476 Technology Applications in Supply Chain Management (3 Credits)
An understanding of the role of technology in managing the supply chain. Provides students with hands-on experience in advanced software systems that build on top of enterprise resource planning systems. Major emphasis is placed on demonstrating that these systems result in supply chain cost reductions and service improvements.
Prerequisite: BMGT372.

BMGT477 International Supply Chain Management (3 Credits)
The study of the importance of the supply chain management within a global context. Topics covered include: the structure, service, pricing and competitive relationships among international carriers and transport intermediaries as well as documentation, location decisions, international sourcing/distribution and management of inventory throughout the international supply chain.

BMGT478 Special Topics in Supply Chain Management (3 Credits)
Selected advanced topics in supply chain management.
Repeatable to: 9 credits if content differs.
Additional Information: Course prerequisites will vary depending on the topic. A maximum of 3 credits of BMGT478 course work can fulfill Supply Chain Management major requirements.

BMGT484 Digital Marketing (3 Credits)
Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services through digital means, including the web, social media, and mobile apps. Both the development and analysis of digital media for marketing will be discussed.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT485 Project Management (3 Credits)
Modern project management techniques that are used by modern practicing professionals will be covered. Particular attention is given to the management of technology based systems and projects in a business enterprise. The topics covered include: defining project scope, alignment of projects with enterprise strategy, managing project cost, time and risks using tools such as CPM/PERT, and measuring project performance.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST408O or INST453.

BMGT487 Six Sigma Innovation (3 Credits)
Enhances the overall understanding of Six Sigma Strategy, Tools and Methods to positively influence the performance of a business process, a product or service. Highlights the application of Define-Measure-Analyze-Improve-Control (DMAIC),Design For Six Sigma (DFSS), and the pursuit of Critical to Quality criteria (CTQ's) in a collaborative perspective, one that recognizes a balance between efficiency, and effectiveness and between statistical analysis and statistical thinking.
Prerequisite: STAT400, BMGT231, BMGT230, or ENME392.

BMGT488 Special Topics in Logistics, Business, and Public Policy (1-3 Credits)
Selected advanced topics in logistics, business and public policy.
Repeatable to: 6 credits if content differs.

BMGT490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: ENES490.
Credit Only Granted for: BMGT490 or ENES490.

BMGT491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: ENES491.
Credit Only Granted for: BMGT491 or ENES491.

BMGT493 Honors Study (3 Credits)
First semester of the senior year. The course is designed for honors students who have elected to conduct intensive study (independent or group). The student will work under the direct guidance of a faculty advisor and the Assistant Dean of Undergraduate Studies. They shall determine that the area of study is of a scope and intensity deserving of a candidate's attention. Formal written and/or oral reports on the study may be required by the faculty advisor.
Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT494 Honors Study (3 Credits)
Second semester of the senior year. The student shall continue and complete the research initiated in BMGT 493, additional reports may be required at the discretion of the faculty advisor and Assistant Dean of Undergraduate Studies.
Prerequisite: BMGT493.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in the Smith School Honors Fellows program.

BMGT495 Strategic Management (3 Credits)
A case-based course where students learn to play the role of the "strategic manager" who defines the scope of its business operations and, within the chosen scope, how the firm will compete against rivals. This course focuses on how a firm can both formulate effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits.

BMGT496 Business Ethics and Society (3 Credits)
A study of the standards of business conduct, morals and values as well as the role of business in society with consideration of the sometimes conflicting interests of and claims on the firm and its objectives. Emphasizes a strategic approach by business to the management of its external environment.
Prerequisite: 1 course in BMGT; or permission of BMGT-Robert H. Smith School of Business.

BMGT497 Strategic Management for Non Business Majors (2 Credits)
Focuses on how a firm can both formulate and implement effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not be a major in the R.H. Smith School of Business.
Additional Information: Course does not apply toward a Smith School degree.

BMGT498 Special Topics in Business and Management (3 Credits)
Special topics in business and management designed to meet the changing needs and interests of students and faculty.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT499 Advanced Business Topics (1 Credit)
Course will delve deeply into a specific business topic. Based on experience and knowledge from undergraduate core business classes, students will examine a particular subject from various angles.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 3 credits if content differs.

BSCI - Biological Sciences Program

BSCI103 The World of Biology (4 Credits)
An introduction to modern biology for the non-science major. Major themes include molecular biology, cell biology, evolution and organismal biology. Relevance of study of biology to modern human life will be emphasized.
Additional Information: Not acceptable for degree requirements in Biological Sciences, Chemistry, or Biochemistry.

BSCI120 Insects (3 Credits)
A survey of the major groups of insects, their natural history, and their relationships with humans and their environment. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

BSCI121 Beekeeping (2 Credits)
A study of the life history, behavior and seasonal activities of the honeybee, its place in pollination of flowers with emphasis on plants of economic importance and bee lore in literature.
Additional Information: Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

BSCI124 Plant Biology for Non-Science Students (3 Credits)
A basic course in plant biology specifically designed for the non-science student. Emphasis is placed on an evolutionary and ecological approach to studying fundamental concepts and processes of plants, their place in the biosphere, the importance of plants to man, and the manner in which humans impact on plants and their environment. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources.
Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.
Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI125.

BSCI125 Plant Biology Laboratory (1 Credit)
An introduction to the biology of plants with emphasis on the processes by which plants function, the diversity of plants, and the importance of plants to humans. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources. CORE Lab Science.
Corequisite: BSCI124.
Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.
Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI124.

BSCI126 Pollinators in Crisis (3 Credits)
We will dissect the pollinator crisis, and in the process learn about insects, about the interaction of organisms in complex ecosystems, and about the human-nature interface. Students will work in groups that specialize in an aspect of pollinator biology and their challenges. Instruction will target methods for collecting information, interpretation of scientific information and the professional presentation of findings.

BSCI130 Calculus for Life Sciences I (1 Credit)
CALC FOR LIFE SCIENCES I

BSCI133 For the Love of Insects (3 Credits)
Insects and their close relatives play an important role in the environment and human society. They provide many environmental services and their presence influences the rest of life on earth. Their contribution to society is often underestimated and underappreciated. Through a diversity of activities, students will leave with a greater appreciation and understanding of insects vital role to humanity.

BSCI135 Amazing Green: Plants that Transformed the World (4 Credits)
An interactive way to learn about plants and science, focusing on how plants have changed human history, the biology of their growth, and the science behind their use.

BSCI145 The Insect Apocalypse: Real or Imagined? (4 Credits)
An article in the New York Times, in 2018, declared an "Insect Apocalypse" that for the first time brought the general, unexplained declines in insects to the public and suggested a catastrophe awaits our planet. Scientists have documented the loss of insect species at a rate exceeding the extinction rates associated with the major geological events in the Earth's history. The insect apocalypse, called the "insect decline" among researchers, potentially could lead to the demise of all terrestrial and freshwater ecosystems. Based on science and research, students will be provided background, and discover on their own, the diversity of the form and functions of insects, as well as how they evolved and persisted for 400 million years. The course, designed for students of any major, celebrates the incredible variation of insect life and what they do to support life on our planet. The course will highlight the use of scientific research to understand and respond to the global crisis.

BSCI150 Beyond Race: Human Biological Diversity (4 Credits)
Race and racism are two of the most important issues in modern American society. Implicit in all considerations of race is the question of whether people of different races are genetically different from one another. The scientific answer to this question is "no". This course allows students to learn, discuss, and apply the scientific evidence for rejecting races as biological categories. The course covers basic biology, human evolution, human phylogenetics, and a critique of race as an explanation for human diversity and traits.
Credit Only Granted for: BSCI189I or BSCI150.
Formerly: BSCI189I.

BSCI160 Principles of Ecology and Evolution (3 Credits)
Basic principles of biology with special emphasis on ecological and evolutionary biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Recommended: For Science majors.
Credit Only Granted for: BSCI106 or BSCI160.
Formerly: BSCI106.

BSCI161 Principles of Ecology and Evolution Lab (1 Credit)
Basic laboratory principles of biology with special emphasis on ecological and evolutionary biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: BSCI160.
Recommended: For Science majors.

BSCI170 Principles of Molecular & Cellular Biology (3 Credits)
Basic principles of biology with special emphasis on cellular and molecular biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Recommended: For Science majors.
Credit Only Granted for: BSCI105 or BSCI170.
Formerly: BSCI105.

BSCI171 Principles of Molecular & Cellular Biology Laboratory (1 Credit)
Basic laboratory principles of biology with special emphasis on cellular and molecular biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: BSCI170.
Recommended: For Science majors.

BSCI201 Human Anatomy and Physiology I (4 Credits)
Anatomy and physiology of the skeletal, muscular, neural, endocrine, and sensory systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.
Prerequisite: BSCI170 and BSCI171; or BSCI105; or students who have taken courses with comparable content may contact the department.

BSCI202 Human Anatomy and Physiology II (4 Credits)
Anatomy and physiology of the cardiovascular, respiratory, immune, digestive, urinary and reproductive systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.
Prerequisite: BSCI201; or permission of CMNS-Biology department.

BSCI207 Principles of Biology III - Organismal Biology (3 Credits)
The diversity, structure and function of organisms as understood from the perspective of their common physicochemical principles and unique evolutionary histories.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And must have completed or be concurrently enrolled in CHEM131.

BSCI222 Principles of Genetics (4 Credits)
Principles and mechanisms of heredity and gene expression. Considers plant, animal, and microbial organisms.
Prerequisite: CHEM131 and CHEM132; and (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105). Or must have completed BSCI105 or (BSCI170 and BSCI171); and two semesters of chemistry.

BSCI223 General Microbiology (4 Credits)
Fundamental concepts in morphology, physiology, genetics, immunology, ecology, and pathogenic microbiology. Applications of microbiology to medicine, the food industry and biotechnology.
Prerequisite: BSCI170 and BSCI171; or BSCI105.
Credit Only Granted for: BSCI223 or BSCI283.

BSCI238 Special Topics in Biology Student Initiated Courses (1 Credit)
Student Initiated Course (STIC) in Biology. Course will be student initiated and taught under close supervision of faculty mentor. Student instructor and faculty mentor must generate proposal and have approval of the Biological Sciences Program to offer a BSCI238 STIC. BSCI238 cannot be applied to the degree requirements of any biological sciences major.
Repeatable to: 5 credits if content differs.

BSCI258 College Park Scholars Internship (1-3 Credits)
Credit to be determined by CPS Director. Must be completed by end of sophomore year.
Restriction: For College Park Scholars - Life Sciences students only.
Repeatable to: 6 credits if content differs.
Additional Information: Course not acceptable towards in Biological Sciences, Chemistry, or Biochemistry.

BSCI279 Supplemental Study (1-3 Credits)
Research or special study to complement a course taken previously which is not fully equivalent to current departmental requirements. Credit according to work done.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 6 credits.

BSCI283 Principles of Microbiology (4 Credits)
Introduction to microorganisms designed for science majors. Genetic principles underlying microbial abilities; microbial structure-function relationships; metabolism, physiology, and ecology of microorganisms; interactions between microorganisms (including pathogens) and their hosts.
Prerequisite: BSCI222.
Restriction: Must be in a major within Biological Sciences; or permission of CMNS-Cell Biology & Molecular Genetics.
Credit Only Granted for: BSCI223 or BSCI283.
Additional Information: Priority given to BSCI, BCHM and CHEM majors.

BSCI289 Off-Campus Internship (1-3 Credits)
Elective credit for formally established off-campus research internship. Permission of Director of Outreach required.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 5 credits if content differs.
Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI300 Strategies for Success (1 Credit)
Students often face an increased emphasis on critical thinking, pressure from a typically higher credit hour load, and a faster pace of exposure to new material when moving from lower- to upper-level coursework. The Biological Sciences program designed this course to help all transfer students make successful transitions, both academically and socially, to the University of Maryland at Shady Grove.
Restriction: Must be in a major in USG-Universities at Shady Grove; and must be in Biological Sciences: Physiology & Neurobiology program.
Credit Only Granted for: BSCI300 or BSCI339R.
Formerly: BSCI339R.

BSCI328 Special Topics in Entomology (1-4 Credits)
Lectures, seminars, mini-courses and other special instruction in various entomological subjects.
Repeatable to: 6 credits if content differs.

BSCI329 Instructional Assistance Practicum (1-3 Credits)
Students serve as instructional assistants in selected undergraduate biology courses. Roles and responsibilities are determined on a course-specific basis and approved by the College Undergraduate Program Committee.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 9 credits if content differs.
Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI330 Cell Biology and Physiology (4 Credits)
Biochemical and physiological mechanisms underlying cellular function. Properties of cells which make life possible and mechanisms by which cells provide energy, reproduce, and regulate and integrate with each other and their environment.
Prerequisite: Minimum grade of C- in CHEM131 and CHEM132. And minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in BSCI105.
Restriction: Must not have completed BSCI230.
Credit Only Granted for: BSCI230 or BSCI330.
Formerly: BSCI230.

BSCI333 Principles of Paleontology (4 Credits)
A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.
Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department.
Restriction: Permission of instructor is required of non-degree seeking students. Cross-listed with: GEOL331.
Credit Only Granted for: GEOL331 or BSCI333.

BSCI334 Mammalogy (3 Credits)
Introduction to the biology of mammals, including evolution, physiological, and behavioral specializations.
Prerequisite: Minimum grade of C- in BSCI207. And minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106.

BSCI335 Mammalogy Laboratory (1 Credit)
Lab and field techniques for the study of mammals, focusing on their identification, anatomy, histology, spatial distribution, ecology, and behavior.
Prerequisite: Minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106. And minimum grade of C- in BSCI207; and must have completed or be concurrently enrolled in BSCI334.

BSCI337 Biology of Insects (4 Credits)
An overview of the biology, evolution and diversity of insects and their relatives. Insect morphology, physiology, behavior and ecology; the impact of insects on humanity and the management of pest insect populations; assembly of an insect collection is required.
Prerequisite: BSCI160 and BSCI161; or BSCI106; or permission of CMNS-Entomology department.

BSCI338 Special Topics in Biology (1-4 Credits)
Lectures, seminars, mini-courses and other special instruction in various biological subjects.
Repeatable to: 6 credits if content differs.

BSCI339 Selected Topics in Biology (1-4 Credits)
Lectures, seminars, and other selected instruction courses in various biological subject matter.
Prerequisite: Permission of CMNS-Biology department.
Repeatable to: 9 credits if content differs.

BSCI342 Biology of Reproduction (3 Credits)
The biology of the reproductive system with emphasis on mammals and, in particular, on human reproduction. Hormone actions, sperm production, ovulation, sexual differentiation, sexual behavior, contraception, pregnancy, lactation, maternal behavior and menopause.
Prerequisite: BSCI170 and BSCI171; or BSCI105; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies; or permission of CMNS-Biological Sciences UG Program. Cross-listed with: WGSS326.
Credit Only Granted for: BSCI342, WMST326 or WGSS326.
Formerly: WMST326.

BSCI343 Cellular Mechanisms of Aging and Disease (3 Credits)
Explore how alterations in normal cellular and molecular processes lead to both aging and a variety of non-infectious human diseases currently plaguing our society. Students will read, analyze, and discuss current primary and secondary literature in the field of cell biology and biomedicine.
Prerequisite: Minimum grade of C- in BSCI330.
Credit Only Granted for: BSCI339I or BSCI343.
Formerly: BSCI339I.

BSCI348 Special Topics in Cell Biology and Molecular Genetics (1-3 Credits)
Presentation and discussion of special subjects in the field of cell biology and molecular genetics. A maximum of three credit hours of BSCI348 may be applied to the BSCI major.
Repeatable to: 8 credits.
Additional Information: A maximum of 8 credits of any BSCI348 course(s) can be applied to one or more undergraduate degrees. Any credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI353 Principles of Neuroscience (3 Credits)
Principles of nervous system function, ranging from molecular and cellular basis of neuron function through nervous system integration.
Prerequisite: 1 course with a minimum grade of C- from (BSCI207, BSCI330).
Corequisite: PHYS122, PHYS142, or PHYS132.

BSCI357 Neurobiology of Chemosensory Systems (3 Credits)
Chemosensation is essential for all forms of life, orchestrating several physiological processes, such as feeding, sexual behaviors, and body homeostasis. This course will review the function of chemosensory systems, including olfaction, gustatory and central chemoreception, among others. Through lectures and discussion of papers, we will examine the cell biology, systems neuroscience, and evolutionary aspects in these chemosensory systems.
Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.
Credit Only Granted for: BSCI339D, BSCI357, BIOL708Q, or NACS728J.
Formerly: BSCI339D.

BSCI360 Principles of Animal Behavior (3 Credits)
Study of animal behavior with emphasis on its evolution and function. Topics include genetic basis of behavior, communication, aggression, foraging, cooperation, mate selection, and relevance for conservation.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And BSCI222.

BSCI361 Principles of Ecology (4 Credits)
Basic principles of population, community, and ecosystem ecology. Use of these principles to predict possible consequences of human-caused changes in the environment and to understand the level of uncertainty of those predictions.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And (MATH130, MATH136, or MATH140).

BSCI363 The Biology of Conservation and Extinction (3 Credits)
Ecology, evolutionary biology, and paleontology will be applied to the study of conservation, species invasions, and extinction.
Prerequisite: Minimum grade of C- in BSCI361.

BSCI364 Conservation Biology Lab (1 Credit)
Understanding and applying principles, practices and common tools of conservation biology. Synthesizing and applying ecological and socioeconomic knowledge to conservation issues.
Prerequisite: Must have completed or be concurrently enrolled in BSCI363.
Credit Only Granted for: BSCI338Q or BSCI364.
Formerly: BSCI338Q.

BSCI370 Principles of Evolution (3 Credits)
Understanding evolutionary processes in a natural and human environment, including adaptation; DNA sequence, protein, and genome evolution; evolution of developmental mechanisms; mechanisms of evolutionary change (mutation, natural selection, drift); epidemiology; coevolution and biological control; speciation; comparative methods; extinction and conservation; human evolution.
Prerequisite: Minimum grade of C- in BSCI160, BSCI161, and BSCI222 .

BSCI373 Natural History of the Chesapeake Bay (3 Credits)
Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.Cross-listed with: ENST373.
Credit Only Granted for: BSCI373 or ENST373.

BSCI374 Mathematical Modeling in Biology (4 Credits)
Students will learn empowering mathematical techniques through the understanding of biological models. Models are chosen from a variety of biological disciplines. Mathematical skills that will be developed along the way include: solving non-linear difference equations, eigenvector analysis, and the implementation of these algorithms as computer models.
Prerequisite: MATH131, MATH136, or MATH141. Cross-listed with: HLSC374.
Credit Only Granted for: BSCI374, BSCI474, or HLSC374.
Formerly: BSCI474.
Additional Information: The HLSC374 version of this course is restricted to students in the Honors College Integrated Life Sciences program.

BSCI378H Cell Biology and Molecular Genetics Department Honors Seminar (1 Credit)
Required seminar for all students participating in departmental honors research program.

BSCI379 Cell Biology and Molecular Genetics Department Research (1-3 Credits)
This course is arranged to provide qualified majors an opportunity to pursue research problems under the supervision of a faculty member of the department.
Prerequisite: Permission of CMNS-Biological Sciences UG Program or Cell Biology & Molecular Genetics department.
Repeatable to: 8 credits.
Additional Information: A maximum of 8 credits of any version of BSCI379 can be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI379H Cell Biology and Molecular Genetics Department Honors Research (1-4 Credits)
Student should consult program guidelines. Research project carried out under guidance of faculty advisor.

BSCI381 Molecular Neuroethology (3 Credits)
The brain generates a tremendous variety of behaviors, but how it achieves these feats remains largely unknown. Genetics and molecular tools yield fundamental insights into how the brain senses its environment and determines an appropriate course of action. This course will describe modern genetic manipulations (eg, CRISPR editing) and neuronal interventions (e. g., optogenetics), and discuss the quantification of behavioral outputs. Course consists of lectures plus readings and group discussions of primary scientific literature.
Prerequisite: Minimum grade of C- in BSCI222; and minimum grade of C- in BSCI353 or NEUR306.
Credit Only Granted for: BSCI339W, BSCI381, or BIOL709W.
Formerly: BSCI339W.

BSCI389 Entomology Department Research (1-3 Credits)
Credit to be determined by the department. A maximum of 8 credits of any version of BSCI389 can be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 8 credits if content differs.

BSCI392 Biology of Extinct Animals (3 Credits)
A survey of extinct animals that have few, if any, direct living descendants. The principles governing the functional design of animals will be used to infer life styles for extinct, and frequently bizarre, organisms.
Prerequisite: BSCI160 and BSCI161; or BSCI106. Cross-listed with: GEOL391.
Credit Only Granted for: GEOL391 or BSCI392.

BSCI393 Biology of Extinct Animals Laboratory (1 Credit)
An overview of the techniques used in paleobiological reconstructions of extinct animals.
Prerequisite: Must have completed or be concurrently enrolled in BSCI392. Cross-listed with: GEOL392.
Credit Only Granted for: GEOL392 or BSCI393.

BSCI394 Vertebrate Form and Function (3 Credits)
Comparative functional anatomy of vertebrates in the context of adaptation to their environments. The vertebrate body and its systems will be considered in terms of structure, physiology, evolution, and embryonic development.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And (BSCI207 or BSCI330).

BSCI398H Biology Department Honors Seminar (1 Credit)
Required seminar for all students participating in departmental honors research program.

BSCI399 Biology Department Research (1-3 Credits)
Research and/or integrated reading in biology under the direction and close supervision of a member of the faculty.
Prerequisite: Permission of the Biology Department.
Restriction: Minimum cumulative GPA of 3.0.
Repeatable to: 8 credits if content differs.
Additional Information: A maximum of 8 credits of any version of BSCI399 may be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI399H Biology Department Honors Research (1-2 Credits)
A laboratory research problem; required each semester during honors participation and culminating in an honors thesis.

BSCI401 Animal Communication (3 Credits)
Examining the mechanisms by which animal produce and receive signals in each sensory modality; and quantifying the type and amount of information conveyed in signals and how animals attend to such information.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And must have completed one semester of physics; and must have completed one semester of organic chemistry.
Recommended: A course in animal behavior or biopsychology.
Credit Only Granted for: BSCI401, BSCI338W or BIOL708W.
Formerly: BSCI338W.

BSCI402 Genomics of Sensory Systems (3 Credits)
An advanced course covering topics on the molecular basis of senses and the application of genomic techniques to studies of sensory systems & sensory ecology.
Prerequisite: BSCI222; or permission of instructor.
Credit Only Granted for: BSCI338C or BSCI402.
Formerly: BSCI338C.

BSCI403 Biology of Vision (3 Credits)
An upper level undergraduate course on the physical, molecular, and neural basis of vision.
Prerequisite: BSCI207.
Recommended: BSCI222.
Credit Only Granted for: BSCI338V or BSCI403.
Formerly: BSCI338V.

BSCI404 Cell Biology from a Biophysical Perspective (3 Credits)
An approach to cell biology by focusing on mechanisms and unifying physical paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think mechanistically and quantitatively.
Prerequisite: BSCI330.
Recommended: PHYS121 and PHYS122; or completion of PHYS131 and PHYS132 recommended. Jointly offered with BIOL704, BIPH704.
Credit Only Granted for: BSCI338O, BSCI404, BIOL704, BIOL708O, or BIPH704.
Formerly: BSCI338O.

BSCI405 Population and Evolutionary Genetics (3 Credits)
Genetic variation within a population provides the basis for future evolution as well as a record of past evolution. The genomics revolution provides data on this variation that, together with mathematical models, allow us to read this record to reconstruct evolutionary trajectories. Examples will focus on hominin and pathogen evolution. In the lab, students will use models to explore how genetic variation (allele frequencies) changes over time and space.
Prerequisite: Minimum grade of C- in BSCI222; and 1 course with a minimum grade of C- from (MATH131, MATH136, MATH141). Jointly offered w ith BIOL709.
Credit Only Granted for: BSCI405, BSCI339J, or BIOL709C.
Formerly: BSCI339J.

BSCI406 Membranes and Biological Interfaces (3 Credits)
An interdisciplinary approach to membrane biology, starting with the physical chemistry of interfaces and model systems and continuing into transport, excitability, and signaling. The course is oriented toward students with broad backgrounds in biology and biophysics. Success in the course will come from a background that prepares students to think mechanistically and quantitatively rather than having substantial factual biological knowledge.
Prerequisite: Minimum grade of C- in BSCI330.
Recommended: PHYS122; or PHYS132; or (PHYS260 and PHYS261).
Credit Only Granted for: BSCI339R, BSCI406, or BIOL709R.
Formerly: BSCI339R.

BSCI407 Behavioral Genetics (3 Credits)
Behavior represents an organism's most dynamic phenotype and allows an animal to respond immediately to both internal and external cues. We will explore the genetic and epigenetic mechanisms that underlie behavioral variation and the associated neurological, hormonal, and developmental pathways. We will examine modern approaches used to study behavioral genetics in model and non-model systems, and in humans. Using case studies, we will explore a range of complex phenotypes including those related to mating, parental care, aggression, circadian rhythm, locomotion, learning, anxiety, and addiction.
Prerequisite: Minimum grade of C- in BSCI222.

BSCI410 Molecular Genetics (3 Credits)
An advanced genetics course emphasizing the molecular basis of gene structure and function in the context of modern approaches to the genetics of humans and model organisms.
Prerequisite: BSCI222. And must have completed CHEM233; or (CHEM231 and CHEM232).

BSCI411 Bioinformatics and Integrated Genomics (4 Credits)
Computational methods for the study of biological sequence data in comparative biology and evolution. Analysis of genome content and organization. Database searching, pairwise and multiple sequence alignment, phylogenetic, methods, pattern recognition, and functional inference. Functional and comparative genomics approaches.
Prerequisite: Minimum grade of C- in BSCI222.
Recommended: BSCI410.
Credit Only Granted for: BSCI380 or BSCI411.
Formerly: BSCI380.

BSCI412 Microbial Genetics (4 Credits)
A laboratory/lecture based course that covers the fundamentals of mutation, mobile genetic elements and transmission genetics of microbial organisms using both classical and molecular approaches.
Prerequisite: BSCI222; and (BSCI223 or BSCI283).

BSCI413 Recombinant DNA (3 Credits)
An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.
Prerequisite: BSCI330, BSCI223, or BSCI230; and BSCI222.
Formerly: ZOOL452.

BSCI414 Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. All current molecular biology techniques used for cloning prokaryotic genes, analyzing the gene products, and modifying the genes will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: BSCI222.

BSCI415 Molecular Genetics Laboratory (3 Credits)
Problem solving laboratory organized around extended projects that employ different approaches toward linking gene and function.
Prerequisite: Must have completed or be concurrently enrolled in BSCI410.
Restriction: Junior standing or higher.
Credit Only Granted for: BSCI348G or BSCI415.
Formerly: BSCI348G.

BSCI416 Human Genetics (3 Credits)
Approaches to human genetics and applications to biology and medicine focusing on specific human genetic topics using primary research papers as the main resource.
Prerequisite: Minimum grade of C- in BSCI410.
Recommended: BSCI330.

BSCI417 Microbial Pathogenesis (3 Credits)
Current research in microbial pathogenesis and the molecular and cellular basis of bacterial disease. Comprehensive overview of the molecular basis of pathogenesis with a focus on model microbial systems to illustrate mechanisms of disease pathogenesis. Topics covered: how microorganisms attach to and enter cells; how host cells are damaged by microbial products; how the host responds to invasion; and host-pathogen evolution.
Prerequisite: BSCI222; and (BSCI223 or BSCI283).
Restriction: Junior standing or higher.

BSCI420 Cell Biology Lectures (3 Credits)
Molecular and biochemical bases of cellular organization and function in eukaryotes.
Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.
Credit Only Granted for: BSCI420 or BSCI421.

BSCI421 Cell Biology (4 Credits)
Molecular and biochemical basis of cellular organization and function in eukaryotes.
Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.
Credit Only Granted for: BSCI420 or BSCI421.

BSCI422 Principles of Immunology (3 Credits)
The immune system in health and disease. Presentation and analysis of the cellular and molecular processes that comprise the immune system.
Prerequisite: BSCI222.
Recommended: BSCI330; and (BSCI223 or BSCI283).
Restriction: Junior standing or higher.

BSCI423 Immunology Laboratory (2 Credits)
Current techniques for assessment of immune status and evaluation of the immune response, including monoclonal antibody production, Western blotting, cytokine assays, ELISA and flow cytometry.
Prerequisite: BSCI222.
Corequisite: BSCI422.
Recommended: BSCI223 or BSCI283.
Restriction: Junior standing or higher.

BSCI424 Pathogenic Microbiology (4 Credits)
The role of bacteria and fungi in the diseases of humans with emphasis upon the differentiation and culture of microorganisms, types of disease, modes of disease transmission, prophylactic, therapeutic, and epidemiological aspects.
Prerequisite: BSCI223 or BSCI283.

BSCI425 Advanced Cell Biology Lab Practices (2 Credits)
Experimental techniques used to study the molecular, structural, and spatial organization of plant and animal cells. Using a combination of in vitro assays aimed at analyzing macromolecular and subcellular components and in vivo analyses designed to reveal the inner architecture of a typical eukaryotic cell, students will have an opportunity to: improve some of the basic technical and conceptual skills they acquired in an introductory cell biology course; develop a more sophisticated understanding of the nature of experimental cell manipulation; and tackle the ongoing challenge of articulating their findings in both written and oral communication.
Prerequisite: Must have completed BSCI330, BSCI222, CHEM231, and CHEM232; and must have completed or be concurrently enrolled in BSCI420.
Credit Only Granted for: BSCI421, BSCI425, or BSCI348C.

BSCI427 Principles of Microscopy (2 Credits)
An introduction to optical principles that underlie light and electron microscopic image formation. Brightfield, darkfield, phase contrast, differential interference contrast, fluorescence and polarized light microscopy. Comparison of light and electron microscopy. The application of these techniques to problems in biological research.
Prerequisite: BSCI421.

BSCI430 Developmental Biology (3 Credits)
Structural, functional and regulatory events and mechanisms that operate during development to produce an integrated, multicellular organism composed of a multitude of differentiated cell types.
Prerequisite: BSCI222 and BSCI330.

BSCI431 The Origin and Evolution of Nervous Systems (3 Credits)
Explore how brains change through evolution along the animal tree of life. By comparing the nervous system structure and development across the animal kingdom, this course aims to reveal common designs and mechanisms that generate behavior, and to inform our understanding of how biology builds minds. Topics include the origins of neurons, the universal molecular patterning of brain development across invertebrates and vertebrates, the evolution of neurotransmission, comparative mechanisms of learning and memory, and what in our brain makes us human.
Prerequisite: Minimum grade of C- in NEUR200, BSCI353 or NEUR306.

BSCI432 Systems View of Cell Biology (3 Credits)
An integrated understanding of cell biology based upon reading of literature, discussion of new findings, and quantitative simulations. Exploration of ten topics including Heredity, Curing Diseases, and Synthesizing Life.
Prerequisite: BSCI330.

BSCI433 Biology of Cancer (3 Credits)
Causes and consequences of neoplastic transformations at the biochemical and cellular levels.
Prerequisite: BSCI222 and BSCI330; or permission of CMNS-Biological Sciences UG Program.

BSCI437 General Virology (3 Credits)
Discussion of the physical and chemical nature of viruses, virus cultivation and assay methods, virus replication, viral diseases with emphasis on the oncogenic viruses, viral genetics, and characteristics of the major virus groups.
Prerequisite: BSCI222; or permission of CMNS-Biological Sciences UG Program.
Restriction: Junior standing or higher.

BSCI440 Mammalian Physiology (4 Credits)
A study of the cardiovascular, hemopoietic, gastrointestinal, renal and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals. Course does not count as an upper level lab for BIOL majors (see BSCI441).
Prerequisite: BSCI330; and (CHEM231 and CHEM232; or must have completed CHEM233). Or permission of CMNS-Biological Sciences UG Program.

BSCI441 Mammalian Physiology Laboratory (2 Credits)
Laboratory exercises in experimental mammalian physiology.
Prerequisite: Must have completed or be concurrently enrolled in BSCI440.

BSCI442 Plant Physiology (4 Credits)
An in-depth examination of the unique molecular and physiological principles necessary to understand how plants grow and respond to the environment at the cellular and organismal levels. Plants evolved unique metabolism and survival strategies, so students should be prepared to enter a world that may be new to them.
Prerequisite: BSCI170 and BSCI171; or BSCI105; or PLSC201. And CHEM231 and CHEM232; or CHEM237; . Cross-listed with: PLSC400.
Credit Only Granted for: BSCI442 or PLSC400.

BSCI443 Microbial Physiology (3 Credits)
Microbial cellular and population growth. Fermentation metabolism, physiology of anaerobiosis, and energy conservation and transformation in bacterial membranes. Efficiency of energy utilization for growth. Membrane structure and transport. Bacterial chemotaxis. Regulation of bacterial chromosome replication, RNA and protein synthesis. Control of metabolic pathways.
Prerequisite: Minimum grade of C- in BSCI223 or BSCI283.

BSCI446 Neural Systems (3 Credits)
Neural development, followed by sensory, motor and integrative system organization in the central nervous system.
Prerequisite: Minimum grade of C- in BSCI330 and BSCI353.

BSCI447 General Endocrinology (3 Credits)
Functions and dysfunctions of the endocrine system with special reference to mammals.
Prerequisite: BSCI330, CHEM241, and CHEM242.

BSCI450 Mammalian Systems Physiology (3 Credits)
A study of the cardiovascular, hemopoietic, gastrointestinal, renal, and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals.
Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in CHEM233 or both CHEM231 and CHEM232.
Credit Only Granted for: BSCI338L, BSCI440 or BSCI450.

BSCI451 Mammalian Systems Physiology Laboratory (2 Credits)
Laboratory exercises in experimental mammalian physiology.
Prerequisite: Must have completed with a minimum of C- or be concurrently enrolled in either BSCI440 or BSCI450.
Credit Only Granted for: BSCI441 or BSCI451.
Formerly: BSCI441.

BSCI452 Diseases of the Nervous System (3 Credits)
An advanced course covering the neuroanatomy, function, and organization of the nervous system and its implication for pathology and disease.
Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in BSCI353. Jointly offered with: NACS728, BIOL708.
Credit Only Granted for: BSCI452, BIOL708E, or NACS728N.

BSCI454 Neurobiology Laboratory (1 Credit)
Basic neuroanatomical techniques, intracellular and extracellular recordings of electrical potentials from nerve and muscle.
Prerequisite: Minimum grade of C- in BSCI330; and must have completed or be concurrently enrolled in BSCI353; and must have completed or be concurrently enrolled in PHYS122, PHYS132, or PHYS142.
Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

BSCI455 Neuroscience Laboratory (3 Credits)
Students will utilize neurophysiological techniques to examine fundamental principles of neurons and neural circuits. This course will reinforce content from prerequisite NEUR courses. Students will also strengthen skills in experimental design and scientific writing.
Prerequisite: NEUR306 or BSCI353; and PHYS132.
Recommended: NEUR305. Cross-listed with: NEUR405.
Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

BSCI456 Advanced Cellular Neuroscience (3 Credits)
Readings and discussion in cellular and molecular mechanisms underlying synaptic structure/function relationships, synaptic potentiation/depression, dendritic integration, homeostatic plasticity, and nervous system development including neurogenesis, axon guidance, synaptogenesis, and activity-dependent development among other topics.
Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.
Recommended: Minimum grade of C- in BSCI440 or another upper-level neuroscience course.
Restriction: Permission of CMNS-Biology department. Jointly offered with: NACS644.
Credit Only Granted for: BSCI339X, BSCI456, or NACS644.
Formerly: BSCI339X.

BSCI460 Plant Ecology (3 Credits)
The dynamics of populations as affected by environmental factors with special emphasis on the structure and composition of natural plant communities, both terrestrial and aquatic.
Prerequisite: Minimum grade of C- in BSCI361.

BSCI462 Population Ecology (3 Credits)
Theory of population growth and regulation, life tables, and theory of competition and predation, evolution in ecological settings, community structure and dynamics.
Prerequisite: MATH130, MATH136, or MATH140; and BSCI361.

BSCI464 Microbial Ecology (3 Credits)
Interaction of microorganisms with the environment, other microorganisms and with higher organisms. Roles of microorganisms in the biosphere. Microorganisms and current environmental problems.
Prerequisite: BSCI223; and (CHEM271 or CHEM277); or permission of the instructor.

BSCI465 Behavioral Ecology (3 Credits)
How natural and social environments shape individual behavior. The influence of evolution on patterns of individual adaptation. Use of the evolutionary paradigm to investigate specific problems in animal and human behavior.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI222.

BSCI467 Freshwater Biology (4 Credits)
Biology and ecology of freshwater invertebrates in lotic and lentic habitats, their adaptation to aquatic life, their function in aquatic ecosystems, and their relationship to environmental deterioration. Laboratory will include field trips, demonstrations, and identifications.
Prerequisite: BSCI160.

BSCI471 Molecular Evolution (3 Credits)
Patterns of DNA sequence variation within and between species, caused by nucleotide changes and the movement of transposable elements. Theories of molecular evolution, such as the neutral theory. Molecular clock hypothesis: its importance as a practical empirical tool in molecular genetics and systematics and its theoretical foundation.
Prerequisite: BSCI222; or permission of CMNS-Biology department.

BSCI472 Evolutionary Biology of Plants (3 Credits)
Evolution in plant populations. The pace, pattern, and mechanisms of evolution will be discussed within a genetic and ecological framework. Some emphasis will be placed on processes that are unique to the evolution of plants.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI222.

BSCI473 Marine Ecology (3 Credits)
Courses in evolution and animal behavior are strongly recommended. A detailed analysis of the evolutionary ecology of marine invertebrates; emphasis on testing of theories and on current literature.
Prerequisite: BSCI207.

BSCI475 Sexual Selection in Nature (3 Credits)
Sexual selection drives some of the most spectacular, if not bizarre, traits in nature. We will explore how organisms select and compete for mates and fertilization success, and how this powerful and pervasive evolutionary force shapes sexual traits and regulates species boundaries. We will focus on the key theories in the field and discuss recent and classic research papers. This is a student-directed class: course topics and materials will be selected based on student interests and involvement. On occasion, experts in the field will be invited to class to discuss their research.
Prerequisite: Minimum grade of C- in BSCI207; or permission of instructor.
Recommended: BSCI360 or BSCI370. Jointly offered with BIOL708.
Credit Only Granted for: BSCI338X, BSCI475, or BIOL708X.
Formerly: BSCI338X.

BSCI480 Arthropod Form and Function (4 Credits)
Survey of the morphological, systematic and physiological diversity of the phylum Arthropoda.
Prerequisite: Permission of CMNS-Entomology (AGNR).

BSCI481 Insect Diversity and Classification (4 Credits)
The techniques of collecting insects in the field and their classification into the latest hierarchical scheme. Field trips will visit habitats throughout the state. An insect collection is required.
Prerequisite: BSCI337.

BSCI482 Insect Physiology and Molecular Biology (4 Credits)
Physiological and biochemical functions of insects. Insect endocrinology, neurobiology, sensory physiology, integument and molting, development and metamorphosis, immunity, metabolism and related topics.
Prerequisite: BSCI337.

BSCI483 Insects, Pathogens, and Public Health (3 Credits)
Mosquito- and tick-borne disease transmission poses significant challenges to human health and well-being globally, and is on the rise in North America. Arthropod parasites and the pathogens they transmit to humans and animals will be introduced, and the public health significance of these arthropods will be examined. The ecology and behavior of vectors in relation to disease transmission will be emphasized.
Prerequisite: BSCI207.

BSCI487 IPM: Science-Based Decision Making for Sustainable Pest Management (4 Credits)
Long-term global food security requires a sustainable increase in agricultural productivity to ensure the availability and accessibility of safe and nutritious food. Agricultural pests reduce global food production and threaten its sustainability. This course explores sustainable pest management in agroecosystems using the integrated pest management (IPM) paradigm. IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment.
Prerequisite: BSCI160 and BSCI161.
Restriction: Must have earned a minimum of 90 credits.
Credit Only Granted for: BSCI487 or ENTM609.

BSCI488 Summer Biology Institutes (1-8 Credits)
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 12 credits if content differs.

BSCI493 Medicinal and Poisonous Plants (3 Credits)
A study of plants important to humans that have medicinal or poisonous properties. Emphasis on plant source, plant description, the active agent and its beneficial or detrimental physiological action and effects.
Prerequisite: (BSCI170 and BSCI171; or BSCI105); and must have completed CHEM233. Or 4 credits in BSCI courses.

BSCI494 Animal-Plant Interactions (3 Credits)
Theoretical, conceptual and applied aspects of evolutionary and ecological interactions between plants and animals. This course gives an overview of major ideas, historical controversies, and current research on animal-plant relationships. We will explore the mechanisms and evolution of plant defenses and animal counter-adaptations, behavioral ecology and interactions across trophic levels, the role of microbial communities in mediating interactions, and how these interactions color human experience through food and medicine. The course will have a blended lecture/discussion format and will include field walks to collect herbivory data and observe animal-plant interactions.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI497 Insect Pests of Ornamentals and Turf (4 Credits)
The recognition, biology and management of insects and mites injurious to ornamental shrubs, trees, greenhouse crops, and turf. Emphasis on Integrated Pest Management (IPM).

BSCV - CIVICUS

BSCV181 Civicus Student and the University (1 Credit)
Knowledge and skills designed to utilize CIVICUS to enhance the college experience and preparation for civic engagement.
Restriction: Freshman standing; and must be in the Civicus program.

BSCV182 Civicus and Service-Learning (1 Credit)
Students will examine domestic societal issues and their national, regional, and local dimensions from political, economic, and policy perspectives. Students will work with local direct service non-profit organizations.
Prerequisite: BSCV191.
Restriction: Must be in the Civicus program.

BSCV191 Introduction to Civicus (3 Credits)
Students will explore a range of ways to think about what it means to fully engage in communities, conduct research and scholarly inquiry to explore pressing contemporary problems, consider the roots of social issues, and explore ways to create positive social change on a school, local, state, and national level.
Restriction: Must be in the CIVICUS Program.

BSCV301 Leadership in a Multicultural Society (3 Credits)
A study and application of skills, historical context, theories, and concepts for constructive leadership in a pluralistic, multicultural, and diverse society. Social science methodologies and theories will provide the structure for the study of contemporary social problems, civil society issues, and leadership practices.
Prerequisite: BSCV182.
Restriction: Must be in the CIVICUS program.

BSCV302 Civicus Capstone (3 Credits)
Capstone course required for CIVICUS citation. Through a supervised internship, students gain hands-on experience in an area related to civic engagement, which gives students authentic experiences that help them develop hard and soft skills to support their community engagement efforts and their work toward social good.
Prerequisite: BSCV301.
Restriction: Sophomore standing or higher. Must be in the CIVICUS Program.

BSCV309 Civicus Seminar (1 Credit)
Review and analysis of contemporary social issues.
Restriction: Must be in the CIVICUS program.
Repeatable to: 5 credits if content differs.

BSGC - Global Communities

BSGC100 The Student in the University: Global Communities (1 Credit)
Students will develop a sense of community within the program, become familiar with campus resources, gain skills and information to prepare for the Global Experience Semester, and explore the surrounding international community.
Restriction: Must be enrolled in Honors Global Communities Living-Learning Program.
Credit Only Granted for: BSGC100 or HGLO100.
Formerly: BSGC100.

BSGC101 Globalization (3 Credits)
Is globalization sustainable? This course is an interdisciplinary exploration of globalization and anti-globalization through analysis of its impact on economic, political, social and environmental affairs. It introduces different frameworks for evaluating whether contemporary globalization is sustainable in its current form.
Restriction: Must be in Honors Global Communities Living-Learning program.
Credit Only Granted for: HGLO101 or BSGC101.
Formerly: BSGC101.

BSGC102 Global Issues (3 Credits)
A survey of some of the major global challenges facing society today, such as human trafficking, nuclear security, and global health. We explore contending approaches to resolving problems, culminating in a major group project.
Prerequisite: BSGC101.
Restriction: Must be in Global Communities Living-Learning program.

BSGC302 BSGC 302 Capstone: Global Connections (1 Credit)
Final component of the Global Communities curriculum. The course connects the global experience with previous BSGC coursework.
Restriction: Must be in Global Communities Living-Learning program. By permission only (BPO).
Additional Information: This course is limited to second-year students in the Global Communities Living-Learning Program who have completed or are in the midst of completing their Global Experience requirement.

BSGC338 Global Service Abroad (3 Credits)
Community service is a valuable response to social problems faced by marginalized populations. How do we perform valuable and effective service in an international setting? This course is designed to enable students to be thoughtful providers of international service. Students will be introduced to existing responses to social problems and will work to formulate their own individual and collective responses. BSGC 338 was developed with funding from the UMD Stamp Service-Learning Fellowship.
Restriction: Permission of Global Communities Living and Learning Program.
Repeatable to: 6 credits if content differs.
Additional Information: Prior knowledge of the language of the host country is preferred but not required. The course is open to ALL majors, with preference given to Global Communities students.

BSGC386 Experiential Learning in Global Communities: Global Internship (1-3 Credits)
Experiential Learning in Global Communities: Global Internship, will give students an opportunity to connect theory with practice.
Restriction: Must be in Global Communities Living-Learning program.
Credit Only Granted for: BSGC398E or BSGC386.
Formerly: BSGC398E.

BSGC398 BSGC Experiential Learning in Global Communities: Global Service (3 Credits)
Experiential learning is an integral element of the Global Communities program. Students will gain an understanding of social issues in marginalized communities, engage in service-learning, and develop an action plan for civic engagement in a diverse global society.
Restriction: Must be in Global Communities Living-Learning program. By permission only (BPO).
Repeatable to: 6 credits if content differs.
Additional Information: - Open to students enrolled in the Global Communities Living-Learning Program.

BSGC399 Topical Investigations in Global Communities (1-3 Credits)
Variable from 1-3 credits and repeatable up to 6 if content varies.
Restriction: Must be a current student in Global Communities Living and Learning Program; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Contact department for information to register for this course.

BSOS - Behavioral and Social Sciences

BSOS138 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS188 Selected Topics in the Behavioral and Social Sciences (1-3 Credits)
Introductory selected topics course dealing with interdisciplinary issues related to the social sciences.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: EDCP108O or BSOS188A.

BSOS201 Ensuring your Financial Future Through Stock Investing (3 Credits)
Introduces students to investing and trading, with special emphasis on the field of technical analysis. Planning for one's financial future is a critical skill for all students. Students will learn how to evaluate companies using the investors.com website and the TC2000 stock charting program. Students will develop an idea of the risks and benefits of investing, establishing a savings strategy, opening an IRA, and strategically planning for future financial security. In addition to readings, lectures, and online videos, students will participate in virtual stock market trading exercises and manage a virtual account.
Credit Only Granted for: BSOS289I or BSOS201.
Formerly: BSOS289I.
Additional Information: No prior knowledge of the stock market or investing is expected or required.

BSOS230 Introduction to Programming for the Social Sciences: Statistical Computing using R (1 Credit)
R is an open-source programming language, specialized for statistical computing, and provides a variety of statistical and graphical techniques that might be relevant for any BSOS program, such descriptive statistics, linear and non-linear regression, text mining, image processing. The R language is increasingly often employed in advanced statistics and data analytics, offering a wide range of application packages for effective programming. This course introduces the R language and several powerful packages in form of lectures, worked-out examples, and group exercises.
Restriction: Must not have completed BSOS330; and must be enrolled in a BSOS major. Or permission of instructor.
Additional Information: Students do not need any prior experience using R.

BSOS231 Introduction to Programming for the Social Sciences: Python (1 Credit)
Python has become the most powerful programming language in advanced statistics and data analytics. It includes expansive packages for data handling and processing, including the latest developments in machine learning, and offers Integrated Development Environments (IDE) for code development, testing, debugging, and graphical representation. In addition, python is deployed on virtually all high performance computing clusters, taking advantage of multi-processing, large memory, and GPU enhanced computing environments. This course offers a thorough introduction to python and those packages that are fundamental to data processing and analysis, image processing, natural language processing, machine learning.
Restriction: Must not have completed BSOS331; and must be enrolled in a BSOS major. Or permission of instructor.
Additional Information: Students do not need any prior experience using Python.

BSOS233 Data Science for the Social Sciences (3 Credits)
An introduction to modern methods of data analysis for social scientists. This course emphasizes teaching students who have no previous coding experience how to analyze data and extract meaning in a social science context. Students will gain critical programming skills and learn inferential thinking through examples and projects with real-world relevance.
Prerequisite: MATH115.
Restriction: Must be in a major in the College of Behavioral and Social Sciences or the College of Information Studies; or permission of instructor.

BSOS238 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS248 Leadership Seminar I (1-6 Credits)
A topics course in the behavioral and social sciences designed to develop student leaders with skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.
Repeatable to: 9 credits.

BSOS258 Leadership Practicum I (1-6 Credits)
This course puts into practice the elements and skills learned in the seminar series that directly benefit the college.
Repeatable to: 9 credits.

BSOS288 Special Topics in Behavioral and Social Sciences (1-3 Credits)
Introductory special topics course focusing on an interdisciplinary topic related to behavioral and social sciences.
Repeatable to: 6 credits if content differs.

BSOS308 Contemporary Issues: Interdisciplinary Approaches (3 Credits)
An interdisciplinary analysis of current public policy issues of international, national and community import. Senior standing recommended.
Recommended: Must have Senior standing.
Repeatable to: 6 credits if content differs.

BSOS326 Python Programming for the Social Sciences (3 Credits)
Python has become the most powerful programming language in advanced statistics and data analytics. It includes expansive packages for data handling and processing, including the latest developments in machine learning, and offers Integrated Development Environments (IDE) for code development, testing, debugging, and graphical representation. In addition, python is deployed on virtually all high performance computing clusters, taking advantage of multi-processing, large memory, and GPU enhanced computing environments. This course offers a thorough introduction to python and those packages that are fundamental to data processing and analysis, image processing, natural language processing, machine learning.
Prerequisite: Students must have completed a least one college-level statistics course.
Restriction: Restricted to students in the Social Data Science major or by permission of the instructor.

BSOS338 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS348 Leadership Seminar II (1-6 Credits)
A topics course in the behavioral and social sciences designed to develop student leaders with advanced skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.
Repeatable to: 9 credits.

BSOS355 Social Sciences Internship Practicum (3 Credits)
BSOS 355 is an internship course open to all majors. It will enable students to articulate and apply the scholarship from the discipline related to their specific internship placement into a real-work environment.
Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 2.5; and must have completed at least 1 semester at UMD.
Credit Only Granted for: BSOS388I or BSOS355.
Formerly: BSOS388I.

BSOS358 Leadership Practicum II (1-6 Credits)
This course puts into practice the advanced skills and elements learned in the seminar series that directly benefit the college.
Repeatable to: 9 credits.

BSOS385 Big-Data Analysis on the BSOS HPC Cluster (2 Credits)
Social media are a primary source of information on social interaction and personal interests. High-performance computing (HPC) is employed to search for hidden pattern and unknown correlations using advanced machine-learning algorithms available in python and R packages. The main steps of Natural Language Processing and big-data analysis are being worked out, from examining random samples to analyzing large data sets via in-memory Monte-Carlo applications and neural networks.
Prerequisite: Students must have completed a least one college-level statistics course.
Recommended: A working knowledge of python or R is expected.
Restriction: Students must be enrolled in a BSOS major; or permission of instructor.
Credit Only Granted for: BSOS385, BSOS685, or BSOS688B.

BSOS386 Experiential Learning (3-6 Credits)

BSOS388 Behavioral and Social Sciences Special Topics (1-3 Credits)
Advanced special topics course focusing on an interdisciplinary topic related to the Behavioral and Social Sciences.
Repeatable to: 6 credits if content differs.

BSOS399 Directed Study in Behavioral and Social Sciences (1-6 Credits)
Guidance for the advanced student capable of interdisciplinary study on special projects under the supervision of the Assistant Dean for Student Affairs.

BSOS438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS448 Teaching Assistant Practicum (1-6 Credits)
Supervised practicum for teaching assistants for BSOS/UNIV courses.
Repeatable to: 9 credits.

BSST - Terrorism Studies

BSST230 Terrorism and the Media (3 Credits)
Student will investigate the interplay between terrorism around the world and mass media content about terrorism. The course will focus both on how news and entertainment media portray terrorism and terrorists, and the effects of terrorism and media portrayal of terrorism on the public and public policy. This course examines terrorism from historical and contemporary perspectives, providing grounds for learning about and discussion of the interplay between terrorism and communication.
Credit Only Granted for: BSOS288T, BSST230, or BSST288T.
Formerly: BSOS288T and BSST288T.

BSST240 Understanding The Principles and Perils of CBRN Weapons (3 Credits)
Explores the 'dark side' of scientific applications. Students will gain an understanding of CBRN Weapons, through the exploration of the scientific method, and certain fundamental principles of chemistry, biology, and physics. Students will also learn how to test hypotheses, use basic statistics, interpret results, and apply their new knowledge through discussions of practical applications in the domains of public health, emergency management, epidemiology, and threat assessment. Bringing these fields together in one class will allow students to better understand the use of and threat from CBRN weapons in terrorism.
Additional Information: If taken in the same term as BSST241 these courses will count for General Education Natural Sciences Lab.

BSST241 Understanding the Principles and Perils of CBRN Weapons (Lab) (1 Credit)
An exploration of the threat of Chemical, Biological, Radiological, and Nuclear (CBRN) weapons aimed to provide students with a basic, multidisciplinary, natural science foundation in chemistry, biology, and physics.
Corequisite: BSST240.
Additional Information: This is an optional 1-credit lab course offered in coordination with BSST240. If taken in the same term as BSST240 these courses will count for General Education Natural Sciences Lab.

BSST258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSST288 Special Topics in Terrorism Studies (3 Credits)
A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.
Repeatable to: 9 credits if content differs.

BSST330 Terrorism Studies (3 Credits)
Theories explaining the formation of terrorist groups and the motivations behind terrorist behavior, building upon theories from social psychology, sociology, political science, criminology, and history. The course examines the different levels of analysis for terrorism studies, the different methods scholars utilize for research, and the most prominent datasets in the field of homeland security. In addition, this course provides a review of various terrorist groups and ideological movements. The course concludes with an introduction to the different approaches to counter violent extremism and terrorism.
Restriction: Must be in the Global Terrorism Minor; or special permission available for students in other Global Studies minors.

BSST331 Innovations in Counterterrorism (3 Credits)
Explore the manners in which states respond to terrorist incidents and the threat of terrorism through counterterrorism approaches and strategies. We will examine counterterrorism responses from law enforcement, military, and the intelligence community. This will include discussions about policy decisions made in response to both terrorist attacks and the threat of terrorism. Counterterrorism strategies this course will cover include deterrence, interdiction, and legal efforts to combat terrorism, including terrorist financing and online recruitment. The course is divided into four general parts. First, we will provide an overview of government counterterrorism options and review key concepts. Second, we will examine law enforcement responses to terrorism including efforts to counter cyberterrorism, social media recruitment, and terrorist financing online. Third, we will focus on military responses to attacks conducted by terrorist groups, including deterrence strategies, targeted strikes, and covert operations. Last, we will review the challenges and complexities of counterterrorism approaches, including the ethical, moral, and legal dilemmas.
Restriction: Must be in the Terrorism Studies minor program.

BSST332 The Practice of Terrorism Studies (5 Credits)
Capstone course for students in the Global Terrorism Minor. Explores in-depth rigorous approaches to conducting research on terrorism and to developing policy on terrorism and counterterrorism. Examines the interplay between terrorism research and counterterrorism policy. All students will participate in an internship or complete a substantive original research project alongside the courses weekly seminar meeting.
Prerequisite: BSST330 and BSST331.
Restriction: Must be in the Terrorism Studies minor program.

BSST334 States of Emergency (3 Credits)
Students will explore the manner in which crises unfold from the perspective of a variety of emergency response disciplines, including: emergency management, law enforcement, intelligence analysis, cyber analysis, risk communication, health and human services, and emergency psychiatry/psychology. Students will participate in a semester-long simulation of an unfolding terrorist attack.

BSST335 Innovations in Countering Violent Extremism (3 Credits)
Introduces students to novel innovations in the development of Countering Violent Extremism (CVE) programs. CVE is a realm of policy, programs, and interventions designed to prevent individuals from engaging in violence associated with radical political, social, cultural, and/or religious ideologies. Unlike counterterrorism strategies that often focus on targeting and disrupting terrorist plots, CVE focuses on radicalization prevention through engagement and intervention with communities. CVE also focuses on deradicalization and rehabilitation of former extremists. Throughout the course, students will work in groups to develop their own innovative CVE programs, rather than merely learn about CVE through lectures.
Credit Only Granted for: BSST335 or BSST338V.
Formerly: BSST338V.
Additional Information: It is recommended that BSST335 be taken after, or concurrent with, BSST330.

BSST337 Ideology and Social Conditions in the Making of Terrorism (3 Credits)
This class focuses on the relations of ideology with social conditions in the historical context of the Middle East and North Africa in order to explain the process of the rise and domination of Islamist extremism and suicide terrorism as a dominant oppositional discourse in the region. Resting on a cognitive conception of ideology, this class focuses on the process in which ideological discourses shape the making of the terrorist mind.
Credit Only Granted for: BSST338G or BSST337.
Formerly: BSST338G.

BSST338 Special Topics in Terrorism Studies (3 Credits)
A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.
Repeatable to: 9 credits if content differs.

BSST340 Oral Communication for National Security Careers (3 Credits)
Students will discuss perspectives on strategic communication and national security, while discussing and practicing public speaking skills and developing proficiency in three genres of security-related briefings. Students will work with the technical, scientific, and/or specialized data, vocabularies, processes, and products of the academic disciplines and/or fields of expertise relevant to national and international security careers.
Credit Only Granted for: BSST340 or BSST338E.
Formerly: BSST338E.

BSST358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSST370 Financing Terror and Hate (3 Credits)
This course will discuss terrorist financial activities, initiatives focused on countering those financial activities, and sanctions policy. This course approaches these topics through various techniques including, structured analytic tools, such as weighted ranking methods, scenario trees, causal flow diagramming, hypothesis testing, utility analysis, as well as game theory and logic will be incorporated into the course to provide students a better framework to form analytic judgments. At the end of the course, students will have gained a solid foundational understanding of the financing and counter-financing of terrorists.
Credit Only Granted for: BSST370 or BSST338Z.
Formerly: BSST338Z.

BSST372 Terrorist Hostage Taking (3 Credits)
Examines different forms of hostage taking, drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. We will consider these events in terms of how they are similar, how they differ and what they are designed to achieve. This course provides insights into the complicated nature of terrorism via hostage taking in order to broaden student understanding of current events. This course also gives students practical experience in finding and coding data, and studying complex human behaviors.

BSST374 Political Assassinations (3 Credits)
Course topics include political assassinations, their consequences, and the possible means for their prevention, from profiling assassins to protection of potential targets. Research on political assassinations has developed from many different disciplines and so we will be drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. In each lecture we will review the scholarly issues associated with political assassinations as well as considering the practical, counter attack challenges faced by security and law enforcement.

BSST377 Applying Theory to the Practice of Countering Terrorism (1 Credit)
Focuses on current events related to terrorism and counterterrorism, as they are discussed in mass media, and the implications of those current events on the ethical and professional conduct of the counterterrorism community. Through a discussion-based seminar, students will bring current, terrorism-related events to classroom discussion, where they will consider the media-framed current events in relation to academic research. Students will be continually challenged to draw connections between terrorism-related events in the news and relevant academic research. Furthermore, this class will use vignettes based in current events to present students with real-world ethical dilemmas that those in the professional counterterrorism community and broader national security community have to confront.
Recommended: BSST330.
Restriction: Restricted to students enrolled in the Global Terrorism Minor (#BS07).
Credit Only Granted for: BSST327, BSST377, or BSST399K.
Formerly: BSST327.
Additional Information: It is recommended that this course be taken in the final semester in the minor program.

BSST386 Experiential Learning in Terrorism Studies (1-5 Credits)
This course will supplement student's experiential learning experience, or internship in the field of terrorism studies and homeland security with guided reflection on their experiences.

BSST389 Internship in Terrorism Studies (1-6 Credits)
Supplements student's experiential learning experience, or internship in the field of terrorism studies and homeland security, with guided reflection on their experiences.
Restriction: Must have earned a minimum cumulative GPA of 2.5.
Repeatable to: 9 credits.

BSST391 Social Network Analysis of Terrorism (1 Credit)
The concept of networks has become central to many discussions of terrorism and political violence research. However, use of the term is rarely backed with theoretical and empirical analysis of actual networks. This course will instruct students in the basics of social network analysis and how to apply SNA methods in the field of terrorism studies.
Credit Only Granted for: BSST391 or BSST399N.
Formerly: BSST399N.

BSST398 Individual Study in Terrorism Studies II (1-3 Credits)
An independent study course for START Students.
Repeatable to: 9 credits if content differs.

BSST399 Individual Study in Terrorism Studies (1-3 Credits)
An independent study course for students in the Global Terrorism Minor program.
Repeatable to: 9 credits if content differs.

BSST458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS - Criminology and Criminal Justice

CCJS100 Introduction to Criminal Justice (3 Credits)
Introduction to the administration of criminal justice in a democratic society, with emphasis on the theoretical and historical development of law enforcement. The principles of organization and administration for law enforcement; functions and specific activities; planning and research; public relations; personnel and training; inspection and control; direction; policy formulation.

CCJS105 Introduction to Criminology (3 Credits)
Criminal behavior and the methods of its study; causation; typologies of criminal acts and offenders; punishment, correction and incapacitation; prevention of crime.

CCJS158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS188 Topics in Criminology and Criminal Justice (3 Credits)
Contemporary and emerging crimes and the response to them by criminal justice agencies. Emphasis is on the emergence of new forms of crimes or criminals.
Prerequisite: CCJS100 or CCJS105.
Repeatable to: 6 credits if content differs.

CCJS200 Statistics for Criminology and Criminal Justice (3 Credits)
Introduction to descriptive and inferential statistics, graphical techniques, and the computer analysis of criminology and criminal justice data. Basic procedures of hypothesis testing, correlation and regression analysis, and the analysis of continuous and binary dependent variables. Emphasis upon the examination of research problems and issues in criminology and criminal justice.
Prerequisite: CCJS100 or CCJS105; and 1 course with a minimum grade of C- from (STAT100, MATH107, MATH111, MATH120, MATH130, MATH135, MATH140).
Restriction: Must be in Criminology and Criminal Justice program; or permission of BSOS-Criminology & Criminal Justice department.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

CCJS225 Responses to Violence (3 Credits)
Conflict is unfortunately resolved through violence in a number of settings. It ranges from interpersonal to international in its scope. This course investigates the strengths and weakness of a number of resolutions to reducing violence over the course of history using both state centered and informal control.

CCJS226 Out of Lock Up: Breaking the Cycle (3 Credits)
Offender reentry in the United States. Examination of experiences of prisoners during and after incarceration. Research on the experiences of special offending populations including females, juveniles, and young adults. Exploration of reentry challenges, historical trends, policy, and practice.

CCJS230 Criminal Law in Action (3 Credits)
Law as one of the methods of social control. Criminal law: its nature, sources and types; theories and historical developments. Behavioral and legal aspects of criminal acts. Classification and analysis of selected criminal offenses.
Prerequisite: CCJS100.

CCJS234 Law of Criminal Investigation (3 Credits)
General principles and theories of criminal procedure. Due process. Arrest, search and seizure. Recent developments. Study and evaluation of evidence and proof.
Prerequisite: CCJS100 and CCJS230.

CCJS258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS278 Special Topics in Criminology and Criminal Justice (3 Credits)
Topics of special interest to undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest. May be delivered online.
Repeatable to: 6 credits if content differs.

CCJS288 Special Topics in Law and Justice (3 Credits)
An analysis of recent developments in criminal law and their implications for criminal justice systems and research. Focus will be on Supreme Court decisions and legislative initiatives.
Prerequisite: CCJS105 and CCJS230.
Repeatable to: 6 credits if content differs.

CCJS300 Criminological and Criminal Justice Research Methods (3 Credits)
Introduction to the formulation of research questions covering crime and justice, research designs, data collection, and interpretation and reporting in criminological and justice-system settings.
Prerequisite: CCJS100 and CCJS105; and (PSYC200, CCJS200, ECON321, BMGT230, or SOCY201).

CCJS301 Fundamentals in Criminal Justice (3 Credits)
Provides an overview of the three major components of the American criminal justice system: police, courts, and corrections. Each component will be explored in its development over time as well as various issues surrounding each component. This course will also cover important issues that are relevant to current debates including race, reentry, technology and crime, juvenile justice, and future directions for criminal justice.
Restriction: Must be enrolled at The Universities at Shady Grove; and must be in the Criminal Justice minor; or by permission of department; and must not be in the Criminology and Criminal Justice major.

CCJS310 Criminal Investigations (3 Credits)
An introduction to modern methods used in detection, investigation, and solution of crime. Students will be taught basic and advanced investigative techniques utilized by law enforcement agencies. Analysis of actual cases will be used to demonstrate practical uses of these techniques.
Prerequisite: CCJS100 and CCJS230.

CCJS318 Special Topics in Criminology & Criminal Justice (3 Credits)
Special topics in various aspects of the field of criminology and criminal justice will be covered.
Repeatable to: 15 credits if content differs.

CCJS320 Introduction to Criminalistics (3 Credits)
An introduction to modern methods used in the detection, investigation and solution of crimes. Practical analysis of evidence in a crime laboratory, including fingerprints and other impressions, firearms ID and ballistics, hairs and fibers, document examination, and use of polygraph.
Prerequisite: CCJS100 and CCJS230.

CCJS325 Slavery in the Twenty First Century: Combating Human Trafficking (3 Credits)
The trafficking of human beings in its historical, legal, economic, political and social contexts. Scope of the global problem, different forms of human trafficking, and regional trends and practices. Roles of government, the international community and individual actors. Strategies to combat trafficking.

CCJS330 Contemporary Criminological Issues (3 Credits)
Topics may include career criminals, prison overcrowding, prediction, ecological studies of crimes, family and delinquency, entrepreneurship in criminal justice and criminology, and similar criminological problems.
Prerequisite: CCJS100 and CCJS105.

CCJS331 Contemporary Legal Policy Issues (3 Credits)
In-depth examination of selected topics. Criminal responsibility. Socio-legal policy alternatives with regard to deviance. Law enforcement procedures for civil law and similar legal problems. Admissibility of evidence. Representation. Indigent's right to counsel.
Prerequisite: CCJS100 and CCJS230.

CCJS332 Major Transitions: From Undergraduate to Professional (1 Credit)
This course is designed to assist criminology and criminal justice students explore career opportunities. Topics will include: graduate school, law school, career opportunities in federal, state, local, and public agencies, resume writing, and internships.
Restriction: Must be in Criminology and Criminal Justice program; and sophomore standing or higher.

CCJS340 Policing (3 Credits)
Critical issues relating to policing. Topics include police discretion, role of police, use of force, misconduct, police research, administration, personnel, and etc.
Prerequisite: CCJS100.

CCJS342 Corrections (3 Credits)
Examination of the American correctional system. Identification of historical and contemporary themes, issues, and trends. Evaluation of correctional policies, practices and research.
Prerequisite: CCJS100.
Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.
Credit Only Granted for: CCJS342 or CCJS452.

CCJS345 Courts and Sentencing (3 Credits)
Contemporary issues in the American court system such as prosecution, sentencing and punishment. Theoretical perspectives on courtroom decision-making integrated with empirical research. Courts and sentencing processes, including initial charging, pretrial detention and final sentencing outcomes. Innovations in courts and sentencing.
Prerequisite: CCJS100.
Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.

CCJS346 Domestic Violence (3 Credits)
A thorough and critical examination of family violence. Topics include the historical background to family violence, methods of studying this serious issue, elder abuse, child abuse, the cultural factors involved in intimate partner violence, violence in same-sex relationships, and the criminal justice response to family violence. Although the course focuses on the American family, illustrations from other cultures are provided.
Prerequisite: CCJS100.
Credit Only Granted for: CCJS346 or CCJS498Y.
Formerly: CCJS498Y.

CCJS350 Juvenile Delinquency (3 Credits)
Juvenile delinquency in relation to the general problem of crime; analysis of factors underlying juvenile delinquency; treatment and prevention; organization and social responsibility of law enforcement.
Prerequisite: CCJS105.
Credit Only Granted for: CCJS350 or CCJS450.

CCJS352 Drugs and Crime (3 Credits)
An analysis of the role of criminal justice in the control of drug use and abuse.
Prerequisite: CCJS100.

CCJS358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS359 Field Training in Criminology and Corrections (1-6 Credits)
Supervised field training in public or private social agencies. Group meetings, individual conferences and written program reports.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS360 Victimology (3 Credits)
Overview of the history and theory of victimology. Analysis of victimization patterns with special emphasis on types of victims and crimes. The interaction between victims of crime and the criminal justice system with respect to the role of the victim and the services offered to the victim.
Prerequisite: CCJS105.

CCJS370 Race, Crime and Criminal Justice (3 Credits)
Role and treatment of racial/ethnic minorities in the criminal justice system. Course will provide students with historical and theoretical framework for understanding this dynamic.
Prerequisite: CCJS100.

CCJS386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-Criminology & Criminal Justice department; and junior standing or higher.

CCJS388 Independent Reading Course in Criminology and Criminal Justice (3 Credits)
Designed for the needs of honor students in criminology and criminal justice.
Prerequisite: CCJS100 and CCJS105.
Restriction: Must be in the Honors program.

CCJS389 Independent Research in Criminology and Criminal Justice (1-6 Credits)
Independent Research for CCJS Departmental Honors students.
Prerequisite: CCJS105.
Restriction: Must be in CCJS Honors Program.
Repeatable to: 6 credits if content differs.

CCJS398 Law Enforcement Field Training (1-6 Credits)
Supervised, structured and focused field training in law enforcement agencies.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS399 Independent Study in Criminology and Criminal Justice (1-3 Credits)
Integrated reading or research under direction and supervision of a faculty member.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS418 Seminar in Criminology and Criminal Justice (3 Credits)
Selected topics of interest in the field of Criminology and Criminal Justice will be covered.
Repeatable to: 18 credits if content differs.

CCJS428 Special Topics in Criminology and Criminal Justice (3 Credits)
Topics in various aspects of the field of criminology and criminal justice will be covered.
Repeatable to: 18 credits if content differs.

CCJS440 Security Administration (3 Credits)
Designed to introduce students to the complex issues of Security Administration and the critical terrorism issues facing the nation. Emphasis is placed on understanding the historical and contemporary issues effecting U.S. Counterterrorism Policy. It also explores the challenges facing today's security administrators including: ethics, classified information, intelligence, terrorist organizations and incidents, physical and personnel security, transportation and border security issues.
Prerequisite: CCJS100 and CCJS340.
Credit Only Granted for: CCJS440 or CCJS498Z.
Formerly: CCJS498Z.

CCJS444 Advanced Law Enforcement Administration (3 Credits)
The structuring of manpower, material, and systems to accomplish the major goals of social control. Personnel and systems management. Political controls and limitations on authority and jurisdiction.
Prerequisite: CCJS100 and CCJS340.

CCJS450 Advanced Juvenile Delinquency (3 Credits)
Examination of juvenile delinquency in the United States. Nature and extent of juvenile delinquency, historical approaches, sociological and criminological theories and research, social contexts including the institutions of families, schools, and peers, and social responses. Prevention, punishment, and treatment programs, both within and outside of the juvenile justice and criminal justice systems.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS350 or CCJS450.

CCJS451 Crime and Delinquency Prevention (3 Credits)
Methods and programs in prevention of crime and delinquency.
Prerequisite: CCJS105 and CCJS300.

CCJS452 Treatment of Criminals and Delinquents (3 Credits)
Processes and methods used to modify criminal and delinquent behavior.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS 342 or CCJS 452.

CCJS453 White Collar and Organized Crime (3 Credits)
Definition, detection, prosecution, sentencing and impact of white collar and organized crime. Special consideration given to the role of federal law and enforcement practices.
Prerequisite: CCJS300; and (CCJS350 or CCJS105).

CCJS454 Contemporary Criminological Theory (3 Credits)
Examination of the main theoretical accounts that explain the underlying causes of criminal behaviors. Explore how individual choices, socialization experiences, biological factors and social structure affect criminal behaviors.
Prerequisite: CCJS300 and CCJS105.

CCJS455 Dynamics of Planned Change in Criminal Justice I (3 Credits)
An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on the development of innovative ideas using a research and development approach to change.
Prerequisite: CCJS300.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS456 Dynamics of Planned Change in Criminal Justice II (3 Credits)
An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on change strategies and tactics which are appropriate for criminal justice personnel in entry level positions.
Prerequisite: CCJS455; or permission of BSOS-Criminology & Criminal Justice department.

CCJS458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS461 Psychology of Criminal Behavior (3 Credits)
Biological, environmental, and personality factors which influence criminal behaviors. Biophysiology and crime, stress and crime, maladjustment patterns, psychoses, personality disorders, aggression and violent crime, sex-motivated crime and sexual deviations, alcohol and drug abuse, and criminal behavior.
Prerequisite: CCJS105 and CCJS300.

CCJS489 Honors Thesis Research (3 Credits)
Designed for students completing their honors thesis.
Prerequisite: CCJS100 and CCJS105.
Restriction: Limited to CCJS Departmental Honors students.
Repeatable to: 6 credits.

CCJS498 Selected Topics in Criminology and Criminal Justice (3 Credits)
Topics of special interest to advanced undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest.
Repeatable to: 6 credits if content differs.

CHBE - Chemical and Biomolecular Engineering

CHBE100 Exploring ChBE (1 Credit)
Overview of the specializations and career paths available in chemical and biomolecular engineering. Academic planning, policies and resources will be covered including introduction to undergraduate research, study abroad, internship and co-op opportunities as well as chemical engineering student groups. A peer mentoring program will enable students to interact with successful upper-class chemical engineering students and build their chemical engineering peer network.
Prerequisite: Permission of instructor; and permission of ENGR-Chemical & Biomolecular Engineering department.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

CHBE101 Introduction to Chemical and Biomolecular Engineering (3 Credits)
Introduction to methods of chemical engineering calculations and analysis. Stoichiometric relations, material and energy balances, and behavior of gases, vapors, liquids and solids. Analytical and computer methods.
Prerequisite: CHEM135; or students who have taken courses with comparable content may contact the department.
Corequisite: MATH141.
Restriction: Must be in Engineering: Chemical program; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE101 or ENCH215.
Formerly: ENCH215.

CHBE250 Computer Methods in Chemical Engineering (3 Credits)
Algorithm development and application of software to the analysis of chemical engineering problems. File management and editing, graphics and numerical methods. Use of spreadsheets, statistics/math software and process simulators for the design of chemical process equipment.
Prerequisite: CHBE101; and must have completed or be concurrently enrolled in MATH241.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE250 or ENCH250.
Formerly: ENCH250.

CHBE301 Chemical and Biomolecular Engineering Thermodynamics I (3 Credits)
Principles of thermodynamics and their application to engineering problems. First and second laws of thermodynamics, properties of gases, liquids and solids, phase equilibrium, flow and non-flow systems, energy conversion, production of work from heat, thermodynamic analysis of processes, equilibrium stage operations and the thermodynamics of chemically reacting systems.
Prerequisite: CHBE101; and must have completed or be concurrently enrolled in CHBE250 and MATH241.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH300 or CHBE301.
Formerly: ENCH300.

CHBE302 Chemical and Biomolecular Engineering Thermodynamics II (3 Credits)
Contemporary trends in chemical engineering thermodynamics that bridge the gap between fundamentals and applications. Thermodynamic analysis of non-ideal and structured systems; such as complex fluids, strongly fluctuating and nanoscale systems, dissipative systems, biosystems, and systems under extreme conditions.
Prerequisite: CHBE301.
Corequisite: CHBE250.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE302 or ENCH400.
Formerly: ENCH400.

CHBE333 Chemical Engineering Seminar (1 Credit)
To develop oral communication skills through a series of class presentations of current chemical engineering topics.
Restriction: Junior standing; and must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE333 or ENCH333.
Formerly: ENCH333.

CHBE369 Teaching Experiences in Chemical Engineering (1-2 Credits)
Students will obtain pedagogical experience by assisting with the teaching of undergraduate courses in Chemical and Biomolecular Engineering.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Repeatable to: 8 credits.

CHBE409 Undergraduate Honors Seminar (1 Credit)
Students will attend and write summaries of departmental seminars, along with professional development activities
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and Permission of ENGR-Chemical & Biomolecular Engineering department; and Must be in the Chemical Engineering Honors Program.
Repeatable to: 2 credits.

CHBE410 Statistics and Design of Experiments (3 Credits)
An introduction to probability, statistics, and design of experiments for chemical engineers.
Prerequisite: Minimum grade of C- in CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE410 or ENCH476.
Formerly: ENCH476.

CHBE422 Chemical and Biomolecular Engineering Transport Phenomena I (3 Credits)
Principals of fluid dynamics as applied to model development and process design. Mass, momentum and energy conservation. Statics and surface tension. Equation of Continuity and Navier-Stokes Equation with application to laminar flow. Dimensional analysis. Macroscopic balances, Bernoulli Equation and friction factors with application to turbulent flow.
Prerequisite: Minimum grade of C- in CHBE101, CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE422 or ENCH422.
Formerly: ENCH422.

CHBE424 Chemical and Biomolecular Engineering Transport Phenomena II (3 Credits)
Principles of mass and heat transfer as applied to model development and process design. Species continuity equation with application to diffusion, and convection in laminar flow. Macroscopic balances and mass transfer coefficients with application to turbulent flow. Microscopic equation of energy with application to heat conduction, and convection in laminar flow. Macroscopic energy balance and heat transfer coefficients with application to turbulent flow. Heat exchanger design.
Prerequisite: CHBE422.
Corequisite: CHBE302.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE424 or ENCH424.
Formerly: ENCH424.

CHBE426 Chemical and Biomolecular Separation Processes (3 Credits)
Separation by stages operations. Rate dependent separation processes. Design application in distillation, gas absorption, liquid extraction, drying, adsorption and ion exhange.
Corequisite: CHBE302; and CHBE424.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE426 or ENCH426.
Formerly: ENCH426.

CHBE437 Chemical and Biomolecular Engineering Laboratory (3 Credits)
Application of chemical engineering process and unit operation principals in small-scale semi-commercial equipment. Data from experimental observations are used to evaluate performance and efficiency of operations. Emphasis on correct presentation of results inreport form.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE437 or ENCH437.
Formerly: ENCH437.

CHBE440 Chemical Kinetics and Reactor Design (3 Credits)
Fundamentals of chemical reaction kinetics and their application to the design and operation of chemical reactors. Reaction rate theory, homogeneous reactions and catalysis electrochemical reactions. Catalytic reactor design.
Prerequisite: Minimum grade of C- in CHBE301, MATH241, and MATH246.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE440 or ENCH440.
Formerly: ENCH440.

CHBE442 Chemical and Biomolecular Systems Analysis (3 Credits)
Dynamic response applied to process systems. Goals and modes of control, Laplace transformations, analysis and synthesis of simple control systems, closed loop response, dynamic testing.
Prerequisite: CHBE424 and CHBE426.
Credit Only Granted for: CHBE442 or ENCH442.
Formerly: ENCH442.

CHBE444 Process Engineering Economics and Design I (3 Credits)
Principles of chemical engineering economics and process design. Equipment sizing and costing. Economic evaluation of projects. Flowsheet synthesis. Introduction to flowsheet simulators and concepts of flowsheet optimization. Synthesis of Heat Exchanger Networks and Distillation Sequences.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE444 or ENCH444.
Formerly: ENCH444.

CHBE446 Process Engineering Economics and Design II (3 Credits)
Application of chemical engineering principles for the design of chemical processing equipment. Representative problems in the design of chemical plants will be the focus of this capstone design class. Comprehensive reports are required.
Prerequisite: CHBE442 and CHBE444.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE446 or ENCH446.
Formerly: ENCH446.

CHBE451 Photovoltaics: Solar Energy (3 Credits)
The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE651.
Credit Only Granted for: ENCH468L, CHBE451 or CHBE651.
Formerly: ENCH468L.

CHBE452 Introduction of Machine Learning in Chemical Engineering (3 Credits)
Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.
Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.
Restriction: Permission of Department or Instructor. Jointly offered with: CHBE652.
Credit Only Granted for: CHBE452 or CHBE652.

CHBE453 Applied Mathematics and Distributive Parameter Systems (3 Credits)
Mathematical techniques applied to the analysis and solution of chemical engineering problems. Use of differentiation, integration, differential equations, partial differential equations and integral transforms. Application of infinite series, numerical and statistical methods.
Credit Only Granted for: CHBE453 or ENCH453.
Formerly: ENCH453.

CHBE454 Chemical Process Analysis and Optimization (3 Credits)
Application of mathematical models to the analysis and optimization of chemical processes. Models based on transport, chemical kinetics and other chemical engineering principles will be employed.
Credit Only Granted for: CHBE454 or ENCH454.
Formerly: ENCH454.

CHBE455 Model Predictive Control (3 Credits)
Empirical model identification from process data. Step and impulse response models. Linearization of nonlinear first principles models. Single variable Model Predictive Control. Robustness with respect to modeling error. MPC based tuning of PID controllers. Feedforward control. Multi-input multi-output processes. Multi-loop decentralized control. Centralized multivariable Model Predictive Control via on-line optimization.
Credit Only Granted for: CHBE455 or ENCH455.
Formerly: ENCH455.

CHBE457 Design and Processing of Polymers for Biomedical Devices (3 Credits)
An overview of the design and processing of polymers used in medical applications. Following a discussion of the physical and mechanical properties of polymers, important classes of polymeric biomaterials will be surveyed, discussing material synthesis, processing techniques and equipment, as well as properties and performance in biomedical applications. Topics will include silicone elastomers, hydrogels, ultra-high molecular weight polyethylene, polyurethanes, polyureas, polyesters, degradable and resorbable polymeric biomaterial designs used in surgery and drug delivery, polymers for ophthalmologic and orthopedic applications, and biopolymers such as silks and collagen. Finally, the design of major industrial polymer processing equipment will be covered, and the fundamentals of extrusion, calendering, coating, fiber spinning, film blowing, and injection molding processes will be presented.
Prerequisite: MATH246; and CHEM231; and (CHBE301, ENMA461, or BIOE232).
Recommended: Knowledge of basic fluid dynamics: CHBE422/BIOE331 or equivalent.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

CHBE468 Research (1-3 Credits)
Investigation of a research project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits.
Formerly: ENCH468.

CHBE469 Special Projects (1-3 Credits)
Special project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits if content differs.

CHBE470 Colloid and Interface Science (3 Credits)
Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.
Prerequisite: CHBE424 and CHBE426.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE670.
Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.

CHBE471 Particle Science and Technology (3 Credits)
Particles are everywhere. We breathe them, eat them, and use them to make many non-particulate materials. Knowledge of particle science and technology is important for manufacturing, for occupational health and safety, as well as environmental considerations. In this multidisciplinary course, the focus will be on the study of science and technology relevant to multiphase systems consisting of solid and/or liquid particles surrounded by a gas. These topics fall loosely under the headings of powder and aerosol technology. Team design projects will be an integral component.
Prerequisite: Knowledge of undergraduate engineering thermodynamics, and transport phenomena; knowledge of numerical methods for solving systems of ordinary differential equations.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE471 or ENCH471.
Formerly: ENCH471.

CHBE472 Control of Air Pollution Sources (3 Credits)
Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE672.
Credit Only Granted for: CHBE472, CHBE672 or ENCH672.

CHBE473 Electrochemical Energy Engineering (3 Credits)
The lecture will start from the basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE673.
Credit Only Granted for: ENCH468K, CHBE473 or CHBE673.
Formerly: ENCH468K.

CHBE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)
Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.
Prerequisite: BIOE120; and permission of instructor.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE674.
Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.

CHBE475 Ethics in Science and Engineering (3 Credits)
Ethical issues in science and engineering and their resolutions are examined. The main topics will be ethics and scientific truth (including issues of proper data analysis, proper data presentation, and record-keeping), ethics and other scientists and engineers (including issues of attribution, confidentiality, conflicts of interest, mentoring, and inclusion of under-represented groups), ethics and the practice of engineering (including responsibilities of engineers to clients, ecological issues, and conflicts of interest), and ethics and society (including funding priorities, moral issues, and human and animal subjects). Class meetings will be organized around discussions, case studies, and student reports. The course is aimed at postdoctoral students, graduate students and advanced undergraduate students who wish to ponder the important contemporary questions about the ethics of how science and engineering get done.
Credit Only Granted for: CHBE475 or ENCH475.
Formerly: ENCH475.

CHBE476 Molecular Modeling Methods (3 Credits)
Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE476.
Credit Only Granted for: ENCH648P, CHBE476 or CHBE676.
Formerly: ENCH468P.

CHBE477 Mesoscopic and Nanoscale Thermodynamics (3 Credits)
Interdisciplinary course primarily for graduate and senior undergraduate students from engineering or science departments. New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artifical organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.
Prerequisite: A prior course in classical thermodynamics.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE477.
Credit Only Granted for: CHBE477, ENCH468Q or CHBE677.
Formerly: ENCH468Q.

CHBE480 Bionanotechnology: Physical Principles (3 Credits)
Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important for biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer structures useful in medicine. Targeted delivery of drugs, genes by nano/micro structures. Cellular assembly in the eye, in insect wings. Cellular assembly at surfaces: gecko feet, duck feathers. Cellular assembly in the presence of crystals: biomineralization.
Prerequisite: BIOE120; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE680.
Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.

CHBE481 Transport Phenomena in Small and Biological Systems (3 Credits)
Interdisciplinary course primarily for senior undergraduate and graduate students from engineering or science departments. The course's main goal is to make the students familiar with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE681.
Credit Only Granted for: ENCH468W, CHBE481 or CHBE681.
Formerly: ENCH468W.
Additional Information: Adding graduate course to jointly offered and credit only granted for fields.

CHBE482 Biochemical Engineering (3 Credits)
Introduction to biochemical and microbiological applications to commericail and engineering processes, including industrial fermentation, enzymology, ultrafiltration, food and pharmaceutical processing and resulting waste treatment. Enzyme kinetics, cell growth, energetics and mass transfer.
Prerequisite: CHBE440.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE482 or ENCH482.
Formerly: ENCH482.

CHBE483 Bioseparations (3 Credits)
Engineering fundamentals of separations and purification of biological molecules. Case studies and examples illustrate principles and practice of centrifugation, precipitation, crystallization, filtration, membrane separations, chromatography, and affinity separation of recombinant proteins and other biomolecules. Process scale-up and economics of biotechnology products and processes.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH483 or CHBE483.
Formerly: ENCH483.

CHBE484 Metabolic Pathway Engineering (3 Credits)
The state-of-the-art in metabolic engineering, with a focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: (1) overview of biochemistry and metabolism; (2) metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; (3) technologies for engineering metabolic pathways; (4) metabolic control analysis and pathway regulation; (5) applications of metabolic engineering to synthesis of biofuels and therapeutics; (6) specialized and related subjects such as protein engineering and synthetic biology.
Prerequisite: CHBE101 and CHBE440.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE684.
Credit Only Granted for: ENCH468M, CHBE484 or CHBE684.
Formerly: ENCH468M.

CHBE485 Biochemical Engineering Laboratory (3 Credits)
Techniques of measuring pertinent parameters in fermentation reactors, quantification of production variables for primary and secondary metabolites such as enzymes and antibiotics, the insolubilization of enzymes for reactors, and the demonstration of separation techniques such as ultrafiltration and affinity chromatography.
Credit Only Granted for: CHBE485 or ENCH485.
Formerly: ENCH485.

CHBE486 Heterogeneous Catalysis for Energy Applications (3 Credits)
Introduction to heterogeneous catalytic science and technology for energy conversion and hydocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogenious reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO2 utilization will be introduced.
Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE486, CHBE686 or ENCH686.

CHBE487 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and MATH241.
Recommended: BSCI330 and BIOE340.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE411, CHBE487, or ENCH468T.
Formerly: ENCH468T.

CHBE490 Polymer Science (3 Credits)
The elements of the polymer chemistry and industrial polymerization, polymer structures and physics, thermodynamics of polymer solutions, polymer processing methods, and engineering applications of polymers.
Credit Only Granted for: CHBE490, ENCH490, or ENMA495.
Formerly: ENCH490.

CHBE495 Nanoparticle Aerosol Dynamics and Particle Technology (3 Credits)
NanoParticles (NA) (< 100 nm), and their science and technology play an important role in nature and industry. From air quality standards, nuclear reactor safety, inhalation therapy, workplace exposure, global climate change, to counterterrorism, aerosols play a central role in our environment. On the industrial side, NA plays an integral part of reinforcing fillers, pigments and catalysts, and the new emerging field of nanotechnology, they are the building blocks to new materials, which encompass, electronic, photonic and magnetic devices, and bio and chemical sensors.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE496 Processing and Engineering of Polymers (3 Credits)
A comprehensive analysis of processing and engineering techniques for the conversion of polymeric materials into useful products. Evaluation of the performance of polymer processes, design of polymer processing equipment.
Credit Only Granted for: CHBE496 or ENCH496.
Formerly: ENCH496.

CHBE497 Protein Engineering (3 Credits)
This course will cover the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.
Prerequisite: BIOE120, CHBE302, and CHBE440; and permission of instructor. Jointly offered with: CHBE697.
Credit Only Granted for: CHBE497, BIOE489R, ENCH 648P or CHBE697.

CHEM - Chemistry

CHEM131 Chemistry I - Fundamentals of General Chemistry (3 Credits)
An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM131 is the first course in a four-semester sequence for students majoring in the sciences, other than Chemistry and Biochemistry majors.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: CHEM132.
Recommended: For Science majors.
Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM153 or CHEM146.
Formerly: CHEM103.

CHEM132 General Chemistry I Laboratory (1 Credit)
Introduction to the quantification of chemical substances, including the concept of the mole and chemical stoichiometry. Additional work involves the synthesis of ionic substances and their qualitative characterization. Must be taken concurrently with CHEM131.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: CHEM131.
Credit Only Granted for: CHEM103, CHEM132, CHEM136, CHEM143, CHEM147 or CHEM177.
Formerly: CHEM103.

CHEM134 Chemical Principles for Engineering (1 Credit)
Basic chemistry for engineering students. Introduction to organic structures and polymers, gas laws, liquids, solids, phase changes, chemical kinetics and electrochemistry.
Prerequisite: Minimum grade of C- in CHEM131; or minimum grade of C- in CHEM146.
Credit Only Granted for: CHEM 134 or CHEM 135.

CHEM135 General Chemistry for Engineers (3 Credits)
The nature and composition of matter, solutions, chemical reactions, equilibria, and electrochemistry, with applications to various fields of engineering.
Prerequisite: Must have math eligibility of MATH120 or higher.
Credit Only Granted for: CHEM103, CHEM113, CHEM131, CHEM135, or CHEM146.

CHEM136 General Chemistry Laboratory for Engineers (1 Credit)
A laboratory course for engineering majors intending to take CHEM231 and CHEM232.
Prerequisite: Must have completed or be concurrently enrolled in CHEM135 and must have math eligibility of MATH120 or higher.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

CHEM146 Principles of General Chemistry (3 Credits)
An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM146 is the first course in a four-semester sequence for Chemistry and Biochemistry majors.
Prerequisite: Must have math eligibility of MATH140 or higher.
Corequisite: CHEM177.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM143, or CHEM146.
Formerly: CHEM143.

CHEM177 Introduction to Laboratory Practices and Research in the Chemical Sciences (2 Credits)
First semester laboratory course required for CHEM and BCHM majors. Introduction to laboratory techniques, including safety practices, scientific ethics, and presentation of current research topics.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: CHEM146, CHEM131, or CHEM135.
Restriction: Must be in a major within CMNS-Chemistry & Biochemistry department; or permission of CMNS-Chemistry & Biochemistry department.
Credit Only Granted for: CHEM132, CHEM136, CHEM147, or CHEM177.

CHEM231 Organic Chemistry I (3 Credits)
The chemistry of carbon: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters and spectroscopy.
Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, CHEM147, or CHEM177); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM232.
Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.
Formerly: CHEM233.

CHEM232 Organic Chemistry Laboratory I (1 Credit)
Provides experience in developing some basic laboratory techniques, recrystallization, distillation, extraction, chromatography.
Prerequisite: CHEM131 and CHEM132; or (CHEM135 and CHEM136); or (CHEM146 and CHEM147). And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM231.
Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.
Formerly: CHEM233.

CHEM237 Principles of Organic Chemistry I (4 Credits)
The chemistry of carbons: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters, and spectroscopy.
Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, or CHEM147); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students. Or permission of CMNS-Chemistry & Biochemistry department.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry) ; or must be in a major in ENGR-A. James Clark School of Engineering.
Credit Only Granted for: CHEM233, (CHEM231 and CHEM232), or CHEM237.

CHEM241 Organic Chemistry II (3 Credits)
A continuation of CHEM231 with emphasis on molecular structure; substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.
Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Credit Only Granted for: CHEM241, CHEM243 or CHEM247.
Formerly: CHEM243.

CHEM242 Organic Chemistry Laboratory II (1 Credit)
Synthetic organic chemistry through functional group manipulation, introduction to instrumentation essential to analysis and structure elucidation.
Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM241.
Credit Only Granted for: CHEM243 or CHEM247.
Formerly: CHEM243.

CHEM247 Principles of Organic Chemistry II (4 Credits)
A continuation of CHEM237 with emphasis on molecular structure, substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.
Prerequisite: Minimum grade of C- in CHEM237; or permission of CMNS-Chemistry & Biochemistry department.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry) ; or must be an honors student.
Credit Only Granted for: CHEM243 or CHEM247.

CHEM271 General Chemistry and Energetics (2 Credits)
An introduction to the physical aspects of chemistry; chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.
Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM272.
Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.
Formerly: CHEM113.

CHEM272 General Bioanalytical Chemistry Laboratory (2 Credits)
An introduction to analytical chemistry with an emphasis on bio-analytical instrumentation and techniques.
Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM271.
Credit Only Granted for: CHEM227, CHEM272 or CHEM277.

CHEM276 General Chemistry and Energetics - Majors (2 Credits)
An introduction to the physical aspects of chemistry for Biochemistry and Chemistry majors. Chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.
Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.
Corequisite: CHEM277.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.
Formerly: CHEM153.

CHEM277 Fundamentals of Analytical and Bioanalytical Chemistry Laboratory (3 Credits)
Quantitative analysis, inorganic analytical chemistry, and an introduction to bio-analytical instrumentation and techniques.
Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.
Corequisite: CHEM276.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM153, CHEM227, CHEM272 or CHEM277.

CHEM386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CHEM389 Pedagogy and Instruction in Chemistry (1-2 Credits)
Methodologies, theory and educational tools applicable to the field of undergraduate chemistry education. Examples covered will use content from introductory general and organic chemistry courses.
Prerequisite: Permission of instructor; and minimum grade of B- in CHEM231; and must have completed or be concurrently enrolled in CHEM241.
Repeatable to: 6 credits.

CHEM395 Professional Issues in Chemistry and Biochemistry (1 Credit)
Seminar on professional issues. Professional responsibilities, ethics, interview techniques, career opportunities, graduate/professional school, race and gender issues.
Restriction: Junior standing or higher; and must be in one of the following programs (Chemistry; Biochemistry).

CHEM398 Special Projects (2 Credits)
Honors projects for undergraduate students.

CHEM399 Introduction to Chemical Research (1-3 Credits)
Basic (chemical) research conducted under the supervision of a faculty member.
Restriction: Junior standing or higher; and permission of CMNS-Chemistry & Biochemistry department.
Repeatable to: 6 credits.

CHEM401 Inorganic Chemistry (3 Credits)
An overview of basic concepts of the electronic structure of the elements, chemical bonding and reactivity, from simple diatomic molecules to coordination compounds. These are viewed from simple (Lewis) to the most comprehensive molecular orbital theory. Symmetry and group theory are used throughout the course.
Prerequisite: CHEM276 or CHEM271; and (CHEM247 or CHEM241).

CHEM403 Radiochemistry (3 Credits)
Radioactive decay; introduction to properties of atomic nuclei; nuclear processes in cosmology; chemical, biomedical and environmental applications of radioactivity; nuclear processes as chemical tools; interaction of radiation with matter.
Prerequisite: Must have completed one year of college chemistry and one year of college physics.

CHEM425 Instrumental Methods of Analysis (4 Credits)
Modern instrumentation in analytical chemistry. Electronics, spectroscopy, chromatography and electrochemistry.
Prerequisite: CHEM272 and CHEM271; or (CHEM276 and CHEM277).

CHEM441 Advanced Organic Chemistry (3 Credits)
An advanced study of the compounds of carbon, with special emphasis on molecular orbital theory and organic reaction mechanisms.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481; and 1 course with a minimum grade of C- from (CHEM241, CHEM247). Jointly offered with CHEM641.

CHEM460 Structure Determination Using Spectroscopic Methods (3 Credits)
The use of infrared, ultraviolet-visible, proton and carbon-13 nuclear magnetic resonance and mass spectroscopy for structure determination in organic chemistry.
Prerequisite: Must have completed CHEM243; or CHEM247; or (CHEM241 and CHEM242).
Formerly: CHEM660.

CHEM471 Techniques in Pulse NMR (1 Credit)
NMR techniques to operate, adjust, and calibrate the spectrometers and acquire and process NMR data in one and two dimensional NMR applications.
Prerequisite: CHEM241 and CHEM242; or CHEM247.
Recommended: CHEM460.
Restriction: Senior standing or higher.
Additional Information: Persons with heart pacemakers and/or metal implants cannot take the course due to potential health hazards.

CHEM474 Environmental Chemistry (3 Credits)
The sources of various elements and chemical reactions between them in the atmosphere and hydrosphere are treated. Causes and biological effects of air and water pollution by certain elements are discussed.
Prerequisite: CHEM481.

CHEM481 Physical Chemistry I (3 Credits)
Thermodynamics and kinetics of chemical and molecular systems. Topics may include internal energy, heat, work, enthalpy, entropy, free energy, and spontaneity as well as reaction order, differential rate laws, integrated rate laws, and rate laws for multi-step processes.
Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

CHEM482 Physical Chemistry II (3 Credits)
Quantum mechanical nature of atoms and molecules. Topics may include model systems for electronic, vibrational, rotational and translational energies as well as connections to molecular spectroscopy and thermal distributions.
Prerequisite: Minimum grade of C- in CHEM481.
Credit Only Granted for: CHEM482 or BCHM485.

CHEM483 Physical Chemistry Laboratory I (2 Credits)
An introduction to the principles and application of quantitative techniques in physical chemical measurements. Experiments will be coordinated with topics in CHEM481.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481.

CHEM484 Physical Chemistry Laboratory II (2 Credits)
A continuation of CHEM 483. Advanced quantitative techniques necessary in physical chemical measurements. Experiments will be coordinated with topics in CHEM 482.
Prerequisite: CHEM481 and CHEM483; and must have completed or be concurrently enrolled in CHEM482.

CHEM498 Special Topics in Chemistry (3 Credits)
Prerequisite: Prerequisite varies with the nature of the topic being considered.

CHIN - Chinese

CHIN101 Intensive Elementary Chinese I (6 Credits)
Introduction to speaking, reading, and writing Chinese with an emphasis on mastering the essentials of pronunciation, basic characters and structural patterns.
Prerequisite: Must have attained appropriate Foreign Language Placement Test (FLPT) score.

CHIN102 Elementary Spoken Chinese (3 Credits)
Continued study of grammatical patterns and vocabulary buildup with particular emphasis on conversation.
Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN103.
Additional Information: Must be taken in conjunction with CHIN103.

CHIN103 Elementary Written Chinese (3 Credits)
Continued study of grammatical patterns and buildup of vocabulary with particular emphasis on reading and writing.
Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN102.
Additional Information: Must be taken in conjunction with CHIN102.

CHIN105 Elementary Chinese - Accelerated Track (3 Credits)
Accelerated instruction in Mandarin Chinese at the elementary level for students with prior Chinese language background, either through home use or formal instruction.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed CHIN103, CHIN102, or CHIN101.

CHIN169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN201 Intermediate Spoken Chinese I (3 Credits)
Emphasis on development of conversational skills with vocabulary build-up and controlled conversation.
Prerequisite: CHIN102; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN202.
Additional Information: Must be taken in conjunction with CHIN202.

CHIN202 Intermediate Written Chinese I (3 Credits)
Reading and writing skills with emphasis on grammar and Chinese characters.
Prerequisite: CHIN103; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN201.
Additional Information: Must be taken in conjunction with CHIN201.

CHIN203 Intermediate Spoken Chinese II (3 Credits)
Continuation of CHIN201.
Prerequisite: CHIN201; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN204.
Additional Information: Must be taken in conjunction with CHIN204.

CHIN204 Intermediate Written Chinese II (3 Credits)
Continuation of CHIN202.
Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN203.
Additional Information: Must be taken in conjunction with CHIN203.

CHIN205 Intermediate Chinese - Accelerated Track (3 Credits)
Accelerated instruction in Mandarin Chinese at the intermediate level for students with prior Chinese language background, either through home use or formal instruction.
Prerequisite: Must have attained appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed CHIN201, CHIN203, CHIN202, or CHIN204.

CHIN213 Chinese Poetry into English: An Introduction (3 Credits)
Issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets. No knowledge of Chinese required.

CHIN215 Introduction to Chinese Philosophy (3 Credits)
How should one make moral choices? What is the best way to live a moral life? How should the state be organized to best encourage proper human behavior? And what happens if the state comes to be formed as an empire? What are the proper moral ways to respond? Questions such as these were at the heart of early Chinese philosophical debates (roughly fifth through first centuries BCE). This course will be study of how the early Chinese thinkers wrestled with these questions and what responses they gave. As we will quickly see, the views that arose in early China were among the most powerful and influential in human history. Regardless of whether one agrees with these views or not, they should be studied and taken seriously by anyone who cares about ethics and politics.
Additional Information: Course is taught in English. No previous knowledge of Chinese philosophy and history will be assumed and no prerequisites are required.

CHIN220 Beginning Chinese Calligraphy (3 Credits)
Introduction to techniques, history, and culture of Chinese calligraphy. Extensive hands-on practice. Taught in English.

CHIN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN301 Advanced Chinese I (3 Credits)
Readings in expository and fictional writing with conversation and composition.
Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN302 Advanced Chinese II (3 Credits)
Continuation of CHIN301.
Prerequisite: CHIN301; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN305 Life in China through TV Plays I (3 Credits)
Using authentic Chinese language material in short TV plays to learn about society and life in China.
Prerequisite: CHIN203 and CHIN204; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN306 Life in China through TV Plays II (3 Credits)
Continuation of CHIN305 using authentic Chinese language material in TV plays to learn about society and life in China.
Prerequisite: CHIN305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN307 Linguistic Landscape of China (3 Credits)
Comprehensive introduction to Chinese and other major languages in the Sino-Tibetan, Altaic, Austroasiatic, and Austronesian families, all of which are spoken in China. Taught in English.
Prerequisite: Must have completed CHIN204 or above; or permission of Chinese Program Advisor.

CHIN313 Chinese Poetry and Prose in Translation (3 Credits)
Writing of the major poets, essayists, and historians from the 10th century B.C. to the 12th century A.D. No knowledge of Chinese is required.

CHIN315 Modern Chinese Literature in Translation (3 Credits)
Major works of fiction and drama from 1920 to the present read in the context of social and literary change. Emphasis on western and traditional Chinese influences on the writers and their works. No knowledge of Chinese required.

CHIN331 Chinese Calligraphy: Theory and Practice (3 Credits)
History of the writing system; major scripts, modes, and styles. Intermediate brushwork and lectures on the culture. Characters for practice selected to correspond to lecture topics. Taught in English.
Prerequisite: CHIN220; or permission of instructor.

CHIN332 Chinese Culture through Traditional Chinese Arts (3 Credits)
Study of calligraphy, music, painting, and taichi coupled with critical readings of scholarly and literary texts. Facilitates an understanding of China and Chinese culture through traditional Chinese arts. Taught in English.

CHIN369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN386 Experiential Learning (3-6 Credits)
Prerequisite: Must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CHIN388 Topics in Chinese Literature in Translation (3 Credits)
Analysis of significant themes and structures in Chinese literature. No knowledge of Chinese required.
Repeatable to: 6 credits if content differs.

CHIN389 Language House Spring Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident of Language House.
Repeatable to: 8 credits.

CHIN401 Readings in Modern Chinese I (3 Credits)
Readings in history, politics, economics, sociology, and literature. Emphasis on wide-ranging, rapid reading, reinforced by conversations and compositions.
Prerequisite: CHIN302; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN402 Readings in Modern Chinese II (3 Credits)
Continuation of CHIN401.
Prerequisite: CHIN401; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN403 Classical Chinese I (3 Credits)
Close readings and discussion of literary, philosophical and historical texts in the original language. The course situates texts in their historical context and also discusses differences between classical and modern Chinese.
Prerequisite: CHIN302 or CHIN306; or permission of instructor.
Additional Information: Texts in Chinese. Class discussion and course work mainly in English.

CHIN408 Selected Readings in Classical Chinese (3 Credits)
Selected readings in Classical Chinese, including important representative works of history, poetry, and parallel prose. Close attention is paid to matters of grammar and phonology in the readings. Content will differ each time this course is offered.
Prerequisite: CHIN321; and must have knowledge of Pinyin.
Repeatable to: 9 credits if content differs.

CHIN411 Business Chinese I (3 Credits)
Conversation, reading, and writing applicable to Chinese business transactions, social meetings, and meetings with government organizations, plus background material in English on professional business practices and social customs associated with business.
Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN412 Business Chinese II (3 Credits)
Continuation of CHIN411.
Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN415 Readings in Current Newspapers and Periodicals (3 Credits)
Reading of periodical literature on selected topics with discussions and essays in Chinese.
Prerequisite: CHIN402; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN418 Special Topics in Contemporary Chinese Fiction and Film (3 Credits)
Various approaches to the most recent textual productions of China and Taiwan. Taught in Chinese.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 12 credits if content differs.

CHIN422 Advanced Chinese Grammar (3 Credits)
Chinese sentence patterns studied and contrasted with English and in terms of current pedagogical as well as linguistic theories. Taught in English and Chinese.
Prerequisite: CHIN302; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN425 Ethnic and Cultural Diversity in China (3 Credits)
This course looks into ethnic and cultural diversity in China. It examines the evolution of the People's Republic of China's (PRC) ethnic policies in relation to nation-state building over the last six decades. Specifically, it studies how the PRC has categorized the Chinese people into 56 ethnic groups, how it has made affirmative action policies to accommodate ethnic diversity, and what problems its approaches have experienced and what solutions it has proposed in its accommodation of ethnicity and diversity in the 21st century. To examine the above issues, the course introduces and applies the concepts of ethnicity, nationality, ethnic nationalism, civic nationalism, identity, social Darwinism, the Soviet model of multinational state building, the Chinese model of inclusive Chinese nation state building, citizenship, individual rights, group rights, equality, and diversity.
Recommended: Any CHIN course or course on China.
Credit Only Granted for: CHIN425 or CHIN429G.
Formerly: CHIN429G.

CHIN428 Selected Topics in Chinese Linguistics (3 Credits)
Undergraduate seminar in Chinese linguistics. Topics may include the ancient writing system, historical phonology, dialectology, prosody and rhyming, grammar and the history of the language as a whole. This course may be repeated with different content, and satisfies the linguistics requirement for the Chinese major. Students are expected to be in at least Third Year Chinese. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Sophomore standing or higher.
Repeatable to: 12 credits if content differs.

CHIN429 Selected Topics in Chinese Studies (3 Credits)
In-depth study of a particular aspect of Chinese cultural, linguistic, literary studies. Specific topic to be announced when course is offered. Taught in English.
Prerequisite: CHIN315.
Repeatable to: 6 credits if content differs.

CHIN441 Traditional Chinese Fiction (3 Credits)
Major works of fiction from the 4th century tales of the marvelous through the 19th century Qing novel. Readings are in classical Chinese and English. Designed for students with advanced language skills. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN443 Cultural Histories of Medicine in China (3 Credits)
Investigates medical knowledge through traditional Chinese approaches to the body and beliefs about healing, including acupuncture, herbal medicine, prayer, ritual and folk medicine. Taught in English.
Restriction: Permission of department, School of Languages, Literatures and Cultures.

CHIN499 Directed Study in Chinese (1-3 Credits)
Readings in Chinese under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

CHSE - Counseling, Higher Education, and Special Education

CHSE200 College Success and Life Planning - Managing College and Career Life through Goal Development and Planning (3 Credits)
The overarching goal of this course is to guide new students affiliated with the TerpsEXCEED program in navigating the initial stages of college, career and campus life management. The course is organized around Academic and Career Habits, Cultural Know-How, Balance of Multiple Roles, and Self-Direction in order to address (a) skills and interest assessments, (b) goal setting, (c) organizational and independent living skills development, (d) travel and transportation orientation to navigate and access campus and College Park, (e) financial planning, (f) safety, (g) social activity access, and (h) basic scheduling and time management. TerpsEXCEED students will be matched with typical student peer supports for a more normalized college experience.
Restriction: Must be in the TerpsEXCEED Program; and permission from TerpsEXCEED Director.
Additional Information: Priority enrollment for students in the TerpsEXCEED program.

CHSE205 Disability: From Stigma and Sideshow to Mainstream and Main Street (3 Credits)
Explores the cultural, historical, educational, and medical roots of difference among human beings and examines the impact of cultural and technological changes on individuals traditionally identified as disabled. The course is designed to develop a broad understanding of the concept of "disability" and the emerging technologies that shape contemporary understanding of this phenomenon and the lives of those considered disabled.
Credit Only Granted for: EDSP289I or CHSE205.
Formerly: EDSP289I.

CHSE338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)
Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on identity-based topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.
Prerequisite: Completion of on-line registration form.
Repeatable to: 6 credits if content differs. Cross-listed with: ENES338.
Formerly: EDHI338.
Additional Information: Students can repeat the course so long as they register for a course with a different letter suffix.

CINE - Cinema and Media Studies

CINE245 Film Form and Culture (3 Credits)
Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.Cross-listed with: ENGL245.
Credit Only Granted for: ENGL245, CINE245 or FILM245.
Formerly: FILM245.

CINE280 Film Art in a Global Society (3 Credits)
Comparative study of a variety of film traditions from around the world, including cinema from Hollywood, Europe, Asia and developing countries, with a stress on different cultural contexts for film-making and viewing.Cross-listed with: CMLT280.
Credit Only Granted for: CINE280, FILM298D or CMLT280.
Formerly: FILM298D.

CINE282 Heroes and Villains in American Film (3 Credits)
We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.Cross-listed with: AMST213.
Credit Only Granted for: AMST213, HONR219F, CINE282 or FILM298V.
Formerly: HONR219F, FILM298V.

CINE283 Iranian Cinema (3 Credits)
Introduction to Iranian cinema, society, and culture. Taught in English.Cross-listed with: PERS283.
Credit Only Granted for: PERS283, CINE283 or FILM298B.

CINE298 Special Topics in International Film Studies (3 Credits)
Special topics in International Film.
Repeatable to: 9 credits if content differs.
Formerly: FILM298.

CINE301 Cinema History I: The Silent Era (3 Credits)
Examines the development of silent cinema from the 1890s to the early 1930s drawing on at least five distinct national traditions (French, German, Russian, British, and American). Introduces students to key cinematic conventions as they emerged around the world.
Prerequisite: ENGL245, CINE245, or FILM245; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: CINE301 or FILM301.
Formerly: FILM301.

CINE302 Cinema History II: The Sound Era (3 Credits)
Introduction to the international history of cinema from sound around 1930 to the present.
Prerequisite: ENGL245, FILM245, or CINE245.
Restriction: Must have permission of the Film Studies program.
Credit Only Granted for: CINE302 or FILM302.
Formerly: FILM302.

CINE311 Documentary Film (3 Credits)
A survey of currents in the history of the documentary film, beginning with early cinema and continuing through to more recent manifestations.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: CINE311, FILM311 or ENGL329L.
Formerly: FILM311.

CINE319 Special Topics in Documentary, Animation, Experimental Cinema, and Other Visual Media (3 Credits)
Examine the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.
Repeatable to: 6 credits.
Formerly: FILM319.

CINE329 Special Topics in National/International Cinemas (3 Credits)
Examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.
Repeatable to: 6 credits.
Formerly: FILM329.

CINE331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)
Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of The Trial, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's 'Kafka', 1991).Cross-listed with: GERM331.
Credit Only Granted for: GERM331, CINE331, FILM331, or HONR348K.
Formerly: FILM331.

CINE332 Brazilian Cinema (3 Credits)
Brazilian films from the late 1950s to the present with a special view to the relationship between cinema, society, historical dates, and social changes in Brazil. Taught in English.Cross-listed with: PORT332.
Credit Only Granted for: PORT332, CINE332, or FILM332.
Formerly: FILM332.

CINE334 Soviet Film: Propaganda, Myth, Modernism (3 Credits)
A Survey of Soviet film from the 1920s to 1991, focusing on important directors, genres, themes, and styles. Taught in English.Cross-listed with: RUSS334.
Credit Only Granted for: RUSS334, CINE334, or FILM334.
Formerly: FILM334.

CINE335 Transnational Chinese Cinema (3 Credits)
Chinese cinema has made a big impact on contemporary world film culture. This course will introduce students to the films directed by some of the most representative filmmakers working in different geopolitical locations (mainland China, Taiwan, Hong Kong) and the Chinese diaspora. The films of these directors, in a spectrum of genres, themes, and styles, have inspired global scholarship, not only in visual culture and cinema, but also in the study of women's issues, gender and ethnic studies, as well as the fields of adaptation and intermedia studies. Students will explore these films in their socio-historical and artistic contexts, considering the influences and innovations that have shaped them and analyzing their reception by audiences and critics. After reading about the films they view, and participating in class discussions, students will be ready to complete their analytical written assignments, for which they will critically examine the films by applying key concepts such as gender, sexuality, race, gaze, style, representation, power, diaspora, etc.Cross-listed with: ARTH391.
Credit Only Granted for: ARTH391 or CINE335.

CINE336 Soviet Cinema and Empire (3 Credits)
Examination of the concepts of "empire" and "nation" through their representation in Soviet cinema. Taught in English.Cross-listed with: RUSS336.
Credit Only Granted for: RUSS336, CINE336, or FILM336.
Formerly: FILM336.

CINE337 Contemporary Chinese Art and Film (3 Credits)
Contemporary Chinese art and film are arguably the most vibrant of all national arts at the turn of the millennium and have become the face - both figuratively and literally - of contemporary China, a complex society with historic overlays of Confucianism, Taoism, Buddhism, Communism, Post-socialism, and state capitalism. Students will consider a wide range of art forms (painting, photography, video, installation, web-based media, and film) in four broad themes (uses of the past; critiques of power; representations of race, gender, and sexuality; socially engaged art) and explore the complex intertwining of the political, historical, and aesthetic aspects in Chinese contemporary art and film, as well as the multiple contexts in which these artworks are created and circulated.Cross-listed with: ARTH392, FILM329L.
Credit Only Granted for: ARTH392, FILM329L or CINE337.

CINE341 Filming War Zones: Representations of Wars in Iraq & Chechnya (3 Credits)
Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.Cross-listed with: ARAB341.
Credit Only Granted for: ARAB341, CINE341 or FILM341.
Formerly: FILM341.

CINE342 Film Comedy (3 Credits)
Comedy as a specific cinematic genre.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC342.
Credit Only Granted for: SLLC342, CINE342, or FILM342.
Formerly: FILM342.

CINE344 Film and the Fantastic (3 Credits)
Survey of fantastic cinema, encompassing American classics, Hollywood recent productions, and independent films, as well as Asian horror films, anime, and European fantasy.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC344.
Credit Only Granted for: SLLC344, CINE344 or FILM344.
Formerly: FILM344.

CINE345 The Films of Alfred Hitchcock (3 Credits)
An examination of important Hitchcock films from the perspective of innovation, aesthetics, and cultural history.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: CINE345, FILM345 or ENGL329J.
Formerly: FILM345.

CINE352 The Baddest Decade: The 1970s in American Film and American History (3 Credits)
The history of the United States and of its cinema in the 1970s.
Prerequisite: HIST201. Cross-listed with: HIST304.
Credit Only Granted for: CINE352, FILM352 or HIST304.
Formerly: FILM352.

CINE359 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)
Examine narrative cinema from the perspective of content (themes, issues, structures) and style through the lens of genre, auteurship (a concept of authorship in film studies), and/or historical aesthetic movements that have been influential in the development of cinema as an art and film studies as a field. Content varies.
Repeatable to: 6 credits.
Formerly: FILM359.

CINE361 Cinema and Globalization (3 Credits)
Introduction to cinema as a global phenomenon.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of Film Studies program; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC361.
Credit Only Granted for: SLLC361, CINE361, or FILM361.
Formerly: FILM361.

CINE362 Vision, Visuality, and the Gaze in Cinema (3 Credits)
Students will build a way of talking critically about film. The prism of seeing, visuality, the gaze, and the like will serve as a way to investigate the way films take on meaning as well as to understand how film participates in a wide network of interconnected ideas, concepts, and modes of thought that have contributed to the audiences' ability to make sense of what a film is conveying.
Prerequisite: ENGL245, FILM245 or CINE245; or permission of Film Studies Program; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC362.
Credit Only Granted for: SLLC362, CINE362, or FILM362.
Formerly: FILM362.

CINE369 Special Topics in Film Theories (3 Credits)
Examines specific methodologies (structuralism, feminism, postcolonialism, etc.) for the critical analysis of film. The course will also consider the historical development of theoretical concepts. Content varies.
Repeatable to: 6 credits if content differs.
Formerly: FILM369.

CINE385 German Cinema (3 Credits)
A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.Cross-listed with: GERM385.
Credit Only Granted for: GERM385, CINE385 or FILM385.
Formerly: FILM385.

CINE388 Experiential Learning: Cinema and Media Studies (1-3 Credits)
Connects students' theoretical understanding of film studies, as obtained through the classroom, to professional experience.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.
Repeatable to: 6 credits.
Formerly: FILM388.

CINE410 Documentary and Narrative (3 Credits)
An examination of the relationship between film and reality, focusing on documentary film.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC410.
Credit Only Granted for: SLLC410, CINE410 or FILM410.
Formerly: FILM410.

CINE411 Experimental Film (3 Credits)
Introductory survey of European and U.S. American experimental cinema.Cross-listed with: SLLC411.
Credit Only Granted for: SLLC411, CINE411 or FILM411.
Formerly: FILM411.

CINE412 Animation and Cinema (3 Credits)
An examination of animation in art, cinema, and other media.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: CINE412, FILM412 or ENGL468C.
Formerly: FILM412.

CINE419 Special Topics in Documentary, Animation, Experimental Cinema, and Other Media (3 Credits)
Advanced studies in Documentary, Animation, Experimental Cinema, and Other Media. Examines the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.
Prerequisite: ENGL245, FILM245, or CINE245; and or permission of ARHU College of Arts and Humanities.
Repeatable to: 6 credits if content differs.
Formerly: FILM419.

CINE420 French Cinema: A Cultural Approach (in Translation) (3 Credits)
A study of French culture, civilization, and literature through the medium of film. Taught in English.Cross-listed with: FREN480.
Credit Only Granted for: FREN480, CINE420 or FILM420.
Formerly: FILM420.

CINE421 Francophone African Film (3 Credits)
Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.Cross-listed with: FREN421.
Credit Only Granted for: FREN421, CINE421 or FILM421.
Formerly: FILM421.

CINE423 Women and French Cinema (3 Credits)
Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in French.Cross-listed with: FREN423.
Credit Only Granted for: FREN423, CINE423 or FILM423.
Formerly: FILM423.

CINE426 Modern Chinese Film and Visual Culture (3 Credits)
Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.Cross-listed with: ARTH484.
Credit Only Granted for: ARTH484, CINE426 or FILM426.
Formerly: FILM426.

CINE427 Visions and Fictions from Spain (3 Credits)
Overview of Spanish cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their social, historical, political, religious, and cultural contexts.
Prerequisite: One course from SPAN331, SPAN332, SPAN333, SPAN361, SPAN362 or SPAN363; or permission of instructor.
Recommended: SPAN333. Cross-listed with: CINE467.
Credit Only Granted for: CINE427, CINE467, FILM427, SPAN427, or SPAN467.
Formerly: FILM427, CINE427, and SPAN427.

CINE429 Special Topics in National/International Cinemas (3 Credits)
Courses in National/International Cinemas may examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.
Repeatable to: 6 credits.
Formerly: FILM429.

CINE430 Critical Issues in Israeli Cinema (3 Credits)
Critical investigation of Zionist and Israeli culture and politics through film.Cross-listed with: HEBR430.
Credit Only Granted for: HEBR430, CINE430 or FILM430.
Formerly: FILM430.

CINE431 Italian Cinema II (In Translation) (3 Credits)
A study of Italian society and culture through the medium of film from the mid 1970's to the present. Taught in English.Cross-listed with: ITAL473.
Credit Only Granted for: ITAL473, CINE431 or FILM431.
Formerly: FILM431.

CINE433 Holocaust in Italian Literature and Cinema (3 Credits)
Review of literature and theoretical writings of Italy's most famous survivor, Primo Levi, to a sampling of Italian films that focus in vastly different and often extremely controversial ways on the experience of the concentration camp, while addressing a series of central questions from the brutal realities of the camps to the "compromises" made in order to survive, the need to bear witness, and the idea of the survivor's guilt.Cross-listed with: ITAL433.
Credit Only Granted for: CINE433, FILM433 or ITAL433.
Formerly: FILM433.

CINE441 Italian Cinema I: Neorealism (3 Credits)
Explores representations of Italy in cinema with special focus on identity formation and the movement of Italian neorealism and post neorealism. Taught in English.Cross-listed with: ITAL436.
Credit Only Granted for: CINE441, FILM441 or ITAL436.
Formerly: FILM441.

CINE451 Film Noir and American Culture (3 Credits)
Introduction to a variety of American movies made in the 1940s and 1950s whose dark themes and stark black-and-white lighting led to their identification as film noir.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: CINE451 or FILM451.
Formerly: FILM451.

CINE452 The Origins of Cinema (3 Credits)
An in-depth engagement with the specificity of early cinema, dedicated to a comparative framework that compares the early cinema period (1890-1915) to other moments of media emergence, both before and after cinema, with special emphasis on the current, "digital" moment.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of Film Studies Program.
Credit Only Granted for: CINE452, FILM452 or ENGL468G.
Formerly: FILM452.

CINE459 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)
Special topics in genres, auteurs, and cinema movements.
Repeatable to: 6 credits.
Formerly: FILM459.

CINE461 Political Cinema (3 Credits)
Histories of cinema and politics in the 20th century.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: SLLC461.
Credit Only Granted for: CINE461, FILM461 or SLLC461.
Formerly: FILM461.

CINE462 Realism and the Real in Film (3 Credits)
Exploration of the problem of realism, one of the most central theoretical issues in film studies.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of instructor.
Credit Only Granted for: CINE462 or FILM462.
Formerly: FILM462.

CINE463 Screening Time: History and Memory in Cinema (3 Credits)
An examination of the ways and techniques with which cinema produces a sense of time in the viewer.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities. Cross-listed with: SLLC463.
Credit Only Granted for: SLLC463, CINE463 or FILM463.
Formerly: FILM463.

CINE464 The Violence of Cinema (3 Credits)
An investigation of cinema's multifaceted relationship to violence.
Prerequisite: ENGL245, FILM245, or CINE245; or permission of instructor.
Credit Only Granted for: CINE464 or FILM 464.
Formerly: FILM464.

CINE467 Visions and Fictions from Spain (3 Credits)
Overview of Spanish cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their social, historical, political, religious, and cultural contexts.
Prerequisite: One course from SPAN331, SPAN332, SPAN333, SPAN361, SPAN362 or SPAN363; or permission of instructor.
Recommended: SPAN333. Cross-listed with: SPAN467.
Credit Only Granted for: CINE427, CINE467, FILM427, SPAN427, or SPAN467.
Formerly: FILM427, CINE427, and SPAN427.

CINE469 Special Topics in Film Theories II (3 Credits)
Special topics in film theories.
Repeatable to: 6 credits.
Formerly: FILM469.

CINE499 Directed Study in Cinema and Media Studies (1-3 Credits)
Readings and Research in Film Studies under faculty supervison.
Prerequisite: Permission of instructor.
Repeatable to: 9 credits if content differs.
Formerly: FILM499.

CINX - Cinema and Media Studies Education Abroad

CINX200 Blockbusters and Bestsellers: Italian Cinema and Literature of the 21st Century (3 Credits)
Examines some of the last three decade's most popular Italian films and novels, systematically exploring various genres such as comedy, drama, mystery, historical and epic. Explores key topics of Italian history, culture and society through an analysis of selected literary and cinematic works, with a focus on cinematic and narrative techniques as well as literary and cinematic genre criticism.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11294. Education Abroad processes registrations for this course on behalf of students.

CINX201 Cosa Nostra: Cinema and History of the (Anti)Mafia (3 Credits)
Examines the "Cosa Nostra", or Sicilian Mafia through historical, social, and cultural perspectives. Explores the progression of the Sicilian Mafia from the Risorgimento to the present day, the myths and legends surrounding the group, and efforts by US and Italian law enforcement and collaborators to fight organized crime through analysis of important American and Italian films portraying mafia culture.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11294. Education Abroad processes registrations for this course on behalf of students.

CINX202 Italian Cinema from Neorealism to Netflix (3 Credits)
Examines some of the most important Italian films from the post-World War II era to the present day, covering ideological and aesthetic rules of film art, and reviewing and expanding upon the most important elements of film technique as well as essential topics in the field of film theory and criticism. Explores the roots of Italian cinema, analyzes Neorealism and examines the most important directors and genres, considering recent small-screen productions from HBO/RAI television and Netflix.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11294. Education Abroad processes registrations for this course on behalf of students.

CINX301 Glued to the Screen: TV Shows, Norms, and Culture (3 Credits)
Introduces the notion of TV as a cultural forum, a social regulator, and a social critique. Using examples from American, Scandinavian, and also British television, we will analyze how TV operates by working through social issues, and how TV shows mirror societal concerns and assumptions.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

CINX302 Spain In Cinema: Global and Local Perspectives (3 Credits)
This course examines both Spanish cinematography and foreign/transnational audiovisual productions related to Spanish culture. The transdisciplinary approach includes film studies, sociology, history, anthropology and art theory, while also applying cultural and cross-cultural studies and post-colonialist views.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

CINX304 London on Film: Representing the City in British and American Films (3 Credits)
Introduces students to key aspects of British film history and culture through consideration of the significance and meaning of London within British film culture. Students will compare and contrast the representation of London by different filmmakers in different eras, examine the social, cultural, and industrial factors that influence the making and reception of films, explore the concepts of "space" and "place", and draw links between London's history and its representation in films.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

CINX305 Spanish Cinema (3 Credits)
One of the clearest representations of a country's culture, along with its art, society and customs, is cinema. This course explores how cinema represents key aspects of Spanish history, politics, lifestyle, and community through the analysis of film format, aesthetics, and historical influences, as well as the production of a short film.
Additional Information: This course is offered as part of the Maryland-in-Sevilla study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/10249. Education Abroad processes registrations for this course on behalf of students.

CINX310 Mafia, Murder, and Mystery: Crime in Italian and American Cinema (3 Credits)
Studies how mafia and organized crime are presented in Italian and American cinematic texts. The course will examine the different expressions of the crime film genre, which dates back to the beginnings of filmmaking, focusing on the technical, visual, and aesthetic aspects of crime films.Cross-listed with: ENGX310.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

CLAS - Classics

CLAS169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS170 Ancient Myths and Modern Lives (3 Credits)
What are myths and why do we tell them? What powers do myths have? We will tackle these questions by looking at the enduring and fascinating myths from ancient Greece and Rome. In addition to studying how they shaped ancient societies, we will also look at their modern influence and reflect upon the power that myths still hold in our contemporary world. Taught in English.Cross-listed with: RELS170.
Credit Only Granted for: CLAS170 or RELS170.
Additional Information: This course cannot be taken for language credit.

CLAS171 Classical Myths in Europe (1 Credit)
The role which Classical Myths have played in the arts, architecture and politics of a major European city. This will only be offered through the study abroad program.

CLAS180 Discovering the World of Ancient Greece (3 Credits)
An exploration of the cultural traits and developments of ancient Greek civilization and its forerunners, from the Bronze Age Mycenaeans and Minoans, through the rise of the classical Greek city-states, to the expansion of Greek cultural influence in the wake of the conquests of Alexander the Great. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of classical Greek civilization, the various institutions and values that characterized the Greeks, and the significant historical events that transformed the culture over the course of antiquity.

CLAS190 Discovering the World of Ancient Rome (3 Credits)
An exploration of the cultural traits and developments of ancient Roman civilization from its roots in Etruscan culture, through the rise of the Roman Republic, to the expansion of Roman cultural influence in the ancient world and the emergence of the Roman Empire. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of ancient Roman civilization, the various institutions and values that characterized the Romans, and the significant historical events that transformed the culture over the course of antiquity.Cross-listed with: HIST219T.
Credit Only Granted for: CLAS190 or HIST219T.

CLAS269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS275 Why do we laugh? (3 Credits)
An introduction to the breadth and complexity of humor's role in society. Students will explore ancient Greek and Roman comedies side-by-side with contemporary sitcoms and movies, to learn the explanations that various disciplines have offered about why we laugh, and to understand the major impact humor has in how we see ourselves and our world.
Additional Information: All readings will be done in English translation.

CLAS276 Are We Rome? (3 Credits)
America, from its very origins as an independent nation, saw itself as the new Rome: its system of government is built on Roman precedents, its national buildings look as if they came from the Roman Forum, and its leisure activities take us to stadiums modeled on the Colosseum. America's relationship to Rome, however, raises its greatest anxiety: will America fall as Rome did? In 1776, the year of American independence, Edward Gibbon published his History of the Decline and Fall of the Roman Empire; America has been thinking about the trajectory of its history alongside Rome's from the very beginning.
Credit Only Granted for: CLAS276 or CLAS289A.
Formerly: CLAS289A.

CLAS305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ANTH305, ARTH305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

CLAS308 The Classics in Context (1-3 Credits)
A Study Abroad course which introduces students to the topography, archaeology and culture of the ancient Mediterranean world.
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 9 credits if content differs.

CLAS309 Special Topics in Classical Literature (3 Credits)
Readings in translation.
Repeatable to: 9 credits if content differs.

CLAS310 Ancient Philosophy (3 Credits)
The origins and development of philosophy and science in Ancient Greece, focusing on the pre-Socratics, Socrates, Plato and Aristotle.
Prerequisite: 6 credits in CLAS courses; or 6 credits in PHIL courses.
Credit Only Granted for: CLAS310 or PHIL310.

CLAS311 Inventing Ancient Greek Culture (3 Credits)
Who were the ancient Greeks, and were they the founders of Western civilization' The course examines the foundations of ancient Greece. Through an analysis of the historical, archaeological, and linguistic evidence, it sheds light on the so-called Black Athena Controversy, which raised doubts about the ancient Greek contribution to Western culture. The course also focuses on the impact of modern identity politics on scholarly discussions of antiquity and the ways in which the Culture Wars of the 1980s and 1990s have influenced analyses of the ancient Greek world.Cross-listed with: HIST328D.
Credit Only Granted for: CLAS311 or HIST328D.

CLAS312 The Modernity of Athenian Democracy (3 Credits)
Examines the question of how Ancient Greek thought can be a tool for facing the challenges of the modern world. Topics such as political participation and engagement in politics, lawfulness and justice, freedom and autonomy, democracy and civic responsibility are found at the core of Ancient Greek thought. In addition to these topics, the course explores, through the teachings of ancient Greek philosophers, historians, and poets, the questions of virtue and happiness at a personal level and the pursuit of happiness at the societal level. Love and friendship are necessary virtues to shape a harmonious and prosperous polis. By studying selected excerpts from the primary sources of Ancient Greek literature in translation, the course defines the core values of democratic society from the viewpoint of the Greeks.

CLAS315 Greek and Roman Athletics (3 Credits)
The origin and evolution of athletics in ancient Greece and Rome studied as recreation, as play, as education, as a profession and as mass entertainment.Cross-listed with: HIST339G.
Credit Only Granted for: CLAS315 or HIST339G.

CLAS320 Women in Classical Antiquity (3 Credits)
A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art. Readings in primary sources in translation and modern critical writings.Cross-listed with: HIST328W, WGSS320.
Credit Only Granted for: CLAS320, WMST320, WGSS320 or HIST328W.

CLAS330 Ancient Greek Religion: Gods, Myths, Temples (3 Credits)
Survey of Greek religious ideas and practices as they evolve from the Bronze Age to the early Christian period.Cross-listed with RELS370.
Credit Only Granted for: CLAS330 or RELS370.

CLAS331 Roman Religion: From Jupiter to Jesus (3 Credits)
Survey of the major institutions of Roman state and private religion and of the diverse religions, including Judaism and Christianity, practiced in the Roman empire.
Formerly: CLAS309J.

CLAS340 Ancient Slavery and its American Impacts (3 Credits)
Interrogates how slavery permeated the ancient Mediterranean societies of Greece and Rome. We will pay particular attention to how hierarchical inequalities are institutionalized, experienced, and represented and to how different marginalized and dominant groups interacted. Enslaved persons performed necessary labor in Greece and Rome and their work was essential for the formation of ancient society in agriculture, mining, domestic spaces, literature, finance, and government. Studying ancient slavery offers a chance to examine Greece and Rome from the bottom up, parsing the scant literary and material evidence for the lives and struggles of enslaved persons. We will practice several different approaches in order to tease out the systematic, economic, political, and personal effects of slavery in the ancient world. The United States of America was also founded as a slave society, and discussions of slavery in the Americas often look back to the ancient Mediterranean. The course will therefore conclude with a unit on how enslavers and abolitionists in the United States utilized and responded to slavery in antiquity.Cross-listed with: HIST339J.
Credit Only Granted for: CLAS340 or HIST339J.

CLAS369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS369A Ancient Greece and the Athletic Spirit (3 Credits)
From the time of the poems of Homer to the end of the Roman Empire, exercise of the body and physical competition played an essential role in ancient Greece. Athletics was regarded as both a sphere of excellence and a form of exciting entertainment. Students will travel around Greece and study firsthand the sites, monuments, and objects that defined the ancient experience of athletics, with the aim of understanding its principal forms, the spirit and values that guided it, and its interrelationship with other aspects of society and culture.

CLAS374 Greek Tragedy in Translation (3 Credits)
Study and analysis of the tragedies of Aeschylus, Sophocles and Euripides with special attention to the concepts of character and of thought as conceived by Aristotle in The Poetics.

CLAS375 Ancient Comedy (3 Credits)
Representative plays by Aristophanes, Menander, Plautus and Terence in translation; examination of Greek tradition in Roman and postclassical periods.

CLAS380 Archaeological Fieldwork in Greece (4 Credits)
Students will learn about the archaeology, history and culture of Greece by participating in the archaeological investigations at Kenchreai, the eastern port of ancient Corinth. Students will learn about data analysis, artifact processing, and conservation, all important components in archaeological fieldwork. This program also gives students a rare chance to live and to learn in one of the most archaeologically rich, historically important, and naturally beautiful regions in Greece, the northeastern Peloponnese. Students will visit sites and museums throughout this region, attend seminars, and experience life in a small village. In this way they will learn not only about the practice of archaeological field research, but also about Greek history and culture from ancient to modern times. While the course focuses on southern Greece during the Roman Empire and Late Antiquity, a period of prosperity and diversity at Kenchreai and in its broader area, students will also explore cultural and historical developments that influenced other regions and longer periods, from the Bronze Age to the Modern era, including religion and cult-practice, art and iconography, settlement and the environment, and the construction of identity.
Credit Only Granted for: CLAS369K or CLAS380.
Formerly: CLAS369K.

CLAS386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CLAS409 Classics Capstone Seminar (3 Credits)
Comparative study of selected central aspects of both ancient Greek and Roman cultures as viewed from the standpoints of literary study, history, art history, and other fields as appropriate. Seminar format involving intensive student research.
Restriction: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS419 The Classical Tradition (3 Credits)
Examination of the role of Greek and Roman civilization in shaping the arts and ideas of western culture.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: CLAS419 or CLAS420.
Formerly: CLAS420.

CLAS470 Approaches to Greek Mythology (3 Credits)
Ancient and modern approaches to understanding Greek myth as expression of human experience, including interpretations drawn from psychology, anthropology, and comparative mythology.
Prerequisite: CLAS170; or permission of ARHU-Classics department.

CLAS488 Independent Study in Classical Civilization (3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS499 Independent Study in Classical Languages and Literatures (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.

CMLT - Comparative Literature

CMLT235 Black Diaspora Literature and Culture (3 Credits)
Examination of key works by writers of the African Diaspora. Relationship among black people across multiple geographic spaces; Africa, the Caribbean, the United States, Europe, Latin America, and Asia. Specific historical, cultural, and literary contexts; themes such as gender, sexuality, migration, slavery, freedom, and equality. Readings may include literary texts (fiction, poetry, drama), music and film. All readings in English, but drawn from multiple languages of the black diaspora, including English, Spanish, French and Portuguese.

CMLT242 Diversify and Multiply: Jewish Culture and the Production of an Identity (3 Credits)
Provides students with a unique exploration of cultural products produced by a diverse array of Jewish creators of literature, comedy and film. The texts, films, and performing arts touch on the central social, economic, and cultural issues of Jews during the ages, and up to the 21st century. This course will explore Jewish creativity throughout history, as well as the Jewish encounter with modernity as a whole. We will be diving into prominent creators such as Tiffany Haddish, Larry David, Sholem Aleichem, Adam Sandler, S. Y. Abramovitsch, Judd Apatow, Philip Roth, Amy Schumer, I. B. Singer, Ben Stiller, Franz Kafka, Dan Levy, and others. Examining their creations will open a window to the diverse methods of construction of modern Jewish identities.Cross-listed with: JWST272, ISRL249G.
Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

CMLT269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CMLT270 Global Literature and Social Change (3 Credits)
Comparative study of literature through selected literary works from several non-Western cultures, viewed cross-culturally in light of particular social, political, and economic perspectives.

CMLT275 World Literature by Women (3 Credits)
Comparative study of selected works by women writers of several countries, exploring points of intersection and divergence in women's literary representations.Cross-listed with: WGSS275.
Credit Only Granted for: WMST275, CMLT275 or WGSS275.
Formerly: WMST275.

CMLT277 Literatures of the Americas (3 Credits)
Comparative study of several North, South, and Central American cultures with a focus on the specificities, similarities, and divergences of their literary and cultural texts.

CMLT280 Film Art in a Global Society (3 Credits)
Comparative study of a variety of film traditions from around the world, including cinema from Hollywood, Europe, Asia and developing countries, with a stress on different cultural contexts for film-making and viewing.Cross-listed with: CINE280.
Credit Only Granted for: CINE280, FILM298D or CMLT280.
Formerly: FILM298D.

CMLT298 Topics in Comparative Studies (3-6 Credits)
Repeatable to: 9 credits if content differs.

CMLT369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CMLT386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and permission of ARHU-English department.

CMLT398 Special Topics in Comparative Studies (3 Credits)
Special topics in comparitive studies.
Repeatable to: 9 credits if content differs.

CMLT399E The Great Derangement: Climate, Art, and Literature (3 Credits)
An investigation of the relationship between climate and art & literature. Introduction to ecological thinking followed by study of artistic and literary works thematically grouped by the four elements: Earth, Water, Air, and Fire. Readings from the German literary tradition (Goethe, Tieck, Stifter, Kafka, Frisch, Wolf) and contemporary research in the environmental humanities, with additional readings and viewings from elsewhere on the planet. Taught in English.
Recommended: 200-level General Education and/or humanities course; and sophomore standing. Cross-listed with: GERM367.
Credit Only Granted for: GERM399E, CMLT399E or GERM367.
Formerly: GERM399E.
Additional Information: Priority in enrollment will be given to German majors.

CMLT469 The Continental Novel (3 Credits)
The novel in translation from Stendhal through the existentialists, selected from literatures of France, Germany, Italy, Russia, and Spain.

CMLT479 Major Contemporary Authors (3 Credits)

CMLT488 Genres (3 Credits)
A study of a recognized literary form, such as tragedy, film, satire, literary criticism, comedy, tragicomedy, etc.
Repeatable to: 6 credits if content differs.

CMLT489 Major Writers (3 Credits)
Each semester two major writers from different cultures and languages will be studied. Authors will be chosen on the basis of significant relationships of cultural and aesthetic contexts, analogies between their respective works, and the importance of each writer to his literary tradition.

CMLT498 Selected Topics in Comparative Studies (3 Credits)

CMLX - Comparative Literature Education Abroad

CMLX300 Leonardo da Vinci: Renaissance Man and Modern Myth (3 Credits)
Leonardo da Vinci (1452-1519) is the last great figure of Western history that masterfully fills the role of both artist and scientist. In light of this achievement, the course will discuss the artistic and scientific endeavors of Leonardo and the impact he had on the shaping of modernity.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

CMLX400 Catalan Culture: Art, Literature and Soccer (3 Credits)
Offers a general introduction to modern and contemporary Catalan culture from the beginning of the twentieth to the twenty-first century. Topics covered include: nationalism, the politics of language, the avant-garde art of Salvador Dali and Miro, literature, and football (soccer).
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

CMSC - Computer Science

CMSC100 Bits and Bytes of Computer and Information Sciences (1 Credit)
Students are introduced to the fields (and disciplines) of computer science and information science within a small classroom setting. They will learn to make a successful transition from high school to the university, while exploring study skills, student success plans and research opportunities.
Restriction: For first time freshmen and first time transfer students. Cross-listed with: INST101.
Credit Only Granted for: CMSC100 or INST101.

CMSC106 Introduction to C Programming (4 Credits)
Design and analysis of programs in C. An introduction to computing using structured programming concepts. Intended for students with no or minimal programming experience.
Prerequisite: MATH115.
Restriction: Must not be in Computer Science program; and must not have completed any courses from CMSC131-499 course range.
Credit Only Granted for: CMSC106 or CMSC122.

CMSC122 Introduction to Computer Programming via the Web (3 Credits)
Introduction to computer programming in the context of developing full featured dynamic web sites. Uses a problem solving approach to teach basics of program design and implementation using JavaScript; relates these skills to creation of dynamic web sites; then explores both the potential and limits of web-based information sources for use in research. Intended to help relate a student's major to these emerging technologies.
Restriction: Must not have completed any courses from CMSC131-499 course range; and must not be concurrently enrolled in CMSC131.
Credit Only Granted for: CMSC106, or CMSC122.

CMSC125 Introduction to Computing (3 Credits)
Introduces you to the computing field as a whole. You will gain skills used across the spectrum of computing majors and learn about the great variety of routes into the various areas of study and employment in technological fields.
Prerequisite: Must have completed or be concurrently enrolled in MATH115 or higher.
Restriction: Must not be in the Computer Science program; and must not have completed any courses from CMSC131-499; and must not have completed INST126 or INST127.

CMSC131 Object-Oriented Programming I (4 Credits)
Introduction to programming and computer science. Emphasizes understanding and implementation of applications using object-oriented techniques. Develops skills such as program design and testing as well as implementation of programs using a graphical IDE. Programming done in Java.
Corequisite: MATH140.
Credit Only Granted for: CMSC131 or IMDM127.

CMSC132 Object-Oriented Programming II (4 Credits)
Introduction to use of computers to solve problems using software engineering principles. Design, build, test, and debug medium -size software systems and learn to use relevant tools. Use object-oriented methods to create effective and efficient problem solutions. Use and implement application programming interfaces (APIs). Programming done in Java.
Prerequisite: Minimum grade of C- in CMSC131; or must have earned a score of 5 on the A Java AP exam; or must have earned a satisfactory score on the departmental placement exam. And minimum grade of C- in MATH140.

CMSC198 Special Topics in Computer Science for Non-Majors (1-4 Credits)
A course designed to allow non-computer science majors and non-computer engineering majors to pursue a specialized topic or project.
Restriction: Must not be in Computer Science program.
Repeatable to: 6 credits if content differs.

CMSC216 Introduction to Computer Systems (4 Credits)
Introduction to the interaction between user programs and the operating system/hardware. Major topics include C programming, introductory systems programming, and assembly language. Other concepts covered include UNIX, machine data representation, thread management, optimization, and virtual memory. Programming is done in the Linux Environment.
Prerequisite: Minimum grade of C- in CMSC132; and minimum grade of C- in MATH141.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permission of CMSC - Computer Science department.

CMSC250 Discrete Structures (4 Credits)
Fundamental mathematical concepts related to computer science, including finite and infinite sets, relations, functions, and propositional logic. Introduction to other techniques, modeling and solving problems in computer science. Introduction to permutations, combinations, graphs, and trees with selected applications.
Prerequisite: Minimum grade of C- in CMSC131; and minimum grade of C- in MATH141.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permissions of CMSC - Computer Science department.

CMSC298 Special Topics in Computer Science (1-4 Credits)
A course designed to allow a lower level student to pursue a specialized topic or project.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.

CMSC320 Introduction to Data Science (3 Credits)
An introduction to the data science pipeline, i.e., the end-to-end process of going from unstructured, messy data to knowledge and actionable insights. Provides a broad overview of several topics including statistical data analysis, basic data mining and machine learning algorithms, large-scale data management, cloud computing, and information visualization.
Prerequisite: Minimum grade of C- in CMSC216 and CMSC250.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: STAT426 or CMSC320.

CMSC330 Organization of Programming Languages (3 Credits)
A study of programming languages, including their syntax, semantics, and implementation. Several different models of languages are discussed, including dynamic, scripting (e.g., Ruby, Python) functional (e.g., OCaml, Haskell, Scheme), and memory safe systems programming (e.g., Rust). Explores language features such as formal syntax, scoping and binding of variables, higher-order programming, typing, and type polymorphism. Introduces finite automata, context free grammar, parsing, lambda calculus, and basics of security attacks and software security.
Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in the Computer Science Minor program; or must be in Engineering: Computer program; and Permission of CMSC - Computer Science department.

CMSC335 Web Application Development with JavaScript (3 Credits)
Provides an introduction to modern ways of developing Web Applications/Services using JavaScript for both front-end and back-end. The course covers topics on fundamental JavaScript language constructs, server-side JavaScript, back-end data persistence, and client-side JavaScript to build Web Applications that interact with Web services and back-end databases.
Prerequisite: Minimum grade of C- in CMSC216 and CMSC250.
Restriction: Permission of CMNS-Computer Science Department.
Credit Only Granted for: CMSC389N or CMSC335.
Formerly: CMSC389N.

CMSC351 Algorithms (3 Credits)
A systematic study of the complexity of some elementary algorithms related to sorting, graphs and trees, and combinatorics. Algorithms are analyzed using mathematical techniques to solve recurrences and summations.
Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permission from the CMSC - Computer Science department.
Credit Only Granted for: CMSC251 or CMSC351.
Additional Information: CMSC351 may not count as one of the required upper level CMSC courses for students who are required to have 24 upper level CMSC credits for graduation, i.e. for students who became computer science majors prior to Fall, 2002.

CMSC388 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.

CMSC389 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science; course may be used as electives for the undergraduate degree and minor.
Repeatable to: 6 credits if content differs.

CMSC390 Honors Paper (3 Credits)
Special study or research directed toward preparation of honors paper.
Restriction: Must be admitted to the Computer Science Honors Program.

CMSC395 Teaching Techniques for Computer Science (1 Credit)
This course will assure that teaching assistants become better skilled at applying effective teaching practices that improve the classroom environment while learning methods to implement mechanisms to improve diversity and inclusion. Legal and ethical aspects of the role will also be considered. Students in the class will be currently working as a teaching assistant and, therefore, be able to apply what they are learning immediately in their own context.
Restriction: Students must be hired as a teaching assistant in the Computer Science Department for the semester they are registered for the course; and permission of the Computer Science Department.

CMSC396 Computer Science Honors Seminar (1 Credit)
Overview of computer science research activities, techniques, and tools. Diverse research areas will be covered, including systems, networks, artificial intelligence, human-computer interaction, software engineering, graphics, vision, and theory.
Prerequisite: Must have admission into Computer Science Departmental Honors Program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC297 or CMSC396.
Formerly: CMSC297.

CMSC398 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science Department.
Repeatable to: 6 credits if content differs.

CMSC401 Algorithms for Geospatial Computing (3 Credits)
An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.
Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor. Cross-listed with: GEOG470. Jointly offered with: GEOG770.
Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.
Formerly: GEOG498I.

CMSC402 Bioinformatic Algorithms and Methods for Functional Genomics and Proteomics (3 Credits)
An introduction to the fundamental concepts in the computational analysis of biological systems with applications to: functional genomics, population genetics, proteomics and epigenetics. Computational concepts covered: network and graph algorithms, combinatorial algorithms, machine learning, large data/network visualization, statistical modeling and inference, probabilistic graphical models, sparse methods in data analysis, numerical optimization. No prior knowledge of biology required.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department.

CMSC411 Computer Systems Architecture (3 Credits)
Input/output processors and techniques. Intra-system communication, buses, caches. Addressing and memory hierarchies. Microprogramming, parallelism, and pipelining.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: ENEE446 or CMSC411.

CMSC412 Operating Systems (4 Credits)
A hands-on introduction to operating systems, including topics in: multiprogramming, communication and synchronization, memory management, IO subsystems, and resource scheduling polices. The laboratory component consists of constructing a small kernel, including functions for device IO, multi-tasking, and memory management.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457).
Restriction: Permission of CMNS-Computer Science department; or must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)).
Credit Only Granted for: CMSC412 or ENEE447.

CMSC414 Computer and Network Security (3 Credits)
An introduction to the topic of security in the context of computer systems and networks. Identify, analyze, and solve network-related security problems in computer systems. Fundamentals of number theory, authentication, and encryption technologies, as well as the practical problems that have to be solved in order to make those technologies workable in a networked environment, particularly in the wide-area Internet environment.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC414, ENEE459C, or ENEE457.

CMSC416 Introduction to Parallel Computing (3 Credits)
Introduction to parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development, and performance analysis of parallel programs.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC416 or CMSC498X.
Formerly: CMSC498X.

CMSC417 Computer Networks (3 Credits)
Computer networks and architectures. The OSI model including discussion and examples of various network layers. A general introduction to existing network protocols. Communication protocol specification, analysis, and testing.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC420 Advanced Data Structures (3 Credits)
Description, properties, and storage allocation functions of data structures including balanced binary trees, B-Trees, hash tables, skiplists, tries, KD-Trees and Quadtrees. Algorithms for manipulating structures. Applications from areas such as String Processing, Computer Graphics, Information Retrieval, Computer Networks, Computer Vision, and Operating Systems.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC421 Introduction to Artificial Intelligence (3 Credits)
Introduces a range of ideas and methods in AI, varying semester to semester but chosen largely from: automated heuristic search, planning, games, knowledge representation, logical and statistical inference, learning, natural language processing, vision, robotics, cognitive modeling, and intelligent agents. Programming projects will help students obtain a hands-on feel for various topics.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC422 Introduction to Machine Learning (3 Credits)
Machine Learning studies representations and algorithms that allow machines to improve their performance on a task from experience. This is a broad overview of existing methods for machine learning and an introduction to adaptive systems in general. Emphasis is given to practical aspects of machine learning and data mining.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH461); and permission of CMNS-Computer Science department.

CMSC423 Bioinformatic Algorithms, Databases, and Tools (3 Credits)
An introduction to the main algorithms, databases, and tools used in bioinformatics. Topics may include assembly and analysis of genome sequences, reconstructing evolutionary histories, predicting protein structure, and clustering of biological data. Use of scripting languages to perform analysis tasks on biological data. No prior knowledge of biology is assumed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC424 Database Design (3 Credits)
Students are introduced to database systems and motivates the database approach as a mechanism for modeling the real world. An in-depth coverage of the relational model, logical database design, query languages, and other database concepts including query optimization, concurrency control; transaction management, and log based crash recovery. Distributed and Web database architectures are also discussed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC425 Game Programming (3 Credits)
An introduction to the principles and practice of computer game programming and design. This includes an introduction to game hardware and systems, the principles of game design, object and terrain modeling, game physics, artificial intelligence for games, networking for games, rendering and animation, and aural rendering. Course topics are reinforced through the design and implementation of a working computer game.
Prerequisite: Minimum grade of C- in CMSC420.

CMSC426 Computer Vision (3 Credits)
An introduction to basic concepts and techniques in computervision. This includes low-level operations such as image filtering and edge detection, 3D reconstruction of scenes using stereo and structure from motion, and object detection, recognition and classification.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351 and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program; or permission of the instructor.
Restriction: Permission of CMNS-Computer Science department.

CMSC427 Computer Graphics (3 Credits)
An introduction to 3D computer graphics, focusing on the underlying building blocks and algorithms for applications such as 3D computer games, and augmented and virtual reality (AR/VR). Covers the basics of 3D image generation and 3D modeling, with an emphasis on interactive applications. Discusses the representation of 3D geometry, 3D transformations, projections, rasterization, basics of color spaces, texturing and lighting models, as well as programming of modern Graphics Processing Units (GPUs). Includes programming projects where students build their own 3D rendering engine step-by-step.
Prerequisite: MATH240; and minimum grade of C- in CMSC420; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC430 Introduction to Compilers (3 Credits)
Topics include lexical analysis, parsing, intermediate representations, program analysis, optimization, and code generation.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC433 Programming Language Technologies and Paradigms (3 Credits)
Programming language technologies (e.g., object-oriented programming), their implementations and use in software design and implementation.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC434 Introduction to Human-Computer Interaction (3 Credits)
Assess usability by quantitative and qualitative methods. Conduct task analyses, usability tests, expert reviews, and continuing assessments of working products by interviews, surveys, and logging. Apply design processes and guidelines to develop professional quality user interfaces. Build low-fidelity paper mockups, and a high-fidelity prototype using contemporary tools such as graphic editors and a graphical programming environment (eg: Visual Basic, Java).
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC435 Software Engineering (3 Credits)
State-of-the-art techniques in software design and development. Laboratory experience in applying the techniques covered. Structured design, structured programming, top-down design and development, segmentation and modularization techniques, iterative enhancement, design and code inspection techniques, correctness, and chief-programmer teams. The development of a large software project.
Prerequisite: 1 course with a minimum grade of C- from (CMSC412, CMSC417, CMSC420, CMSC430, CMSC433, ENEE447); and permission of CMNS-Computer Science department.

CMSC436 Programming Handheld Systems (3 Credits)
Fundamental principles and concepts that underlie the programming of handheld systems, such as mobile phones, personal digital assistants, and tablet computers. Particular emphasis will be placed on concepts such as limited display size, power, memory and CPU speed; and new input modalities, where handheld systems differ substantially from non-handheld systems, and thus require special programming tools and approaches. Students will apply these concepts and principles in the context of an existing handset programming platform.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC451 Design and Analysis of Computer Algorithms (3 Credits)
Fundamental techniques for designing efficient computer algorithms, proving their correctness, and analyzing their complexity. General topics include graph algorithms, basic algorithm design paradigms (such as greedy algorithms, divide-and-conquer, and dynamic programming), network flows, NP-completeness, and other selected topics in algorithms.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC452 Elementary Theory of Computation (3 Credits)
Techniques are developed to determine the difficulty of a problem relative to a model of computation. Topics include Finite Automata, P, NP, decidability, undecidability, and communication complexity.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC454 Algorithms for Data Science (3 Credits)
Fundamental methods for processing a high volume of data. Methods include stream processing, locally sensitive hashing, web search methods, page rank computation, network and link analysis, dynamic graph algorithms as well as methods to handle high dimensional data/dimensionality reduction.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.
Restriction: Permission of CMSC-Computer Science department.
Credit Only Granted for: CMSC454 or CMSC498U.
Formerly: CMSC498U.

CMSC456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor . Cross-listed with: MATH456, ENEE456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

CMSC457 Introduction to Quantum Computing (3 Credits)
An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).
Restriction: Permission of CMNS-Computer Science department.
Additional Information: No previous background in quantum mechanics is required.

CMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Cross-listed with: AMSC460.
Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

CMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Cross-listed with: AMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

CMSC470 Introduction to Natural Language Processing (3 Credits)
Introduction to fundamental techniques for automatically processing and generating natural language with computers. Machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of natural language. Application of these techniques in a series of assignments designed to address a core application such as question answering or machine translation.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH461).
Restriction: Permission of CMNS-Computer Science department.

CMSC471 Introduction to Data Visualization (3 Credits)
Datasets are becoming increasingly large and complex, requiring intuitive ways to explore and interpret them quickly and efficiently. In this case, a picture is worth a thousand words: visualizations enable us to transform data into images that are easier to understand and reason about, compared to raw numbers and raw text. Visualizations are critical tools in externalizing and organizing our knowledge and insights, whether to explore collected datasets to improve our understanding of the physical world, to assess and debug analysis/experimental workflows, or to present new and interesting results to diverse audiences. In this course we will study techniques and algorithms for creating effective visualizations based on principles from graphic design, perceptual psychology, and cognitive science. Students will learn how to design and build interactive visualizations for the web, using the D3.js (Data-Driven Documents) framework.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science Department.
Restriction: Permission of the CMNS-Computer Science Department.
Credit Only Granted for: CMSC471 or CMSC498O.
Formerly: CMSC498O.

CMSC472 Introduction to Deep Learning (3 Credits)
An introduction to deep learning, a machine learning technique, as well as its applications to a variety of domains. Provides a broad overview of deep learning concepts including neural networks, convolutional neural networks, recurrent neural networks, generative models, and deep reinforcement learning, and an intuitive introduction to basics of machine learning such as simple models, learning paradigms, optimization, overfitting, importance of data, and training caveats.
Prerequisite: Minimum grade of C- or higher in CMSC330 and CMSC351; and 1 course with a minimum grade of C- or higher from (MATH240, MATH461).
Restriction: Permission of the CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's) program.
Credit Only Granted for: CMSC498L or CMSC472.
Formerly: CMSC498L.

CMSC473 Capstone in Machine Learning (3 Credits)
Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.
Prerequisite: Minimum grade of C- or higher in CMSC421 or CMSC422.
Recommended: Background or exposure to machine learning topics is strongly encouraged.
Restriction: Permission of instructor and Permission of CMSC - Computer Science department.
Credit Only Granted for: CMSC498P or CMSC473.
Formerly: CMSC498P.
Additional Information: Students will be paired with project advisors from the UMD faculty or alternatively, an industry advisor. Students are encouraged to plan for projects results that can be published at academic conferences or will impact academic research.

CMSC474 Introduction to Computational Game Theory (3 Credits)
Game theory deals with interactions among agents (either human or computerized) whose objectives and preferences may differ from the objectives and preferences of the other agents. It will also provide a comprehensive introduction to game theory, concentrating on its computational aspects.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Credit Only Granted for: CMSC474, ECON414, GVPT390 or GVPT399A.

CMSC475 Combinatorics and Graph Theory (3 Credits)
General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340). And permission of CMNS-Computer Science department; or permission of CMNS-Mathematics department. Cross-listed with MATH475 .

CMSC476 Introduction to Robotics with Perception (3 Credits)
Introduction to the programming of robots with perception. Topics covered include navigation using vision and 3D depth sensors, localization and map making, image processing for visual navigation and recognition, and basic vision and depth-based manipulation. Develop algorithms and learn how to use vision and software tools, such as Open CV, MoveIt, and the Point Cloud Library. Programming done in Python and C++ under the Robotic Operating System (ROS).
Prerequisite: Minimum grade of C- in MATH240, CMSC330, and CMSC351.
Restriction: Permission of CMNS-Computer Science department.

CMSC477 Robotics Perception and Planning (3 Credits)
A hands-on introduction to perception and planning for robotics, including rigid body transformations and rotations, dynamics and control of mobile robots/drones, graph based and sampling based planning algorithms, Bayseian and Kalman filtering, camera models and calibration, projective geometry, visual features, optical flow, pose estimation, RANSAC and Hough transform, structure from motion, visual odometry, machine learning basics, visual recognition and learning.
Prerequisite: MATH240; and (ENEE467 or CMSC420).
Restriction: Must be in the Robotics and Autonomous Systems minor; or permission of department.
Credit Only Granted for: CMSC477 or CMSC498F.
Formerly: CMSC498F.
Additional Information: Students in the Robotics and Autonomous Systems minor should take ENEE467 as a prerequisite; Computer Science students not in the minor should take CMSC420.

CMSC488 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.
Additional Information: Course may be used as electives for the undergraduate degree and minor.

CMSC498 Selected Topics in Computer Science (1-3 Credits)
An individualized course designed to allow a student or students to pursue a selected topic not taught as a part of the regular course offerings under the supervision of a Computer Science faculty member. In addition, courses dealing with topics of special interest and/or new emerging areas of computer science will be offered with this number. Selected topics courses will be structured very much like a regular course with homework, project and exams. Credit according to work completed
Restriction: Permission of CMNS-Computer Science department.

CMSC499 Independent Undergraduate Research (1-3 Credits)
Students are provided with an opportunity to participate in a computer science research project under the guidance of a faculty advisor. Format varies. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper delineating their contribution to the field.
Restriction: Must be in one of the following programs (Computer Science; Engineering: Computer) ; and permission of CMNS-Computer Science department.

COMM - Communication

COMM107 Oral Communication: Principles and Practices (3 Credits)
A study of and practice in oral communication, including principles of interviewing, group discussion, listening, informative briefings, and persuasive speeches.
Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130 or THET285.

COMM130 Professional Communication and Writing (1 Credit)
Designed to enhance the clarity and grace of students' writing. Students will acquire knowledge of writing based on principles of style and grammar as well as argument and organizational structure across a diversity of professional writing contexts. Students will also engage in peer review of one another's writing.
Restriction: Must be in the Communication major.

COMM170 Foundations of Listening (3 Credits)
Role, process, and levels of listening behavior and the development of listening skills.

COMM200 Critical Thinking and Speaking (3 Credits)
Theory and practice of persuasive discourse analysis and composition. Research techniques, logical and rhetorical conceptions of argument, and technical principles for persuading in public venues.
Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130, OR THET285.

COMM201 Introduction to Public Relations (3 Credits)
Basic concepts and principles of public relations. Roles in organizations and society; history; skills and practices of public relations; theories and models of effective and ethical public relations.
Prerequisite: Must have completed or be concurrently enrolled in COMM130.
Restriction: Must be in the Communication major.

COMM207 Oral Communication for Engineers (1 Credit)
An exploration of oral communication skills which prepares engineers to engage in interpersonal communication in professional and international settings, communicate effectively in group environments, and deliver listenable presentations.
Prerequisite: ENES100.

COMM230 Argumentation and Debate (3 Credits)
A study of the fundamental principles of reasoning, analysis, and evidence preparation of debate briefs and presentation of standard academic debate.

COMM250 Introduction to Communication Inquiry (3 Credits)
An introduction to the field of communication. Definitions, models, and contexts of communication; rhetorical theory and rhetorical criticism of discourse.

COMM269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

COMM288 Communication Internship (1-6 Credits)
An individual experience arranged by the student with the instructor. Does not satisfy communication major requirements. 45 hours of supervised internship per credit hour with communication professional. Not a substitute for COMM386.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 6 credits if content differs.

COMM298 Selected Topics in Communication (3 Credits)
Special topical study of contemporary issues in communication.
Repeatable to: 6 credits if content differs.

COMM301 Rhetorical Theories (3 Credits)
Explores the idea of rhetoric, from antiquity to digitality. Rhetoric, as an art of moving bodies, is central to democratic self-governance: only through persuading each other can we develop a shared vision of a just and desirable future. This course tracks the genesis of rhetorical theory in the ancient world, 20th-century struggles against fascist rhetoric, and contemporary extensions of rhetoric in digital media ecologies.
Prerequisite: COMM130, COMM250; and one course from STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one course from COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM301 or COMM401.

COMM302 Communication Science Theories (3 Credits)
This class introduces students to the principles of theory construction and offers a critical overview of how communication theories can be applied to solving problems in diverse social contexts, including interpersonal, intercultural, organizational, health, and/or political issues. The ultimate goal of this course is to put students in an intellectual position to understand theories more logically and critically and use them appropriately and effectively in conducting academic research and addressing social issues.
Prerequisite: COMM130, COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM302 or COMM402.

COMM303 Media Theory (3 Credits)
Provides students with an introduction to media theory from multiple perspectives. We will begin by understanding how the history of mediated communication has been connected to ideology and lived experiences. Through readings, discussions, and activities, you will understand how technical, historical, economic social, and political forces have helped shape media content and the media themselves. You should also become familiar with the debate over how much influence the media have over their audiences, and what types of influences are present. The course will introduce issues relevant to consideration of media and historically underrepresented and marginalized groups, as well as individual and societal functions of the media.
Prerequisite: COMM130 and COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.
Restriction: Must be in the Communication major.

COMM304 Communication Research Literacy (3 Credits)
Explores the different research traditions in the Communication discipline. This "literacy" course will develop students' ability to locate and fully comprehend Communication research and to understand how that research is conducted, reported, analyzed, and critiqued in Communication literature.
Prerequisite: Must have completed the Communication gateway requirements (COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200 or COMM230). Must have completed or be concurrently enrolled in COMM130.
Restriction: Must be in the Communication program.

COMM305 Qualitative Communication Research Methods (3 Credits)
Introduces undergraduate students to the methods used in qualitative communication research. Topics covered in class include ethics, field research, reflexivity, data collection, and data analysis. Over the course of the semester, students will develop a research prospectus, engage in field research (interviews and observations), analyze qualitative data, and write/present their research.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.

COMM306 Rhetorical Methods in Communication (3 Credits)
Equips students with skills for conducting research using rhetorical-critical methods. Such methods are crucial for scholars studying all kinds of public rhetoric: speeches, popular culture, photojournalism, digital media, public monuments, laws, and more. They are also instrumental for citizens engaging with elected officials, other citizens, and democratic institutions, as well as professionals who seek to create and understand persuasive discourse. This course will equip you with critical interpretive skills important to your work as a scholar, citizen, and professional.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.

COMM307 Quantitative Methods in Communication (3 Credits)
Designed to introduce students to the basics of quantitative communication research methods. As such, it covers the basic principles of scientific inquiry, the process for generating research questions and hypotheses, the concept of variables, sampling methods, research designs, basics of data analyses, as well as ethics in scientific research. This course prepares students to become informed consumers of quantitative communication research.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM400 or COMM307.
Formerly: COMM400.

COMM324 Communication and Gender (3 Credits)
Explores how communication shapes constructions of gender, sex, sexuality and other identity markers. Topics include issues of oppression, identity, and power and social, political, and economic situations and examines how these issues impact our daily lives.

COMM330 Argumentation and Public Policy (3 Credits)
Contemporary theories of argumentation with special emphasis on methods of formulating and critiquing public policy argument.

COMM331 News Writing and Reporting for Public Relations (3 Credits)
Writing and researching news and information media for public relations; laboratory in news-gathering tools and writing techniques for public relations.
Prerequisite: COMM130 and COMM201.
Restriction: Must be in Communication program; and (sophomore standing; or junior standing).
Credit Only Granted for: JOUR201, COMM231, or COMM331.
Formerly: COMM231.

COMM332 News Editing for Public Relations (3 Credits)
Copy editing, graphic principles and processes, news and information technologies for public relations.
Prerequisite: Minimum grade of C- in COMM331; or students who have taken courses with comparable content may contact the department. And permission of ARHU-Communication department.
Restriction: Must be in Communication program.
Credit Only Granted for: JOUR202, COMM232, or COMM332.
Formerly: COMM232.

COMM340 Communicating the Narrative (3 Credits)
The role of narratives in communicating messages and development of strategies to effectively communicate the narrative form through storytelling, oral reading, and anecdotes.

COMM351 Public Relations Techniques (3 Credits)
The techniques of public relations, including news releases, publications and printed materials, audio-visual techniques, speeches and special events. Application of these techniques in laboratory and field projects.
Prerequisite: COMM331.
Restriction: Must be in Communication program.

COMM353 New Media Writing for Public Relations (3 Credits)
Students learn the uses and influence of new media on public relations practice and expand their ability to write using new and traditional media platforms and tools
Prerequisite: Minimum grade of C- in COMM351.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM352 or COMM353.
Formerly: COMM352.

COMM354 Public Relations Programs (3 Credits)
Analysis of eight major programs typically carried out by public relations professionals: employee relations, media relations, financial relations, member relations, governmental relations, community relations, fundraising and dealing with activist public.
Prerequisite: COMM201.

COMM360 The Rhetoric of Black America (3 Credits)
An historical-critical survey of the rhetoric of Black Americans from the colonial period to the present.

COMM369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

COMM370 Mediated Communication (3 Credits)
Analysis and critique of structure, performance, content, effects, and future of mediated communication.
Prerequisite: COMM250.
Restriction: Junior standing or higher.

COMM371 Communication and Digital Media (3 Credits)
A basic introduction to communication in the digital age. Through class lectures, assignments and projects, students will learn to effectively use new media for the purpose of strategic message creation and management used in the field of communication. Students will apply the basics of visual layout skills and the principles of visual design to create messages using words and images.
Restriction: Must be in Communication program.

COMM372 Communication, Meaning, and Digital Media (3 Credits)
An exploration of visual communication and meaning creation. A theoretical and practical application of communication concepts and techniques in the production of visual content.
Restriction: Must be in Communication program.

COMM373 Communication and Digital Visual Narrative (3 Credits)
Examination of the traditional style of visual communication, its practices and theoretical underpinnings juxtaposed against contemporary digital media aesthetics and techniques. Utilizing a variety of communication skills and new media tools, students will plan, write, shoot, edit, and upload digital visual narratives.
Restriction: Must be in Communication program.

COMM374 Communicating Visually: Message Production and Digital Media (3 Credits)
Focus on the interplay between technology, images and sound in the creation of digital content. This is a communication process by which a digital visual message evolves from conception to completion, incorporating the creative, financial and marketing tools. Students will conceive, plan, recruit and supervise digital video projects, developing a familiarity with production management technique and execution.
Restriction: Restricted to Communication Majors at the Universities at Shady Grove.

COMM375 Documentary Theory and Practice (3 Credits)
A historical and theoretical introduction to documentary films and videos. Students will explore the power of documentaries to address socially significant issues.
Restriction: Must be in Communication program.

COMM376 Communication through Advocacy Short Film (3 Credits)
Explores the theory and practice of contemporary communication and advocacy short form video.
Restriction: Must be in Communication program.

COMM382 Essentials of Intercultural Communication (3 Credits)
Introduction of major theories and concepts of intercultural communication; examination of processes that make up cultural differences; and use of intercultural communication competence skills.
Credit Only Granted for: COMM382 or COMM482.

COMM385 Influence (3 Credits)
Explores contemporary theories of influence and their implications for communication practice. Topics include power and influence, logical theory, rhetorical theory, persuasion theory, framing theory, social influence theory, and propagation of influence in mediated social networks.
Credit Only Granted for: COMM385 or COMM498I (Spring 2014).
Formerly: COMM498I (Spring 2014).

COMM386 Experiential Learning (3-6 Credits)
Supervised internship experience with communication professionals. Relation of academic training to professional experience.
Prerequisite: Permission of ARHU-Communication department.
Restriction: Junior standing or higher; and must be in Communication program.

COMM388 Communication Practicum (1-3 Credits)
Supervised professional-level practice in communication.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 3 credits if content differs.

COMM398 Selected Topics in Communication (3 Credits)
Topical study of contemporary issues in communication.
Repeatable to: 6 credits if content differs.

COMM399 Honors Thesis (3 Credits)
Prerequisite: Permission of ARHU-Communication department.
Restriction: Must be in Communication program.
Repeatable to: 6 credits if content differs.

COMM400 Research Methods in Communication (3 Credits)
Philosophy of scientific method; role of theory; research ethics; empirical research methods (measurement, sampling, design, analysis).
Prerequisite: COMM250; and must have an introductory course in statistics.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM400 or COMM307.

COMM401 Interpreting Strategic Discourse (3 Credits)
Principles and approaches for practical analysis of discourse designed to shape audience opinion.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM402 Communication Theory and Process (3 Credits)
Philosophical and conceptual analysis of communication theories.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM419 Special Topics in Health Communication (3 Credits)
Covers a variety of topics of health communication. Blends theoretical concepts and practical concerns that impact upon health communication processes. This course covers a specific topic of health communication in greater depth and applies scholarly discoveries to real-world examples.
Prerequisite: COMM304.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM420 Theories of Group Discussion (3 Credits)
Current theory, research and techniques regarding small group process, group dynamics, leadership and decision-making.

COMM421 Communicating Leadership (3 Credits)
Examines the nature of leadership, theories of leadership from a communication perspective, relationships between leadership, authority, power, and ethics. Explores leadership responsibilities, commitments, and actions.

COMM422 Communication Management (3 Credits)
Communication policies, plans, channels, and practices in the management of the communication function in organizations.

COMM423 Communication Processes in Conferences (3 Credits)
Group participation in conferences, methods of problem solving, semantic aspects of language, and the function of conferences in business, industry and government settings.

COMM424 Communication in Complex Organizations (3 Credits)
Structure and function of communication within organizations: organizational climate and culture, information flow, networks and role relationships.

COMM425 Negotiation and Conflict Management (3 Credits)
Role of communication in shaping negotiation and conflict processes and outcomes.

COMM426 Conflict Management (3 Credits)
Role of communication in managing conflict processes.
Recommended: COMM425 and COMM250.

COMM427 Crisis Communication (3 Credits)
Explores theories and research related to communication before, during, and after a crisis. Students examine the fundamentals of organizational communication, crisis management, and strategic and crisis communication planning before examining case studies of a number of real-life crises: organizational crises, natural disasters, accidents, terrorism incidents, health crises, and major crises of credibility.

COMM428 Special Topics Seminar in Dialogues and Deliberation (3 Credits)
A study in public dialogue and deliberation theory and practice. This course will integrate recorded lectures, readings, videos, Public Dialogues, teamwork, and historical research.
Prerequisite: COMM250; and must have completed or be concurrently enrolled in COMM306.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM435 Theories of Interpersonal Communication (3 Credits)
Major theoretical approaches and research trends in the study of interpersonal communication.
Prerequisite: COMM400; or permission of ARHU-Communication department.

COMM436 Interpersonal Arguing (3 Credits)
An examination of face to face arguing.
Prerequisite: COMM400 and COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM436 or COMM498I.
Formerly: COMM498I.

COMM448 Special Topics in Public Relations (3 Credits)
Courses seek to examine historical and current communication management theories, literature and practices for the purposes of understanding the business environment in which public relations/communication management operates and applying the best of these theories and practices toward the management of the public relations/communications functions of an organization.
Prerequisite: COMM201.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM449 Special Topics in Digital Communication (3 Credits)
Explores the topics that have arisen around computers, digital technologies, the internet, big data, surveillance capitalism, and network infrastructures.
Repeatable to: 6 credits if content differs.

COMM450 Ancient and Medieval Rhetorical Theory (3 Credits)
A survey of rhetorical theory in the ancient and medieval periods. Emphasis is placed on the theoretical problems that gave rise to its development within both periods. Authors include Isocrates, Plato, Aristotle, Cicero, Quintilian, Hermogenes, Martianus Capella, Aurelius Augustine, Alberic of Monte Cassino, Geoffrey of Vinsauf and Robert of Basevorn.
Prerequisite: COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM450 or COMM650.

COMM454 Rhetoric of the 1960s (3 Credits)
Study of key rhetoric of the 1960s. Treats rhetoric of relevant Presidents and several protest movements including civil rights, anti-war, and women's liberation. Contrasts traditional modes of argument with alternative rhetorical forms.
Prerequisite: COMM301.

COMM455 Speechwriting (3 Credits)
The study of message strategies in order to research and develop effective speech texts appropriate to speakers and their audiences in various public contexts.

COMM456 Freedom of Speech & the First Amendment (3 Credits)
Examines the U.S. Supreme Court's rulings on freedom of speech cases as grounded in the First Amendment to the U.S. Constitution. It also considers the political and ideological role of "freedom of speech" as a rhetoric organizing and ordering U.S. political culture.
Credit Only Granted for: COMM498Y or COMM456.
Formerly: COMM498Y.

COMM458 Seminar in Political Communication (3 Credits)
The examination of special topics for and theories of political communication.
Prerequisite: COMM250.
Repeatable to: 6 credits if content differs.

COMM459 Special Topics in Science Communication (3 Credits)
This seminar course is designed to help students learn a variety of topics of science communication.
Repeatable to: 6 credits if content differs.

COMM460 Public Life in American Communities, 1634-1900 (3 Credits)
Ways that Americans have used their voice to create public life. Focus is on the diverse social communities that have characterized American life and the place and characteristics of oral discourse in each.

COMM461 Voices of Public Leadership in the Twentieth Century (3 Credits)
Study of the use of speaking in the power struggles of the twentieth century. Focus is on important speakers of the century, their social and policy influence, and the struggle to expand the diversity of voices with power in the public sphere.

COMM462 Visual Communication (3 Credits)
The study of visual communication should change the way one sees the world. Students will observe, analyze, and critique visual images. The ascendance of images in our contemporary world will be demonstrated, methods for critically comprehending how images do persuasive work will be identified, and students will develop a vocabulary for critiquing images, and assist students in creating compelling images.
Credit Only Granted for: COMM462 or COMM498V.
Formerly: COMM498V.

COMM468 Seminar in Mediated Communication (3 Credits)
The examination of special topics related to the study of mediated communication.
Prerequisite: COMM402, COMM450, COMM350, or JOUR350.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM469 The Discourse of Social Movements (3 Credits)
Study of key social movements that have influenced American social and political life. In alternate years the Civil Rights Movement and the Rhetoric of Women's Suffrage and Abolitionism. Consideration of how groups excluded from or marginalized in American political life affect social change.
Recommended: COMM301.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM470 Listening (3 Credits)
The principles of listening behavior.

COMM471 Public Communication Campaigns (3 Credits)
Diffusion theory and its implications for public communication campaigns.
Prerequisite: COMM200; or permission of ARHU-Communication department.

COMM472 Nonverbal Communication (3 Credits)
Nonverbal communication in human interaction theory and research on proxemics, kinesics and paralanguage as expression of relationship, affect and orientation within and across cultures.

COMM475 Persuasion (3 Credits)
Bases of persuasion, with emphasis on recent experimental developments in persuasion.

COMM476 Language, Communication, and Action (3 Credits)
Communication as symbolic action through the study of communication ethics. Emerging ethical principles and decision-making in public discourse, interpersonal communication, organizational communication, public relations, health communication, and crisis communication.
Restriction: Must be in the Communication major.

COMM477 Discourse Analysis (3 Credits)
Concepts of textual and discourse analysis applied to speech situations.

COMM478 Communication Colloquium (1 Credit)
Current trends and issues in the field of communication, stressing recent research methods. Recommended for senior and graduate student majors and minors in communication.
Repeatable to: 4 credits if content differs.

COMM482 Intercultural Communication (3 Credits)
The major variables of communication in an intercultural context: cultural, racial and national differences; stereotypes; values; cultural assumptions; and verbal and nonverbal channels.

COMM483 Senior Seminar in Public Relations (3 Credits)
Integration of theory, techniques and research methods into the planning and execution of public relations campaigns for specific organizations. Analysis of research on the case studies of public relations.
Prerequisite: COMM351; and 1 course from (COMM305, COMM306, COMM307, or COMM400).
Additional Information: Students who enrolled after Fall 2020 should not take COMM400 as a prerequisite.

COMM488 Communication Portfolio Project (1 Credit)
Preparation of the professional communication portfolio.
Restriction: Senior standing; and must be in Communication program.
Repeatable to: 3 credits if content differs.

COMM489 Topical Research (1-3 Credits)
Individualized research projects conducted with a faculty sponsor.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 6 credits if content differs.

COMM498 Seminar (3 Credits)
Present-day communication research.
Restriction: Permission of instructor; and senior standing.

COMX - Communication Education Abroad

COMX200 Social Media, Social Food (3 Credits)
What is "Social Media" and how will developing media skills help students plan successful careers in the world of food? This course will provide a perfect example of the importance of communication and social media in the food industry.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

COMX201 Social Media: an Italian Perspective (3 Credits)
The world of social media has its own specialized vocabulary. Key terms such as "social media strategy", "followers", "engagement" and "content marketing" will form the basis of our study. Nowadays, thanks to the internet, the small market downtown has enlarged its boundaries worldwide and mere shouting louder has been replaced by advertising through social media. Hence, the title of this course: Social media, yes, but from an Italian perspective.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

COMX300 Media and Gender (3 Credits)
Media representations of men and women influence and affect interpretations of sexual identities, interpretations of social roles, and perceptions of equality or inequality in society. This course reviews the extent and importance of media influences through a study of representations of men and women and alternative sexualities in the popular media and advertising in the latter half of the 20th century.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

CPBE - College Park Scholars-Business, Society, and Economy

CPBE100 College Park Scholars: Business, Society & the Economy First-Year Colloquium (1 Credit)
Introductory colloquium: Examination of issues related to business, society and the economy.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE225 Enterprise Communications (3 Credits)
Examines basic interpersonal communication processes within written and oral channels, with practical applications for the business environment.
Prerequisite: CPBE100.
Restriction: Must be enrolled in College Park Scholars' Business, Society and the Economy (CPBE) program.
Formerly: CPSP220.

CPBE230 College Park Scholars: Business, Society & the Economy Internship Practicum (1-3 Credits)
Supervised internship project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE240 College Park Scholars: Business, Society & the Economy Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE250 College Park Scholars: Business, Society & the Economy Research Practicum (1-3 Credits)
Supervised research project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE270 Impacts of Globalization (3 Credits)
Introduces students to key global concepts, discusses a range of perspectives on globalization and cultural competence, and offers an applied learning experience.
Prerequisite: CPBE100; or by permission.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program; or by permission. Cross-listed with: HONR298A.
Credit Only Granted for: CPBE270 or HONR298A.

CPET - College Park Scholars-Environment, Technology & Economy

CPET100 College Park Scholars: Environment, Technology & Economy First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the convergence of the environment, technology and the economy.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET101 College Park Scholars: Environment, Technology & Economy First-Year Colloquium II (3 Credits)
Introductory colloquium II: Continued examination of issues related to the convergence of the environment, technology and the economy. Group projects in sustainable development.
Prerequisite: CPET100.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET200 College Park Scholars: Environment, Technology & Economy Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to sustainable development.
Prerequisite: CPET101.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET230 College Park Scholars: Environment, Technology & Economy Internship Practicum (1-3 Credits)
Supervised internship project in an area related to the environment, technology and the economy.
Prerequisite: CPET200.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPET240 College Park Scholars: Environment, Technology & Economy Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to the environment, technology and the economy.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET), Science, Technology & Society (CPSS), Arts (CPSA) and Business, Society, & Economy (CPBE) programs.

CPET250 College Park Scholars: Environment, Technology & Economy Research Practicum (1-3 Credits)
Supervised research project in an area related to the environment, technology and the economy.
Prerequisite: CPET200.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPGH - College Park Scholars-Global Public Health

CPGH100 College Park Scholars: Global Public Health First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of factors that determine the health status of populations around the world.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH101 College Park Scholars: Global Public Health First-Year Colloquium II (1 Credit)
Using case studies, students will examine necessary components to design successful public health interventions.
Prerequisite: CPGH100.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH200 College Park Scholars: Global Public Health Second-Year Colloquium (1 Credit)
Building on knowledge and skills gained from the first-year colloquia, students will develop public health interventions that address a public health issue of a particular community.
Prerequisite: CPGH101.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH230 College Park Scholars: Global Public Health - Internship Practicum (1-3 Credits)
Supervised internship project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH240 College Park Scholars: Global Public Health Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH250 College Park Scholars: Global Public Health Research Practicum (1-3 Credits)
Supervised research project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH270 College Park Scholars: Global Public Health Education Abroad Practicum (1-3 Credits)
Education abroad experience in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPJT - College Park Scholars-Justice and Legal Thought

CPJT100 College Park Scholars: Justice & Legal Thought: First-Year Colloquium (1 Credit)
Students will gain an experiential understanding of law and justice by investigating concepts and frameworks of justice and apply them to real-world experience.
Restriction: Students must be enrolled in the College Park Scholars Justice & Legal Thought (CPJT) program.

CPJT101 Colloquium in Justice and Legal Thought (1 Credit)
An exploration of contemporary issues related to justice and legal thought.

CPJT200 Justice and legal Thought Second Year Colloquium (1 Credit)
Advanced colloquium for second year students related to research skill development
Restriction: Students must be enrolled in the College Park Scholars Justice and Legal Thought (CPJT) program.
Additional Information: When combined with the first year CPJT colloquia, students will learn how to research issues discussed and debated throughout year one.

CPJT230 Capstone for Justice and Legal Thought: Internship (2-3 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum internships in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunction with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final project culminating in a poster presentation.

CPJT240 Capstone for Justice and Legal Thought: Service-Learning (2 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum volunteer experiences in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunctions with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought program through an innovative final project culminating in a poster presentation.

CPJT250 Capstone for Justice and Legal Thought: Research (2 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform applied research in a law related setting. Students must interact directly with legal professionals under the supervision of program staff. Students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final research project culminating in a poster presentation.

CPMS - College Park Scholars-Media, Self and Society

CPMS100 College Park Scholars: Media, Self & Society First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the media.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS101 College Park Scholars: Media, Self & Society First-Year Colloquium II (1 Credit)
Examination of the media's coverage of topical issues.
Prerequisite: CPMS100.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS225 Analyzing Media Practice through Theory (3 Credits)
Media analysis investigating patterns of ownership, the working of media organizations, patterns of coverage and the nature of audiences.
Prerequisite: CPMS100.
Restriction: Must be in the Scholars Media, Self & Society Program.
Formerly: CPSP222.

CPMS230 College Park Scholars: Media, Self & Society - Internship Practicum (1-3 Credits)
Supervised internship project in an area related to media, self and society.
Prerequisite: CPMS101.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS240 College Park Scholars: Media, Self & Society - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to media, self and society.
Prerequisite: CPMS101.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPPL - College Park Scholars-Public Leadership

CPPL100 College Park Scholars: Public Leadership First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to public leadership.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL101 College Park Scholars: Public Leadership First-Year Colloquium II (1 Credit)
Continued examination of issues related to public leadership. Development of team, community-based learning project proposals.
Prerequisite: CPPL100.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL200 College Park Scholars: Public Leadership - Applied Leadership Capstone I (1 Credit)
Planning and initiation of team, community-based-learning projects.
Prerequisite: CPPL101.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL201 College Park Scholars: Public Leadership - Applied Leadership Capstone II (2 Credits)
Implementation and evaluation of team, community-based-learning projects.
Prerequisite: CPPL200.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPSA - College Park Scholars-Arts

CPSA100 College Park Scholars: Arts First-Year Colloquium I (1 Credit)
Introductory colloquium: Aesthetic, intellectual and personal examination of the arts.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA101 College Park Scholars: Arts First-Year Colloquium II (1-2 Credits)
Introductory colloquium II: Arts workshops and Arts Festival.
Prerequisite: CPSA100.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA149 College Park Scholars: Arts Service-Learning Outreach (2 Credits)
Service-Learning outreach to Prince George's County schools and non-profit agencies.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Repeatable to: 6 credits.

CPSA200 College Park Scholars: Arts Second-Year Colloquium I (1 Credit)
Advanced colloquium I: Examination of the arts in society; and preparation for "Scholarship-in-Practice" project.
Prerequisite: CPSA101.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 240, 250 or 260, students will earn General Education Scholarship-in-Practice credit.

CPSA201 College Park Scholars: Arts Second-Year Colloquium II (1-2 Credits)
Advanced colloquium II: Arts workshop and Arts Festival.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA240 College Park Scholars: Arts Service-Learning Practicum (2 Credits)
Supervised Service-Learning project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA250 College Park Scholars: Arts Research Practicum (2 Credits)
Supervised research project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA260 College Park Scholars: Arts Peer-Teaching Practicum (2 Credits)
Supervised peer-teaching project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSD - College Park Scholars-Science, Discovery & the Universe

CPSD100 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium A (1 Credit)
Introductory colloquium: Examination of issues related to science, discovery and the universe.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.
Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD101 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium B (1 Credit)
Introductory colloquium: Examination of the intersection of astronomy and culture; and the roles of science, exploration and communication in the process of discovery.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.
Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD200 College Park Scholars: Science, Discovery & the Universe Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to science, discovery and the universe.
Prerequisite: CPSD100 and CPSD101.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD230 College Park Scholars: Science, Discovery & the Universe - Internship Practicum (1-3 Credits)
Supervised internship project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD240 College Park Scholars: Science, Discovery & the Universe - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD250 College Park Scholars: Science, Discovery & the Universe - Research Practicum (1-3 Credits)
Supervised research project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSF - College Park Scholars-Life Sciences

CPSF100 College Park Scholars: Life Sciences First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the life sciences.
Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSF101 College Park Scholars: Life Sciences First-Year Colloquium II (1 Credit)
Further examination of issues related to the life sciences.
Prerequisite: CPSF100.
Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSF200 College Park Scholars: Life Sciences Second-Year Colloquium (1 Credit)
This course is the final of a three-semester sequence within the College Park Scholars- Life Sciences Program. In the first semester, our content focused on community; we built community as a program of unique individuals to create a common identity and discussed the ways in which the science community exists. The second semester allowed us to explore the life sciences through our lenses of curiosity; we asked big questions and moved toward big answers. This semester is focused on engagement. We will take time to be fully present in the life sciences community and learn why it is important to gain practical knowledge and experiences to further the goals and aims of science.
Prerequisite: CPSF101.
Restriction: Must be in the College Park Scholars Life Sciences program.
Credit Only Granted for: CPSF200 or CPSP218L.
Formerly: CPSP218L.

CPSG - College Park Scholars-Science and Global Change

CPSG100 College Park Scholars: Science & Global Change First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to science and global change.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG101 College Park Scholars: Science & Global Change First-Year Colloquium II (1 Credit)
Introductory colloquium II: Continued examination of issues related to science and global change.
Prerequisite: CPSG100.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG200 College Park Scholars: Science & Global Change Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to science and global change.
Prerequisite: CPSG101.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG230 College Park Scholars: Science & Global Change - Internship Practicum (1-3 Credits)
Supervised internship in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG240 College Park Scholars: Science & Global Change - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning experience in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG250 College Park Scholars: Science & Global Change - Research Practicum (1-3 Credits)
Supervised research experience in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSN - College Park Scholars-International Studies

CPSN100 College Park Scholars: International Studies First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to international studies.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN101 College Park Scholars: International Studies First-Year Colloquium II (1 Credit)
Introductory colloquium II: Continued examination of issues related to international studies.
Prerequisite: CPSN100.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.
Additional Information: When paired with the successful completion of CPSN 100, students will earn Diversity/Cultural Competence General Education credits.

CPSN230 College Park Scholars: International Studies - Internship Practicum (1-3 Credits)
Supervised internship project in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN240 College Park Scholars: International Studies - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN250 College Park Scholars: International Studies - Research Practicum (1-3 Credits)
Supervised research in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSP - College Park Scholars Program

CPSP118 College Park Scholars First-Year Colloquium I (1-3 Credits)
Introductory colloquium for specific College Park Scholars Program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP119 College Park Scholars First-Year Colloquium II (1-3 Credits)
Intermediate colloquium for specific College Park Scholars Programs.
Prerequisite: CPSP118.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP218 College Park Scholars Second-Year Colloquium I (1-3 Credits)
Colloquium for specific College Park Scholars Program.
Prerequisite: CPSP118.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP219 College Park Scholars Second-Year Colloquium II (1-3 Credits)
Intermediate colloquium for specific, second year, College Park Scholars Program.
Prerequisite: CPSP218.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP229 Practicum: Online Communication (1-3 Credits)
Supervised practicum in Website development.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP239 Practicum: Internship (1-3 Credits)
Supervised internship in interest area related to the theme of the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP249 Practicum: Service-Learning (1-3 Credits)
Supervised Service-Learning project in area related to the theme of the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP259 Practicum: Research (1-3 Credits)
Supervised research project in interest area related to the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP269 Practicum: Peer Teaching (1-3 Credits)
Supervised peer teaching in students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP279 Practicum: Study Abroad (1-3 Credits)
Supervised international experience that satisfies students' College Park Scholars practicum requirement.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP318 College Park Scholars Special Topics (1-3 Credits)
Special Topics learning opportunities in College Park Scholars.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP339 Advanced Practicum: Internship (1-3 Credits)
Independent study designed for students who wish to extend in greater depth and detail projects begun in sophomore year. Subject varies. Overseen by faculty director or mentor.
Prerequisite: CPSP239.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP349 Advanced Practicum: Service Learning (1-3 Credits)
Advanced supervised Service-Learning project.
Prerequisite: CPSP249.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP349T College Park Scholars: Infrastructure and Society (3 Credits)
One of the most important, and underappreciated, aspects of our society is its infrastructure (roads, buildings, communication systems, water delivery systems, sanitation systems, energy systems, etc.). We often take for granted the services infrastructure bring us. As a consequence, the United States, which at one time was a world leader in creating infrastructure, is experiencing an infrastructure crisis. Furthermore, not everyone experiences this issue equally. This course is designed to identify the root causes of the crisis. You will explore emerging social, political, legal, cultural, and social justice issues associated with the building and maintenance of infrastructure from the perspective of Science and Technology Studies (STS) and engineers. You will work with a volunteer corps of professional engineers from a variety of disciplines on a service-learning project designed to assess the safety and vitality of infrastructure.
Restriction: Must be currently enrolled in a College Park Scholars program.
Credit Only Granted for: CPSP349T or CPSS340.
Formerly: CPSP349T.

CPSP359 Advanced Practicum: Research (1-3 Credits)
Advanced supervised internship experience.
Prerequisite: CPSP259.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP369 Advanced Practicum: Peer Teaching (1-3 Credits)
Supervised advanced practicum in peer instruction.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 6 credits.

CPSP379 Advanced Practicum: Study Abroad (1-3 Credits)
Advanced, supervised study-abroad experience.
Restriction: Must be in the College Park Scholars Program; or permission of UGST-College Park Scholars.
Repeatable to: 3 credits if content differs.

CPSP386 Experiential Learning (3-6 Credits)

CPSP388 Advanced Special Topics in College Park Scholars (1-3 Credits)
Interdisciplinary topics of special interest to College Park Scholars, such as legacies of the cold war, environmental ethics, women in leadership, and other timely issues. Projects build on previous work in College Park Scholars.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 6 credits if content differs.

CPSS - College Park Scholars-Science, Technology and Society

CPSS100 College Park Scholars: Science, Technology & Society First-Year Colloquium I (2 Credits)
Introductory colloquium: Examination of issues related to science, technology and society.
Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS101 College Park Scholars: Science, Technology & Society First-Year Colloquium II (1 Credit)
Continued examination of issues related to science, technology and society.
Prerequisite: CPSS100.
Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS220 The Future of Communicating Science (3 Credits)
How can scientists communicate their work effectively? The field of science communication ventures that the answer is not simply a matter of improving capacity (e.g., because people lack scientific information, scientists lack communication skills, or both). Rather, it calls for sustained collaboration and empathy between laypersons and experts. In this hands-on, experiential course, we use a model of cultural competency to put forth solutions to bridge the expert-lay divide. We investigate typical venues in which science is communicated (museums, YouTube videos, federal agency websites, and much much more) and study best practices for communication. Then we explore emerging venues that support sustained contact between so-called "lay citizens" and scientific or technical experts (dance/improv techniques, ethnographic methods and citizen science). Students learn to use cross-cultural perspectives as a basis to pilot and test ways of strengthening relationships and improving communication.
Restriction: Must be in the College Park Scholars Science, Technology or Society program or have permission of the program.

CPSS225 College Park Scholars Capstone: Science, Technology, and Society (3 Credits)
Exploration and understanding of ways science and technology shape and are shaped by society.
Prerequisite: CPSS100.
Restriction: Must be in the College Park Scholars Science, Technology & Society (CPSS) program.
Formerly: CPSP227.

CPSS230 College Park Scholars: Science, Technology & Society - Internship Practicum (1 Credit)
Supervised internship in an area related to science, technology and society.
Prerequisite: CPSS101.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS240 College Park Scholars: Science, Technology & Society - Service-Learning Practicum (3 Credits)
Supervised Service-Learning practicum in issues related to science, technology and society.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program; or permission of instructor.

CPSS260 College Park Scholars: Science, Technology & Society - Peer-Teaching Practicum (1 Credit)
Supervised peer teaching in science, technology and society.
Prerequisite: CPSS101.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS340 College Park Scholars: Infrastructure and Society (3 Credits)
One of the most important, and underappreciated, aspects of our society is its infrastructure (roads, buildings, communication systems, water delivery systems, sanitation systems, energy systems, etc.). We often take for granted the services infrastructure bring us. As a consequence, the United States, which at one time was a world leader in creating infrastructure, is experiencing an infrastructure crisis. Furthermore, not everyone experiences this issue equally. This course is designed to identify the root causes of the crisis. You will explore emerging social, political, legal, cultural, and social justice issues associated with the building and maintenance of infrastructure from the perspective of Science and Technology Studies (STS) and engineers. You will work with a volunteer corps of professional engineers from a variety of disciplines on a service-learning project designed to assess the safety and vitality of infrastructure.
Restriction: Must be currently enrolled in a College Park Scholars program.
Credit Only Granted for: CPSP349T or CPSS340.
Formerly: CPSP349T.

DANC - Dance

DANC109 Choreography I: Improvisation (3 Credits)
An introduction to the process of spontaneous movement discovery involving solo and group movement experiences.
Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC118 Beginning Tap (2 Credits)
Introduction to tap for the beginning student.
Repeatable to: 4 credits.

DANC119 Introduction to American Social Dance (2 Credits)
Social dance forms of North America.
Repeatable to: 4 credits.

DANC128 Fundamentals of Ballet (2 Credits)
Introduction to ballet technique and terminology for the beginning student.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC138 Global Dance Forms (2 Credits)
Movement course. Traditional dances and music of selected cultures.
Repeatable to: 6 credits if content differs.

DANC148 Fundamentals of Modern Dance (2 Credits)
Introduction to modern dance with emphasis on the development of fundamental movement skills.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC149 Fundamentals of Modern Dance II (2 Credits)
Continuation of the development of axial and locomotor movement skills with emphasis on the development of functional alignment, musicality, range of movement, coordination, and movement memory.
Prerequisite: DANC148.
Repeatable to: 4 credits.

DANC158 Fundamentals of Jazz (2 Credits)
Introduction to the jazz style in dance for the beginning student.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC179 Movement Integration (2 Credits)
Conditioning and re-patterning techniques for achieving integrated movement.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 4 credits if content differs.

DANC199 Practicum in Choreography, Production and Performance I (1-3 Credits)
Choreography, production, and performance of student works, both on and off campus.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC200 Introduction to Dance (3 Credits)
A study of dance as a form of communication and as an art form; a survey of the theories and styles of dance, and their relationships to other art forms.

DANC207 Choreography II: The Creative Process (3 Credits)
Explorations in movement, music, words, objects, and environments through improvisation and choreographic problem solving.
Prerequisite: DANC109.
Restriction: Permission of ARHU-Dance department.

DANC208 Choreography I (3 Credits)
Basic principles of dance composition: space, time, dynamics, and movement invention. The development of critical awareness.
Prerequisite: DANC109 and DANC102.
Repeatable to: 6 credits.

DANC209 Dance Composition (3 Credits)
Exploration of the structural elements of dance composition.
Prerequisite: DANC207.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC218 Modern Dance I (3 Credits)
Development of heightened body awareness, breath support, dynamic alignment, and spatial awareness. Focus on rhythmic clarity and musicality.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC219 Modern Dance II (3 Credits)
Continuation of the elements addressed in DANC218 with an added focus on momentum, the use of counter-tension, stability/mobility, suspension, and dynamic range.
Prerequisite: DANC218.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC228 Ballet I (2 Credits)
Barre and center work for alignment, strength, flexibility and coordination. Introduction to ballet terminology.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC229 Ballet II (2 Credits)
Continuation of DANC228.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC248 Modern Dance I (3 Credits)
Body alignment, rhythm, dynamics, space and dance phrases.
Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC249 Modern Dance II (3 Credits)
Continuation of DANC248.
Prerequisite: DANC248; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC258 Jazz I (2 Credits)
Jazz warm-ups and combinations emphasizing rhythm and movement isolations.
Prerequisite: DANC158.
Restriction: Must be in Dance program.
Repeatable to: 4 credits.

DANC259 Jazz II (2 Credits)
Continuation of the principles of Jazz I. Emphasis on style and execution of movement.
Prerequisite: DANC258.
Repeatable to: 4 credits.

DANC269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC299 Practicum in Choreography, Production and Performance II (1-3 Credits)
Continuation of DANC199.
Prerequisite: DANC199; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC304 Dance Education I: Foundations (3 Credits)
Organization and content of the studio dance class. Structuring developmentally appropriate dance experiences for students ages 3-18.
Restriction: Permission of ARHU-Dance department.

DANC308 Choreography II (3 Credits)
Exploration of the formal elements of choreography; theme, development, repetition, contrast, transition, continuity and structure.
Prerequisite: DANC208.
Repeatable to: 6 credits.

DANC309 Choreography III: Dance Composition (3 Credits)
Exploration of the structural elements of dance composition.
Prerequisite: DANC207.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: DANC209 or DANC309.
Formerly: DANC209.

DANC310 Dance Lighting (3 Credits)
Two lectures and two laboratory periods per week. Theory and practice of stage lighting with specific reference to designing for dance.
Prerequisite: DANC210.

DANC318 Modern Dance III (3 Credits)
Continuation of the elements addressed in DANC219 with an added focus on off-verticality, spirals, complex level changes, more complex and extended phrasing, responsiveness to accompaniment, vocalization.
Prerequisite: DANC219.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC319 Modern Dance IV (3 Credits)
Continuation of the elements addressed in DANC318 with an added focus on movement subtlety and complexity, and stylistic demands.
Prerequisite: DANC318.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC328 Ballet III (2 Credits)
Execution of the vocabulary of ballet movement with technical accuracy.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC329 Ballet IV (2 Credits)
Continuation of DANC328.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC330 Hip Hop History & Culture (3 Credits)
Places the rich movement history of hip hop in a larger cultural context. Students will be exposed to the elements of hip hop culture, including graffiti, emceeing and deejaying, in relationship to various urban dance forms influenced by the hip hop movement. Additionally, students will explore hip hop's international presence, theorize its future and create self-choreographed routines.

DANC338 Dance Techniques (2 Credits)
Intermediate/Advanced level physical practice that sources a range of dance practices relevant to the current dance field in order to expose students to a plurality of techniques as a form of inclusive investigation.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC348 Modern Dance III (3 Credits)
The body as an instrument of expression; techniques for increasing kinesthetic sensitivity.
Prerequisite: DANC249; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC349 Modern Dance IV (3 Credits)
Continuation of DANC348.
Prerequisite: DANC348; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC371 Somatics (3 Credits)
Current ideas and trends in dance technique, with a focus on the incorporation of dance science and somatics into dance training.
Prerequisite: DANC179.
Restriction: Permission of ARHU-Dance department.

DANC379 Practicum in Dance (1-3 Credits)
Performing experience for the student dancer who has developed a professional level of competence.
Repeatable to: 12 credits.

DANC383 Dance History & Theory (3 Credits)
With a primary focus on Western concert dance from the 20th and 21st centuries, this course proposes an understanding of dance as it is situated in historical and cultural contexts. Rather than proposing a canon of "masterworks", this course interrogates choreography and other dance practices from multiple perspectives such as feminist theories, race, gender, and sexuality studies.
Restriction: Permission of ARHU-Dance department.
Credit Only Granted for: DANC283 or DANC383.
Formerly: DANC283.

DANC386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC398 Directed Studies in Dance (1-6 Credits)
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC399 Practicum in Choreography, Production and Performance III (1-3 Credits)
Continuation of DANC299.
Prerequisite: DANC299; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC405 Dance Education II: Education & Policy (3 Credits)
Curricula in dance in K-12 settings, classroom management, assessment/grading, and best practices in dance education in public schools. Current research and policy issues are included. This course counts towards teacher certification in the State of Maryland.
Restriction: Permission of ARHU-Dance department.

DANC409 Contact Improvisation (2 Credits)
Discovery and cultivation of the principles and skills of Contact Improvisation dance technique.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.
Credit Only Granted for: DANC489C or DANC409.

DANC410 Technical Theater Production for Dance (3 Credits)
A study of the theoretical principles of production and the practical application of those principles to the presentation of dance works.
Prerequisite: DANC210; or students who have taken courses with comparable content may contact the department; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC418 Contemporary Modern (2 Credits)
Physical practice that sources postmodern dance influences, endurance training, improvisation, and choreographic composition to present movement practices as a form of investigation.
Prerequisite: DANC218; or permission of instructor.
Repeatable to: 6 credits.
Credit Only Granted for: DANC418 or DANC489O.
Formerly: DANC489O.

DANC420 Partnering (2 Credits)
Elements of contemporary partnering including weight sharing, counter balancing, momentum/leverage, lifting and moving responsively.
Restriction: Permission of ARHU-Dance department.

DANC429 Advanced Ballet Technique II (1 Credit)
Intensive work in ballet technique for the professionally-oriented dancer.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 3 credits.

DANC448 Modern Dance V (3 Credits)
Complex phrases of modern dance movement with emphasis on articulation and expression.
Prerequisite: DANC349; and must audition.
Repeatable to: 6 credits.

DANC449 Modern Dance VI (3 Credits)
Continuation of DANC448.
Prerequisite: DANC448; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC466 Laban Movement Analysis (3 Credits)
Introduction to Rudolf Laban's system of qualitative movement analysis in relation to understanding personal movement style. Application to dance performance, teaching, composition and research.

DANC468 Dance Repertory (3 Credits)
Form, content, music, design and performance of modern dance works.
Prerequisite: DANC349; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC469 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC479 Advanced Practicum in Dance (1-3 Credits)
Advanced level performing experience for the student dancer who has developed an advanced professional level of competence.
Repeatable to: 6 credits.

DANC485 Seminar in Dance (3 Credits)
Individual research leading to a presentation with written documentation of the process, serving as a culmination of undergraduate study for dance majors.
Prerequisite: DANC483.
Restriction: Must be in Dance program; and senior standing.

DANC488 Project-Based Learning (3 Credits)
A specific project, is addressed, in dance from the perspectives of the investigator, the creator/choreographer, and the performer. Projects are cross-disciplinary and/or cross-cultural, and may involve both on- and off-campus experiences.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC489 Special Topics in Dance (1-3 Credits)
Theoretical, choreographic, pedagogic, or performance study.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC499 Practicum in Choreography, Production and Performance IV (1-6 Credits)
Advanced workshop in dance presentation, including performing, production and planned field experiences.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

EALL - East Asian Languages and Literatures

EALL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

EALL300 The Languages of East Asia (3 Credits)
A survey of Chinese, Japanese, and Korean, and the languages of other East Asian nationalities. Provides a basic understanding of the structures of these languages. Topics covered include the characterizing features; the relationships of the languages to each other; the geographical, social, and historical settings. No knowledge of Asian languages is required. Taught in English.

EALL369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ECON - Economics

ECON111 Thinking Like an Economist (3 Credits)
An introduction to the modes of thought of economics. Use of simple standard tools of economics to analyze important problems that arise frequently in public policy, the news media, and in daily life. An emphasis on how economists predict what choices societies make and how economists analyze whether those are good choices. Practical application of a variety of economic tools leading to a focus on the essential unity underlying these analytical tools, viewing economics as a discipline that applies a core methodology in different ways in different situations.
Restriction: Sophomore standing or lower; or permission of BSOS-Economics department.

ECON155 Economics & the College Affordability Crisis (3 Credits)
Why have tuition and fees increased substantially over the past 30 years at almost all institutions of higher education in the US? How can quality and productivity be measured in schools? Why do most students pay considerably less than the actual cost of service provision? What is society's interest in devoting considerable resources to education beyond the high school level? How do existing and proposed governmental policies impact both the number of students pursuing a college education and the cost of this education? ECON155 uses tools from economics to examine and explore answers to these and other related questions.
Additional Information: No background in economics is required, although this course could be a nice complement for ECON200 and ECON201.

ECON175 Inequality: Determinants and Policy Remedies (3 Credits)
History shows that the gap between the rich and the poor has varied over time within and between countries, most recently seeming to increase within many countries while somewhat decreasing between countries. This course challenges students to investigate why people make different amounts of money, why income inequality has changed dramatically in recent years, what public policy tools exist to counter inequality increases, and what different institutional arrangements different countries use to lower inequality. This course will introduce students to theoretical tools used by economists to understand the sources of inequality and will also examine various empirical measures of inequality.

ECON181 Putting a Price on the Environment: An Economist's Perspective on Sustainability (3 Credits)
How does society balance the benefits of environmental protection and preservation against the costs? Though some might say that the environment is priceless, economists recognize that every action involves trade-offs. This course investigates sustainability through comparing costs and benefits. From this perspective, other questions arise: How can we design policies that incentivize sustainable choices? Why might usual market functioning fail to achieve sustainability? Do we need to put a price on the environment in order to protect it? How do we measure an economy's "success"? This course explores the answers to these and other related questions from an economist's perspective.

ECON185 Energy: Crisis or Breakthrough? (3 Credits)
Will we face an energy crisis in the near future, or will technological breakthroughs solve problems? Will we destroy the environment by careless use of polluting energy, or we will find new and clean sources of energy that resolves the environmental issue once and for all? Will politicians and governments succeed in agreeing on a coherent strategy to deal with global issues related to energy, or do we expect individual countries to move in different directions and exacerbate the problems? Students will explore the demand and supply sides of the energy market and their relationships with government policies and environmental concerns. Students will also analyze empirical evidence to better understand the factors affecting energy production and consumption in the past and possible directions in the future. By examining past situations when technological change mitigated problems in energy markets, we can make informed predictions about what could happen next.

ECON200 Principles of Microeconomics (3 Credits)
Introduces economic models used to analyze economic behavior by individuals and firms and consequent market outcomes. Applies conceptual analysis to several policy issues and surveys a variety of specific topics within the broad scope of microeconomics.
Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.
Credit Only Granted for: ECON200, AREC240, or AREC250.
Additional Information: It is recommended that students complete ECON200 before taking ECON201.

ECON201 Principles of Macroeconomics (3 Credits)
An introduction to how market economies behave at the aggregate level. The determination of national income/output and the problems of unemployment inflation, will be examined, along with monetary and fiscal policy.
Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.
Recommended: ECON200.
Credit Only Granted for: ECON201 or ECON205.

ECON230 Applied Economic Statistics (3 Credits)
Introductory course to develop understanding of statistical concepts used in applied economics. Students will acquire skills needed to calculate and interpret statistical concepts, including descriptive statistics, probability, discrete and continuous distributions, sampling, point and interval estimations, hypothesis testing, basic analysis of variance, and simple linear regression models. Students will apply these concepts to data using both handheld calculators and spreadsheets(Excel), and students will be introduced to an econometric software package such as SPSS or SAS or R.
Prerequisite: Must have math eligibility of MATH113 or higher; or 1 course with a minimum grade of C- from (MATH107, MATH110); and minimum grade of C- in ECON200 and ECON201.
Recommended: Students should already have basic familiarity with Microsoft Excel or similar spreadsheet software.
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

ECON258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ECON300 Methods and Tools for Economic Analysis (3 Credits)
Economic application of mathematical tools and concepts necessary for intermediate and advanced coursework in economics. Topics include: multivariable calculus, constrained optimization, foundational coverage of probability theory, and exponential/logarithmic functions.
Prerequisite: 1 course with a minimum grade of C- from (ECON200, ECON201); and minimum grade of C- in MATH140.
Restriction: Must be in Economics Bachelor of Science program; and must not have completed MATH241.

ECON305 Intermediate Macroeconomic Theory and Policy (3 Credits)
Analysis of the determination of national income, employment, and price levels. Discussion of consumption, investment, inflation, and government fiscal and monetary policy.
Prerequisite: Minimum grade of C- in ECON201 and ECON200. And 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140); or must have completed MATH220 with a minimum grade of C-.
Credit Only Granted for: ECON305 or ECON325.

ECON306 Intermediate Microeconomic Theory & Policy (3 Credits)
Analysis of the theories of consumer behavior, producer behavior, different market structures, and various sources of inefficient outcomes. Analysis of microeconomic policies designed to improve market outcomes.
Prerequisite: 1 course with a minimum grade of C- from (ECON200, AREC250); and minimum grade of C- in ECON201. And 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140); or must have completed MATH220 with a minimum grade of C-.
Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.

ECON310 European Economic History (3 Credits)
The evolution of the capitalist system from its medieval origins to the present. Emphasis on dynamic forces of cumulative change in capitalism, including capital accumulation, technology, expansion of markets, the corporate form of private property in the means of production, and the relation of capitalism to war and revolution.
Prerequisite: ECON201 and ECON200.

ECON311 American Economic History Before the Civil War (3 Credits)
Economic concepts are used to analyze various aspects of the founding and early history of the U.S., including the British settlement of the North American colonies, the economics of the American Revolutionary war, the writing of the Constitution, the development of financial markets, policies on public lands and the spread of western agriculture, slavery, banking, and early industrialization.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON312 American Economic History After the Civil War (3 Credits)
Topics include: the economics of the Civil War, the performance of southern agriculture in the late 19th century, the rise of large corporations, industrialization, the development of financial markets, the creation of the Federal Reserve Board, the economics of the Great Depression and the New Deal, the economic impact of World War II, and the rise of the modern service economy in the late 20th century. Utilizes basic economic theories to understand these episodes as well as the progress of the U.S. economy over this period.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON314 Economic History, Development and Policy (3 Credits)
Study abroad in the economic history, institutional development, and recent economic policy problems of selected areas.
Prerequisite: ECON200 and ECON201.

ECON315 Economic Development of Underdeveloped Areas (3 Credits)
Analysis of the economic and social characteristics of underdeveloped areas. Recent theories of economic development, obstacles to development, policies and planning for development.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Credit Only Granted for: ECON315 or ECON416.

ECON317 Global Economic Policies (3 Credits)
Analysis of policy options and debates on fostering economic growth and development in a global economy where national boundaries are no longer relevant. Topics covered will include real loanable funds markets in both local and international contexts during normal conditions and during financial crises, the design of trade and industrial policies, and the role of the World Bank, IMF, WTO, and other international agencies as well as regional and bilateral trade agreements. Emerging economies will be emphasized.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON321 Economic Statistics (3 Credits)
Introduction to the use of statistics in economics. Topics include: Probability, random variables and their distributions, sampling theory, estimation, hypothesis testing, analysis of variance, regression analysis and correlation.
Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).
Restriction: Must be in Economics Bachelor of Science program.

ECON325 Intermediate Macroeconomic Analysis (4 Credits)
Analysis of macroeconomic behavior and policy with emphasis on theoretical rigor. Topics include the determinants of economic growth, unemployment, inflation, and international economic flows.
Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON305 or ECON325.

ECON326 Intermediate Microeconomic Analysis (4 Credits)
Analysis of economic decision-making by individuals and firms, the resulting market outcomes, and applications to real-world problems. Emphasis on analytical logic and theoretical rigor. Topics covered include consumer preferences and utility maximization, perfect competition and market power, uncertainty and risk, externalities, and asymmetric information.
Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON306, ECON326, or AREC326.

ECON327 Behavioral Economics (3 Credits)
Integrating the insights of psychology into economics. Analysis of the ways in which individuals make decisions that systematically depart from the so-called "standard model" of homo economicus, which assumes perfect rationality, perfect selfishness, and perfect willpower. Investigating the implications of the major findings of behavioral economics for policymakers.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON330 Money and Banking (3 Credits)
The structure of financial institutions and their role in the provision of money and near money. Analysis of the Federal Reserve System, the techniques of central banks, and the control of supply of financial assets in stabilization policy. Relationship of money and credit to economic activity and the price level.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON340 International Economics (3 Credits)
Introduces economic models of international trade and finance. Analyzes policies designed to promote and restrict international trade and to manage exchange rates and impact international capital flows.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Credit Only Granted for: ECON340 or ECON441.

ECON358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Prerequisite: At least one principles level course.
Repeatable to: 15 credits if content differs.

ECON375 Economics of Poverty and Discrimination (3 Credits)
Examination of various issues, including: the causes of persistent poverty over time for some groups within society; the relationship of poverty to technological change, to economic growth, and to education and training; economic results of discrimination; proposed remedies for poverty and discrimination.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON386 Experiential Learning (3 Credits)
See Department Advising Office for course eligibility, course requirements, and application information.
Prerequisite: ECON201 and ECON200.
Restriction: Permission of BSOS-Economics department; and must be in a major within the BSOS-Economics department; and minimum cumulative GPA of 2.5; and junior standing or higher.

ECON387 Career Preparation for Economics Majors (2 Credits)
Increase student knowledge of career paths, job search tools, and strategies for successfully obtaining a job with a BA or BS in economics. Students will engage in a range of different activities which build their understanding of job opportunities in economics and hone their abilities to find positions they want. Students will reflect on specific skills employers seek from economics graduates and incorporate that knowledge in their own individual job search and career plan.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science) ; and must have earned a minimum of 60 credits.
Additional Information: This course is intended for juniors or first semester seniors who are beginning their job search. Students who have already secured an employment opportunity for after graduation should not register.

ECON396 Independent Honors Study (3 Credits)
First semester of the departmental honors sequence. Students will develop and apply research skills required to carry out original research. By the end of the semester students will have produced a complete draft of an honors thesis resembling a scholarly journal article.
Restriction: Permission of BSOS-Economics department.

ECON397 Honors Thesis (3 Credits)
General supervision will be provided through assembled meetings with the professor in charge of the course.
Prerequisite: ECON396.
Restriction: Must be a candidate for honors in economics.

ECON398 Topics in Economics (3 Credits)
This course is designed to meet the changing interests of students and staff. Topics vary in response to those interests. Students are advised to seek information about the coverage and prerequisites during the registration period.
Prerequisite: ECON201 and ECON200.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON399 Independent Study in Economics (1-3 Credits)
Integrated readings and independent study under direction and supervision of a faculty member. Contact department for additional information.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON401 Current Issues in American Economic Policy (3 Credits)
Analysis of current economic problems and public policies. Topics could include poverty, income inequality, social insurance, education, environmental sustainability, immigration, and innovation. Other issues may be substituted depending on current events.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Must be in Economics Bachelor of Arts program.

ECON402 Macroeconomic Models and Forecasting (3 Credits)
Analysis of the fluctuations in economic activity and the formulation and use of forecasting models of the economy. Illustrations of computer macro models and forecasting problems.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON406 Advanced Microeconomics (3 Credits)
Expands on the assumptions of rational decision-making used in intermediate microeconomics and develops more complicated, more realistic models which address uncertainty, intertemporal choices, strategic interactions, social preferences and considerations of what is fair.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON407 Advanced Macroeconomics (3 Credits)
An in-depth analysis of current issues in macroeconomic theory and policy. Topics covered include: 1. alternative perspectives on macroeconomics including monetarism, new classical equilibrium models, rational expectations, and real business cycle models; 2. long term growth, the slowdown in productivity growth, and concerns about U.S. competitiveness; 3. the effectiveness of macroeconomic policy in an open economy; 4. the effects of finance on the real sector.
Prerequisite: Minimum grade of C- in ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON410 Comparative Economic Institutions (3 Credits)
Institutions are the sets of rules that constrain the decisions and interactions of economic agents. The course uses economic analysis to understand both formal institutions (e.g. laws) and informal institutions (e.g. cultural norms). Practical examples are drawn from economics, law, and politics, and reflect the experience of many different countries.
Prerequisite: Minimum grade of C- in ECON325 and ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON412 Economic History and Modern Development (3 Credits)
Analysis of major economic, political, and social change in the developed world since 1800. This includes factors contributing to increases in economic performance, changes in the form of government, technological change (including industrialization), and integration and disintegration of the global economy. Emphasis is on institutional changes in how societies organize economic and political activities.
Prerequisite: Minimum grade of C- in ECON325 and ECON326.
Restriction: Must be in Economics Bachelor of Science program.

ECON414 Game Theory (3 Credits)
Studies the competitive and cooperative behavior that results when several parties find that their individual outcomes are jointly determined. Students will learn how to use game theory to analyze situations of potential conflict. Applications are drawn from economics, business, and political science.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: CMSC474, ECON414, GVPT399A or GVPT390.

ECON415 Market Design (3 Credits)
Focuses on recent developments in the design of markets to improve economic performance and to open new economic opportunities. It is divided into three main segments -- auction design, the design of matching mechanisms, and antitrust theory and policy.
Prerequisite: Minimum grade of C- in ECON414.
Restriction: Must be in Economics Bachelor of Science program.

ECON416 Analysis of Economic Development (3 Credits)
Analysis of the determinants and influences on economic development. Emphasis on both theoretical models and econometric methods of explaining why some countries are poor, along with examination of policies to promote development.
Prerequisite: Minimum grade of C- in ECON325, ECON326, and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON315 or ECON416.

ECON417 Estimating Policy and Program Impact (3 Credits)
Governments, businesses, non-profits, funders, and other organizations must allocate scarce resources between competing uses. Understanding the causal effect of policies, programs or investments on key outcomes can guide the choices of these decision-makers. Correlations between policies and outcomes or changes in outcomes after new policies are adopted are rarely sufficient for estimating the causal effect, however. This course focuses on econometric strategies for obtaining unbiased causal estimates, including experimental methods, instrumental variables, regression discontinuity, and differences-in-differences. There will be an emphasis on using Stata and on interpreting the results of econometric analysis
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326) and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

ECON418 Economic Development of Selected Areas (3 Credits)
Economic and institutional characteristics of a specific geographic area are identified and discussed, and alternate strategies and policies for development are analyzed.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 6 credits if content differs.

ECON422 Econometrics (3 Credits)
Emphasizes the interaction between economic problems and the assumptions employed in statistical theory. Formulation, estimation, and testing of economic models, including single variable and multiple variable regression techniques, theory of identification, and issues relating to inference.
Prerequisite: 1 course with a minimum grade of C- from (ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON422, ECON424, or AREC422.

ECON423 Advanced Topics in Econometrics (3 Credits)
Interaction between economic problems and specification and estimation of econometric models. Topics may include: autocorrelation, heteroscedasticity, functional form, simultaneous equation models, logit and probit models, instrumental variables, qualitative choice models, and other computational methods.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON424 Applied Econometrics (3 Credits)
Provide the knowledge and skills necessary to accomplish and utilize basic applied econometric analysis utilized by many business service providers, government agencies, and nonprofits engaged in policy analysis. Topics include simple and multiple regressions using cross section, time series, and panel data, issues of heteroskedasticity, serial correlation, and multicollinearity, models with binary dependent variable, and program evaluation. Course emphasizes application of knowledge using software packages but still covers essential theoretical background.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON422, ECON424 or AREC422.

ECON425 Mathematical Economics (3 Credits)
Covers mathematical tools and skills utilized in upper undergraduate and master's level coursework in Economics and Public Policy. Reviews calculus and math of finance and growth. Introduces techniques of optimization, linear algebra, and differential equations and connects them to micro and macro theory and applications. Topics will also include coverage of probability theory to explore how economists model uncertainty, as well as economic applications of integration.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Restriction: Must be in Economics Bachelor of Arts program.

ECON426 Economics of Cost-Benefit Analysis (3 Credits)
Study of how to use cost benefit analysis and other similar tools of applied microeconomics to conduct policy analyses. Cost-benefit analysis is an empirical method of identifying an optimal choice from a set of policy alternatives, where optimal is defined in terms of economic efficiency. Real world examples are addressed, so that students understand limitations of the methods and also interactions of economic analysis with political and administrative processes.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON427 Experimental Economics (3 Credits)
An introduction to the methodology of experimental economics and its application to issues such as decision-making under uncertainty, auctions, and public goods. Also an introduction to behavioral economics as a relatively new area of economic research.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON433 Economics of Big Data (3 Credits)
The importance of big data in the global economy is rising. Students will explore the definition and characteristics of big data, the impact of big data on individuals, use of big data by firms, entrepreneurs and non-profits, as well as how big data reshapes various public policies.
Prerequisite: Minimum grade of C- in ECON326 and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON434 The Economics of Information and Uncertainty (3 Credits)
How do rational agents make decisions when faced with uncertainty? How do markets and other institutions deal with risks? How do markets behave when some actors are better informed than others? What incentives influence whether economic decision-makers hide or reveal information? Topics include the value of information, the purchase of warranties, agency problems in management, adverse selection and moral hazard in insurance, and signaling in education.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON498U or ECON434.
Formerly: ECON498U.

ECON435 Financial Markets and the Macroeconomy (3 Credits)
The different types of financial assets that exist, the markets that they trade in, and the determination of their prices and rates of return are examined. Specific topics that will be covered include the Markowitz portfolio selection model, the capital asset pricing model, the arbitrage pricing theory, the efficient markets hypothesis, the term structure of interest rates, and options. There will be almost no emphasis on issues in corporate finance.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed BMGT343.
Credit Only Granted for: BMGT343 or ECON435.
Additional Information: Finance majors will not receive credit for ECON435.

ECON436 Financial Econometrics (3 Credits)
An introduction to financial econometrics, which is data science applied to understanding the financial system. Students will learn modern techniques in financial econometrics with an emphasis on the interaction between modeling (theory) and empirical analysis. Topics include relevant economic theory, optimization techniques, probability models, statistical analysis, and use of statistical software.
Prerequisite: Minimum grade of C- in ECON325 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON441 Theory of International Economics (3 Credits)
Theoretical treatment of international trade and international finance. Includes Ricardian and Heckscher-Ohlin theories of comparative advantage, analysis of tariffs and other trade barriers, international factor mobility, balance of payments adjustments, exchange rate determination, and fiscal and monetary policy in an open economy.
Prerequisite: Minimum grade of C- in ECON326 and ECON325.
Restriction: Must be in a major within the BSOS-Economics department; and must not have completed ECON340, ECON442, or ECON443.
Credit Only Granted for: ECON340, ECON441, ECON442, or ECON443.

ECON442 Globalization and Capital Markets (3 Credits)
Uses models of open-economy macroeconomics to explain the causes and consequences of international capital flows. Analysis is made of private consumption, investment, the government sector, current accounts, the labor market, and the money and foreign exchange markets in small open economies. This framework is then used to study examples of how speculative attacks on currencies, sudden reversals of capital inflows, and the effects of the lack of credibility of economic policy affect economic development.
Prerequisite: Minimum grade of C- in ECON326 and ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON442.

ECON443 International Trade and Trade Policy in the New Global Economy (3 Credits)
Examines the economics of international economic integration, including the theory of customs unions and free trade areas, the role of GATT and the WTO, changes in individual countries' foreign trade policies during the new era of globalization, the special role of multinational firms in world trade, and recent controversies about the benefits and costs of globalized trade.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON443.

ECON444 Research in Globalization (3 Credits)
As globalization continues, individual countries must confront a variety of related issues including rising inequality, decline of domestic industries, climate change, and disputes over intellectual property rights. Various economic models and research methods will be covered to develop the analytic and empirical skills needed to perform independent research in globalization. Students will prepare literature reviews, conduct preliminary empirical investigations using STATA, and produce well-designed research proposals.
Prerequisite: Minimum grade of C- in ECON326 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON498G or ECON444.
Formerly: ECON498G.

ECON451 Public Choice (3 Credits)
Analysis of collective decision making, economic models of government, program budgeting, and policy implementation; emphasis on models of public choice and institutions which affect decision making.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with: AREC453.
Credit Only Granted for: AREC453 or ECON453.

ECON454 Public Finance and Public Policy (3 Credits)
The role of the the public sector in a market economy constitutes the over-arching topic of this course. Emphasis lies on analyzing government expenditure programs and the microeconomics of tax policy.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, STAT400, ECON321).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

ECON455 Economics of Education Policy (3 Credits)
Examines the role that government plays in providing and financing education. Analyzes why people invest in education. Considers the effects of education on long-term social and economic outcomes, the behavior of institutions that produce education, and how to design and implement public policies affecting the level and distribution of educational resources. Uses microeconomic models and empirical findings to analyze current issues in education policy.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON468E or ECON455.
Formerly: ECON468E.

ECON456 Law and Economics (3 Credits)
Relationship of the exchange process to the system of institutions and rules that society develops to carry out economic transactions. Topics covered include: Property rights; torts, negligence, and liability; contracts and exchanges; criminal control and enforcement; equity and efficiency issues .
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Prerequisite: At least one intermediate theory course and/or statistics.
Repeatable to: 15 credits if content differs.

ECON460 Industrial Organization (3 Credits)
Examines different theoretical models of firm behavior in markets with varying amounts of market power. Relates theory to specific industries and examines how market structure evolves over time.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON461 Economics of Regulation and Anti-trust (3 Credits)
Considers government intervention in economic activity of three types: antitrust policy, regulation of natural monopolies, and health safety regulation. Covers theoretical models, real-world policy applications, and empirical studies relevant to the impact of regulation.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON462 Economics of Entrepreneurship (3 Credits)
Economic theory highlights the role of entrepreneurs in fueling economic growth and accomplishing reallocation of resources in response to changes in preferences, technology, demographics, and resource. This course uses empirical evidence to examine the extent to which these predictions are valid. To more fully understand the motivations and constraints relevant to entrepreneurs, student will write a business plan as if s/he were starting a new business.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON398O or ECON462.
Formerly: ECON398O.

ECON463 Economics of Sports (3 Credits)
The application of theoretical and empirical economic tools to the sports industry, including competition at professional,collegiate, and international levels. Microeconomic models from labor, industrial organization and public finance will be applied to the sports industry and combined with data from sports markets, providing students with opportunities to produce and interpret economic analysis. The topic of discrimination will also be explored in the context of this particular economic activity.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Arts program.

ECON465 Health Economics (3 Credits)
Analyze markets for health care and related products by understanding the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Analysis will combine both theoretical models and empirical tools.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON468 Special Topics in Applied Economics (3 Credits)
Selected topics in applied economics. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (BMGT230, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON306).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 15 credits if content differs.

ECON470 Labor Economics: Theory and Evidence (3 Credits)
Analysis of labor markets in theory and the real world. Topics include labor supply, labor demand, human capital, performance incentives, unemployment, discrimination, and immigration. Students will develop an understanding of how formal economic research is used to analyze U.S. labor markets and how research influences policy debates.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, STAT400, ECON321).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON470 or ECON471.

ECON471 Labor Market Policies and Research (3 Credits)
Economic analysis of labor based on modern theory and empirical analysis. Focus on public policy, studying the interactions between labor demand and labor supply in the labor market and how policies impact those interactions. Possible policies include welfare policy, minimum wage policy, immigration policy, and anti-discrimination policies. Uses statistical software to summarize and create visualizations of economic data.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON470 or ECON471.

ECON472 Economics of Social Safety Nets (3 Credits)
Analysis of the economic issues associated with social safety nets. Topics to be covered include the cash transfer programs for breaking the cycle of poverty, labor market policies aimed at combating unemployment, childhood interventions to improve human capital development, and the challenges faced by pension systems over the world. The approach is based on a life-cycle perspective. Evidence and experiences from developed and developing countries will covered.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.
Restriction: Must be in Economics Bachelor of Arts program.

ECON481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: AREC481.
Credit Only Granted for: ECON481 or AREC481.

ECON484 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC454.
Credit Only Granted for: AREC454 or ECON484.

ECON485 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC455.
Credit Only Granted for: AREC455 or ECON485.

ECON486 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC456.
Credit Only Granted for: AREC456 or ECON486.

ECON488 Applied Research Practicum (1-3 Credits)
Students gain experience applying economic knowledge and producing research valued by businesses, non-profits, and/or government agencies. Students engage in activities similar to what an intern or entry-level employee would perform. Students work in small groups to find different kinds of data and facts, analyze and interpret this information, and use research findings to develop and present recommendations for simulated clients.
Prerequisite: 1 course with a minimum grade of B- from (BMGT230, ECON321, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Recommended: ECON422, ECON402, or ECON424.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON489 Applied Economics Practicum (1-3 Credits)
Students gain experience explaining economic knowledge to people who have not studied economics. Students engage in activities preparing them for careers in banking, business consulting, financial education, wealth management, and related services.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON490 Urban & Regional Economics: Issues and Policies (3 Credits)
Exploration of urban and regional economics and policies, including economic forces leading to formation of city and regional networks. Conceptual and empirical analysis of policies affecting land use, housing, transportation and other aspects of sub-national economic development.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON321, BMGT230, ECON230).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON398I or ECON490.
Formerly: ECON398I.

ECON498 Special Topics in Economic Analysis (3 Credits)
Selected topics in economic analysis. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (ECON321, STAT401); and 1 course with a minimum grade of C- from (ECON325, ECON326).
Restriction: Must be in Economics Bachelor of Science program.
Repeatable to: 15 credits if content differs.

ECON499 Independent Research in Economics (1-3 Credits)
Directed research under the supervision of a faculty member. Contact department for additional information.
Prerequisite: 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230, STAT400); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum of 3 credits from ECON400-499 course range.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

EDCI - Curriculum and Instruction

EDCI243 Attitudes and Beliefs about the "Other" in Literature, Film and the Media (3 Credits)
An examination of the ways various media represent dominant and non-dominant identities and the parameters for acceptable social behavior, and how these sociocultural forces shape personal identities, cultural competence and interpersonal power dynamics.

EDCI288 Special Topics in Teacher Education (1-3 Credits)
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.
Repeatable to: 6 credits if content differs.

EDCI355 Field Experience in Secondary Mathematics Education (1 Credit)
Practical experience as an aide to two secondary mathematics teachers (middle grades and high school); assigned responsibilities and participation in a variety of teaching/learning activities.
Prerequisite: Minimum of 6 credits from MATH400-499 course range.
Corequisite: EDCI 455.
Restriction: Must be in Secondary Educ: Mathematics program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI360 Field Experience in Middle School (1 Credit)
A Middle-school field experience that precedes student teaching.
Prerequisite: EDCI457 and EDCI411; or permission of instructor.
Corequisite: EDCI413 and EDCI424.
Restriction: Minimum cumulative GPA of 2.5; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in the Middle School Teacher Education Program.
Credit Only Granted for: EDCI355, EDCI360 or EDCI375.

EDCI362 Materials and Instruction for Creating Skilled and Motivated Readers, Part 2 (3 Credits)
Selecting, evaluating, and using a variety of materials and instructional techniques to create skilled and motivated readers in the elementary grades, particularly in diverse classroom settings; Topics include word analysis, spelling, writing, reading comprehension strategies, directed reading lessons and explicit instruction.
Corequisite: EDCI322, EDCI397, TLPL306, and EDCI489.
Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI375 Field Experience in Science Education (1 Credit)
This field experience course is designed to provide prospective teachers with knowledge of theory and best school practice relevant to effective pedagogy, current educational goals, and trends in educational assessment in a public school environment. Topics includes planning, instructional delivery, diversity and individual differences, classroom management, technology, and inclusion of students with special needs.
Corequisite: EDCI470.
Restriction: Must be in Secondary Educ: Science program.

EDCI386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and junior standing or higher.

EDCI420 Student Teaching Seminar in Secondary Education: Social Studies (1 Credit)
An analysis of teaching theories, strategies, and techniques in the student teaching experience.
Prerequisite: EDCI426 and EDCI427.
Corequisite: EDCI421 and EDCI422.
Restriction: Minimum cumulative GPA of 2.75.

EDCI421 Student Teaching in Secondary Schools: Social Studies/History (12 Credits)
Prerequisite: Admission to teacher education program.
Corequisite: EDCI420.
Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Social Studies program.

EDCI422 Student Teaching in Secondary Schools: Social Studies/ Geography (12 Credits)
Prerequisite: EDCI321.
Corequisite: EDCI420.

EDCI428 Field Experience in Secondary Social Studies Teaching (1 Credit)
Practical experience as an aide to a regular social studies teacher; assigned responsibilities and participation in a variety of teaching/ learning activities. Students must reserve one full day per week for internship placement.
Corequisite: EDCI427.
Restriction: Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI430 Student Teaching Seminar in Secondary Education: World Language (1 Credit)
An analysis of teaching theory, strategies and techniques in the internship experience.
Prerequisite: EDCI410 and EDCI433.
Corequisite: EDCI431 and EDCI474.
Restriction: Must be in Secondary Educ: Foreign Languages program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI431 Teaching Internship in Secondary Schools: World Language (12 Credits)
Practical experience as a full-time intern with a fully licensed World Language teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences.
Prerequisite: EDCI410 and EDCI433.
Corequisite: EDCI430 and EDCI474.
Restriction: Minimum cumulative GPA of 2.75; and must be in Secondary Educ: Foreign Languages program. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Additional Information: Internship lab fee applies. See current program description for details.

EDCI438 Field Experience in Second Language Education (1 Credit)
Practical experience as an aide to a regular foreign language teacher; assigned responsibilities and participation in a variety of teaching/ learning activities.
Corequisite: EDCI330.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Foreign Languages program.
Repeatable to: 3 credits if content differs.

EDCI440 Internship Seminar in Secondary Education: English (1 Credit)
A review and analysis of current instructional theories, strategies and best practice in relation to the teaching internship. Meets at area high school; location provided before first meeting.
Prerequisite: EDCI447 and EDCI467.
Corequisite: EDCI441 and EDCI474.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI441 Internship in Secondary Schools: English (12 Credits)
Practical experience as a full-time intern with a fully licensed English teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences. Internship lab fee applies. See current program description for details.
Prerequisite: EDCI447 and EDCI467.
Corequisite: EDCI440 and EDCI474.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI447 Field Experience in English Teaching (1 Credit)
Practical experience as a part-time intern working with a fully licensed English teacher in a diverse school setting. Students must reserve one full day or two half days per week for the part-time internship.
Corequisite: EDCI467.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI448 Student Teaching in Secondary Schools: Theatre/English (12 Credits)
Practical experience as an aide to a regular English, speech or drama teacher; assigned responsibilities and participation in a variety of teaching/learning activities.
Prerequisite: EDCI417.
Corequisite: EDCI440.
Restriction: Must be in Secondary Educ: English Language Arts program.

EDCI450 Internship Seminar in Secondary Education: Mathematics (1 Credit)
Strategies and techniques in the internship experience. Structured work on teaching portfolio (requirement for graduation and certification). Place, day, and time to be arranged.
Prerequisite: EDCI457 and EDCI455.
Corequisite: EDCI451 and EDCI474.
Restriction: Must be in Secondary Educ: Mathematics program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI460 Student Teaching: Middle School (12 Credits)
A Middle-school student teaching experience in two content areas.
Prerequisite: EDCI413.
Corequisite: EDCI414 and EDCI425.
Restriction: Minimum cumulative GPA of 2.5; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and for Middle School Education majors only.

EDCI464 Assessment for Reading (3 Credits)
Examination of reading assessment theory, materials and procedures; Topics include validity and reliability in reading assessment, formal and informal assessment, reading instruction that is informed by ongoing assessment, and the effects of assessment on students and schooling in a diverse society.
Prerequisite: EDCI362.
Restriction: Senior standing. And must be in Elementary Education program; or must be in Early Childhood Education program.

EDCI471 Internship in Secondary Schools: Science (12 Credits)
Practical experience as a full-time intern with a fully licensed science teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences. Internship lab fee applies. See current program description for details.
Prerequisite: EDCI470.
Corequisite: EDCI480 and EDCI474.
Restriction: Must be in Secondary Educ: Science program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI474 Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Education (2 Credits)
Multi-disciplinary capstone course for Secondary Education majors. Discussion of pedagogical and content issues relevant for teaching academically, culturally, and linguistically diverse students with particular emphasis on students with special educational needs and English language learners. Students develop and use curriculum-based assessments and/or lessons with these groups of students.
Corequisite: Enrolled in internship/certification area.
Restriction: Must be in one of the following programs (Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Mathematics; Secondary Educ: Foreign Languages; Secondary Educ: Social Studies; Secondary Educ: Art) ; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI481 Student Teaching: Elementary (12 Credits)
Prerequisite: EDCI352, EDCI362, EDCI342, EDCI372, and EDCI322.
Corequisite: EDCI464.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Elementary Education program; and minimum cumulative GPA of 2.75.

EDCI497 The Study of Teaching (3 Credits)
Identification and examination of learner and teacher outcome variables related to teaching systems, methods, and processes. Methods of conducting classroom research.
Prerequisite: EDCI481.
Corequisite: EDCI489.

EDCI498 Special Problems in Teacher Education (1-6 Credits)
Individual study of approved problems.
Restriction: Must be in a major within EDUC-Teaching, Learning, Policy and Leadership department; or must be in Curriculum and Instruction (Doctoral) program; or must be in Curriculum and Instruction (Master's) program; or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Repeatable to: 6 credits.

EDCI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDCP - Education Counseling and Personnel Services

EDCP100 Academic Success Strategies (1 Credit)
Empower students to become more active learners in college and in life. Examine prior and current learning strategies. Create new pathways for growth now and in the future.
Restriction: Junior standing or lower; or permission of instructor.
Credit Only Granted for: EDCP108B or EDCP100.
Formerly: EDCP108B.

EDCP101 The Transfer Student in the University (1 Credit)
Support transfer students in making a successful transition to the University. By making students aware of themselves as learners, introducing students to campus resources, and teaching research-based learning strategies, this course empowers students to become active and effective learners.
Credit Only Granted for: EDCP108G or EDCP101.
Formerly: EDCP108G.

EDCP102 Math Study Skills and Building Confidence (1 Credit)
Empower students to take charge of their math learning and utilize effective strategies for math success.
Restriction: Sophomore standing or lower; or permission of instructor.
Credit Only Granted for: EDCP108M or EDCP102.
Formerly: EDCP108M.
Additional Information: This course is recommended for freshmen and sophomore students enrolled in a math class who would like to increase their math confidence and learn how to study math efficiently. This hybrid course includes two in-person meetings (to be arranged) and weekly online assignments.

EDCP108 College and Career Advancement: Concepts and Skills (1 Credit)
Knowledge and skills designed to enhance college as a learning experience or preparation for life.
Repeatable to: 3 credits if content differs.

EDCP210 Peer Counseling Skills and Mental Health Advocacy (3 Credits)
Introduction to core helping skills in peer counseling settings and three predominant theoretical approaches used in the counseling field (humanistic, psychodynamic, cognitive-behavioral). The course also explores mental health stigma and advocacy. Students will build an understanding of the practical application of underlying principles and theory in counseling and the helping professions, while exploring their own, and societal, biases, assumptions, and attitudes toward mental health.
Restriction: Must not have completed EDCP310; and must not have completed PSYC433.
Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

EDCP230 The Science and Practice of Happiness and Psychological Well-Being (3 Credits)
An introduction to theory and research on positive psychology, subjective well-being, and the psychology of happiness. This will include examination of hedonic and eudaimonic models of well-being and sociocultural understandings of happiness, together with how it relates to health, relationships, money, religion, work, and social media. Students will also explore common misconceptions and myths about happiness and well-being and will engage in a variety of activities designed to deepen their understanding of happiness in their own lives and broader societal trends related to well-being.

EDCP298 Special Problems in Counseling and Personnel Services (1-3 Credits)
Individual instruction in special problems related to counseling, student leadership, and college student development.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP310 Peer Counseling Theory and Skills (3 Credits)
The theories and skills of peer helping relationships. Counseling theories and skills at a level appropriate for students seeking basic level training for use in peer counseling settings.
Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

EDCP312 Multi-Ethnic Peer Counseling (3 Credits)
Knowledge, skills, and attitude to function as peer helpers of Multi- Ethnic students.
Restriction: Sophomore standing or higher.
Formerly: EDCP310A.

EDCP325 Substance Use and Abuse in American Society (3 Credits)
Incidence, etiology, effects and management of substance use and abuse from perspective of the individual, the family, and society.

EDCP386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and sophomore standing or higher.

EDCP411 Principles of Mental Health (3 Credits)
Mechanisms involved with personal adjustment, coping skills, and the behaviors that lead to maladjustment.
Prerequisite: 9 semester hours in the behavioral sciences; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP420 Advanced Topics in Human Diversity and Advocacy (3 Credits)
This course will build upon students' knowledge of diversity in American society and will examine contemporary topics related to multiculturalism in educational and community contexts as well as strategies for advocacy in such venues. This course fulfills CORE requirements in diversity.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP462 Disability in American Society (3 Credits)
Critical examination of the history of discrimination and analysis of current policies toward people with severe physical and mental disabilities.
Restriction: Must have earned a minimum of 30 credits; and sophomore standing or higher.

EDCP489 Field Experiences in Counseling and Personnel Services (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP498 Special Problems in Counseling and Personnel Services (1-3 Credits)
Available only to major students who have formal plans for individual study of approved problems.
Prerequisite: Available only to major students who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP499 Workshops, Clinics, Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Department of Counseling and Personnel Services (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing; clinical experiences in counseling and testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups.
Repeatable to: 6 credits.

EDHD - Education, Human Development

EDHD200 Paradigms and Perspectives in Human Development (3 Credits)
An introduction to the paradigms and perspectives that guide the study of human development across the lifespan in cognitive, social, physical and emotional domains. Topics of study include overlying principles, concepts, assumptions, theoretical frameworks, and research methods that influence ways in which development is conceptualized. The course is designed to provide insight into major questions of the day in human development and how these prevailing perspectives have evolved over time. This course will also help students understand how knowledge of theory and research is translated into practice in a variety of professional settings.
Restriction: Must have 45 or fewer credits; or must be in the Human Development program or Human Development minor.

EDHD201 Learning How to Learn (3 Credits)
Immerses students in the theoretical and empirical study of learning by engaging them in orchestrated experiences and activities drawn directly from the disciplinary research. Students achieve deep understanding of their own learning, as well as the means of enhancing that learning both in school and out-of-school contexts.

EDHD210 Foundations of Early Childhood Education (3 Credits)
Students explore historical and current research in early childhood education, primary models of curriculum and pedagogy in the field, and the relationship between critical aspects of young children's development and the creation of inclusive learning opportunities for all children, including children at risk. The concept of developmentally appropriate practice and its application across different developmental levels and early childhood classrooms will be introduced and connected with discussion in EDHD220 and EDSP211. Students examine issues in developing and implementing high quality early childhood education experiences for young children with and without disabilities, including the influence of family, culture, and community, the needs of children at risk (e.g., poverty, immigrant status, English Language Learners), and the role of assessment in early learning.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD220 Exploring Early Childhood General and Special Education (3 Credits)
Students who are considering a career in education will consider information about the teaching profession. Students reflect on their personal strengths, identify areas of growth, and examine their predisposition to work with young children with and without disabilities. They will discuss the nature of teaching, the moral and philosophic underpinnings that influenced their decision to enter into the teaching professions, as well as the roles and responsibilities of teachers and the characteristics and qualities for effective teachers (teaching styles and teacher's primary role in the classroom).
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD221 Aggression and Violence in Everyday Life: Can Violence Be Prevented? (3 Credits)
History of aggression and violence in the world and in the United States. Examines the extent to which various forms are prevalent today and scientifically supported prevention strategies. Methods of studying aggression are reviewed, as are theories and methods of preventing aggression and violence.

EDHD228 Research Experiences in Human Development (3 Credits)
Provides students with hands-on participation in faculty-supervised laboratory research activities in the Department of Human Development & Quantitative Methodology. Students will learn about the purpose of scientific research and engage in activities that advance their knowledge and skills with regard to its ethical practice.
Restriction: Permission of instructor.
Repeatable to: 6 credits.

EDHD230 Human Development and Societal Institutions (3 Credits)
Development of the individual in the context of relationships with the formal and informal institutions of society. An examination of various aspects of development from the broad perspective of the social sciences.

EDHD231 Inside 21st Century Creativity: How Creative Ideas, Concepts, and Products are Generated (3 Credits)
Mechanisms of the creative mind. Psychological, social, sociological, developmental, cultural, educational, genetic and neural based roots of creativity.

EDHD241 Are Two Languages Better than One: The Science and Controversy of Bilingualism (3 Credits)
Examines the big question: Are two languages better than one? We will study the science of bilingualism: contemporary theories; research; controversies surrounding bilingual education; nature vs. nurture; first language acquisition. Additional studies cover: who is bilingual, how children become bilingual, factors that influence bilingual development, bilingual benefits and impact on brain development; bilingual education policy.

EDHD306 Research Methods in Human Development (3 Credits)
Addresses the scientific concepts and principles central to the study of human behavior and development. Students will learn about basic research methods in studying human behavior in developmental context and will participate in experiential activities, such as conducting observations and collecting self-report data. Major themes: goals of developmental research, fundamental research designs, types of measurement, elements of good scientific writing, and ethical issues in the study of human development.

EDHD310 Your Brain on Education: The Neuroscience of Learning and Development (3 Credits)
Investigation linking research in the brain science of learning and development, including the neural basis of academic skills, to achievement, disability, and broader applications to classroom learning. This course will focus on areas of education including language (spoken and written), conceptual change, numerical/quantitative processing, and social cognition as well as burgeoning areas of neuroscientific research in general cognitive processes such as attention, memory, and executive processing. These topics will be discussed with respect to typical and atypical development with some focus on developmental disabilities including autism, specific language impairment, reading and math impairment, and attention deficit disorders among others. This course will focus on both the theoretical perspectives and pragmatic issues of how evidence regarding brain development can or may be translated into useful or misleading information for educators, professionals, and parents/guardians of our children.
Prerequisite: PSYC100.

EDHD313 Creative Experiences for Young Children (3 Credits)
Provides preservice teachers with an understanding of the current research on the development of creativity and integration of the arts into an early childhood classroom.
Restriction: Must be in Early Childhood Education program.
Credit Only Granted for: EDHD313 or EDCI313.
Formerly: EDCI313.

EDHD314 Reading in the Early Childhood Classroom (3 Credits)
Early childhood students introduced to current research/methods on teaching language arts. Focus on development of linguistic and cognitive processes in emergent literacy and beginning reading and writing. Application to models for the instruction and assessment of reading/writing in preschool-aged children. Also includes material on classroom-based interventions for young children at risk of reading failure due to learning difficulties. Includes Field Experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD425; and corequisite: EDHD419 or EDSP420.
Restriction: Must be enrolled in Professional Early Childhood/Early Childhood Special Education Program; and minimum cumulative GPA of 2.75.

EDHD315 Reading in Early Childhood Classroom: Instruction and Materials Part II (3 Credits)
This course builds on the theories and teaching strategies of EDHD314. Students will focus on teaching of reading and writing to primary grade students.
Prerequisite: EDHD314.
Restriction: Must be in Early Childhood Education program.

EDHD319 Selected Topics in Human Development (3 Credits)
Selected topics in human development in relation to contemporary culture.
Repeatable to: 6 credits if content differs.

EDHD320 Human Development Through the Life Span (3 Credits)
Central concepts related to parameters of human development, individual and social, which arise throughout the life span. Continuity and change within the developing individual.

EDHD321 The Young Child as Scientist (2 Credits)
Provides theoretical and practical knowledge for teaching science in early childhood classrooms. Appropriate teaching strategies and materials of instruction are presented for diverse settings. Includes field experience.
Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD435, and EDHD427.
Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD322 The Young Child as Mathematician (3 Credits)
Provides a theoretical and instructional framework for mathematics instruction in early childhood classrooms. Development of understanding of early childhood mathematics that emphasizes how and in what environment young children learn mathematics. Current thinking about both content and instructional strategies for mathematics curriculum, including identification and review of standards and expectations for learning outcomes for all children. Assessment strategies for evaluating all children will be addressed. Includes Phase 1 Field Experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP 430, EDSP 433; OR Track 2: Must have completed EDHD415, EDHD 424.
Corequisite: EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD323 Children Study their World (3 Credits)
Provides theoretical and instructional framework for social studies instruction in inclusive early childhood classrooms. Course will reflect current thinking about content and instructional strategies for social studies curriculum; identification and review of standards/expectations for learning outcomes for all children; assessment strategies for evaluating of social studies objectives; use of data driven instruction to support all children; observation of children's understanding of their social world in field placements; opportunities to explore these understandings through interviews with children and the implementation of activities. Includes Phase 1 Field Experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430, EDSP433; or Track 2: Must have completed EDHD415, EDHD424.
Corequisite: EDHD322, EDSP417, EDHD441, EDHD443, EDHD442, EDHD444, and EDSP321.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department; and junior standing or higher.

EDHD390 Career Paths and Internship Preparation in Human Development (1 Credit)
Prepares degree candidates in Human Development for career paths in the field including initial job seeking skills, knowledge necessary for entry into various professions and preparation for the program internship requirement
Restriction: Must be in the Human Development major.

EDHD400 Introduction to Gerontology (3 Credits)
Multidisciplinary survey of the processes of aging. Physiological changes, cultural forces, and self-processes that bear on quality of life in later years. Field study of programs, institutions for elderly, individual elders, their families and care providers.

EDHD401 Promoting Optimal Aging (3 Credits)
Theoretical, research, and applied issues related to optimal aging from psychological, biological, and societal perspectives. Group or individual projects involving direct field experiences.
Prerequisite: EDHD320; or EDHD400; or permission of EDUC-Human Development and Quantitative Methodology department.
Credit Only Granted for: EDHD401 or EDHD641.

EDHD402 Social Development (3 Credits)
Social Development. Critical concepts and ideas of the study of child and adolescent social development. Focus on changes in interpersonal relationships, emotions, achievement-related behavior and competence, and functioning within the broader social context.
Recommended: EDHD411.

EDHD411 Child Growth and Development (3 Credits)
Theoretical approaches to and empirical studies of physical, psychological and social development from conception to puberty. Implications for home, school and community.

EDHD412 Infant Development (3 Credits)
Infant development across domains, including perceptual, motor, cognitive, language, social and emotional functioning from pre-natal through third year of life.

EDHD413 Adolescent Development (3 Credits)
Adolescent development, including special problems encountered in contemporary culture. Observational component and individual case study.

EDHD414 Development of the Scientific Mind Across the Lifespan (3 Credits)
Study of the educational, cognitive, social, and cultural factors that underlie the development of the scientific mind across the lifespan.
Recommended: EDHD320.

EDHD415 Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms (3 Credits)
Teachers must have knowledge and skill regarding how to appropriately manage the classroom so that all children, those with and without disabilities, will be able to learn from their school experiences. Classroom management extends beyond responding to student misbehavior to include a comprehensive approach to addressing the social/emotional competence of typically and atypically developing children. The goal of this course is to prepare early childhood teachers who are able to sensitively, responsively, and effectively manage a classroom of young students who are typically developing and those who have disabilities. Includes Field Experience.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP423, EDSP424, and EDHD431.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD420 Cognitive Development and Learning (3 Credits)
Current developmental theories of cognitive processes such as language, memory, and intelligence and how differences in cognitive level (infancy through adolescence) mediate learning of educational subject matters.
Prerequisite: EDHD320, EDHD411, PSYC341, or PSYC355; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD421 Peer Relations (3 Credits)
Historical and theoretical underpinnings to contemporary research on peer interactions, relationships, and groups. Focus on (1) inter-dependencies of individual characteristics, social behaviors, social relationships; (2) relations between familial factors and extra-familial peer interactions and relationships; (3) normal and abnormal peer relationships; and (4) cross cultural universals and differences.
Recommended: EDHD411.

EDHD424 Culture, School & Community: Contexts for Learning (PreK-3rd) (3 Credits)
Explores the development of the young child (with and without disabilities, as well as those at environmental risk) in the context of the family and community, with emphasis on the impact of state, federal and school system policy on the child's world. Course will consider issues within the family, and the wider socio-cultural ecology that relate to the child's ability to develop and learn. In addition, students will develop strategies for respectful and culturally responses approaches to actively engage families in their children's development and learning. Includes Field Experience.
Prerequisite: EDHD425 and EDHD314; and (EDHD419 or EDSP420).
Corequisite: EDSP315, EDHD431, EDHD415, and EDSP423.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD425 Language Development and Reading Acquisition (3 Credits)
This course focuses on young children's language development and the relationship between language and reading acquisition. Students will learn: concepts central to language development; language achievements at different ages; concepts of emergent literacy; models of reading acquisition and skilled reading.

EDHD426 Cognitive and Motivational Literacy Content (3 Credits)
Students preparing for secondary teaching will learn about the cognitive and motivational aspects of literacy and learning from text for the content areas of literature, science, history and mathematics. Different evidenced-based literacy approaches appropriate for content learning are presented. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

EDHD427 Constructing and Integrating the Early Childhood Curriculum (3 Credits)
Explores the world from the child's perspective and constructs curriculum based on cognition, learning, and children's experiences. The integrated curriculum is the overarching framework for this course. Includes field experience.
Prerequisite: EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD435.
Restriction: Must be in Early Childhood Education program; and senior standing.

EDHD430 Adolescent Violence (3 Credits)
Examines the roots of violence among adolescents and the extent to which this constitutes a problem in various settings. Research studies on its origins, prevention and intervention and implications for social policy are examined.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD431 Child Development and Learning, Three to Eight Years (3 Credits)
Provides a basic understanding of child development theory and research, as well as specific knowledge about the development of children during the early and middle childhood "stages," specifically from ages 3 years to 8 years. A major emphasis will be the application of theory and research from the field of educational psychology to an understanding of how young children learn and achieve academically. Because the course will address the developmental and academic functioning of children with and without disabilities, a particular focus will be on individualization.
Prerequisite: Minimum grade of C- in EDHD314 and EDHD425; and 1 course with a minimum grade of C- from (EDHD419, EDSP420).
Corequisite: EDSP423 and EDSP315; and TRACK I: Must be concurrently enrolled in EDSP430, EDSP433; or TRACK 2: Must be concurrently enrolled in EDHD415, EDHD424.

EDHD432 Internship in EC/ECSE (12 Credits)
Interns spend five days per week in the classroom/home-based setting (under the mentorship of a certified teacher) where they gradually assume full responsibility for the planning, delivery and assessment of instruction or an intervention. Track I students will have an Infant/Toddler placement with special educator, Track II students will be in a Pre-K/K or Grade 1,2,3 classroom with general or special educator (must be opposite grade level and mentor from Phase I/fall of the senior year).
Prerequisite: EDHD323, EDHD322, EDSP417, EDHD441, EDHD442, EDHD443, EDHD444, and EDSP321.
Corequisite: EDHD437.
Restriction: Must be in Early Childhood and Early Childhood Special Education program; and senior standing or higher.

EDHD434 Child Development, Birth to Three Years (3 Credits)
Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD314 and EDHD425. Cross-listed with EDSP420.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.
Formerly: EDHD419A.

EDHD435 Effective Components of the Early Childhood Classroom (3 Credits)
Explores three topics integral to effective, child-centered early childhood classrooms: assessment, classroom management and parent involvement. Includes field experience.
Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD427.
Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD436 Cognition and Motivation in Content Area Literacy for Middle-School Students (3 Credits)
Cognitive and motivational processes of literacy and learning from texts across subjects. Structured approaches to using reading, writing, and speaking for content learning based on approaches to knowledge, motivation, and strategies. Classroom contexts that enable middle-school students to engage with diverse texts and Internet resources are provided

EDHD437 EC/ECSE Teachers as Researchers and Reflective Practitioners (3 Credits)
Students use action research to improve instructional delivery or familial interactions in an effort to enhance the overall educational experiences/outcomes of children in classrooms or home-based contexts. Students will design and implement an action research project in an effort to meet a goal articulated in an applicable Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP) as the basis of their project.
Prerequisite: Minimum grade of C- in EDHD322, EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.
Corequisite: EDHD432.

EDHD440 Adult Development (3 Credits)
Major conceptual approaches to the study of adult development including physical, cognitive, social, emotional and self processes that take place within individuals as they progress from emerging adulthood through middle age.
Prerequisite: EDHD320; or permission of EDUC-Human Development and Quantitative Methodology department.
Recommended: EDHD413.

EDHD441 Data Driven Decision Making in EC/ECSE (1 Credit)
Students will be exposed to formative (e.g., classroom based, ongoing) and summative (e.g., standardized testing) assessments. Students will collect and analyze formative assessment data from their internship classrooms as the bases of planning and delivering instruction to meet the diverse needs of all learners. They will also analyze standardized assessment data to gain an understanding of measures used to determined cross-school and cross-teacher effectiveness. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP433 or TRACK 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDSP417, EDHD442, EDHD443, and EDHD444.

EDHD442 Interventions for Children with Behavioral Challenges (1 Credit)
Students will expand knowledge of and develop skills to address challenging behaviors in inclusive early childhood classrooms. Students examine the causes underlying challenging behaviors during the early childhood years, and identify appropriate resources and support services for working with families to develop a unified approach when responding to behavioral challenges. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDSP321, EDSP417, EDHD322, EDHD323, EDHD441, EDHD443, and EDHD444.

EDHD443 Interventions for Children with Social and Communication Challenges (1 Credit)
Students will learn about the characteristics of children with autism spectrum disorder, pervasive developmental disorder, social communication disorder, and other related challenges and will be equipped to meet the needs of this group of children in the early childhood classroom. The utilization of Universal Design for Learning (UDL), Response to Intervention (RTI) and other early childhood special education approaches, as they apply to this specific group of children, will be addressed. Interventions designed to improve the functioning of children with autism spectrum disorders and related disorders will be reviewed. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDHD322, EDSP321, EDSP417, EDHD323, EDHD441, EDHD442, and EDHD444.

EDHD444 Action Research in EC/ECSE (1 Credit)
Students will become familiar with the EC/ECSE research process, literature and how teachers use action research to improve pedagogy and the experiences of children in classrooms or home-based contexts. Students will utilize this knowledge, as well as either a goal in an Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP), to develop an action research study commenced during the following semester. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDHD441, EDHD442, EDHD443, EDSP417, and EDSP321.

EDHD445 Guidance of Young Children (3 Credits)
Practical aspects for helping and working with children, drawing on research, clinical studies, and observation. Implications for day care and other public issues.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD460 Educational Psychology (3 Credits)
Application of psychology to learning processes and theories. Individual differences, measurement, motivation, emotions, intelligence, attitudes, problem solving, thinking and communicating in educational settings.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD489 Field Experiences in Human Development (3-6 Credits)
Planned field experience (internship or research-based activities) related to Human Development. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDHD498 Special Problems in Education (1-3 Credits)
Available only to students who have definite plans for individual study of approved problems.
Prerequisite: Available only to students who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDHI - Education Leadership, Higher Ed and International Ed

EDHI288 Special Problems in Education (1-6 Credits)
Available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.
Formerly: EDPL288.

EDHI338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)
Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on difficult topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.
Prerequisite: Completion of on-line registration form.
Repeatable to: 6 credits if content differs.
Formerly: EDPL288.

EDHI488 Special Topics in Education Policy and Administration (1-3 Credits)
Special and intensive treatment of current topics and issues in education policy and administration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits.
Formerly: EDPL488.

EDHI489 Field Experiences in Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL489.

EDHI498 Special Problems in Education (1-3 Credits)
Available only to students who have definite plans for individual study of approved problems.
Prerequisite: Available only to students who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL498.

EDHI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.
Repeatable to: 6 credits.
Formerly: EDPA499.

EDMS - Measurement, Statistics, and Evaluation

EDMS410 Classroom Assessment (3 Credits)
Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.
Restriction: Junior standing or higher.

EDMS451 Introduction to Educational Statistics (3 Credits)
Introduction to statistical reasoning; location and dispersion measures; computer applications; regression and correlation; formation of hypotheses tests; t-test; one-way analysis of variance; analysis of contingency tables.
Restriction: Sophomore standing or higher.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

EDMS489 Field Experiences in Measurement and Statistics (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 4 credits.

EDMS498 Special Problems in Measurement and Statistics (1-3 Credits)
Available only to education majors who have formal plans for individual study of approved problems.
Prerequisite: Available only to education majors who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDPS - Education Policy Studies

EDPS310 Foundations of Education (3 Credits)
Social context of education and conflicts over philosophies, values, and goals that are reflected in educational institutions in our pluralistic society. Helps teachers become reflective, critical thinkers about the social and philosophical issues they face and the choices they make.
Credit Only Granted for: EDPL301 or EDPS301.
Formerly: EDPL301.

EDPS401 Educational Policy, and Social Change (3 Credits)
An examination of education policy in relation to the social environment and change. Contemporary education and social issues are examined, including technology as a complex force which influences social change. This is a Social Foundations course.
Credit Only Granted for: EDPL401 or EDPS401.
Formerly: EDPL401.

EDSP - Education, Special

EDSP210 Introduction to Special Education (3 Credits)
Characteristics and needs of individuals receiving special education and related services. Current issues and practices in special education.
Restriction: Sophomore standing or lower.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP211 Introduction to Special Education (3 Credits)
An introduction to the field of special education. Students examine historical foundations, including legislation; review components necessary for effective service delivery; and develop an understanding of the role of collaboration and consultation with parents, school personnel and other professionals. In addition, students are introduced to the nature and characteristics of various disabilities and review current issues in the field including overrepresentation of minority students in special education, inclusion, and federal and state assessment mandates. Current topics are addressed including evidence-based practices, universal design for learning, and individualization and differentiation of instruction..
Restriction: Sophomore standing or lower; and permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP220 Disability in Community: Access, Accommodation, and Adaptation (3 Credits)
Examines the concept of disability in a variety of community settings. Drawing on classic and contemporary readings in psychology, sociology and special education, the course will couple conceptual and historical understanding of disability with first-hand service-learning experiences in the community. Students will develop a plan in several phases that encompasses principles of Universal Design for Living/Learning (UDL) to study and participate in community-based activities.

EDSP288 Special Topics in Teacher Education (1-3 Credits)
Restriction: Must be in a major in EDUC-College of Education; or permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits if content differs.

EDSP298 Special Problems in Teacher Education (1-6 Credits)
Available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching. Credit according to extent of work.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching.

EDSP315 Inclusive Instruction: Reading Methods II (3 Credits)
Focus on current research and methods of teaching reading in the primary grades. Examination of development of a balanced literacy program of children of all reading levels in inclusive early childhood classrooms. Students will learn to select and use a variety of evidence-based reading strategies and assessment tools for reading and writing instruction. Includes field experiences.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP423 and EDHD431; and track 1: Must be concurrently enrolled in EDSP430 and EDSP433; OR Track 2: Must be concurrently enrolled in EDHD415 and EDHD424.

EDSP321 The Young Child As Scientist (3 Credits)
A theoretical and pedagogical framework for evidence-based inclusive science instruction in inclusive early childhood classrooms. Examination of principles of inquiry-based science learning and develop strategies for helping children acquire fundamental problem-solving skills that may be applied to understanding a wide array of science content. Assessment strategies for evaluating the achievement of science objectives, and the achievement for all children will be addressed. Includes field experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP376 Fundamentals of Sign Language (3 Credits)
Receptive and expressive skills in American Sign Language. Examination of the causes of deafness, characteristics of deaf education, and aspects of the culture of the deaf community.

EDSP386 Experiential Learning (3-6 Credits)
Prerequisite: Learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

EDSP400 Instruction of Students with Severe Disabilities I (3 Credits)
Functional assessment procedures and instructional methods for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP602.
Credit Only Granted for: EDSP400 or EDSP602.

EDSP401 Teaching Students with Disabilities in Elementary Classrooms (3 Credits)
This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.
Restriction: Permission of EDUC-Special Education department.
Credit Only Granted for: EDSP401 or EDSP499F.
Formerly: EDSP499F.

EDSP402 Field Placement: Severe Disabilities I (2-5 Credits)
Practicum experience in settings serving students with severe disabilities.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP403 Instruction of Students with Physical Disabilities (3 Credits)
Assessment, curriculum, and instruction for students with physical disabilities. Focus on etiology, environmental and learning adaptations, and assistive technology.
Prerequisite: EDSP400 or EDSP602. Jointly offered with EDSP603.
Credit Only Granted for: EDSP403 or EDSP603.

EDSP404 Education of Students with Autism Spectrum Disorders (3 Credits)
Characteristics, needs, assessment, and educational methods for students with autism spectrum disorders.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP604.
Credit Only Granted for: EDSP404 or EDSP604.

EDSP410 Instruction of Students with Severe Disabilities II (3 Credits)
Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP614.
Credit Only Granted for: EDSP410 or EDSP614.

EDSP411 Universal Design for Learning (3 Credits)
Universal Design for Learning addresses a foundation framework for teacher candidates to learn how to design and implement instruction for a broad range of students with diverse needs rather than rely exclusively on accommodations to instruction for some students.
Prerequisite: EDSP210 or EDSP470.
Restriction: Must be in Special Education program.

EDSP413 Behavior and Classroom Management in Special Education (3 Credits)
Use of applied behavior analysis for assessment of behavior and learning environments. Design of behavior and classroom management of students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP613.
Credit Only Granted for: EDSP413, or EDSP613.

EDSP415 Assessment in Special Education (3 Credits)
Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and program planning.
Recommended: STAT100; or SOCY201.
Restriction: Must be in Special Education program. Jointly offered with EDSP615.
Credit Only Granted for: EDSP415, or EDSP615.

EDSP416 Reading and Writing Instruction in Special Education I (3 Credits)
Assessment and instruction of reading and writing skills for students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP616.
Credit Only Granted for: EDSP416 or EDSP616.

EDSP417 Reading Diagnosis and Assessment (3 Credits)
Reading Diagnosis and Assessment prepares teacher candidates to assess children in general and special early childhood educations settings in the areas of reading and writing in order to plan for instruction. The course will focus on diagnostic, screening, progress monitoring, and outcome assessments in early and beginning literacy. The course is designed to provide participants with the knowledge and skills necessary to collect and use a wide range of assessment data in general education and special education settings. Includes field experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP420 Child Development, Birth to Three Years (3 Credits)
Child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210 and EDHD220.
Corequisite: EDHD425 and EDHD314.
Restriction: Must be in Special Education program. Cross-listed with EDHD434.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

EDSP421 Field Placement in Special Education: Early Childhood I (2-4 Credits)
Field experience I in early childhood special education.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)).

EDSP422 Curriculum and Instruction: Early Childhood Special Education (3 Credits)
Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades.
Restriction: Must be in Special Education program. Jointly offered with EDSP627.
Credit Only Granted for: EDSP422 or EDSP627.

EDSP423 Assessment in Early Childhood Special Education (3 Credits)
Assessment procedures for infants and young children with disabilities, birth through grade 3.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP423 or EDSP624.

EDSP424 Field Placement in Special Education: Early Childhood II (2-4 Credits)
Field experience in early childhood special education.
Restriction: Must be in Special Education program.

EDSP425 Pre-Internship I (1 Credit)
This required EDSP field placement is a 3-hour per week seminar and field placement that meets across 15 weeks. Opportunities are provided to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in a four-week experience in a high incidence placement AND a four-week experience in a low incidence (LI) placement. The purpose is to provide each special education teacher candidate (TC) with practical experience to complete field-based requirements and begin to meet the CEC Initial Preparation Standards (2012). Furthermore, since EDSP 425 is the first internship experience in the Special Education Program in the College of Education at University of Maryland, teacher candidates will become familiar with the Special Education Program, College of Education, Maryland State Department of Education (MSDE), Counsel for Accreditation of Educator Preparation (CAEP), and Council for Exceptional Children (CEC) expectations and requirements for graduation and teacher licensure.
Corequisite: EDSP451 and EDSP400.
Restriction: Must be in the Special Education major.

EDSP426 Pre-Internship II (1 Credit)
A 3-hour per week seminar and field placement that meets across 15 weeks. Teacher candidates will assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.
Corequisite: EDSP415 and EDSP416.
Restriction: Must be in the Special Education major.

EDSP430 Early Intervention: Early Childhood Special Education (3 Credits)
Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP430 or EDSP631.

EDSP433 Families and Culture in Early Intervention (Birth-5) (3 Credits)
Provides students with the skills and information they need to work effectively with families of young children (birth to age 5) who have or are at risk for disabilities in early childhood or early intervention programs. Students will review current local, state and federal policies establishing the rights of families of infants and young children with disabilities to participate in decision making for their child. We will discuss relevant theoretical and research literature as well as the cultural and contextual issues involved in working with families of very young children. Includes field experiences.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP430, EDSP315, and EDHD431.

EDSP434 Field Placement in Special Education: Secondary Middle I (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP435 Field Placement in Special Education: Secondary Middle II (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP443 Language and Literacy Acquisition in Children with Disabilities (3 Credits)
Language and literacy acquisition and characteristics of typical and atypical language development in supporting students with reading and writing disabilities.
Restriction: Must be in Special Education program.
Additional Information: This course is the first of four reading courses required by the Maryland State Department of Education for teacher certification in Special Education.

EDSP450 Inclusive Practices in the Schools (3 Credits)
Educational practices regarding inclusive education in the schools for students with and without disabilities.Jointly offered with EDSP606.
Credit Only Granted for: EDSP450 or EDSP606.

EDSP451 Curriculum and Instruction: Elementary/Middle Special Education (3 Credits)
Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.
Restriction: Must be in Special Education program. Jointly offered with EDSP652.
Credit Only Granted for: EDSP451 or EDSP652.

EDSP452 Internship I: Elementary/Middle Special Education (2-4 Credits)
Field experience in elementary/middle school special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP692.
Credit Only Granted for: EDSP452 or EDSP692.

EDSP453 Methods and Models of Instruction: Elementary Special Education (3 Credits)
Focus on models and methods of instruction responsive to the cognitive, linguistic, and cultural characteristics of elementary students in special education.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP453 or EDSP653.

EDSP454 Field Placement in Special Education: Elementary II (2-4 Credits)
Field experience in elementary special education.
Restriction: Must be in Special Education program.

EDSP455 Assessment in Elementary Special Education (3 Credits)
Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP654.
Credit Only Granted for: EDSP455 or EDSP654.

EDSP466 Issues and Models of Instruction: Middle/Secondary Special Education (3 Credits)
Issues, legislation, and service models in middle/secondary special education. Emphasis on career and vocational education, self-determination, and transition.
Restriction: Must be in Special Education program. Jointly offered with EDSP664.
Credit Only Granted for: EDSP466 or EDSP664.

EDSP470 Introduction to Special Education (3 Credits)
Designed to give an understanding of the needs of all types of exceptional children.
Restriction: Must not have completed EDSP210.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP474 Assessment in Middle/Secondary Special Education (3 Credits)
Cognitive, vocational, and social assessment for students with disabilities. Emphasis on interpretation of assessment results and case management practices.
Restriction: Must be in Special Education program. Jointly offered with EDSP674.
Credit Only Granted for: EDSP474 or EDSP674.

EDSP476 Communicating with Sign Language (3 Credits)
Intermediate level receptive/expressive skills in American Sign Language. Aspects of the culture, history, and research perspectives of the deaf community.
Prerequisite: EDSP376.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP477 Curriculum, Assessment, and Instruction: Middle/Secondary Special Education (3 Credits)
Methods and assessment practices for effective instruction in middle and secondary content areas for students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP677.
Credit Only Granted for: EDSP477 or EDSP677.

EDSP481 Cultural Diversity and Disability (3 Credits)
A study of diversity issues within special education, with attention to uses of race, culture, and disability as they pertain to teaching, learning, and social justice.
Restriction: Must be in Special Education program. Jointly offered with EDSP681.
Credit Only Granted for: EDSP481, EDSP499C, EDSP678C, or EDSP681.
Formerly: EDSP499C.

EDSP482 Literacy Approaches for At-Risk Adolescents (3 Credits)
Provides approaches to teaching reading in the content areas for secondary students with disabilities.
Prerequisite: Must have completed or be concurrently enrolled in EDHD426.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP682.
Credit Only Granted for: EDSP482 or EDSP682.

EDSP484 Reading and Writing Instruction in Special Education II (3 Credits)
Focus on the development of reading and writing programs for students in special education. Builds on foundations established in EDSP416.
Prerequisite: EDSP416.
Restriction: Must be in Special Education program. Jointly offered with EDSP684.
Credit Only Granted for: EDSP484 or EDSP684.

EDSP485 Assessment and Instruction in Mathematics in Special Education (3 Credits)
Instructional methods and assessment in mathematics in special education.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP683.
Credit Only Granted for: EDSP485 or EDSP683.

EDSP486 Promoting Prosocial Behavior in Special Education (3 Credits)
Focus on social development among students with and without disabilities, the relationship between pedagogy and student behavior, and classroom, school, and community approaches for developing prosocial behavior.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP486 or EDSP686.

EDSP487 Family Partnerships in Special Education (3 Credits)
Strategies for communicating and working with families of students with disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP687.
Credit Only Granted for: EDSP487 or EDSP687.

EDSP488 Selected Topics in Teacher Education (1-3 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; or must be in a major in EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDSP489 Field Experiences in Special Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP490 Teacher Candidate Research Seminar in Special Education (3 Credits)
Study of current issues and research concerning the education of students in special education.
Restriction: Must be in Special Education program.

EDSP494 Internship: Early Childhood Special Education (6-12 Credits)
Student teaching, full-time for twelve weeks, with infants or preschool children with disabilities.
Restriction: Must be in Special Education program.

EDSP495 Internship II: Elementary/Middle Special Education (6-12 Credits)
Internship II is a full-time 15 week field-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their field placement experience.
Corequisite: EDSP490.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with: EDSP695.
Credit Only Granted for: EDSP495 or EDSP695.

EDSP496 Internship: Middle/Secondary Special Education (6-12 Credits)
Student teaching, full-time for twelve weeks, with middle or high school age students with disabilities.
Restriction: Must be in Special Education program.

EDSP498 Special Problems in Special Education (1-6 Credits)
Available only to education majors who have definite plans for individual study of approved problems. Credit according to extent of work.
Prerequisite: Available only to education majors who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP499 Workshops, Clinics, and Institutes in Special Education (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the special education department (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing. Laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits if content differs.

EDUC - Education

EDUC386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-College of Education; and junior standing or higher.

EDUC388 Special Topics in Education (1-3 Credits)
Restriction: Permission of EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDUC478 Using Information Technology in Schools (1-3 Credits)
Strategies, resources, tools and organizational concepts for using technology to facilitate classroom learning and school administrative functions.
Restriction: Permission of EDUC-College of Education; and junior standing or higher.
Repeatable to: 6 credits if content differs.

EDUC498 Selected Topics in Education (1-3 Credits)
Current topics and issues in education.
Restriction: Permission of EDUC-College of Education.
Repeatable to: 9 credits if content differs.

EDUC499 Honors Thesis (1-6 Credits)
Individual thesis work under supervision of faculty advisors; includes periodic seminar meetings with other honors students engaged in thesis work.
Prerequisite: Admission to College Honors Program.
Restriction: Permission of EDUC-College of Education.

ENAE - Engineering, Aerospace

ENAE100 The Aerospace Engineering Profession (1 Credit)
Overview of salient aspects of professional practice of Aerospace Engineering. Introduction to the range of technical expertise needed to succeed in the profession and the objectives of the various parts of the Aerospace Engineering program at UMCP in supporting students' efforts in gaining the required knowledge and skills. Familiarization with departmental faculty and their areas of research, creation of links with other students, professional society student chapters, and available resources. Discussion of ethical issues, business requirements, and their interactions with technical developments.
Recommended: ENES100 and MATH140.

ENAE200 Aerospace Engineering Profession II (1 Credit)
Overview of the engineering profession as it pertains to the role of the engineer in society, professional practice and ethical standards, career development, opportunities and need for lifelong learning, importance of safety and standards, effective written, visual, and oral communications, and the impact of the engineering profession on global issues.
Recommended: ENAE100.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE202 Computing Fundamentals for Engineers (3 Credits)
Introduction to computational tools for the solution of engineering problems. C++ & MATLAB programming including branching and loops, functions, file handling, arrays, and data structures. Students will be introduced to object-oriented programming, basic computing, algorithms, and principles of software engineering.
Credit Only Granted for: ENAE202 or ENME202.

ENAE283 Introduction to Aerospace Systems (3 Credits)
Introduction to airplanes and space vehicles as aerospace systems. Fundamentals that describe these systems. Elements of aerodynamics, airfoils and wings. Airplane performance, stability and control. Aircraft and rocket propulsion. Fundamentals of orbital motion. Aspects of vehicle conceptual design.
Prerequisite: PHYS161, MATH141, and ENES102.
Corequisite: PHYS261 and PHYS260.
Restriction: Must be in Engineering: Aerospace program.
Credit Only Granted for: (ENAE281 and ENAE282) or ENAE283.
Formerly: ENAE281 and ENAE282.

ENAE301 Dynamics of Aerospace Systems (3 Credits)
Kinematics and dynamics of three dimensional motion of point masses and rigid bodies with introduction to more general systems. Primary emphasis on Newtonian methods. Practice in numerical solutions and computer animation of equations of motion using MATLAB.
Prerequisite: PHYS271, MATH461, PHYS270, MATH246, ENAE283, ENAE202, ENES102, and MATH241.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE311 Compressible Aerodynamics (3 Credits)
Fundamentals of aerodynamics. Elements of compressible flow. Normal and oblique shock waves. Flows through nozzles, diffusers and wind tunnels. Elements of the method of characteristics and finite difference solutions for compressible flows. Aspects of hypersonic flow.
Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE324 Aerospace Structures (4 Credits)
Analysis of torsion, beam bending, plate bending, buckling and their application to aerospace.
Prerequisite: ENES220.
Restriction: Must be in Engineering: Aerospace program.

ENAE362 Aerospace Instrumentation and Experimentation (3 Credits)
Basic instrumentation electronics including DC electronics, AC electronics, semiconductors, electro-optics and digital electronics. Sensing devices used to carry out experiments in Aerospace Engineering includes metrology, machine tool measurements, bridge circuits, optical devices, and introduction to computer based data acquisition. Topics chosen to support measurements in aerodynamics, flight structures and flight control.
Prerequisite: MATH246 and ENAE283.
Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE380 Flight Software Systems (3 Credits)
Avionics using advanced sensor and computing technologies are at the heart of every modern Aerospace vehicle. Advanced software systems to improve cockpit safety and enable unmanned and deep-space missions. Object-oriented programming and software engineering concepts required to design and build complex flight software systems. Software validation, verification and real-time performance analysis to assess flight software system reliability and robustness. Human-machine interface design for piloted systems. Automatic onboard data acquisition and decision-making for unmanned air and space vehicles.
Prerequisite: ENAE283 and ENAE202.
Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE398 Honors Research Project (1-3 Credits)
Planned sequence of steps in aerospace honors research in which students take three (3) consecutive semesters of this course in partial fulfillment of aerospace engineering honors program requirements. The first semester consists of a series of seminars and meetings with faculty mentors on honors research; two semesters consist of undergraduate honors research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference.
Prerequisite: Must be accepted into Aerospace Honors Program.
Restriction: Must be in Engineering: Aerospace program.
Repeatable to: 3 credits if content differs.

ENAE403 Aircraft Flight Dynamics (3 Credits)
Study of motion of aircraft, equations of motion, aerodynamic force representation, longitudinal and lateral motions, response to controls and to atmospheric disturbances, handling qualities criteria and other figures of merit.
Prerequisite: ENAE414 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE404 Space Flight Dynamics (3 Credits)
Three-dimensional motion under central fields. Solutions to orbital motion, orbital elements, time elements. Kepler's laws. Orbital maneuvering, rendezvous and station-keeping. Rigid-body attitude dynamics, spacecraft attitude dynamics.
Prerequisite: ENAE301.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE414 Incompressible Aerodynamics (3 Credits)
Aerodynamics of inviscid incompressible flows. Aerodynamic forces and moments. Fluid statics/buoyancy force. Vorticity, circulation, the stream function and the velocity potential. Bernoulli's and Laplace's equations. Flows in low speed wind tunnels and airspeed measurement. Potential flows involving sources and sinks, doublets, and vortices. Development of the theory of airfoils and wings.
Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE415 Helicopter Theory (3 Credits)
Elementary exposition on the theory and practice of aerodynamics applied to helicopters and other rotary wing aircraft.
Prerequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program.

ENAE420 Computational Structural Mechanics (3 Credits)
Introductory of finite element methods for aerospace engineering modeling and analysis; equips students with ability to understand manuals of commercial finite element analysis software.
Prerequisite: ENES220 and MATH241; and must have completed a course in linear algebra.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE423 Vibration and Aeroelasticity (3 Credits)
Dynamic response of single and multiple degrees of freedom systems, finite element modeling, wing divergence, aileron reversal, wing and panel flutter.
Prerequisite: ENAE324.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE425 Mechanics of Composite Structures (3 Credits)
Introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.
Prerequisite: MATH246, ENAE324, ENES220, and MATH241.

ENAE432 Control of Aerospace Systems (3 Credits)
An introduction to the feedback control of dynamic systems. Laplace transforms and transfer function techniques; frequency response and Bode diagrams. Stability analysis via root locus and Nyquist techniques. Performance specifications in time and frequency domains, and design of compensation strategies to meet performance goals.
Prerequisite: Minimum grade of C- in ENAE301 and ENAE283.
Restriction: Junior standing or higher; and must be in Engineering: Aerospace program.

ENAE441 Space Navigation and Guidance (3 Credits)
Principles of navigation. Celestial, radio, and inertial navigation schemes. Navigational and guidance requirements for orbital, planetary, and atmospheric entry missions. Fundamentals of communications and information theory. Link budgets, antennas and telemetry systems.
Prerequisite: ENAE404 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE450 Robotics Programming (3 Credits)
Introduces students to the Robot Operating System (ROS) as well as to many of the available tools commonly used in robotics. Lectures focus on theory and structure, whereas laboratory sections will focus on applications and implementations. Students learn how to create software and simulations, interface to sensors and actuators, and integrate control algorithms. The course works through exercises involving a number of autonomous robots (i.e., ground and air vehicles) that students will eventually use in their subsequent RAS minor courses. Topics include: ROS architecture, console commands, ROS packages, simulation environments, visualizations, autonomous navigation, manipulation, and robot vision.
Prerequisite: ENME480 or ENAE380.
Restriction: Must be in the Robotics and Autonomous Systems (RAS) minor; or permission of department.
Additional Information: Students in the Robotics and Autonomous Systems minor should take ENME480 as a prerequisite; Aerospace Engineering students not in the minor should take ENAE380.

ENAE455 Aircraft Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of piston, turbojet, fanjet, and other variations of airbreathing aircraft power units.
Prerequisite: ENES232, ENAE414, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE457 Space Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.
Prerequisite: PHYS271, ENES232, PHYS270, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And senior standing.

ENAE464 Aerospace Engineering Laboratory (3 Credits)
Application of fundamental measuring techniques to measurements in aerospace engineering. Includes experiments in aerodynamics, structures, propulsion, flight dynamics and astrodynamics. Correlation of theory with experimental results.
Prerequisite: ENAE324, ENAE362, ENAE311, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE467 Advanced Space Propulsion and Power (3 Credits)
Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.
Prerequisite: ENAE457.
Restriction: Permission of Instructor. Jointly offered with: ENAE667.
Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.
Formerly: ENAE488I.

ENAE471 Aircraft Flight Testing (3 Credits)
Provides basic instruction to aircraft flight testing and demonstrates need for systematic, well-proven technique to allow for accurate airplane performance. Concepts of aerodynamics, airplane performance, and stability and control. Emphasis on single-engine general aviation type aircraft.
Prerequisite: ENAE414.
Corequisite: ENAE403.
Restriction: Must be in Engineering: Aerospace program.

ENAE481 Principles of Aircraft Design (3 Credits)
Aircraft design principles blending both synthesis and analysis. The iterative nature of the design process. Applied aerodynamics. Elements of aircraft performance calculation and optimization. Design of aircraft including payload, crew and avionics provisions, propulsion selection and sizing, aerodynamic configuration optimization, mass properties, stability and control characteristics, and vehicle subsystems. Individual student projects in aircraft design.
Prerequisite: ENAE324, ENAE362, and ENAE432.
Corequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE482 Aeronautical Systems Design (3 Credits)
Senior capstone design course in the aeronautics track. Introduction of computerized methods for sizing and performance analysis. More comprehensive methods to predict weight, aerodynamics and propulsion system characteristics. Consideration in design disciplines such as vulnerability, maintainability, produceability, etc. Groups of students will complete, brief and report on a major design study to specific requirements.
Prerequisite: ENAE455, ENAE423, ENAE403, and ENAE481.
Restriction: Must be in Engineering: Aerospace program; and senior standing or higher.

ENAE483 Principles of Space Systems Design (3 Credits)
Principles of space systems analysis and vehicle design. Launch vehicle performance analysis and optimization. Design of vehicle systems including avionics, power, propulsion, life support, human factors, structures, actuator and mechanisms, and thermal control. Design processes and design synthesis. Individual student projects in vehicle design.
Prerequisite: ENAE404, ENAE324, ENAE362, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE484 Space Systems Design (3 Credits)
Senior capstone design course in the space track. Group preliminary design of a space system, including system and subsystem design, configuration control, costing, risk analysis, and programmatic development. Course also emphasizes written and oral engineering communications.
Prerequisite: ENAE423, ENAE483, ENAE441, and ENAE457.
Restriction: Must be in Engineering: Aerospace program.

ENAE488 Topics in Aerospace Engineering (1-4 Credits)
Technical elective taken with the permission of the student's advisor and instructor. Lecture and conference courses designed to extend the student's understanding of aerospace engineering. Current topics are emphasized.
Prerequisite: Permission of student's advisor required.
Restriction: Permission of instructor.

ENAE499 Elective Research (3 Credits)
Undergraduate research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference or competition.
Prerequisite: Permission from student's advisor required.
Restriction: Senior standing or higher; and must be in Engineering: Aerospace program; and permission of instructor; and permission of ENGR-Aerospace Engineering department.
Repeatable to: 6 credits if content differs.

ENBC - Biocomputational Engineering

ENBC301 Introduction to Biocomputational Engineering (1 Credit)
Provides practical tools to help Biocomputational Engineering majors to think critically about their goals and career paths and to utilize their major to set their career trajectory.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in Biocomputational Engineering major.

ENBC311 Python for Data Analysis (3 Credits)
Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.
Prerequisite: Minimum grade of C- in MATH241; and minimum grade of C- in BIOE241 or approved prior study in Matlab.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE489A, BIOE442 or ENBC311.

ENBC312 Object Oriented Programming in C++ (3 Credits)
Provides a solid foundation for object-oriented programming using the C ++ programming language. It introduces fundamental conceptual tools and their implementation of object-oriented design and programming such as: object, type, class, implementation hiding, inheritance, parametric typing, function overloading, polymorphism, source code reusability, and object code reusability. Fundamental principles of object-oriented design and programming are stressed while covering the language details.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC321 Machine Learning for Data Analysis (3 Credits)
Instructs students in the fundamentals of machine learning methods through examples in the biological phenomenon and clinical data analysis. This course is designed to share knowledge of real-world data science and aid to learn complex machine learning theory, algorithms, and coding libraries in a simple way. Students will learn the machine learning theory, but they will also get hands-on practice building their models using programming tools such as Python and R.
Prerequisite: Minimum grade of C- in ENBC311 and ENBC332.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC322 Algorithms (3 Credits)
Presents an introduction to the techniques for designing efficient computer algorithms and analyzing their complexity using the Python programming language. Students will gain insight into principles and data-structures useful in algorithm design. General topics include asymptotics, sorting and searching, hashing, algorithm design techniques, graph algorithms, and dynamic programming.
Prerequisite: Minimum grade of C- in ENBC311.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: ENEB355 or ENBC322.

ENBC331 Applied Linear Systems and Differential Equations (3 Credits)
Applications of linear algebra and differential equations to bioengineering and biomolecular systems. Designed to instruct students to relate mathematical approaches in bioengineering to their physical systems. Examples will emphasize fluid mechanics, mass transfer, and physiological systems.
Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in BIOE241 or approved prior study in Matlab.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE371 or ENBC331.

ENBC332 Statistics, Data Analysis, and Data Visualization (3 Credits)
Instructs students in the fundamentals of probability and statistics through examples in biological phenomenon and clinical data analysis. Data visualization strategies will also be covered.
Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in BIOE241 or approved prior study in Matlab.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE372, ENBC332 or STAT464.

ENBC341 Biomolecular Engineering Thermodynamics (3 Credits)
A quantitative introduction to thermodynamic analysis of biomolecular systems. The basic laws of thermodynamics will be introduced and explained through a series of examples related to biomolecular systems.
Prerequisite: Minimum grade of C- in MATH246 and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE232, ENBC341 or CHBE301.

ENBC342 Computational Fluid Dynamics and Mass Transfer (3 Credits)
Principles and applications of fluid mechanics with a focus on bioengineering topics. Content includes conservation of mass, momentum, and energy, as well as the application of these fundamental relations to hydrostatics, control volume analysis, internal and external flow, and boundary layers. Applications to biological and bioengineering problems such as tissue engineering, bioprocessing, imaging, and drug delivery.
Prerequisite: Minimum grade of C- in ENBC341; and minimum grade of C- in BIOE241 or approved prior study in Matlab; and must have earned a minimum grade of C- or be concurrently enrolled in ENBC331.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE331 or ENBC342.

ENBC351 Quantitative Molecular and Cellular Biology (3 Credits)
Provides a quantitative analysis of the behavior of cellular and molecular systems. The focus will be the construction and application of mechanistic models of biomolecular interaction rate processes, which form the foundation of most biological functions. The course will also provide in-depth, practical exploration into data analysis of key bioengineering techniques.
Prerequisite: Minimum grade of C- in BSCI170 or BIOE120.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC352 Molecular Techniques Laboratory (2 Credits)
Provides students with the opportunity to learn how biology and engineering can synergistically contribute to our understanding of biological and biomedical problems. Students will gain hands-on experience through wet lab experiments in basic techniques relevant to bioengineering.
Prerequisite: Minimum grade of C- or concurrently enrolled in ENBC351.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC353 Synthetic Biology (3 Credits)
Introduces students to the scientific foundation and concepts driving the fast-paced field of synthetic biology. This course aims to apply engineering principles, measurement science, and modern molecular biology to increase understanding of complex biological systems and to develop novel applications that address global challenges in health, manufacturing, energy, agriculture, and the environment. Students will explore the principles and applications of the field via in-depth analysis. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.
Prerequisite: Minimum grade of C- in BSCI170 or BIOE120.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.
Credit Only Granted for: BIOE461 or ENBC353.

ENBC403 Research Methods in Biological Data Mining (3 Credits)
An introduction to the fundamentals of conducting research projects utilizing a general understanding of quantitative/qualitative research, clinical data analysis, and multiple examples of different research approaches in the biological phenomenon. The course includes an overview of design strategies to implement various data mining technologies.
Prerequisite: Minimum grade of C- or concurrently enrolled in ENBC311.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC423 Applied Computer Vision (3 Credits)
Introduction to the basics and modern deep learning models in the Artificial Intelligence field of computer vision. The course emphasizes applications of computer vision in medical imaging. Computer vision techniques will be demonstrated using software packages implementing bioimage informatics methods.
Prerequisite: Minimum grade of C- in ENBC311 and ENBC312.

ENBC431 Finite Element Analysis (3 Credits)
An introduction to the theory, programming and application of the finite element method that is used to solve problems in engineering analysis and design. Modeling, analysis, and design using the FEA software SolidWorks. The objective of the course is to teach the fundamentals of the finite element method with emphasis on the underlying theory, assumption, and modeling issues as well as providing hands-on experience using finite element software to model, analyze, and design systems.
Prerequisite: Minimum grade of C- in MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENCE - Engineering, Civil

ENCE100 Introduction to Civil and Environmental Engineering (1 Credit)
An overview of the department of Civil and Environment Engineering. Students are introduced to the undergraduate curriculum and will be exposed to other undergraduate and graduate students at various points in their program. The course blends panel presentations by seniors and graduate students, faculty and practitioners with a project and book review to be performed by the students.

ENCE200 Civil Engineering Graphics for Design and Construction (3 Credits)
Introduction to the basic principles and fundamentals of civil design, plan interpretation, and plan creation. Development of the knowledge and skills to analyze existing sites, environmental features, and characteristics used to develop a site properly. Introduction of the use of Computer-Aided Drafting (CAD) software in the context of civil and environmental engineering design and applications.
Prerequisite: ENES100, MATH141, and ENES102; and permission of ENGR-Civil & Environmental Engineering department.

ENCE201 Engineering Information Processing (3 Credits)
Exploration of algorithms for solving problems in several important areas of numerical computing: roots of equations; matrix algebra and the systems of linear equations; function approximation, numerical differentiation and integration; and ordinary differential equations. Issues of solution accuracy, robustness, and efficiency are also considered. Numerical techniques are presented in the context of engineering applications, and example problems are solved using a variety of computer-based tools (primarily MATLAB).
Prerequisite: ENES220 and MATH241; and permission of ENGR-Civil & Environmental Engineering department.
Corequisite: MATH246.
Credit Only Granted for: ENCE201 or ENCE203.

ENCE204 How Do Cities Work (3 Credits)
Can we improve the way cities work? Are we equitably sharing the benefits and the burdens of living in a city? This course examines how cities work, and importantly, whether they work the same for everyone living in the city. We will explore the ways in which we provide city services and who is included or excluded from these services. We will examine how the city infrastructure serves a neighborhood's residents, with an eye toward how community forms. We will use first person accounts from policymakers, advocates, and community members to learn about the planning process for services and the tensions that can exist around access to healthcare, food and affordable housing. Each week we will study a new facet of the city, drawing on the writings of experts and your own journey through the city to better understand its infrastructure, asking how does it work, how does it connect to other infrastructure and whom does it primarily serve?

ENCE205 Biology for Civil and Environmental Engineers (3 Credits)
Introduction to the functions and interactions of biological systems in civil and environmental engineering systems in the context of societal issues. The course includes an introduction to biotechnological principles from a quantitative perspective, modern experimental techniques in biotechnology and methods of data analysis. Roles for civil and environmental engineers in society seen from a biotechnological perspective, and the role of biotechnology in civil and environmental engineering will be elucidated. The role of biotechnology in other engineering disciplines will also be discussed.
Prerequisite: MATH140 or equivalent.
Restriction: Must be in the Civil Engineering program; or permission of the Civil and Environmental Engineering Department.
Credit Only Granted for: BIOE120 or ENCE205.

ENCE215 Engineering for Sustainability (3 Credits)
Engineers have a key role to play in planning, designing, building, and ensuring a sustainable future. In this class, a problem-based approach is used to examine fundamentally-based analyses and approaches for engineering as sustainable society, with a focus on sustainable use of energy and materials, sustainable infrastructure solutions, atmospheric sustainability and sustainable water supply, and human population growth and resource consumption and its implications for sustainability.
Prerequisite: CHEM135; and permission of ENGR-Civil & Environmental Engineering department.

ENCE300 Fundamentals of Engineering Materials (3 Credits)
Behavior, physical, mechanical and chemical properties, design and performance of civil engineering materials, including aggregates, cement, concrete, asphalt binders and mixtures, plastics and geosynthetics, timber, metals and alloys. Modified and advanced highway materials (polymer and rubber modified mixtures, high performance concrete, composites, smart materials). Laboratory testing with hands-on experience on aggregates, Portland cement concrete, asphalt mixtures, timber and metals as per SUPERAVE, ACI design methods, and ASTM standards and specifications.
Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE302 Probability and Statistics for Civil and Environmental Engineers (3 Credits)
Statistics is the science of data. Civil Engineers must often make decisions based on incomplete, variable or uncertain information. In addition, modern methods of design and analysis need to account for variability in natural, engineered and human systems. After successful completion of this class, a student should have facility and familiarity with established basic techniques for managing data, modeling variability and uncertainty, communicating about data and decisions, and supporting or defending a decision or judgment based on uncertain or incomplete data.
Prerequisite: MATH246 and ENCE201; and permission of ENGR-Civil & Environmental Engineering department.

ENCE305 Fundamentals of Engineering Fluids (3 Credits)
The theoretical bases for fluid statics and dynamics, including the conservation of mass, energy and momentum. Modeling of hydraulic systems are introduced. Emphasis on pipe flow and open-channel hydraulics, with real-world applications.
Prerequisite: ENES220, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENCE310 Introduction to Environmental Engineering (3 Credits)
Introduction to the physical, chemical and biological systems relating to the quality of water, land and air environments. Fundamental principles will be emphasized, current environmental pollution problems will be examined and methods of pollution abatement discussed.
Prerequisite: PHYS260 and ENCE215; and permission of ENGR-Civil & Environmental Engineering department.

ENCE320 Introduction to Project Management (3 Credits)
Principles and techniques of managing engineering projects from the initiation, through planning, execution, monitoring & control, then finally closeout.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A James Clark School of Engineering.
Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST408O or INST453.

ENCE325 Introduction to Construction Project Management (3 Credits)
Learn the basic topics in sourcing, planning, financing, designing, contracting, constructing and operating buildings and other facilities in the built infrastructure. Topics include construction economics, design constructability reviews, construction process planning, contracts and procurement strategies, project scheduling and resource utilization, site layout planning, project cost and quality controls, temporary structures, environmental sustainability, project handover procedures, facility operation and management, IT-based tools for construction project and resource management.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in a major in ARCH-School of Architecture, Planning, & Preservation; or must be in the Construction Project Management minor. And permission of ENGR-Civil & Environmental Engineering department.
Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST408O or INST453.

ENCE340 Fundamentals of Geotechnical Engineering (3 Credits)
Introductory study of soils in civil engineering. Soil origin, phase relationships and classification schemes. Soil hydraulics: capillary, effective stress, permeability and seepage considerations. Basic stress distribution theories and soil consolidation-settlement analysis. Integration of shear strength evaluation with slope stability analysis. If time permits, topics such as applications in geoenvironmental engineering will be covered.
Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE353 Introduction to Structural Analysis (3 Credits)
The basic tools of structural analysis and design. Design loads. Equilibrium of external and internal forces. Shear and moment diagrams in beams and frames. Truss analysis. Influence line diagrams. The slope-deflection method and method of consistent deformation. Matrix stiffness methods for beams, frames and trusses.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department; and (MATH246 and ENES220).

ENCE360 Analysis of Civil Engineering Systems (3 Credits)
Introduction to systems approach and systems analysis in civil and environmental engineering. Introduction to systems analysis tools that facilitate engineering management decision making including optimization and computer simulation. Introduction to linear and nonlinear mathematical optimization including linear and integer programming, elementary nonlinear programming and dynamic programming.
Prerequisite: ENCE201 and MATH140; and permission of ENGR-Civil & Environmental Engineering department.

ENCE370 Introduction to Transportation Engineering and Planning (3 Credits)
Engineering problems of transportation by highways, airways, pipelines, waterways, and railways. Transportation modes and technologies, vehicle dynamics, basic facility design, traffic stream models, capacity analysis, transportation planning, evaluation and choice, and network analysis.
Prerequisite: ENCE201, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.

ENCE386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENCE398 Honors Research Project (1-3 Credits)

ENCE402 Simulation and Design of Experiments for Engineers (3 Credits)
Review of statistics and hypothesis testing, sample design and design of experiments, generation of discrete and continuous distributions and their applications. Introduction of simulation languages and simulation of discrete and continuous engineering systems. Output analysis, model validation and sensitivity and reliability analysis.
Prerequisite: ENCE302; and permission of ENGR-Civil & Environmental Engineering department.

ENCE411 Environmental Engineering Science (3 Credits)
Introduces the analytical techniques available to assess performance of engineering processes as they relate to water, soil, and air treatment and quality. The basic principles of environmental management, economics of waste treatment, by-product reutilization, and energy cycles are introduced and discussed. Alternative technologies are introduced and evaluated mostly by assessing their potential to reduce waste, minimize energy use, and promote sustainability. Students' activities include, a weekly lab to provide hands-on experience with environmental quality measurements and treatment techniques; on-site visits to regional industries that undertake sustainable practices; and a final research project where experimental design and laboratory techniques are used to assess interactions between technologies and natural systems and their potential for reducing environmental impacts.
Prerequisite: ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE412 Environmental Engineering Unit Operations (3 Credits)
Examination of unit operations and processes encountered in environmental engineering field. Fundamental principles learned from previous classes will be applied into the design and operation of unit operations and processes, particularly in the area of water and wastewater treatment. Similar processes will be applied to air pollution control, solid waste disposal and hazardous waste treatment.
Prerequisite: ENCE305 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE420 Selection and Utilization of Construction Equipment (3 Credits)
Learn to evaluate and select construction equipment with a focus on mechanized equipment for earthwork and building construction.Learn about the parties involved in procurement, operation and maintenance, and how to cost-effectively plan, select, and utilize equipment for earthmoving, paving, formwork, trenching, rock excavation, tunneling, site preparation, and steel and concrete construction. Explore trends in equipment design, construction automation, and robotics.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor.

ENCE421 Legal Aspects of Architectural and Engineering Practice (3 Credits)
Learn the basic structure of the US legal system and court procedures and legal principles relevant to architectural and engineering design and construction contracts including principles of ethical, legal and professional conduct of engineers and architects.Topics include: contracts for design and construction, sales and warranties, torts and product liability, business agency and government agencies, professional liability of architects and engineers, labor laws, expert testimony, mediation and arbitration, tangible property including real estate, intellectual property including trademarks, patents and copyrights, insurance and sureties.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE422 Project Cost Accounting and Economics (3 Credits)
Learn: the fundamentals of accounting; project cost accounting principles as they apply to project management; project cost accounting; and the fundamentals of engineering economics.Topics include: project feasibility analysis; reading and analyzing financial statements; cash management; cash flow analysis; depreciation and taxes; and impact on profitability; the principles of activity based costing; net present value analysis; the framework for project performance measurement, cost performance indices, and earned value analysis.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE423 Project Planning, Estimating & Scheduling (3 Credits)
Learn the fundamentals of project planning, estimating, and scheduling. Understand the concepts of planning; to reduce uncertainty, improve efficiency of the operation, to set and meet objectives, and to provide a basis for monitoring and controlling the work. Be introduced to: the concepts of resource definition, assignment and management, and; the basics of project estimating (pricing) methods including global pricing strategies, types of estimates, pricing processes, overhead and profit, and project financing.Learn the basics of project scheduling including; bar charts, network-based methodologies, and linear scheduling techniques. Emphasis is placed on Critical Path Method (CPM) scheduling, a network based methodology. Be exposed to the use of scheduling software and will actually develop a CPM schedule for an actual construction project as part of a semester project.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE424 Communication for Project Managers (3 Credits)
Learn the fundamentals of communications for project managers. Emphasis is on interpersonal and group communications; through voice, electronic, and written messages; project cycle and reports and presentations during this cycle; and communications for employment.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management minor. Jointly offered with: ENCE614.
Credit Only Granted for: ENCE424 or ENCE614.

ENCE426 Construction Documentation and BIM Applications in Engineering and Construction (3 Credits)
Learn the basics of construction documentation methods, with particular emphasis on Building Information Modeling (BIM). Topics include: the fundamentals of assembly, coordination, and maintenance of construction documents and implementation of BIM techniques in the design and construction processes, and; a review of Autodesk, Revit, and Navisworks and other leading BIM software. Lectures from project management faculty supplemented by guest lecturers from the construction industry.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE431 Hydrologic Engineering (3 Credits)
An introduction to basic principles of hydrologic science including the hydrologic cycle, rainfall, surface runoff and streamflow. Special emphasis is placed on hydrologic engineering design of stormwater management and flood control facilities. Design projects are used to illustrate design practices.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE432 Ground Water Hydrology (3 Credits)
Concepts related to the development of the ground water resources, hydrology, hydrodynamics of flow through porous media, hydraulics of wells and basin-wide ground water development. Fundamentals of ground water pollution are introduced.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE441 Foundation Design (3 Credits)
Critical review of classical lateral earth pressure theories, analysis of retaining walls and reinforced earth walls, subsurface explorations, bearing capacity and settlement of shallow foundations, design of deep foundations that includes both pile foundations and drilled shafts.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE444 Experimental Methods in Geotechnical Structural Engineering (3 Credits)
In the geotechnical engineering part of the course, major soils testing and their interpretation including classification, compaction, strength, and compressibility will be undertaken. The structural engineering part of this course covers test planning, loading apparatus, instrumentation, data acquisition and data analysis, as well as basic aspects of structural testing techniques and shake-table test.
Prerequisite: ENCE353 and ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE447 Pavement Engineering (3 Credits)
Fundamental principles underlying the design, construction, maintenance and repair, and management of highway and airfield pavement systems. Pavement performance (functional/structural; evaluation); pavement mechanics (multi-layered elastic theory; slab theory); pavement materials (properties and characterization); environmental effects; current rigid and flexible design methods (new/rehabilitation); construction (new construction; maintenance/repair; rehabilitation); economic evaluation; pavement management.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE453 Computer-Aided Structural Analysis (3 Credits)
Computer-aided analysis of structural systems. Unified matrix formulation of stiffness and flexibility methods. Slope deflection method. Evaluation of truss, frame, and grid systems. Non-prismatic and curved elements. Error analysis and determination of ill-conditions. Introduction to finite element methods; formulation of simple two-dimensional elements. In laboratory, use and development of CAD software.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE454 Design of Concrete Structures (3 Credits)
Combined bending and compression, development and anchorage of reinforcement, deflections, design of slabs including one-way and two-way, design of footings, retaining walls, introduction to prestressed concrete, design of multi-story buildings.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.
Formerly: ENCE451.

ENCE455 Design of Steel Structures (3 Credits)
Behavior and design of members subjected to fatigue, and combined bending and compression; plate girders, composite beams, open-web joists and connections. Methods of allowable stress design, and load and resistance factor design. Elements of plastic analysis and design. Framing systems and loads for industrial buildings and bridges.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE466 Design of Civil Engineering Systems (3 Credits)
A major civil engineering design experience that emphasizes development of student creativity, development and use of design methodologies, evaluation of alternate solutions, feasibility considerations, and detailed system descriptions. Realistic design constraints including economic factors, safety, aesthetics, and reliability will be imposed. Students will work in design project groups and be required to exercise oral and written communication skills.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.
Additional Information: Must be taken in the semester in which the student graduates.

ENCE470 Highway Engineering (3 Credits)
Highway location and design, highway engineering economics, traffic engineering, traffic measurement devices and technologies. Includes discussion of technological advances in traffic flow and capacity, such as signal systems, corridor control, automatic driver information, incident detection and autonomous vehicle operation.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE472 Transportation Engineering (3 Credits)
Transportation engineering concepts including transportation systems analysis, airport systems, airline and airport operations, marine transportation and urban public transportation systems.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE488 Senior Thesis (3 Credits)
Advanced study in civil engineering problems with special emphasis on mathematical modeling and experimental methods.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.

ENCE489 Special Problems in Civil Engineering (1-4 Credits)
A course arranged to meet the needs of exceptionally well prepared students for study in a particular field of civil engineering.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.
Repeatable to: 9 credits if content differs.

ENEB - Embedded Systems & Internet of Things

ENEB302 Analog Circuits (4 Credits)
Foundations of circuits, focusing on applications including signal amplification, power amplification, instrumentation and filters. Fundamental concepts of analog circuits including analysis methods in time and complex domains, with emphasis on circuit topologies relevant in embedded systems. Intensive application of simulations and hands-on laboratory exercises.
Prerequisite: Minimum grade of C- in PHYS260 and PHYS261; and 1 course with a minimum grade of C- from (MATH246, MATH241, MATH240); and permission from the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB304 Microelectronics and Sensors (3 Credits)
An overview of basic Internet of Things (IOT) architecture, core IOT hardware enablers, and IOT sensors and their implementation. This course covers commonly used analog amplifier designs and biasing, as well as characterization in the frequency and time domains. In addition, this course discusses the physical principles in RF communications as it relates to wireless personal and local networks (WPAN/WLAN) and short-range communication systems.
Prerequisite: Minimum grade of C- in ENEB302; and permission from the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB340 Intermediate Programming Concepts and Applications for Embedded Systems (2 Credits)
Principles of programming for embedded systems development. Includes principles of software development in Unix, C and other high level languages, input/output, data types and variables, operators and expressions, program selection, repetition, functions, arrays, strings, introduction to algorithms, software projects, debugging, documentation. Includes hands-on applications in microprocessor environments.
Prerequisite: Completion of approved introductory programming course with a minimum grade of a "C-"; and permission of the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB341 Introduction to Internet of Things (3 Credits)
An introduction to the foundations of Internet of Things (IoT), including IoT devices, communications, connection considerations, back-end services/applications, and business models. This course looks at the IoTs as the general theme of physical/real-world things becoming increasingly visible and actionable via Internet and Web technologies. It also covers networking protocols and gateways, security and privacy, data analytics and cloud computing platforms.
Prerequisite: Permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB344 Digital Logic Design for Embedded Systems (4 Credits)
Hands on approach on foundations of digital logic for embedded systems applications; including input/output, logic gates, Karnaugh maps, latches, flip-flops and state-machines. This course also covers design and analysis of synchronous sequential systems, implementation with PLA's, multiplexers, decoders, encoders, binary arithmetic units such as adders and subtractors, conversions between decimal and arbitrary radix numbers, especially octal, hexadecimal, and binary representations, radix and diminished radix arithmetic, and character codes.
Corequisite: ENEB340; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB346 Linear Algebra for Machine Learning Applications (3 Credits)
Foundations of linear algebra for machine learning and data science applications with emphasis on implementing machine learning data science algorithms in a computer programming environment with linear algebra software tools and libraries as this course aims to provide a hands-on experience and learning environment for students. Students will learn the fundamental concepts in linear algebra that are directly relevant to machine learning and big data modeling and computations. These include vector and matrix operations, determinants, factorization methods, principal component analysis, eigenvalues, and singular value decomposition.
Prerequisite: MATH140.
Restriction: Must be in the Embedded Systems & Internet of Things program and must receive permission from the Embedded Systems & Internet of Things program.

ENEB352 Introduction to Networks and Protocols (3 Credits)
An introduction to the principles of computer networking and covers the architecture and operation of the TCP/IP protocol stack. Topics will include fundamental networking concepts, the layers of the TCP/IP protocol stack, the packet structure and operation of each layer with detailed discussion on reliable data transfer, flow control, congestion control, routing algorithms, error detection, Local Area Networks (LANs), and multiple access protocols. The course will also cover wireless protocols relevant to Internet of Things (IoT) such as WLAN (IEEE 802.11), Zigbee (IEEE 802.15.4), and Bluetooth as well as some popular IoT application-layer and network-layer protocols including CoAP, AMQP, MQTT, XMPP and 6LoWPAN. As a part of the course work, the students will attend lab sessions where they will learn how to capture and analyze network traffic, how to configure networking functions on Linux systems, and how to operate and configure routers using Juniper Networks devices in a real-world lab environment.
Prerequisite: Minimum grade of C- in ENEB341; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB353 Computer Organization for Embedded Systems (3 Credits)
Overview of the basic principles of computer organization and design with emphasis on low resource microcontrollers common in IoT applications. The topics include assembly and machine instructions, data-path and controller design, pipelining and memory hierarchy.
Prerequisite: Minimum grade of C- in ENEB344 and ENEB354; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB354 Discrete Mathematics for Information Technology (3 Credits)
Foundations of discrete mathematics for information technology and embedded computing. Topics include sets, relations, functions and algorithms, proof techniques and induction, number theory, counting and combinatorics, and Graph theory.
Prerequisite: Minimum grade of C- in MATH141.
Restriction: Must be in the Embedded System and Internet of Things program.

ENEB355 Algorithms in Python (3 Credits)
A study of fundamental algorithmic problem-solving techniques in Python for today's large-scale computer systems as well as microcontrollers. Algorithms are instructions for solving problems and data structures are strategies for organizing information on computers. Efficient algorithms require appropriate data structures, and vice versa. Students will learn about the algorithms and data structures that form the building blocks of Python programming language. Student will also learn to analyze the cost of algorithms, according to how their running time or space requirements grows as data size grows.
Prerequisite: Minimum grade of C- in ENEB340 and ENEB354; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.
Credit Only Granted for: ENEB355 or ENBC322.

ENEB408 Capstone Design Lab (3 Credits)
This course is the first of a two-semester sequence of capstone design laboratory experiences required for Embedded Systems and Internet of Things students. Students will learn the principles of design, project planning, and project management. They will develop an ability to apply engineering solutions considering public health, safety, and welfare. Students will develop a consciousness of ethical and professional responsibilities and recognition of global, cultural, social, environmental, and economic factors in the design process. Students will also develop an ability to communicate in written and oral forms and to function effectively on a team. Projects will involve hardware, including a combination of off-the-shelf and custom-made components supported by hardware descriptive language software. The projects meet specific design challenges with applications in industry, healthcare, transportation, environmental sensing, cyber-security, and machine learning.
Prerequisite: Minimum grade of C- in all required 300-level ENEB courses.
Restriction: Must be in the Embedded Systems & Internet of Things program; and must receive permission from the Embedded Systems & Internet of Things program.
Repeatable to: 6 credits.

ENEB443 Hardware/Software Security for Embedded Systems (3 Credits)
This course will provide an in-depth understanding of systems level software and hardware in designing industry-standard secured embedded systems. It aims to provide a comprehensive systems view of security, including hardware, platform software such as operating systems and integrated development environments, software development process, data protection protocols, and some aspects of cryptography. To goal is to expose students on how to develop embedded software and properly utilize platform components to ensure the highest levels of security.
Prerequisite: Permission from the Embedded Systems & Internet of Things program; and minimum grade of C- in ENEB454.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB444 Operating Systems for Embedded Systems (3 Credits)
Theory, design, implementation and analysis of low-resource computer operating systems for IoT applications. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and real-time operating systems. Optional topics may include communications protocols and computer security.
Prerequisite: Minimum grade of C- in ENEB340 and ENEB344; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB451 Network Security (3 Credits)
The foundations of modern cryptography including IoT security aspects, IoT features leading to security issues, as well as design considerations. Various cryptographic algorithms are discussed including the lightweight cryptography used in IoT applications. We will focus on the technology advances, industrial standards, and law enforcement that have been or have to be made to establish trust in four key areas to establish the trust in computing: security, privacy, reliability, and business integrity. Students will implement cryptographic algorithms using industry-standard tools and programming languages. Furthermore, students will analyze various encryption algorithms using cryptanalysis tools.
Prerequisite: Minimum grade of C- in ENEB352.
Restriction: Must be in the Embedded Systems & Internet of Things program and must receive permission from the Embedded Systems & Internet of Things program.

ENEB452 Advanced Software for Connected Embedded Systems (3 Credits)
Hardware and software foundations, evaluations and validation, application mapping, optimization and testing of cyber-physical systems, namely, embedded systems and communication technologies.
Prerequisite: Minimum grade of C- in ENEB454; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program; and senior standing.

ENEB453 Web-Based Application Development (3 Credits)
Introduction to cloud computing, computer programming in the context of developing full-featured dynamic websites. Uses a problem-solving approach to teach basics of program design and implementation using JavaScript; relates these skills to the creation of dynamic websites; then explores both the potential and limits of web-based information sources for use in research. This course provides a practical introduction to full-stack web development using PHP and JavaScript. The course will start with HTML/CSS/JavaScript to cover the client-side of applications. Then, it will move on to the server-side with PHP and integrating with a MySQL database to create a complete web application.
Prerequisite: ENEB340 and ENEB341.
Restriction: Must be in the Embedded Systems & Internet of Things program; and permission of the Embedded Systems & Internet of Things program.

ENEB454 Embedded Systems (3 Credits)
This course will provide students with the essential knowledge base that will enable them to tackle complex problems encountered in embedded systems design. The course will provide an overview of associated hardware components and software methodologies as well as the tools used in the development of modern embedded systems. Student will be exposed to the theoretical foundations which will be reinforced with carefully selected hands-on laboratory exercises, thereby getting a sense of how the theoretical concepts connect with the real-world embedded systems applications.
Prerequisite: Minimum grade of C- in ENEB353; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB455 Advanced FPGA System Design using Verilog for Embedded Systems (3 Credits)
A project-oriented course on digital system design using Verilog hardware description language (HDL) in an industry-standard design environment appropriate for embedded systems. Students will implement real-world designs in field programmable gate arrays (FPGAs) as well as test and optimize the FPGA. Students will also work in teams on multiple, medium-scale digital system design projects and make oral presentations and written reports.
Prerequisite: Minimum grade of C- in ENEB344 and ENEB340; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB457 Foundations of Databases for Web Applications (3 Credits)
An introduction to database systems and its applications to the Internet. It develops the database approach as a means to model the real world. The course will cover the fundamentals of the relational model, structured query language (SQL), data modeling, and database administration. This will cover an in-depth coverage of the relational model, logical database design, query languages, and other DB concepts including query optimization, concurrency control, transaction management, and log based crash recovery. In addition, students will be exposed to web-based database processing, data warehouse structures and fundamental concepts of nonrelational structured data storage (Big Data). Concepts will be illustrated with well-known Database Management System (DBMS) products such as MS Access, MS SQL Developer, Oracle Database XE, and MySQL Community Server.
Prerequisite: Minimum grade of C- in ENEB345, ENEB352, and ENEB355; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB499 Senior Research Projects in Embedded Systems & Internet of Things (1-5 Credits)
Provides students in the Embedded Systems & Internet of Things (ESIOT) program with an opportunity to engage in independent research projects on advanced embedded systems topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing an ENEB499 project, the focus is to conduct an independent investigation of a technical theme by the student.
Prerequisite: Permission of the Embedded System and Internet of Things program.
Restriction: Must be in the Embedded System and Internet of Things program.
Repeatable to: 5 credits if content differs.

ENEE - Electrical & Computer Engineering

ENEE101 Introduction to Electrical & Computer Engineering (3 Credits)
An exploration of topics within Electrical & Computer Engineering (ECE). Students will be introduced to key elements of both the Electrical Engineering and Computer Engineering curriculum, including: circuits, computing systems and software, communications and controls, electrodynamics and waves, microelectronics, signal processing, and power systems.
Corequisite: MATH140. And corequisite: ENEE140 or CMSC131; or a score of 5 on the A Java AP exam; or a score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and students cannot enroll in ENEE101 and ENES100 in the same semester.

ENEE131 Technology Choices (3 Credits)
An exploration of the positive and negative effects of technology on society, via diverse criteria to assess the relative well being of individuals and society; an examination of how society can help shape the future of technology and the tools that can be used to make wise technology choices.

ENEE140 Introduction to Programming Concepts for Engineers (2 Credits)
Introduction to the programming environment: editing, compiling, UNIX, data types and variable scope; program selection, formatted/unformatted input/output, repetition, functions, arrays and strings.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program; or must be in Engineering: Materials Science program.

ENEE142 Programming Elements for pre-service STEM teachers (3 Credits)
An introduction to programming concepts and computational thinking with STEM applications for preservice teachers with little or no previous programming experience. Python 3 programming is introduced in the context of simple STEM applications and elements of engineering hardware that are needed to design, build, and run STEM experiments and applications are taught.
Restriction: Must be in a major in EDUC-College of Education.

ENEE148 Special Topics in Electrical Engineering (1-3 Credits)
Introductory Electrical Engineering topic selected as announced every semester.
Restriction: Must be in Engineering: Electrical program; and permission of ENGR-Electrical & Computer Engineering department.
Repeatable to: 6 credits if content differs.

ENEE150 Intermediate Programming Concepts for Engineers (3 Credits)
Advanced programming concepts: coding conventions and style; pointers; dynamic memory allocation and data structures; linked lists; graphs; abstract data types; object-oriented design. There will be team-based software projects and group presentations.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department. And ENEE140 or CMSC131; or score of 5 on the A Java AP exam; or score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.
Corequisite: MATH140.
Restriction: Must be in Engineering: Electrical program.
Credit Only Granted for: ENEE114 or ENEE150.
Formerly: ENEE114.

ENEE159 Introductory Topics in Computer Engineering (1-4 Credits)
Selected introductory level topics in computer engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 8 credits if content differs.

ENEE200 Technology and Consequences: Engineering, Ethics, and Humanity (3 Credits)
What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.

ENEE205 Electric Circuits (4 Credits)
Design, analysis, simulation, construction and evaluation of electric circuits. Terminal Relationships. Kirchoff's laws. DC and AC steady state analysis. Node and mesh methods. Thevenin and Norton equivalent circuits. Transient behavior of first- and second-order circuits. Frequency response and transfer functions. Ideal op-amp circuits. Diode and transistor circuits.
Prerequisite: Minimum grade of C- in PHYS260; and minimum grade of C- in PHYS261; and permission of ENGR-Electrical & Computer Engineering department.
Corequisite: MATH246.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE204 or ENEE205.
Formerly: ENEE204.

ENEE222 Elements of Discrete Signal Analysis (4 Credits)
Discrete-time and continuous-time signals, sampling. Linear transformers, orthogonal projections. Discrete Fourier Transform and its properties. Fourier Series. Introduction to discrete-time linear filters in both time and frequency domains.
Prerequisite: Minimum grade of C- in MATH141; and permission of ENGR-Electrical & Computer Engineering department. And minimum grade of C- in ENEE140; or minimum grade of C- in CMSC131.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE222, ENEE241, or MATH242.
Formerly: ENEE241.

ENEE244 Digital Logic Design (3 Credits)
The design and analysis of combinational and synchronous sequential systems comprising digital logic gates and flip-flop memory devices; underlying tools such as switching and Boolean algebras and Karnaugh map simplification of gate networks; design and use of decoders, multiplexers, encoders, adders, registers, counters, sequence recognizers, programmable logic arrays (PLAs), read-only memories (ROMS, PROMS), and similar devices. Arbitrary radix conversion.
Prerequisite: Must have completed or be concurrently enrolled in CMSC132 or ENEE150; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Sophomore standing or higher; and must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE245 Digital Circuits and Systems Laboratory (2 Credits)
Introduction to basic measurement techniques and electrical laboratory equipment (power supplies, oscilloscopes, voltmeters, etc.). Design, construction, and characterization of digital circuits containing logic gates, sequential elements, oscillators, and digital integrated circuits. Introduction to digital design and simulation with the Verilog Hardware Description Language (HDL).
Prerequisite: Minimum grade of C- in ENEE244. And minimum grade of C- in ENEE150; or minimum grade of C- in CMSC132. And permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE299 Introductory Research Projects in Electrical and Computer Engineering (1-5 Credits)
The purpose is to provide first and second year students with an opportunity to engage in independent research projects on electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 299 project, the focus is to conduct an independent investigation of a technical theme by the student.
Prerequisite: Permission of the Department of Electrical & Computer Engineering.
Restriction: Must be in one of the following programs: Electrical Engineering (09090) or Computer Engineering (09991).
Repeatable to: 5 credits.
Additional Information: Credits may not be used for major requirements in either Electrical Engineering (09090) or Computer Engineering (09991).

ENEE303 Analog and Digital Electronics (3 Credits)
Conceptual operation of transistors and diodes. Large and small signal operation of BJTs and MOSFETs. Basic transistor configurations. Logic circuits and semiconductor memory. Multi-transistor circuits including differential amplifiers and current mirrors. Frequency response.
Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE304 Introduction to Micro and Nanoelectronics (3 Credits)
Introduction to semiconductor device physics: drift-diffusion model, pn junction properties, BJTs and FETs. Electronic circuits: diode circuits, BJT and MOSFET amplifiers, logic gates and multi-transistor circuits (such as differential amplifiers and current mirrors).
Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE304 or ENEE313.

ENEE305 Introduction to Micro and Nanoelectronics Lab (2 Credits)
Introductory laboratory in semiconductors and electronics. Characterization of diodes followed by design and testing of analog and digital circuits at the transistor (FET and BJT) level.
Prerequisite: Minimum grade of C- in ENEE304; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in the following program (Engineering: Electrical).
Credit Only Granted for: ENEE305 or ENEE307.

ENEE307 Electronic Circuits Design Laboratory (2 Credits)
Students will design and test analog and digital circuits at the transistor level. FETs and BJTs will be covered. The laboratory experiments will be tightly coordinated with ENEE303 materials.
Prerequisite: Minimum grade of C- in ENEE303; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE313 Introduction to Device Physics (3 Credits)
Basic physics of devices including fields in solids, crystal structure, properties of electrons and holes. Current flow in Si using drift-diffusion model. Properties of the pn junction. Properties of devices including BJTs, FETs and their physical characteristics.
Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE312 or ENEE313.

ENEE322 Signal and System Theory (3 Credits)
Concept of linear systems, state space equations for continuous systems, time and frequency domain analysis of signals and linear systems. Fourier, Laplace and Z transforms. Application of theory to problems in electrical engineering.
Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in ENEE222; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE324 Engineering Probability (3 Credits)
Axioms of probability; conditional probability and Bayes' rules; random variables, probability distribution and densities: functions of random variables: weak law of large numbers and central limit theorem. Introduction to random processes; correlation functions, spectral densities, and linear systems. Applications to noise in electrical systems, filtering of signals from noise, estimation, and digital communications.
Prerequisite: Minimum grade of C- in MATH246 and ENEE222; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: BMGT231, STAT400 or ENEE324.
Additional Information: Electrical Engineering majors may NOT substitute STAT400 for ENEE324.

ENEE350 Computer Organization (3 Credits)
Structure and organization of digital computers. Registers, memory, control and I/O. Data and instruction formats, addressing modes, assembly language programming. Elements of system software, subroutines and their linkages.
Prerequisite: Minimum grade of C- in ENEE244; and 1 course with a minimum grade of C- from (ENEE150, CMSC132); and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Formerly: ENEE250.

ENEE351 Algorithms and Data Structures (4 Credits)
Introduction to fundamental concepts in computer engineering, including topics in discrete math, data structures and algorithms. The course will also include a hands-on programming component. This course will provide students with the tools to design modular, time and space-efficient algorithms for real-world problems.
Prerequisite: Minimum grade of C- in ENEE150 and ENEE244.
Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in the Computer Engineering Minor or the Academy of Machine Learning.
Credit Only Granted for: ENEE351 or CMSC351.

ENEE359 Intermediate Topics in Computer Engineering (1-3 Credits)
Selected intermediate level topics in computer engineering.
Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 100- and 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 6 credits if content differs.

ENEE380 Electromagnetic Theory (3 Credits)
Introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equations.
Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in MATH241, PHYS270, and PHYS271; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program.

ENEE381 Electromagnetic Wave Propagation (3 Credits)
The electromagnetic spectrum: Review of Maxwell's equations; the wave equation potentials, Poynting's theorem, relationship between circuit theory and fields; propagation of electromagnetic waves in homogeneous media and at interfaces; transmission line theory, waveguides, radiation and antennas.
Prerequisite: Minimum grade of C- in ENEE380; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program.

ENEE382 Electromagnetics (4 Credits)
Theory and tools needed to solve electromagnetic problems and understand how electromagnetic waves propagate and interact with materials. Fields and potentials. Maxwell's equations and wave propagation. Reflection and transmission. Transmission lines. Antennas and radiation.
Prerequisite: Minimum of C- or better in ENEE205, MATH241, PHYS270, and PHYS271; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in the Electrical Engineering program.
Credit Only Granted for: ENEE381 or ENEE382.

ENEE396 Leadership, Creativity and Service Learning (3 Credits)
Introduction to engineering creativity and innovation in engineering. Application of creativity methods to topics in communication, service learning, teaching, research, and leadership. Discussions of leadership style, professional communication, and the handling of ethical dilemmas. Investigation of how experiential learning can enhance leadership and teamwork skills, connect to classroom learning and provide opportunities to gain practical experience.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE407 Design & Testing of RF and Microwave Devices (2 Credits)
An introduction to state of the art design, and testing techniques of RF and microwave devices. Designs, simulations and layout of different devices are performed using the software package ADS (Advanced Design System). The course highlights a wide range of engineering applications including terrestrial microwave links, satellite communications, broadcasting, mobile communications and radar.
Prerequisite: Minimum grade of C- in ENEE381; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE408 Capstone Design Project (3 Credits)
Culmination of prior course work in electrical and computer engineering. Utilization of modern design tools and methodologies for the design of components or systems under realistic constraints, with particular emphasis on teamwork and oral/written communication. Areas in which projects are currently offered include: microprocessor-based systems, digital systems, VLSI design (both digital and mixed-signal), and optical systems.
Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 6 credits if content differs.

ENEE411 Advanced Analog and Digital Electronics (3 Credits)
Examination of analog and digital device models for analysis, design, and simulation of transistor level electronic circuits, emphasizing Metal Oxide Silicon Field Effect Transistors (MOSFETs); fundamental single transistor configurations; frequency response, feedback, and stability of multi-transistor circuits, such as current mirrors, differential amplifiers, voltage references, operational amplifiers and data converters; complementary Metal Oxide Silicon (CMOS) implementations of static and clocked digital as well as mixed signal circuits.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and must have permission of the department.
Credit Only Granted for: ENEE411 or ENEE419A.
Formerly: ENEE419A.

ENEE413 Advanced Electronic Devices (3 Credits)
Advanced devices and their physical operation, providing a thorough description of those parts not usually covered in introductory electronics courses. These include Schottky and tunnel junctions, negative resistance devices used in wireless communication, homo-structure compound semiconductor transistors, hetero-structure (quantum effect) transistors, non-volatile memory devices, photonic devices such as LEDs and solid-state lasers, solar cells, photo-detectors and camera imagers, as well as bio-related components. Special consideration will be given to achieve an understanding of noise processes that limit electronic device performance. In all cases, system-level applications will be illustrated.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE413 or ENEE480.
Formerly: ENEE480.

ENEE416 Integrated Circuit Fabrication Laboratory (3 Credits)
Characterization of wafers and fabrication steps. Oxide growth, lithography, dopant diffusion, and metal deposition and patterning will be discussed in the lectures and carried out in the lab in fabricating NMOS transistor circuits. The transistor characteristics will be measured and related to the fabrication parameters.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Formerly: ENEE419J.

ENEE417 Microelectronics Design Laboratory (2 Credits)
Students design and build fairly sophisticated circuits, mainly composed of discrete transistors and integrated circuits. Many of the projects are designed to require that students synthesize from what they have learned in many of the disciplines in electrical engineering. Students learn they can actually use their knowledge to build something very practical, which may include a high-fidelity amplifier, a radio, a memory cell, a transmitter, etc.
Prerequisite: Minimum grade of C- in ENEE303; and minimum grade of C- in ENEE307; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE419 Topics in Microelectronics (1-3 Credits)
Selected topics of current importance in microelectronics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE420 Communication Systems (3 Credits)
Fourier series, Fourier transforms and linear system analysis; random signals, autocorrelation functions and power spectral densities; analog communication systems: amplitude modulation, single-sideband modulation, frequency and phase modulation, sampling theorem and pulse-amplitude modulation; digital communication systems pulse-code modulation, phase-shift keying, differential phase shift keying, frequency shift keying; performance of analog and digital communication systems in the presence of noise.
Prerequisite: ENEE322, ENEE324; and completion of all lower-division technical courses in the EE curriculum.

ENEE425 Digital Signal Processing (3 Credits)
Sampling as a modulation process; aliasing; the sampling theorem; the Z-transform and discrete-time system analysis; direct and computer-aided design of recursive and nonrecursive digital filters; the Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT); digital filtering using the FFT; analog-to-digital and digital-to analog conversion; effects of quantization and finite-word-length arithmetic.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE426 Communication Networks (3 Credits)
The main design issues associated with computer networks, satellite systems, radio nets, and general communication networks. Application of analytical tools of queuing theory to design problems in such networks. Review of proposed architectures and protocols.
Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Computer or Engineering: Electrical program.
Credit Only Granted for: CMSC417 or ENEE426.

ENEE428 Communications Design Laboratory (2 Credits)
EE capstone design course. Exploring the signal processing and communication systems theoretical concepts presented in ENEE 420 Communication Systems and ENEE 425 Digital Signal Processing by implementing them on actual DSP based hardware in real time.
Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.
Corequisite: ENEE425 or ENEE420.
Restriction: Must be in Engineering: Electrical or Engineering: Computer program.

ENEE429 Topics in Communications (1-3 Credits)
Selected topics of current importance in communications.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE436 Foundations of Machine Learning (3 Credits)
A broad introduction to the foundations of Machine Learning (ML), as well as hands-on experience in applying ML algorithms to real-world data sets. Topics include various techniques in supervised and unsupervised learning, as well as applications to computer vision, data mining, and speech recognition.
Prerequisite: 1 course with a minimum grade of C- from (ENEE324, STAT400); and 1 course with a minimum grade of C- from (ENEE150, CMSC216); and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Permission of ENGR-Electrical & Computer Engineering department. And must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; or must be in the ECE Department's Machine Learning notation program.
Credit Only Granted for: ENEE436, ENEE439M, or CMSC422.
Formerly: ENEE439M.

ENEE439 Topics in Signal Processing (1-3 Credits)
Selected topics of current importance in signal processing.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE440 Microprocessors (3 Credits)
Microprocessor architectures, instruction sets, and applications. Bus structures, memory, I/O interfacing. Assembly language programming, LSI device configuration, and the embedding of microprocessors in systems.
Prerequisite: ENEE350; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE445 Computer Laboratory (2 Credits)
This laboratory course focuses on the hardware/software interface in computer systems. Hands-on experiments are used to teach design, construction, analysis, and measurement of both hardware and software for embedded systems. Projects emphasize using microcontrollers for control, sensing, and communication through various I/O devices.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206; and minimum grade of C- in ENEE350; and must have earned a minimum grade of C- in all 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE446 Digital Computer Design (3 Credits)
Hardware design of digital computers. Arithmetic and logic units, adders, multipliers and dividers. Floating-point arithmetic units. Bus and register structures. Control units, both hardwired and microprogrammed. Index registers, stacks, and other addressing schemes. Interrupts, DMA and interfacing.
Prerequisite: ENEE350; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE446 or CMSC411.

ENEE447 Operating Systems (4 Credits)
The course will present the theory, design, implementation and analysis of computer operating systems. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and protection and security in operating systems. Optional topics may include communications protocols, computer security, and real-time operating systems. The lectures will be complemented with a significant level of programming, bringing up a simple operating system from scratch, concurrently as the topics are discussed in lecture. A weekly recitation section will provide TA support and an informal laboratory atmosphere. Each student will have their own board, so development will be done largely outside the classroom at each student's pace.
Prerequisite: 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457); and permission of ENGR-Electrical & Computer Engineering department; and (ENEE350, CMSC330, and CMSC351).
Restriction: Must be in Engineering: Computer program; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE447, CMSC412, or ENEE459S.
Formerly: ENEE459S.

ENEE456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor . Cross-listed with: MATH456, CMSC456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

ENEE457 Computer Systems Security (3 Credits)
Theoretical and practical aspects of computer systems security. Topics covered include symmetric/asymmetric encryption, message authentication, digital signatures, access control, as well as network security, web security and cloud security. Students acquire tools necessary for designing secure computer systems and programs and for defending against malicious threats (e.g., viruses, worms, denial of service).
Prerequisite: Minimum grade of C- in ENEE350; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: CMSC414, ENEE459C or ENEE457.
Formerly: ENEE459C.

ENEE459 Topics in Computer Engineering (1-3 Credits)
Selected topics of current importance in computer engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE460 Control Systems (3 Credits)
Mathematical models for control system components. Transform and time domain methods for linear control systems. Introductory stability theory. Root locus, bode diagrams and Nyquist plots. Design specifications in the time and frequency domains. Compensation design in the time and frequency domain. Introduction to sampled data systems.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.

ENEE461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control and familiarize them with the characteristics and limitations of real control devices. They will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in ENEE322; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE461, ENME461, or ENME489N.

ENEE463 Digital Control Systems (3 Credits)
Introduction to techniques for the analysis and design of linear control systems and implementation of control systems using digital technology. Topics include linearization, solution of linear equations, z-transforms and Laplace transforms, design of linear controllers, optimal control, and digital implementation of control designs. Students will use MATLAB for the solution of problems and the design of control systems.
Prerequisite: ENEE322; and completion of lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Formerly: ENEE469E.

ENEE467 Robotics Project Laboratory (3 Credits)
Teaches practical skills to build, control, and deploy robotic systems. Interdisciplinary groups of students develop real-world robotic systems, with emphasis on making a real robot do what one wants it to do.
Prerequisite: ENAE450 or (ENEE322 and a course which covers academic content similar to that of ENAE450 with approval from the Department of Electrical and Computer Engineering).
Restriction: Must be in the Robotics and Autonomous Systems minor; or permission of Department of Electrical and Computer Engineering.

ENEE469 Topics in Controls (1-3 Credits)
Selected topics of current importance in controls.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Repeatable to: 99 credits if content differs.

ENEE473 Electrical Machines Laboratory (2 Credits)
Experiments involving single and three phase transformers, induction machines, synchronous machines and D.C. machines.
Prerequisite: Minimum grade of C- in ENEE205; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Recommended: ENEE322.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE474 Power Systems (3 Credits)
Interconnected power systems, transmission lines, load flow studies, unit commitment and economic dispatch. Three phase networks, machine models. Symmetrical components, fault analysis and unbalanced operation. Power system transients, stability and numerical methods in power system analysis.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE475 Power Electronics (3 Credits)
This course is suitable for undergraduate and graduate students who want to learn the basic principles of power electronics and its applications. Special emphasis is placed on the interdisciplinary nature of power electronics. Strong and intimate connections between power electronics and circuit theory, electronic circuits, semiconductor devices, electric power, magnetic, motor drives and control are stressed.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE476 Renewable Energy (3 Credits)
Solar Energy Conversion Systems: History of Photovoltaic (PV) Systems, PV Cell, Module and Array Models and Equivalent Circuits, Characteristic Resistance, Fill Factor, Effects of Parasitic Resistances, Mismatch Effects, Shading, Bypass Diodes, Sun Tracking Systems, Maximum Power Point Tracking (MPPT) Techniques, Isolated and Non-isolated Switch-mode DC/DC for PV Systems, Inverter Design and Control, Sizing the PV Panel and Battery Pack in PV Applications. Wind Energy Conversion Systems: Introduction to Wind Energy Harvesting, Horizontal and Vertical Wind Systems, Fundamentals of Wind Energy Harvesting Systems, Variable Speed and Fixed Speed Wind Energy Conversion Systems (WECS), Wind Turbines and Different Electrical Machines in Wind Applications, Induction Machine and Dynamic Model of Induction Machines, Synchronous Generators and Dynamic Model of SG, Control of Wind Energy Conversion Systems.
Prerequisite: Minimum grade of C- in ENEE303; and completion of all lower-divisions ENEE courses with a C- or better.
Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE419R or ENEE476.
Formerly: ENEE419R.

ENEE486 Optoelectronics Lab (2 Credits)
Hands-on experience in performing measurements in optics and electro-optics. Basics of optics, light detectors, Fourier optics, gratings and spectrometers, pulsed dye lasers, fiber optics, electro-optics, and acousto-optics.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in PHYS271 and PHYS270; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE488 Independent Study in Electrical and Computer Engineering (1-3 Credits)
The purpose is to provide students with an opportunity for independent study projects on advanced electrical and computer engineering topics. These projects typically involve academic investigations of technical themes that are not addressed in the established elective and special topics courses taught by the department on a regular basis. Study plans are tailored to students educational goals but are approved and supervised by faculty.
Prerequisite: Must have completed and earned a minimum grade of regular (letter) C- in all lower-division EE or CP tech electives; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 9 credits if content differs.
Additional Information: A total of 5 credits combined of ENEE488 and ENEE499 can count towards a degree in electrical and computer engineering.

ENEE489 Topics in Electrophysics (1-3 Credits)
Selected topics of current importance in electrophysics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE490 Physical Principles of Wireless Communications (3 Credits)
Prerequisite: ENEE381.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE490 or ENEE498B.
Formerly: ENEE498B.

ENEE496 Lasers and Electro-optic Devices (3 Credits)
Modern physical optics: Gaussian beams, optical resonators, optical waveguides; theory of laser oscillation, rate equations; common laser systems. Selected modern optoelectronic devices like detectors and modulators. Role of lasers and optoelectronics in modern technology.
Prerequisite: ENEE381; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE498 Topics in Electrical Engineering (1-3 Credits)
Selected topics of current importance in electrical engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 99 credits if content differs.
Formerly: ENEE488.

ENEE499 Senior Projects in Electrical and Computer Engineering (1-5 Credits)
The purpose is to provide students with an opportunity to engage in independent research projects on advanced electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 499 project, the focus is to conduct an independent investigation of a technical theme by the student. The project may be used to satisfy the advanced lab requirement if it is approved as a primarily experimental research project. In that case, the student will enroll in ENEE499L.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 9 credits if content differs.
Formerly: ENEE418.
Additional Information: A total of 5 credits combined of ENEE448 and ENEE499 can count toward a degree in electrical or computer engineering.

ENES - Engineering Science

ENES100 Introduction to Engineering Design (3 Credits)
Students work as teams to design and build a product using computer software for word-processing, spreadsheet, CAD, and communication skills.
Corequisite: MATH140.

ENES102 Mechanics I (3 Credits)
The equilibrium of stationary bodies under the influence of various kinds of forces. Forces, moments, couples, equilibrium, trusses, frames and machines, centroids, moment of inertia, beams, friction, stress/strain, material properties. Vector and scalar methods are used to solve problems.
Corequisite: MATH140.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Formerly: ENES110.

ENES106 Achieving Success in Mathematics (3 Credits)
An exploration of the skills and habits needed to successfully complete introductory mathematics courses.
Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES107 Achieving College Excellence (1-3 Credits)
An exploration of the skills and habits needed to successfully complete the introductory chemistry course for engineering students. Course will also include strategies for a successful first year experience.
Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES108 Achieving College Success: First Year Transition (1 Credit)
An exploration of the skills and habits needed to successfully complete the first year of study for Science, Technology, Engineering, and Mathematics (STEM) majors. This course is an extension of the college success seminars taught during the Summer Bridge Program.
Restriction: Permission of ENGR-A. James Clark School of Engineering.
Repeatable to: 2 credits if content differs.

ENES113 Virtus Living and Learning Community Seminar I (1 Credit)
The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to basic tools, undergraduate research opportunities, and campus and engineering resources.
Restriction: Must be in first year Virtus program.

ENES114 Virtus Seminar II (1 Credit)
Focus on personal and professional development with engineering with a strong emphasis on career development. Learn to employ strategies and skills for academic and professional success.
Prerequisite: ENES113.
Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES115 FLEXUS Living and Learning Community Seminar I (1 Credit)
The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to campus and engineering resources, basic tools, and undergraduate research opportunities. Students will discuss issues of concern through a variety of book readings, self-reflections, and panel discussions with practicing women engineers.
Restriction: Must be a first year FLEXUS Participant.

ENES116 FLEXUS Living and Learning Community Seminar II (1 Credit)
The seminar focuses on personal and professional development by enhancing technical ability, understanding educational options through minors and student projects in engineering, identifying and employing strategies and skills for academic and professional success, and developing career commitment through networking and mentoring. Students develop professional portfolios in preparation for a future internship or job.
Prerequisite: ENES115.

ENES140 Discovering New Ventures (3 Credits)
Students explore dynamic company startup topics by working in teams to design a new venture. This multi-disciplinary course helps students to learn the basic business, strategy, and leadership skills needed to launch new ventures. Topics include learning how to assess the feasibility of a startup venture, as well as how to apply best practices for planning, launching, and managing new companies. Students discuss a wide range of issues of importance and concern to entrepreneurs and learn to recognize opportunities, assess the skills and talents of successful entrepreneurs, and learn models that help them navigate uncertainty.
Additional Information: This course may count as an elective for a student at the University of Maryland, depending on the student's specific degree program. It cannot be counted towards the requirements for the Smith School of Business Entrepreneurship Fellow Program.

ENES150 Transfer LEAD Seminar I (2 Credits)
This seminar focuses on personal and professional development for transfer students in the A. James Clark School of Engineering. Transfer LEAD is a program for Engineering transfer students with four main outcomes: Learn, Educate, Adapt, Direct. Topics covered in this course include campus resources, student identity development, leadership development, and student outreach. Students will learn educational theory in order to develop a sense of leadership as students in the Clark School of Engineering.
Restriction: Eligible external transfer students in the A. James Clark School of Engineering; and permission of instructor.

ENES152 Transfer LEAD Seminar II (1 Credit)
This is a continuation of ENES150: Transfer LEAD Seminar I. Transfer LEAD is a program for Engineering transfer students with four main outcomes: Learn, Educate, Adapt, Direct. In this course, students will apply the concepts they learned in ENES150 in a practical setting. Students will focus on engagement, communication, and peer education.
Prerequisite: ENES150.
Restriction: Must be an eligible external transfer student in the A. James Clark School of Engineering; and permission of instructor.

ENES181 Engineering & The Grand Challenges (1 Credit)
Introduction to the various fields of engineering and the necessary context for students to fully engage in selected National Academy of Engineering's Grand Challenges such as economical solar energy, carbon sequestration, access to clean water, engineering better medicines, restoring urban infrastructure and personalized learning. The lectures and activities will provide an introduction to the engineering disciplines, NAE Grand Challenges, STEM cultures, and research.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must be a new freshman or transfer student.

ENES190 Introduction to Design and Quality (4 Credits)
QUEST students learn and apply design practices to design new products and services. Working in multidisciplinary teams, students use quality and process improvement methods to identify, analyze, and recommend solutions to real-world problems.
Restriction: Must be in the Quest program. Cross-listed with: BMGT190.
Credit Only Granted for: BMGT190 or ENES190.

ENES192 Engineering For Us All (3 Credits)
Students are challenged to uncover hidden valuable connections among a variety of disciplines, while creatively seeking and solving problems as a team. Students learn and practice skills for how groups function and identify innovation while addressing the tensions between our inherent drives to seek and solve, to share, and to sell.
Prerequisite: MATH107.
Additional Information: Recommended for non-engineering majors.

ENES197 The Fault in Our Data: What Counts and Who's Counting (3 Credits)
Quantitative data and analysis are key to understanding the shape of the world. In this course, we will use the tools of computational analysis to load, interrogate, visualize, and model datasets from dozens of data points to hundreds of thousands. We'll look at how computational methods can tell us when a movie is sexist, how wealth inequality can form, and how rumors spread like diseases. Then, you will find datasets of interest, write code to make sense of them, and share your findings with the world. No prior programming experience is required.
Prerequisite: MATH113 or equivalent.
Recommended: MATH115.

ENES200 Technology and Consequences: Engineering, Ethics and Humanity (3 Credits)
What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.
Credit Only Granted for: ENEE200 or ENES200.

ENES206 Introducing Safety into the Design Process (3 Credits)
The development of any object or infrastructure (from a chair to a bridge) requires a design process. The design process takes all the variables of functionality, aesthetics, cost, etc. and determines an optimized solution. Some of the variables are quantitative but some are subjective. Depending on the object or infrastructure, some variables will take more importance than others will. The design of an ornament or jewelry will require an emphasis on aesthetics. The design of a vehicle or a bridge will emphasize its functionality or strength. Independent of the optimization process followed the use of all objects or infrastructure has to be safe. Safety is a social responsibility that needs to be guaranteed. This course will address how safety is introduced into the design process, how technology advancements and complexity challenge safety and how the social responsibility of safety is embedded in regulatory frameworks and in professional practice.
Restriction: Sophomore standing or lower.

ENES210 Entrepreneurial Opportunity Analysis and Decision-Making in 21st Century Technology Ventures (3 Credits)
This multi-disciplinary course helps students learn the principles of entrepreneurial opportunity analysis and decision-making in an increasingly dynamic and technically-inclined society. Emphasis is placed on how aspiring technology entrepreneurs can develop their entrepreneurial perspectives to develop winning entrepreneurial plans for their future ventures.
Credit Only Granted for: ENES210 or ENES461.

ENES211 Introduction to Global Entrepreneurship (1 Credit)
Examines the opportunities and challenges of entrepreneurship and innovation from an international perspective through lectures, case studies, instructors, and guest speakers with international experiences and other relevant activities. Focuses on the benefit for every entrepreneur and innovator to understand the cultural, strategic and operational aspects related to conducting entrepreneurial ventures in an international context.

ENES213 Virtus Living and Learning Community Seminar III (1 Credit)
The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking and mentoring and developing awareness of diversity issues.
Prerequisite: ENES113.
Restriction: Must be a participant in the second year of the Virtus program.

ENES214 Virtus Seminar IV (1 Credit)
Students continue to develop their leadership and mentoring skills, participate in networking opportunities and explore their interest in special engineering topics.
Prerequisite: Students must have completed ENES213.
Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES215 FLEXUS Living and Learning Community Seminar III (1 Credit)
The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing self-confidence and self-efficacy in academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking, mentoring and role modeling, and developing awareness of diversity issues, specifically gender diversity.
Prerequisite: ENES115 and ENES116.
Restriction: Must be a second year FLEXUS participant.

ENES216 FLEXUS Living and Learning Community Seminar IV (1 Credit)
The seminar focuses on gender diversity and its cross-sections with culture. Students continue to enhance their leadership and mentoring skills, participate in networking opportunities with women in leadership roles and careers in engineering, and engage in opportunities for outreach and service-learning. Students will also complete a culminating semester project.
Prerequisite: ENES115, ENES116, and ENES215.
Restriction: Restricted to second year FLEXUS participants.

ENES220 Mechanics II (3 Credits)
Stress and deformation of solids-rods, beams, shafts, columns, tanks, and other structural, machine and vehicle members. Topics include stress transformation using Mohr's circle; shear and moment diagrams; derivation of elastic curves; and Euler's buckling formula. Design problems related to this material are given in lab.
Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must not be in Engineering: Electrical program.

ENES221 Dynamics (3 Credits)
Systems of heavy particles and rigid bodies at rest and in motion. Force-acceleration, work-energy and impulse-momentum relationships. Motion of one body relative to another in a plane and in space.
Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENES232 Thermodynamics (3 Credits)
Introduction to thermodynamics. Thermodynamic properties of matter. First and second laws of thermodynamics, cycles, reactions, and mixtures.
Prerequisite: PHYS261 and PHYS260.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Credit Only Granted for: BIOE232, CHBE301, ENCH300, ENES232, ENME320, or ENME232.
Formerly: ENME232 and ENME320.

ENES240 Ethical, Policy and Social Implications of Science and Technology (3 Credits)
Asks students to think about how society should manage complexity, transformation, and uncertainty with an eye on developing a broader sense of ethics and social responsibility. Introduces analytical frameworks, concepts, and data collection techniques that interdisciplinary scholars use to map relationships among science, technology and society and generate important questions about the future of society.
Restriction: Must be in the Science, Technology, Ethics and Policy minor. Cross-listed with: PLCY240.
Credit Only Granted for: ENES240 or PLCY240.

ENES259 Study Abroad Special Topics in Engineering II (1-6 Credits)
Special topics course in engineering science taken as part of an approved study abroad program.
Repeatable to: 6 credits if content differs.

ENES269 Topics in Grand Challenges for Engineering in a Global Context (3 Credits)
Special topics course that explores the grand engineering challenges facing the world from a technical, cultural, political, and economic perspective, as well as solutions developed through innovation and technology. Topics can include energy, environment, urban infrastructure, health, safety and security, and engineering the tools of discovery.
Repeatable to: 6 credits if content differs.
Additional Information: Course includes a study abroad component. No engineering background is required.

ENES288 Engineering Leadership Seminar (1-4 Credits)
Engineering leadership will be examined at the individual, team and organizational levels.
Corequisite: ENES100; or permission of instructor.

ENES304 RISE Seminar (1 Credit)
This is the first semester of a two semester sequence taken by RISE students in their first semester in the program. T he purpose of ENES 304 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.
Restriction: Must be in the Engineering RISE Leadership Program; and permission of ENGR-A. James Clark School of Engineering.

ENES305 RISE Leadership Seminar (1 Credit)
This is the second semester of a two semester sequence taken by RISE students in their final semester in the program. The purpose of ENES 305 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and ENES304.

ENES316 Global Leadership in Engineering, Business, & Technology (3 Credits)
An introduction to global leadership research, theories, and practice with an emphasis on applied dimensions of global leadership in the engineering, business, and technology sectors. This course prepares students to further their knowledge and capacities for global leadership to be successful in industry.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or permission of instructor.
Additional Information: Students will be required to participate in off-campus industry visits outside of the formal class meeting time.

ENES317 Introduction to Leadership in Engineering, Science, and Technology (3 Credits)
Develop a comprehensive overview and introduction to leadership and organizational development. Students will reflect on their own leadership experiences, develop a strong foundational knowledge of leadership theory, and advance their capacities in effectively leading teams. Students will connect leadership theory to practice by engaging in case study analysis and critique leadership practices enacted within engineering and technology settings. Students will complete self-assessments to better understand their own leadership strengths and refine their approaches to leadership by incorporating theories covered in this course.
Restriction: Must be in the Minor in Global Engineering Leadership(#EN09).
Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)
Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on identity-based topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.
Prerequisite: Completion of on-line registration form.
Repeatable to: 6 credits if content differs. Cross-listed with: CHSE338.
Formerly: EDHI338.
Additional Information: Students can repeat the course so long as they register for a course with a different letter suffix.

ENES340 Engineering and Social Justice (3 Credits)
Students will explore the relationships between engineering and social justice through personal reflection and historical and contemporary case studies. Students will explore their own social locations, privileges, alliances, and resistances to social justice through critical engagement of interdisciplinary readings that challenge engineering mindsets and ideologies. Students will work to understand what constitutes social justice in different areas of social life and the role that engineers, and engineering might play. Students will gain an understanding of why and how engineering has been aligned and divergent from social justice issues and causes.
Prerequisite: ENEE200.

ENES388 Engineering Honors Seminar (1 Credit)

ENES389 Selected Topics (3 Credits)
Repeatable to: 6 credits if content differs.

ENES390 Designing Innovative Systems (3 Credits)
QUEST students develop an understanding of complex systems that incorporate elements of business and technical design and analyze how these systems evolve over time and may be shaped by technology disruptions, internal decisions, and external forces. Students apply these concepts to real-world complex systems in a team environment.
Prerequisite: ENES190 or BMGT190.
Restriction: Must be in the QUEST program. Cross-listed with: BMGT390.
Credit Only Granted for: BMGT390 or ENES390.

ENES397 Mentoring Multidisciplinary Teams (3 Credits)
QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: BMGT397.
Credit Only Granted for: BMGT397 or ENES397.

ENES424 Engineering Leadership Capstone: Inclusive Leadership in Addressing Organizational & Societal Challenges (3 Credits)
The Minor in Global Engineering Leadership is designed to bring together one's understanding of leadership, organizations, culture, and global studies and apply this synthesized learning to a capstone project. The project will provide real-world application of global leadership principles to address an organizational or societal need. Students will utilize an inclusive leadership and global mindset to propose a big idea which brings about a positive organizational or societal change.
Prerequisite: ENES472 and ENES317.
Restriction: Must be in the Global Engineering Leadership minor (#EN09).

ENES428 Engineering Research for Exchange Students (3-12 Credits)
Directed research within the Clark School of Engineering for international exchange students.
Restriction: Available only to visiting exchange students taking part in an Engineering exchange program.
Repeatable to: 24 credits.

ENES440 Science, Technology and Society: Certificate Program Capstone (3 Credits)
Capstone research seminar for students in the Science, Technology and Society certificate program.
Restriction: Must be in the Science, Technology and Society certificate program; or permission of ENGR-A. James Clark School of Engineering.
Credit Only Granted for: ENES440 or UNIV401.
Formerly: UNIV401.

ENES458 Topics in International Engineering (1-4 Credits)
A variety of topics related to engineering in a global context are discussed including cultural aspects, cross-cultural communication, international standards and law, and engineering and technology issues, business behavior, attitudes and values of selected countries and regions.
Prerequisite: ENES100.
Repeatable to: 12 credits if content differs.

ENES459 Study Abroad Special Topics in Engineering IV (1-6 Credits)
Special topics course in engineering science taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENES460 Fundamentals of Technology Start-Up Ventures (3 Credits)
Fundamental aspects of creating, organizing, funding, managing, and growing a technology startup venture. This multidisciplinary course will draw on management, business, legal, financial, as well as technical, concepts. Students form teams and develop a business plan for a technology company, based on each team's own business idea and then present the plan to a panel of outside experts.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES460, BMGT461, SMLP470 or HLMN470.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES461 Advanced Entrepreneurial Opportunity Analysis in Technology Ventures (3 Credits)
Explores the factors that influence entrepreneurial opportunity analysis in technology-based ventures. Uses a cognitive theoretical framework to examine the integration of motivation, emotions and information processing modes to make complex entrepreneurial decisions in technology venture environments.
Credit Only Granted for: ENES210 or ENES461.

ENES462 Marketing High-Technology Products and Innovations (3 Credits)
Examines the opportunities and challenges of marketing high-technology products in turbulent environments requiring rapid decision making with incomplete information. Explores how innovations are introduced at frequent intervals, research-and-development spending is vital, and there are high mortality rates for both products and businesses.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES463 Strategies for Managing Innovation (3 Credits)
Emphasizes how the technology entrepreneur can use strategic management of innovation and technology to enhance firm performance. Examines the process of technological change, the ways that firms come up with innovations, the strategies that firms use to benefit from innovation, and the process of formulating technology strategy. Provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES463, BMGT467, SMLP473 or HLMN472.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES464 International Entrepreneurship and Innovation (3 Credits)
Focuses on the need for every entrepreneur and innovator to understand the global market in today's hypercompetitive world, and to appreciate how to compete effectively in domestic markets by managing international competitors, suppliers, and influences. Explore how the distinction between foreign and domestic markets is becoming less pronounced. Develop skills to identify and manage opportunities on a global basis.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES466 Leading and Financing the Technology Venture (3 Credits)
Focuses on the challenges of leading and financing new technology ventures. Leadership topics include team selection and formation, aligning rewards with relative contributions of team members, and how early decisions can enable or prevent founders from achieving results that align with their individual motivations for becoming an entrepreneur. Essential tools and methods for building a strong financial foundation for a new technology venture are examined. Includes important accounting principles as well as methods for keeping financial control of the technology venture. Insights are shared on navigating the multitude of financial barriers that may block your entrepreneurial success, as well as how to grow the technology venture from concept through launch.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES466, BMGT365, SMLP471 or HLMN471.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with: ENME467.
Credit Only Granted for: ENES467 or ENME467.

ENES471 Legal Aspects of Entrepreneurship (3 Credits)
Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES472 Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology (3 Credits)
Develop global leadership capacities and an understanding of the cultural aspects pertaining to industry and international business. In a globalized world, the ability to work, lead and communicate in culturally diverse settings has become a core component to leadership. Through real-world examples, research, and simulations, students will increase their self-awareness and understanding of culture and how culture influences attitudes, behaviors, and practices at the individual, organizational, or societal levels. Students will develop the skills necessary to navigate, negotiate, and lead cross-cultural engagements and teams. The course content is relevant and applicable to anyone interested in developing cross-cultural leadership competencies and cultivating a global mindset.
Restriction: Sophomore standing or higher; must be a minor in Global Engineering Leadership (#EN09), Global Poverty (#AG06), Global Terrorism Studies (#BS07), or International Development and Conflict Management (#BS02).
Credit Only Granted for: ENES472, SLLC471, or SLLC473.
Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES474 Global Perspectives of Engineering (3 Credits)
Faculty supervised research on aspects of engineering in a foreign country including leading fields of research, key world markets, and the culture of the engineering workplace. Students will produce a comprehensive report exhibiting their expertise in their chosen country and the field of engineering within.
Prerequisite: ENES100; or permission of ENGR-A. James Clark School of Engineering.
Restriction: Must be in the International Engineering Minor.
Credit Only Granted for: ENES458M or ENES474.
Formerly: ENES458M.

ENES478 Topics in Engineering Education (1 Credit)
Topics related to teaching engineering courses, particularly project-based courses. Topics can include learning styles, student development theory, multicultural issues in teaching, facilitating team experiences, assessment, and academic integrity.
Restriction: Must be in the Engineering Teaching Fellow program.
Repeatable to: 3 credits if content differs.

ENES480 Engineering Honors Seminar I (1 Credit)
Introduction to engineering leadership, professionalism, and ethics. Discussions of leadership style, elements of success, professional communication, codes of ethics, handling of ethical dilemmas, and the characteristics of a professional.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES481 Engineering Honors Seminar II (1 Credit)
Introduction to engineering creativity and innovation in engineering. Application of methods of creativity to topics in communication, conducting research, and leadership.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES489 Special Topics in Engineering (3-6 Credits)
Special topics in engineering.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENES490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: BMGT490.
Credit Only Granted for: BMGT490 or ENES490.

ENES491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: BMGT491.
Credit Only Granted for: BMGT491 or ENES491.

ENES498 Special Topics in Entrepreneurship (3 Credits)
This entrepreneurship seminar and case study-based course will explore technology entrepreneurship with a focus on leadership, marketing, team-building, and management of new technology ventures and assumes baseline knowledge of entrepreneurship. Students will learn skills needed to succeed as a technology entrepreneur and how to apply best practices for planning, launching, and growing new companies. This course is a requirement of the Hinman CEOs program.
Restriction: Must be in Hinman CEOs Program.
Repeatable to: 12 credits if content differs.

ENES499 Senior Projects in Engineering (3 Credits)
Students will work in large teams to solve a multidisciplinary research/design problem. The course will begin with students identifying opportunities, brainstorming project concepts to address these opportunities, applying lean startup and design thinking strategies, and then selecting/proposing a project for the semester. Acceptable projects will require the multidisciplinary design, construction and testing of a project within limited budget and time constraints.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and completion of all 1XX and 2xx level (lower-division) technical courses in engineering major with a C- or better.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENFP - Engineering, Fire Protection

ENFP101 Introduction to Fire Protection Engineering (1 Credit)
This course will introduce students to the impact of fire on people, property and the environment and methods to mitigate the threat of fire. Student teams will apply the principles of fire behavior and fire safety systems covered in the first half of the course to design, build and test a fire safe, small-scale apartment. A final experiment will be conducted to provide an assessment of the complete designs of each team.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP108 or ENFP101.
Formerly: ENFP108.

ENFP102 Fire Safe Building Designs (3 Credits)
Students are introduced to Fire Protection Engineering (FPE). Discussions on contemporary fire safety topics are designed to raise your interest and understanding of fire, its impact on people, property and the environment and methods to mitigate the threat of fire. Students will have hands-on experiences through a set of demonstrations and a final experiment to explore fire behavior and the performance of fire safety systems. The final experiment will apply the principles of fire behavior and fire safety systems to build and test a fire safe, small-scale residence.

ENFP201 Numerical Methods with MatLab (3 Credits)
A broad range of numerical methods are illustrated and applications related to engineering problems are implemented using Mat Lab thus providing a working knowledge of this computational tool. The topics covered in the course include: finding roots of equations with bracketing and open methods; solving linear systems of equations with matrices, Gauss elimination, LU decomposition, and iterative methods; linear regression, polynomial interpolation; numerical integration and numerical differentiation; ordinary and partial differential equations. Additional topics such as optimization, eigenvalues, Fourier analysis, splines, and Romberg integration may be included as time allows.
Prerequisite: MATH141.
Restriction: Must be in Engineering: Fire Protection program.

ENFP250 Introduction to Life Safety Analysis (3 Credits)
Introduction to fire protection engineering and building regulation focusing on building safety systems, egress system design and evacuation modeling.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP250 or ENFP251.
Formerly: ENFP251.

ENFP300 Fire Protection Fluid Mechanics (3 Credits)
Presents students with the fundamental properties of fluids and fluid movement. Both static and dynamic fluid problems will be considered with an emphasis on fire protection systems.
Prerequisite: MATH246 and ENFP201; and must have completed or be concurrently enrolled in PHYS260, PHYS261, and ENES232.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENFP310 Water Based Fire Protection Systems Design (3 Credits)
Introduction to aqueous fire suppression. Discussion of key fluid dynamics and heat transfer processes in aqueous fire suppression. System design and performance analysis based on national standards, hydraulic theory and elementary fluid dynamics and heat transfer.
Prerequisite: ENFP300.
Corequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP312 Heat and Mass Transfer (3 Credits)
Fundamentals of heat and mass transfer. Conduction, convection, and radiation modes of heat transfer. Diffusion concepts and evaporation phenomena. Problem solving techniques with application to fire problems.
Prerequisite: ENES232 and ENFP300.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP312 or ENME332.

ENFP350 Professional Development Seminar (1 Credit)
An integrative, upper level professional development seminar covering topics such as engineering ethics, professional licensing, codes and standards, intellectual property, career selection and various contemporary issues in fire protection engineering.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Junior standing or higher.

ENFP405 Structural Fire Protection (3 Credits)
Effects of elevated temperature on structural materials; steel, concrete, wood, gypsum, glass and reinforced plastics. Experimental evaluation of fire resistance of building assemblies. Analytical methods to evaluate fire resistance of structural members.
Prerequisite: ENES220.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP405 or ENFP621.

ENFP410 Special Hazard Suppression Systems (3 Credits)
Analysis of application and theory of fire suppression systems. The key elements of fire suppression systems will be discussed along with how they interact for effective fire suppression design. Physical mechanisms for a variety of fire suppression approaches will be discussed including hose streams, sprinklers, water mist, foam, clean agents, and chemical agents.
Prerequisite: ENFP310 and ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP410 or ENFP653.

ENFP411 Risk-Informed Performance Based Design (3 Credits)
Appraisal and measurement of fire safety. Application of systems analysis, probability theory, engineering economy and risk management in the identification and synthesis of components of fire protection engineering. Methods for the development of criteria for the design, evaluation and assessment of fire safety or component hazards.
Restriction: Senior standing; or permission of ENGR-Fire Protection Engineering department.

ENFP413 Human Response to Fire (3 Credits)
Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety calculations. Physiology and toxicology of the fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.
Prerequisite: ENFP250.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP613.
Credit Only Granted for: ENFP413 or ENFP613.

ENFP415 Fire Dynamics (3 Credits)
Designed to give students a quantitative understanding of fire behavior. The fundamentals of physics and chemistry of combustion are presented and used to derive key analytical relationships that describe fire growth. Application of these relationships to the analysis of common fire scenarios is emphasized.
Prerequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP651.
Credit Only Granted for: ENFP415 or ENFP651.

ENFP420 Fire Assessment Methods and Laboratory (4 Credits)
Experimental evaluation of ignition, flame spread, rate of heat release and smoke production of flammable gases, liquids, solids, and interior finish materials. Analytical and computer methods for the design, performance, and analysis of fire experiments. Preparation of laboratory reports.
Prerequisite: Student must have senior standing; and minimum grade of C- in ENFP312.
Restriction: Must be in Engineering: Fire Protection program.
Credit Only Granted for: ENFP320 or ENFP420.
Formerly: ENFP320.

ENFP425 Enclosure Fire Modeling (3 Credits)
An introduction to enclosure fire dynamics through the development of fire modeling algorithms and the application of computer-based fire modeling techniques. The objectives of the course are: to provide a basic understanding of enclosure fire dynamics with an emphasis on a system-level viewpoint (i.e., a global description of the coupling between combustion dynamics, smoke filling, vent flows and heat transfer); and to provide an introduction to the zone modeling approach. Topics covered include a review of the mathematical formulation of zone models, a discussion of numerical integration of the zone modeling equations (using MATLAB), and an introduction to zone modeling software used by professional engineers (e.g., CFAST).
Prerequisite: ENES232, ENFP300, and ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and senior standing; and permission of ENGR-Fire Protection Engineering department.

ENFP426 Computational Methods in Fire Protection (3 Credits)
Introduction to computer-based fire modeling: zone modeling and Computational Fluid Dynamics (CFD); documentation of input data, validation and verification tests.
Recommended: ENFP425.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP429 Independent Studies (1-3 Credits)
For students who have definite plans for individual study of approved problems, or study of an advanced topic selected in conjunction with the faculty.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Must be in Engineering: Fire Protection program.
Repeatable to: 6 credits if content differs.

ENFP440 Smoke Management and Fire Alarm Systems (3 Credits)
Analysis of hazard posed by smoke in buildings. Performance characteristics of smoke management systems. Review of analytical design aids. Functional analysis and design of fire detection and alerting systems. Examination and evaluation of code criteria, performance specifications and research.
Prerequisite: Must have completed with a C- or better or concurrently be enrolled in ENFP300.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with: ENFP627.
Credit Only Granted for: ENFP440 or ENFP627.

ENFP464 Industrial Fire Safety (3 Credits)
Designed to introduce students to the basics of process safety with a focus on the methods and techniques that may be utilized when evaluating the existing or proposed safety protection solutions in industrial facilities. An emphasis is placed on properly identifying the hazards that are present, the risk exposure, and how best to address the risk. The foundation is laid by presenting the necessary background information on industrial processes and integrating this information with applicable fire/explosion safety science.
Prerequisite: Students must be of senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department. Also offered as: ENFP664.
Credit Only Granted for: ENFP464, ENFP489I, ENFP629I OR ENFP664.
Formerly: ENFP489I.
Additional Information: The course will be taught as a dual senior-level undergraduate course and graduate course.

ENFP465 Fire and Explosion Investigations (3 Credits)
This course covers many aspects of fire and explosion investigation and reconstruction. Information on field techniques, applicable standards, and best practices are presented with an emphasis on how fire science and fire dynamics can be applied to forensic analysis. Experiments are performed and analyzed to demonstrate the concepts.
Prerequisite: Student should have senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489N, ENFP629N OR ENFP665.
Formerly: ENFP489N.
Additional Information: The course will be taught as a shared senior-level undergraduate course and graduate course.

ENFP467 Wildland Fires: Science and Applications (3 Credits)
Introduction to the global problem of wildland fires with an overview of the social, political and environmental issues posed as well as detailed coverage of the science, technology and applications used to predict, prevent and suppress wildland fires.
Prerequisite: ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489W, ENFP629W, or ENFP667.
Formerly: ENFP489W.

ENFP489 Special Topics (3 Credits)
Selected topics of current importance to fire protection.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Repeatable to: 6 credits.

ENGL - English

ENGL101 Academic Writing (3 Credits)
An introductory course in expository writing.
Additional Information: Students must complete this course with a minimum grade of C- in order to fulfill the General Education Fundamental Studies Academic Writing requirement.

ENGL120 Acting Human: Shakespeare and the Drama of Identity (3 Credits)
Shakespeare's ideas of dramatic realism studied through close examination of literary and dramatic techniques. How Shakespeare generates the fiction of a living, thinking person in the space of five acts, and how readers participate in the making of that fiction. Some attention to Shakespeare on film and what the playwright can teach us about different media.

ENGL121 The Power of Song: Renaissance Lyric and Its Afterlives (3 Credits)
Examines the power that song has over its audiences. Drawing on literary, performance, and sound studies, we will investigate how song takes hold of its listeners in uniquely moving ways. We will examine the special appeal of song in early modern England, including works by William Shakespeare, John Milton, and William Byrd. And we will compare the song culture of the English Renaissance to the power of song in contemporary life, from Kendrick Lamar to CocoRosie.

ENGL125 Why Poetry Matters (3 Credits)
Introduction to the formal fundamentals of poetry and exploration of the role poetry plays in how we think about the human condition; what constitutes knowledge and wisdom, interior subjectivity and communal identity; and how this knowledge is to be used in confronting new challenges and the perennial questions: how to live with oneself, and as oneself; in time, and with others; here, where we reside; and elsewhere, where we imagine ourselves going.

ENGL126 Why Fiction Matters (3 Credits)
Consider how short stories, novellas, and novels are vital to understanding our world and ourselves. Read and analyze a diverse range of twentieth- and twenty-first-century fiction, and apply the techniques of form and craft to your own experiments in fiction writing. Use critical analysis and hands-on creative experimentation to explore how fiction helps us understand the past, engage in the present, and build a better future.

ENGL130 Race and the Cultural Politics of Blood: A Historical Perspective (3 Credits)
Exploration of race, as term and concept, at three different historical times and from three different perspectives, through the reading of three stories: William Shakespeare's drama Othello, Aphra Behn's novella Oroonoko, and the short story Benito Cereno by Herman Melville. Exploration of the importance of context in interpretation. Study of how a concept for rationalizing human difference appears and adapts, fuses and fades away, relocates and is repurposed. How understanding of the particular situation of the concept, its context, changes our reading of the story.

ENGL132 Aliens, Exiles, and Immigrants (3 Credits)
Exploration of ideas, beliefs, and aspirations that immigrants carry from one nation to another. Different ways of understanding national and cultural identities, and ways the experiences of immigration have changed significantly over time. Readings examine historical and contemporary immigrant writing, including post-9/11 poetry and fiction; memoirs of nineteenth-century British emigrants to South Africa, Australia, and Canada; literature by emigrants from Asia, the Middle East, and Latin America now living in the United States; and writing by individuals displaced by war, famine, and political conflict. Politics of immigration and citizenship; historical and contemporary arguments for and against immigration and assimilation.

ENGL134 The Rites of Discovery: Science, Law, and Literature, 1492-1992 (3 Credits)
History of idea of "discovery" from sixteenth-century debate about European "rights of discovery" to 500th anniversary, in 1992, of Columbus' landfall in New World. Evolution of modern concept of discovery, both as part of history of science and in legal context of history of European colonialism and cultural encounter with Native peoples of Americas, Africa, and Asia. Exploration of primary and secondary sources relating to international law, science, and literature.

ENGL140 American Fictions: U.S. Literature, History, Politics, and Constitutional Law (3 Credits)
Works of American literature explored in the context of major texts and developments of U.S. history, culture, politics, and constitutional law. We begin with the Declaration of Independence and the U.S. Constitution, and survey the course of American literature and history, from 1776 to the present, in relation to defining political and constitutional issues. Readings of canonical works like "Huckleberry Finn" and "The Grapes of Wrath" coupled with special attention to minority authors and issues, and horizons of constitutional contemplation opened up by minority, immigrant, and women's voices and experiences. Key historical and political issues include human rights; equal protection; religious tolerance; democratic principles; republican structures of government; independence; revolution; slavery; removal; immigration; free speech; labor rights; civil rights; feminism; environmentalism; international law and flows of people; economic globalization; technology and digital innovation; and the role that literature and the humanities play in fostering various forms of civil society, multiculturalism, and a globally accountable citizenship.

ENGL142 Literary Maryland (3 Credits)
What does the literature of Maryland teach us about our state's past, present, and future? "Literary Maryland" explores this question by taking students on a tour of our state's prose, poetry, and drama from colonization to the present. In addition to reading fascinating writing and visiting interesting places, you'll learn how the Chesapeake was formed; why nobody sings the entire national anthem; and what led Baltimore to name its football team after a poem written by a Virginian.
Credit Only Granted for: ENGL142 or ENGL289M.
Formerly: ENGL289M.

ENGL143 Visualizing Knowledge: From Data to Images (3 Credits)
Explores how technology and people shape our current age of information through the various forms of visually representing information. Visualizations do not show us things that are evident--visualizations make things evident. We will thus examine the history of visualization practices, the theories of image-making that guide their production, and the current state of the art. Students will engage critically with a wide range of information visualization practices to gain an understanding of the work involved in producing them and their histories. Students will also seek out contemporary visualizations, interact with the practitioners who produce them, and produce their own visualization as a response or critique.

ENGL146 Seeing the Present: Graphic Storytelling in the Age of Social Media (3 Credits)
We increasingly live in a world dominated by digital images: graphic narratives, data visualizations, tweets, GIFs, and computer animation. Students will learn how to critically analyze this digital visual rhetoric and how to become a skilled user of visual discourse. By examining a range of science fiction, graphic novels, photography, and films, we will develop a critical vocabulary for understanding the possibilities and perils of our digital image culture. We will apply this vocabulary to analyzing visual representations of contemporary political questions including: climate change, criminal justice, bio-technological transformations of the human, and the incorporation of algorithm-based platforms into everyday life.

ENGL152 What is Justice?: Literature and the Invention of Ethical Imagination (3 Credits)
Exploration of literature's unique ability to animate human passions underlying ethical dilemmas. How literary texts shape understanding of justice; how plays, novels, and films define, critique, challenge, and even alter society's comprehension of equity and inequity, crime and punishment, pardon and torture, and ideas about civil liberties and human rights. Attention to how writers have described just and unjust within their historical moment; crucial role of imagination in formation of ethical citizens across time.

ENGL154 Race, Children's Television, and the Legacies of Jim Henson (3 Credits)
How do children form ideas about race from television? We will approach this question by studying representations of race in children's television from the founding of the animation industry in the 1910s to educational programming epitomized by Sesame Street and the work of Jim Henson. We will also explore representations of race in the "Saturday Morning Cartoon Lineup" and in the subsequent proliferation of computer-generated images, gifs, and memes. Students will visit archives on campus pertaining to Jim Henson's work and reflect on what they find. Assignments will include a paper focused on critical analysis and self-reflection, and students will have the option of completing a multimedia project featuring video production, puppet making, or another creative means of producing a lesson for children.
Credit Only Granted for: ENGL154 or ENGL439J.
Formerly: ENGL439J.

ENGL181 English Grammar (1 Credit)
The basic structure of formal written English, including parts of speech, sentence patterns, standard punctuation, diction, and usage.
Restriction: Must not have completed JOUR181 or ENGL181.
Credit Only Granted for: ENGL181 or JOUR181.

ENGL201 Inventing Western Literature: Ancient and Medieval Traditions (3 Credits)
Wide range of texts, genres, and themes from ancient and medieval Western traditions. Study of cultural, historical, and artistic forces shaping traditions, and the influence and relevance of those traditions to life in twenty-first century.

ENGL202 Inventing Western Literature: Renaissance to Modern (3 Credits)
Wide range of texts from the Renaissance to the 21st century. Themes and literary techniques in the evolution of Western literature. Print publication, industrialization, questioning of religious, political, intellectual, and cultural authority.

ENGL211 English Literature: Beginnings to 1800 (3 Credits)
Surveys medieval and early modern literary works written in England. Readings may include Beowulf, Chaucer, Spenser, Mary Wroth, Milton; eighteenth-century satire, drama, novels.

ENGL212 English Literature: 1800 to the Present (3 Credits)
Surveys the major literary movements of the period, from Romantic to Victorian to Modern. Such authors as Wordsworth, Keats, Bronte, Tennyson, Browning, Yeats, Joyce, Woolf.

ENGL221 American Literature: Beginning to 1865 (3 Credits)
Surveys American writing from the founding of the colonies through the Civil War. Authors such as Taylor, Cooper, Poe, Dickinson.

ENGL222 American Literature: 1865 to Present (3 Credits)
Surveys American writing from the Civil War through the Cold War. Authors such as Clemens, Frost, Hurston, Bellow.

ENGL233 Introduction to Asian American Literature (3 Credits)
A survey of Asian American literature with an emphasis on recurrent themes and historical context.Cross-listed with: AAST233.
Credit Only Granted for: ENGL233 or AAST233.

ENGL234 African-American Literature and Culture (3 Credits)
An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.Cross-listed with: AASP298L.
Credit Only Granted for: ENGL234 or AASP298L.

ENGL235 U.S. Latinx Literature and Culture (3 Credits)
Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.Cross-listed with: AMST298Q.
Credit Only Granted for: ENGL235 or AMST298Q.

ENGL240 Introduction to Fiction, Poetry, and Drama (3 Credits)
Readings in the novel, short story, poetry and drama.

ENGL241 What the Novel Does (3 Credits)
An exploration of what the novel does that cannot be done by film, by television, by cell-phone screens, by any stream of images, or by textual excerpts pulled up for a quick read. The different ways of the novel, with particular focus on the process of thinking and the developed consciousness. The novel as a machine to think with and an irreplaceable model of complex human thought. Study of how thought is presented in radically different ways in novels that cross lines of class, gender, chronology, and nationality.

ENGL243 What is Poetry? (3 Credits)
An exploration of arguably the most complex, profound, and ubiquitous expression of human experience. Study through close reading of significant forms and conventions of Western poetic tradition. Poetry's roots in oral and folk traditions and connections to popular song forms.

ENGL244 The Play's the Thing (3 Credits)
Exploration of drama through a consideration of plot, narrative flow, analytical flow, staging, performance, manuscript and printing history, text and textual change over time, and interpretation. Plays will be approached as public attempts to understand what it means to be alive.

ENGL245 Film Form and Culture (3 Credits)
Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.Cross-listed with: CINE245.
Credit Only Granted for: ENGL245, CINE245 or FILM245.
Formerly: FILM245.

ENGL246 Introduction to the Short Story (3 Credits)
A survey of the genre, with a focus on significant elements, such as plot, character, description, style, and theme. Readings will be drawn from a range of cultures and communities.

ENGL250 Reading Women Writing (3 Credits)
Explores literary and cultural expressions by women and their receptions within a range of historical periods and genres. Topics such as what does a woman need in order to write, what role does gender play in the production, consumption, and interpretation of texts, and to what extent do women comprise a distinct literary subculture. Interpretation of texts will be guided by feminist and gender theory, ways of reading that have emerged as important to literary studies over the last four decades.Cross-listed with: WGSS255.
Credit Only Granted for: ENGL250, WMST255 or WGSS255.
Formerly: WMST255.

ENGL254 Introduction to Humanities, Health, and Medicine (3 Credits)
An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: ARHU230, HIST219N, WGSS230.
Credit Only Granted for: ARHU230 , ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

ENGL255 Literature of Science and Technology (3 Credits)
Examines science and technology through the lens of British and American literature, primarily between 1800 and the present. Readings from early natural and experimental philosophers of the Scientific Revolution and Enlightenment. How literary works represent the ethics of science and technology; beneficial developments of science, and also heavy toll of industrialization. Writers studied may include Francis Bacon, Mary Shelley, Charles Darwin, H.G. Wells, Albert Einstein, Aldous Huxley, Richard Feynman, Philip K. Dick, Octavia Butler, Michael Frayn, and Tom Stoppard.

ENGL256 Fantasy Literature (3 Credits)
How fantasy employs alternate forms of representation, such as the fantastical, estranging, or impossible, which other genres would not allow. Through novels, short stories, graphic novels, and film, traces fantasy's roots in mythology and folklore, then explores how modern texts build upon or challenge these origins. Examination of literary strategies texts use to represent the world through speculative modes. How to distinguish fantasy from, and relate it to, other genres such as science fiction, horror, fairly tales, and magical realism. Fantasy's investment in world-building, history, tradition, and categories of identity such as race, class, and gender. How fantasy, as a genre, form, and world-view, is well-suited to our contemporary reality.

ENGL257 Children's Literature (3 Credits)
Literature of the nineteenth through the twenty-first century concerned with, and written for, children and young adults. How such narratives speak to themes of changing social, religious, political, and personal identity. Through poetry, novels, graphic novels, and film, explores how children's tales encapsulate and reflect on human existence, while pushing boundaries of what constitutes "children's literature" and what exactly defines the "child." Considers questions of literary classification through investigation of political and religious issues, gender politics, animal rights, social justice, race, war, and what it means to "grow up."

ENGL262 Introduction to the Hebrew Bible/Old Testament (3 Credits)
Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.Cross-listed with: JWST262, HEBR298B.
Credit Only Granted for: JWST262, HEBR293B, or ENGL262.

ENGL265 LGBTQ+ Literatures and Media (3 Credits)
A study of literary and cultural expressions of queer and trans identities, positionalities, and analytics through an exploration of literature, art, and media. We will examine historical and political power relations by considering the intersections of sexuality and gender with race, class, nation, and disability. Topics include the social construction and regulation of sexuality and gender, performance and performativity, intersectionality, and the relationship between aesthetic forms and queer/trans subjectivity. Our interpretations will be informed by queer and trans theories.
Restriction: Must not have completed LGBT265. Cross-listed with: LGBT265.
Credit Only Granted for: ENGL265 or LGBT265.

ENGL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL269M Morocco: In the Footsteps of the Beat Generation (3 Credits)
Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the "orient" has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppressionCross-listed with: ARHU269A.
Credit Only Granted for: ARHU269A or ENGL269M.

ENGL271 Writing Poems and Stories: An Introductory Workshop (3 Credits)
Introduction to theory and practice of writing fiction and poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL272 Writing Fiction: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL273 Writing Poetry: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.
Restriction: Must not have completed ENGL271, ENGL274, ENGL294,or AASP274. Cross-listed with AASP274.
Credit Only Granted for: ENGL274 or AASP274.

ENGL275 Scriptwriting for Theater, Film, and Television (3 Credits)
Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.Cross-listed with: ARHU275.
Credit Only Granted for: ENGL275 or ARHU275.

ENGL278 Special Topics in Literature (3 Credits)
Repeatable to: 9 credits if content differs.

ENGL280 The English Language (3 Credits)
Introduction to the structure of English and its historical development, with a focus on techniques of linguistic analysis. Major topics include the sound systems of English and its patterns of word formation and sentence structure, and the ways these have changed over time and vary around the world.

ENGL281 Standard English Grammar, Usage, and Diction (3 Credits)
Study of the structures and patterns of English grammar. The focus is on the standard dialect and contemporary usage, but we will also explore variation over time and across dialects. Includes word formation, sentence elements and structures, and conventions of punctuation, as well as the social aspects of grammatical choices.

ENGL282 How Rhetoric Works: Persuasive Power and Strategies (3 Credits)
Examines how persuasion functions and influences our lives and perception, focusing on a variety of contexts: business, politics, media, law, and entertainment. Students learn persuasive and argumentative principles to understand what rhetoric is, how it works, and what it does, and to apply the knowledge to produce effective communication appropriate for their purpose, audience, and context. A wide range of persuasive media, genres, and forms will be studied to help students sharpen how they interpret and practice persuasion.

ENGL289 Special Topics in English (3 Credits)
Introduces students to notable themes and approaches in English studies. Topics vary by section and semester.
Repeatable to: 12 credits if content differs.

ENGL290 Introduction to Digital Studies (3 Credits)
Introductory course in digital studies. Surveys contemporary humanities work in digital technologies, including the web and social media and their historical antecedents. Explores design and making as analytical tools alongside reading and writing. Situates digital media within power and politics and develops critical awareness of how media shape society and ethics. Interdisciplinary approaches to creativity, analysis, and technology. While the course will include hands-on practice, no prior experience of programming, designing, or making required other than a willingness to experiment and play.

ENGL291 Writing, Revising, Persuading (3 Credits)
Intermediate-level, writing-intensive course for students who have successfully satisfied the Fundamental Studies Academic Writing requirement but wish to hone skills in analyzing and producing rhetorically attuned, well-styled prose. Deeper study of rhetorical theory and its application to a wide variety of arguments and situations. Additional writing practice, techniques of revision, study of effect of stylistic choices. Topics may include argumentation theory, visual rhetoric, stylistic theory, and writing theory.
Prerequisite: Must have satisfied Fundamental Studies Academic Writing requirement.

ENGL292 Writing for Change (3 Credits)
Service learning in collaboration with students at area high schools. Explores how writing can be a tool for social change. Participants serve as mentors, create a performance event concerning a pressing social issue, and compose reflections, literacy narratives, publicity materials, and a multimodal project. Focus on developing critical self-awareness.
Prerequisite: Permission of ARHU-English department.
Recommended: ENGL101.
Restriction: Requires application and references. Jointly offered with: ENGL388C.
Credit Only Granted for: ENGL292 or ENGL388C.

ENGL293 Writing in the Wireless World (3 Credits)
A hands-on exploration of writing at the intersection of technology and rhetoric. Students will learn to read, analyze, and compose the kinds of multimodal documents--documents combining text, image, and sound--that constitute communication in our digital world.
Recommended: ENGL101.

ENGL294 Persuasion and Cleverness in Social Media (3 Credits)
Exploration of various persuasive media encountered in daily life through the lens of rhetorical and critical theories. Principles of rhetoric and analysis of how persuasion functions across media. Invention of effective multimedia works appropriate to purpose, audience, and context. Concepts from cultural studies used to develop critical awareness about power and ideology and how they influence the way people produce and understand messages. By integration of technology, rhetoric, and cultural studies, students become more critically-rhetorically informed thinkers, authors, and audiences of arguments and culture in the digital age. Writing intensive course. No prior multimedia experience is expected.
Prerequisite: Must have satisfied Fundamental Studies Academic Writing requirement.

ENGL296 Reading and Writing Disability (3 Credits)
Locates and analyzes disability in various settings, modes, and texts. Investigates the material and cultural effects of the language, stories, and myths of disability. Explores the many definitions and frameworks of disability: as dynamic lived experiences, as a political identity, as a rich culture, as socially constructed barriers, and as an oppressed minority group. Examines how disability is portrayed, controlled, stereotyped, and celebrated across social, medical, political, cultural, and personal networks.

ENGL297 Introduction to Professional Writing (3 Credits)
Introduction to the rhetorical principles and professional practices of professional writing, particularly the research, writing, communication, analytical, and technological skills needed for the Professional Writing minor. How culture and technology relate to the work of professional writing; design principles and rhetorical moves; digital tools, research skills, and writing strategies of professional writers. Develops skills needed to publish a writing portfolio that showcases students' professional writing competencies and projects your professional writer identities.
Prerequisite: ENGL101.

ENGL301 This is English: Fields and Methods (3 Credits)
"English" means a lot of things. Are you looking for literature, or linguistics? For writing--creative, critical, or professional? For theater, or debate? For film, or even videogames? This gateway course for the English major introduces you to all of these areas and more, as well as to our discipline's unique resources for studying and enjoying them. The English discipline includes three main interpretive fields: Literary and Cultural Studies; Language, Writing, and Rhetoric; and Media Studies. This course brings together the fundamental concepts and methods for reading, viewing, and researching practiced in these fields, launching you into English studies and and helping you to choose the major track that is right for you.
Restriction: Must be in English Language and Literature program; or must be in Secondary Educ: English Language Arts program.

ENGL302 Medieval Literature in Translation (3 Credits)
Surveys major works of English and continental Middle Ages. Readings may include romance, lyric and drama, Germanic epic, works of Dante, Chretien de Troyes, Jean de Meun, Christine de Pisan, Malory, English and continental mystics.

ENGL305 Early Drama (3 Credits)
Explore medieval and Renaissance drama and performance, placing the Shakespearean stage in its cultural and historical contexts.

ENGL308 Special Topics in Shakespeare (3 Credits)
A topical exploration of William Shakespeare's plays and poems as well as their cultural contexts, performance history, and the roles they play in modern and contemporary culture
Repeatable to: 12 credits if content differs.

ENGL310 Medieval and Renaissance British Literature (3 Credits)
Detailed study of selected major medieval and Renaissance works written in England. Cultural attitudes and historical contexts. May include Beowulf, Anglo-Saxon lyric, drama, sonnets; works of women writers, Chaucer, Spenser, Sidney. Some readings in Middle English.

ENGL311 British Literature from 1600 to 1800 (3 Credits)
The culture of seventeenth and eighteenth-century Britain seen through detailed study of selected major texts. Drama, poetry, political writings, and early novels by men and women. Authors may include Donne, Milton, Jonson, Behn, Swift, Pope, Montagu, and Wollstonecraft.

ENGL312 Romantic to Modern British Literature (3 Credits)
Detailed study of selected major texts from the 19th and 20th centuries. Transitions from Romanticism to Victorian age to Modernism. Historical, social, literary contexts. Issues such as rise of democracy; industrial revolution; the "woman question"; revolutions in literary form. Authors might include Wordsworth, Austen, Dickens, Arnold, T.S. Eliot, and Woolf.

ENGL313 American Literature (3 Credits)
A detailed study of selected major texts of American literature from the 17th century to the 20th century. Issues such as race, gender, and regionalism. Authors such as Franklin, Hawthorne, Dickinson, Hemingway, and Morrison.

ENGL316 Native American Literature (3 Credits)
Examines literature that explores the experiences and cultures of America's Indigenous peoples from the sixteenth century to the contemporary moment. We will analyze poetry, historical accounts, oral narratives, short stories, and novels by Native American writers in order to explore key concerns in Native American Studies, such as dilemmas of Indigenous sovereignty, settler colonialism, the settler state, stolen land, and the natural environment.

ENGL317 African American Literature (3 Credits)
Consideration of key texts in African American literature that explore the experiences of people of African descent in America from the mid-nineteenth century to the contemporary moment. Relationship between literary texts, historical events and cultural formations. Examines a range of texts and genres (autobiography, slave narrative, travel narrative, poetry, essays, fiction), and their contribution to national literary tradition.

ENGL319 Special Topics in Science, Literature, and Media (3 Credits)
A topical investigation of the ways that science, art, and technology provoke ideas and innovation across their disciplinary boundaries within specific historical moments and locations.
Repeatable to: 12 credits if content differs.

ENGL321 Comics and the Graphic Novel (3 Credits)
Comics has become one of the most globally popular art forms of the twenty-first century, but it also has a rich history that stretches back to the eighteenth century, and arguably much earlier. This course will introduce students to the unique formal properties of comics and will survey the history of comics across national traditions, including texts drawn from the American, Franco-Belgian, and Japanese traditions. We will read across a range of genres and cultural registers--including newspaper strips, superhero comics, Underground comix, manga, the graphic memoir, and alternative comics. You will learn to analyze and write about the form and history of the medium.

ENGL327 The Suburbs in American Literature and Film (3 Credits)
Explores through written expression and through cinema the diverse and changing world of US suburbia. Premised on two arguments: (1) the suburbs embody many of the contours and contradictions of American life; and (2) the suburbs are far more racially, ethnically, culturally, sexually, economically diverse than mass media suggests. Investigation via prose, poetry, drama, and cinema, as well as secondary sources in sociology, women's studies, ethnic studies, history, cultural studies, psychology, anthropology, and the history of science and technology.

ENGL329 Special Topics in Film Studies (3 Credits)
Studies in various periods and genres of film.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL331 American Jewish Literature (3 Credits)
An exploration of the role played by literature in the development of American Jewish ethnic identity. Primary materials include essays, poetry, plays, short stories, novels, films and music.Cross-listed with JWST341.
Credit Only Granted for: ENGL331 or JWST341.

ENGL334 The Bible as Literature (3 Credits)
The Bible as a major source of contemporary Western religious symbolism and culture. Exploration of how this literary legacy appears in our own cultural experience. Historical critical and literary critical method and theory introduced and applied to the texts.

ENGL344 Nineteenth-Century Fiction (3 Credits)
Major British, American, and other fiction writers of the nineteenth century studied in the context of the broad global, intellectual, and artistic interests of the century.

ENGL345 Twentieth Century Poetry (3 Credits)
Major British and American poets of the twentieth century.
Restriction: Must not have completed ENGL446 or ENGL445.

ENGL346 Twentieth Century Fiction (3 Credits)
Major British, American, and other fiction writers of the twentieth century studied in the context of the broad global, intellectual, and artistic interests of the century.

ENGL348 Literary Works by Women (3 Credits)
The context, form, style and meaning of literary works by women.
Prerequisite: Must have completed at least one lower-level English literature course and one other lower-level English course; or Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 6 credits if content differs. Cross-listed with: WGSS348.
Formerly: WMST348.

ENGL349 Asian American Literatures (3 Credits)
Study of selected writers, particular themes, or genres in Asian American literatures.
Repeatable to: 9 credits if content differs.

ENGL352 Intermediate Fiction Workshop (3 Credits)
A class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and the fiction of colleagues, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.
Prerequisite: Minimum grade of A- in ENGL271 or ENGL272; or permission of ARHU-English department.

ENGL353 Intermediate Poetry Workshop (3 Credits)
A class in the making of poetry. Intensive discussion of students' own poems. Readings in both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, memorization, and attendance at poetry readings.
Prerequisite: Minimum grade of A- in ENGL271 or ENGL273; or permission of ARHU-English department.

ENGL354 Intermediate Scriptwriting for Theater, Film, and Television (3 Credits)
Demystifies the art of dramatic writing. Students will come to understand that a play or screenplay is never a lecture, and that we write scripts to find out something about ourselves and the subjects we tackle. Students will analyze plays and screenplays, as well as workshop each others' scripts, to help them produce their own successful plays and screenplays written for the stage, screen, or box.
Prerequisite: 1 course with a minimum grade of A- from (ENGL275, ARHU375, THET340).

ENGL355 Digital Fictions (3 Credits)
Explores literary fiction composed and delivered in digital forms from the origins of computers in the mid-twentieth century to the present day. The course places equal emphasis on a historical survey of the intersection between the digital and the literary; on the enterprise of digital fiction as a dynamic and living form with new work appearing online almost every day; and on offering students the opportunity to experiment with digital platforms for fiction writing of their own. No technical expertise (or experience in creative writing) is expected or assumed.
Credit Only Granted for: ENGL355 or ENGL378C.
Formerly: ENGL378C.

ENGL358 Special Topics in U.S. Latinx Literature (3 Credits)
Topical study of selected works by U.S. Latinx writers.
Repeatable to: 9 credits if content differs.

ENGL359 Special Topics in LGBTQ+ Literatures and Media (3 Credits)
Selected study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.
Repeatable to: 9 credits if content differs. Cross-listed with LGBT359.

ENGL359F Lesbian, Gay, Bisexual, and Transgender Film and Video (3 Credits)
Comparative analysis of forms, themes, and the politics of representation in film and video by and/or about LGBT people.
Restriction: Junior standing or higher. Cross-listed with: LGBT327.
Credit Only Granted for: LGBT327 or ENGL359F.

ENGL360 African, Indian and Caribbean Writers (3 Credits)
Selected writers from countries formerly colonies of Britain, France, Denmark, etc. Attention to ways regions have developed distinctive political and aesthetic values resulting from indigenous traditions and foreign influences.

ENGL361 Recovering Oral Histories (3 Credits)
Service-learning course that gives students an opportunity to develop writing, interviewing, and communication skills as they contribute to the work of a community organization. In the classroom, students will reflect on the process and do background research to understand the particular context of the organization's work. In the field, students will interview (or have informal discussions with) young people helped by the organization in order to construct a narrative about their lives, their perceptions of themselves, and their experiences.
Prerequisite: Students must have completed one course in English, Latin American Studies, or Education.

ENGL362 Caribbean Literature in English (3 Credits)
Political and literary traditions that intersect in the fiction, poetry, and drama written in English by Caribbean writers, primarily during the 20th century.Cross-listed with: LASC348E.
Credit Only Granted for: ENGL362 or LASC348E.

ENGL368 Special Topics in African American, African, and African Diaspora Literatures (3 Credits)
Topical study of selected literature by African American and Black Diaspora writers from Africa, the Caribbean, North and South America, and beyond.
Repeatable to: 9 credits if content differs.

ENGL369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL369D Australian Literature and Culture (3 Credits)
An immersion into Australian culture and history, this course will explore the literature, music, theater, and arts of Indigenous and contemporary Australia. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day Australians and the skills needed to navigate those issues. Along the way, we will look back to the colonial founding of Australia as a British outpost and consider how modern Australia has emerged from a mixing of Western and Indigenous cultures.
Additional Information: This is an Education Abroad course.

ENGL369N New Zealand Literature and Culture (3 Credits)
An immersion into the literature, history, and culture of New Zealand, this course will look back to the colonial founding of New Zealand as a British outpost, and to the strong Maori culture the British encountered when they arrived. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day New Zealanders and the skills needed to navigate those issues. Along the way, we will consider how modern New Zealand has emerged from a mixing of Western and Indigenous cultures.
Additional Information: This is an Education Abroad course.

ENGL370 Junior Honors Conference (1 Credit)
Preparation for writing the senior honors project.
Restriction: Candidacy for honors in English.

ENGL373 Senior Honors Project (2 Credits)
Research and writing of senior honors project. Strongly recommended for students planning graduate work.
Prerequisite: ENGL370.
Restriction: Must be in English Language and Literature program.

ENGL375 J.R.R. Tolkien: Middle-earth and Beyond (3 Credits)
An in-depth look at major themes and ideas spanning Tolkien's well-known and lesser-known works across a variety of genres and styles. We will study "The Hobbit" and "The Lord of the Rings" in connection with Tolkien's back-story mythology expressed in "The Silmarillion." We will also consider film adaptations and other popular fantasy influenced by Tolkien. And we will explore lesser-known works such as "Farmer Giles of Ham," and Tolkien's essays on fairy stories and on "Beowulf.

ENGL376 The Speculative Imagination: Science Fiction on Page and Screen (3 Credits)
Examines a global cross-section of science fiction in literature, film, television, comics, and other media. Studies the unique formal qualities of science fiction and traces its history from its origin in the eighteenth century to the present. Explores how the twenty-first century has brought new prominence to science fiction by creators of color, women creators, and queer creators, as well as intersections of these. Considers how science fiction addresses a range of phenomena--from environmental destruction to surveillance to imperialism and militarism. Students learn how to analyze and write about the formal and historical dimensions of the genre.
Credit Only Granted for: ENGL379Y or ENGL376.
Formerly: ENGL379Y.

ENGL377 Medieval Myth and Modern Narrative (3 Credits)
Literary patterns characteristic of medieval myth, epic, and romance; their continuing vitality in modern works; and links between Medieval works like "The Prose Edda", "Beowulf", "The Morte D'Arthur", "The Volsunga Saga", and "Grettis Saga" and modern narratives like Tolkien's "The Lord of the Rings".

ENGL378 Special Topics in English (3 Credits)
Offers sustained attention to notable current themes and approaches in English studies. Topics vary by section and semester.
Repeatable to: 12 credits if content differs.

ENGL379 Special Topics in Literature (3 Credits)
Repeatable to: 12 credits if content differs.

ENGL381 MGA Legislative Seminar (3 Credits)
Prepares students to intern for the Maryland General Assembly. Introduces standard legislative genres and assigns extended practice in researching legislative issues.
Prerequisite: Students who have taken courses with comparable content may contact the department; or ENGL101.
Restriction: Permission of ARHU-English department. Cross-listed with: HONR368A.
Credit Only Granted for: HONR368A or ENGL381.
Additional Information: Application required. Contact english@umd.edu for more information.

ENGL383 Language in Its Social Contexts (3 Credits)
Exploration of the social and political aspects of language use, including interactional behavior, the structure of conversation, persuasive uses of language, social dialects, language use within speech communities, and language and identity. We will examine and compare analytical approaches to pragmatics and discourse analysis.

ENGL384 Concepts of Grammar (3 Credits)
Introduction to the basic units of grammatical description; motivation for and nature of constituent structure and syntactic categories; fundamental grammatical concepts employed in the teaching and learning of languages.

ENGL385 English Semantics (3 Credits)
The study of meaning in language and language use. Examines how the senses of words and other linguistic constructions are mentally represented, and how they contribute to the construction of meanings in linguistic communication.

ENGL386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENGL387 Visual Rhetoric (3 Credits)
Investigation of the persuasive power of visuals based on how they construct and communicate their content and predispose viewers to an interpretation or attitude. "Iconic" images and other modes of visual representation including diagrams, graphs, and page or screen design. Most attention given to a grammar and rhetoric of visuals. Also the elements of images and their arrangement and consideration of historical and generic contexts and the "affordances" of various media. Not a course in "high art" or in video, TV, or film. Emphasis on visuals that accompany or replace verbal texts.

ENGL388 Writing, Research, and Media Internships (1-6 Credits)
Field work in English studies.
Restriction: Permission of ARHU-English department.
Repeatable to: 12 credits.

ENGL388C Writing for Change (3 Credits)
Service learning in collaboration with students at area high schools. Explores how writing can be a tool for social change. Participants serve as mentors, create a performance event concerning a pressing social issue, and compose reflections, literacy narratives, and publicity materials. Students also design individual projects that link course content and students' own professional interests.
Prerequisite: Permission of ARHU-English Department .
Recommended: ENGL101.
Restriction: Requires application and references. Jointly offered with: ENGL292.
Credit Only Granted for: ENGL292 or ENGL388C.

ENGL388M Maryland General Assembly Writing Internship (6 Credits)
Experiential learning at the Maryland General Assembly (early January through early April). Interns participate in standard office tasks, research legislative issues, and draft legislative texts such as constituent letters, notes on bills, newsletters, policy memos, and testimony. Specific assignments vary according to the host legislator's needs and the intern's schedule.
Prerequisite: ENGL381 or HONR368A.
Restriction: Minimum cumulative GPA of 3.0; and must have earned a minimum of 60 credits; and must be admitted to the MGA program. Cross-listed with: HONR379W.
Credit Only Granted for: ENGL388M or HONR379W.

ENGL388P English Careers Internship (1-6 Credits)
Students receive credit for an internship of their choice that focuses at least half of its work on core English skills such as writing, editing, and research. Students secure their own internship placements. Course assignments include, for instance, an activity log, reflection papers, a supervisor evaluation, and a final portfolio of work.
Prerequisite: Permission of ARHU-English department.
Repeatable to: 12 credits if content differs.
Additional Information: Each enrolled credit equals 45 hours of on-site internship work.

ENGL388V Undergraduate Teaching Assistants in English (1-6 Credits)
A weekly teaching practicum and concurrent internship as an undergraduate teaching assistant in an English course. Students will explore the theories and best practices of teaching and learning in the various fields of the English discipline, particularly writing and literary studies. The emphasis is on creating inclusive classrooms and working with diverse learners and is grounded in theories of critical pedagogy. Students will apply principles of learning theory to develop and facilitate learner-centered lessons and discussions. They will also study composition pedagogy in preparation for responding to student writing in the course for which they are an assistant.
Prerequisite: Permission of the ARHU-English department.
Repeatable to: 12 credits.
Additional Information: Students should consult with the UTA Coordinator to determine the number of enrollment credits.

ENGL388W Writing Center Internship (1-6 Credits)
Examines face-to-face and online writing center theory and practice through readings, exercises, and supervised tutoring. Students investigate the writing process and help other writers to negotiate it.
Prerequisite: Permission of the Writing Center (1205 Tawes Hall).
Repeatable to: 12 credits. Cross-listed with: SPAN388W.
Credit Only Granted for: ENGL388W or SPAN388W.

ENGL390 Science Writing (3 Credits)
Specifically designed for students interested in further study in the physical and biological sciences. Exposes students to the conventions of scientific prose in the genres of research articles and proposals. Students also learn to accommodate scientific information to general audiences.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.
Credit Only Granted for: ENGL390 or ENGL393S.
Formerly: ENGL393S.

ENGL391 Advanced Composition (3 Credits)
An advanced composition course which emphasizes constructing written arguments accommodated to real audiences.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL392 Legal Writing (3 Credits)
Conventions of legal writing and research. Students learn how to read and write about cases, statutes, or other legislation; how to apply legal principles to fact scenarios; and how to present a written analysis for readers in the legal profession. Assignments may include the law-school application essay, case briefs, legal memos, and client letters.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL393 Technical Writing (3 Credits)
Focuses on the writing of technical papers and reports.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL394 Business Writing (3 Credits)
Intensive practice in the forms of written communication common in the business world: letters, memos, short reports, and proposals. Focus on the principles of rhetoric and effective style.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL395 Writing for Health Professions (3 Credits)
Focus on accommodating health-related technical material and empirical studies to lay audiences, and helping writers to achieve stylistic flexibility and correctness.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398 Topics in Professional Writing (3 Credits)
Professional writing courses that focus on the audiences, conventions, and genres of particular disciplines, professions, or organizations. Examples include writing for the arts, writing case studies and investigative reports, writing about economics, and writing for non-profit organizations.
Prerequisite: ENGL101; or students who have taken courses with comparable content may contact the department.
Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.
Repeatable to: 6 credits if content differs.

ENGL398A Writing for the Arts (3 Credits)
Examines the situations and genres in which working professionals (practitioners, advocates, administrators, and educators) write about art, culture, and artists. The course covers the complex process that writers need to learn, including how to accommodate information to specific audiences, how to use stylistic and visual devices to make information more accessible, and how to edit their own work as well as that of their peers. Assignments parallel the writing demands that students will face in the workplace, including analyzing and composing artist statements, an arts manifesto, art education guides, press releases about artists and their work, critical reviews of exhibits and performances, and proposals to funding agencies and foundations.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398B Writing for Social Entrepreneurship (3 Credits)
Designed for students who want to develop the skills needed to start a successful social venture--a start-up business with a social mission or a new nonprofit program. The course centers on a major writing project such as a business plan, a website design plan, a fundraising proposal, or a concept paper for a new nonprofit organization. Students produce other communication projects that social entrepreneurs use to develop their businesses and nonprofits, such as presentations or pitches to prospective investors/donors, marketing materials, and a job announcement. Students will learn from local social entrepreneurs who share their experiences of using writing to succeed in the field.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398C Writing Case Studies and Investigative Reports (3 Credits)
Designed for students interested in becoming police investigators, educators, case workers, insurance adjusters, nurses, or program evaluators, or in entering branches of the social sciences that investigate cases and value reports based on accurate descriptions and compelling narratives. Such reports must be factual and yet useful to decision makers, unbiased and yet focused. Students study genres and language skills from careful summarizing to convincing storytelling.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398E Writing About Economics (3 Credits)
Examines the characteristic genres of writing in modern economics, including theoretical and empirically based journal articles, reports for government and commercial clients, and economic information presented to a variety of non-professional audiences, such as citizen-oriented and public policy organizations. Students learn how to analyze these documents rhetorically and how to communicate economic information using the content, arrangement, style, and visual graphics best suited to the purposes and standards of particular audiences. Core assignments include a genre-based journal and document analysis, presentations on economics-related topics for both economists and non-professional audiences, and a major research-based writing project for an audience outside of the classroom.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398L Scholarly Writing in the Humanities (3 Credits)
Examines scholarship in the humanities as a genre of professional writing and investigates the norms and procedures of advanced academic writing. Assignments parallel the writing demands that students will face in the academic workplace, including a graduate school application essay, a genre review, an annotated bibliography, a journal article, and an oral presentation of article subject matter.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398N Writing for Non-Profit Organizations (3 Credits)
Examines professional writing and communication work in the non-profit sector. Students will analyze the audiences and document genres that they may encounter in real-world non-profit work and will learn how to compose many of these documents, from press releases and other public relations material to position papers, reports, and grant proposals. Students may also have the opportunity to add a service-learning component to the course by working with and for an area non-profit.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398R Writing Non-Fictional Narratives (3 Credits)
Approaches nonfiction narrative-a kind of writing influenced by fiction, magazine journalism, memoir, and personal essay--as a form of professional writing used in publishing and a range of careers involving proposal writing, work documentation, lobbying, social marketing, and political commentary, among others. Students learn to use many of the same tools as fiction writers, such as dialogue, vivid description, developing characters, nonlinear structure, and shifts in tense, time, and points of view. They also learn how to edit their own work as well as that of their peers, doing multiple revisions of the major assignments for a final portfolio. Major assignments include essays targeted to specific publications, query letters, audience analysis, and a publisher analysis.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398V Writing About the Environment (3 Credits)
Designed for those aspiring to work in a variety of fields that influence and are influenced by environmental science, including public policy, advocacy, science, and industry. Students learn to apply principles of technical writing to a range of scenarios and issues particular to the intersection of scientific knowledge and environmental policy. Writing audiences range from the public to decision-makers. The course emphasizes writing both within and across disciplines to enlist research for practical contexts.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL402 Chaucer (3 Credits)
Works read in Middle English. Readings may include Canterbury Tales, Troilus and Criseyde, dream visions, lyrics.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL403 Shakespeare: The Early Works (3 Credits)
Close study of selected works from the first half of Shakespeare's career. Generic issues of early histories, comedies, tragedies. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL404 Shakespeare: The Later Works (3 Credits)
Close study of selected plays from the second half of Shakespeare's career. Generic issues of later tragedies, later comedies, romances. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL407 Non-dramatic Literature of the Sixteenth Century (3 Credits)
Poetic and prose genres--utopia, epic, narrative, lyric, sonnet, oration, epistle, sermon, apologia--in context of the literary and intellectual life of the sixteenth century. Writers such as More, Wyatt, Surrey, Sidney, and Spenser.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL408 Literature by Women Before 1800 (3 Credits)
Selected writings by women in the medieval and early modern era.
Prerequisite: Must have completed two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS408.
Formerly: WMST408.

ENGL409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL410 Edmund Spenser (3 Credits)
Selected works of Edmund Spenser in their literary, social, and historical contexts. Special attention to The Faerie Queene; also sonnets and lyric poetry.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL412 Literature of the Seventeenth Century, 1600-1660 (3 Credits)
Works from early Stuart through Interregnum period. Major literary genres in historical contexts. Writers such as Donne, Jonson, Mary Wroth, Bacon, Browne, and Marvell.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL414 Milton (3 Credits)
Poetry and major prose in their social, political, and literary-historical contexts. Special attention to Paradise Lost. Other works may include Samson Agonistes and shorter poems.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL415 Literature of the Seventeenth Century, 1660-1700 (3 Credits)
English poetry, drama, fiction, and non-fiction written from the Restoration of Charles II to 1700. Attention to increasing literacy and publication and greater involvement by women in literary production. Authors include Milton, Dryden, Congreve, and Behn.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL416 Literature of the Eighteenth Century, 1700-1750 (3 Credits)
British literary traditions, including the poetry of Pope, the prose of Swift, the correspondence of Montagu, the drama of Gay, and early novels by Defoe, Richardson, and Fielding.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL417 Literature of the Eighteenth Century, 1750-1800 (3 Credits)
British poetry, drama, fiction, and nonfiction, emphasizing innovative forms and attitudes in genres such as the gothic novel and political writings, as well as more traditional works. Authors include Johnson, Burney, Sterne, Burke, and Wollstonecraft.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL420 English Romantic Literature (3 Credits)
British poetry, drama, fiction, and criticism c.1790 to c.1830, a period of dramatic social change and revolution in literature, philosophy, the arts, industry, and politics. Authors include Austen, Wordsworth, Coleridge, Keats, Byron, Percy, and Mary Shelley.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL422 English Victorian Literature (3 Credits)
A survey of English literature of the Victorian period. Writers may include Arnold, Browning, Tennyson, Dickens, George Eliot, Carlyle, Ruskin, Newman, and Wilde.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL425 Modern British Literature (3 Credits)
Major Modernist writers in English prose and poetry since 1900. Such writers as Eliot, Larkin, Forster, Burgess, Durrell, Henry Green, Golding, Auden, Malcolm Lowry, Joyce, and Yeats.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL428 Seminar in Language and Literature (3 Credits)
Topics will vary each semester. The course will provide a seminar experience in material or methodologies not otherwise available to the major.
Restriction: Junior standing or higher; and must be in the English Honors program or gain permission from the department.
Repeatable to: 12 credits if content differs.

ENGL429 Independent Research in English (1-6 Credits)
An advanced independent research project for qualified students, supervised by an English faculty member, on a topic not ordinarily covered in available courses.
Prerequisite: ENGL301; and two English courses (excluding fundamental studies requirement); and permission of ARHU-English department.
Restriction: Sophomore standing or higher.
Repeatable to: 9 credits if content differs.

ENGL430 Literature of the Americas from First Contact to Revolution (3 Credits)
Examines the literature of the cultural encounters, colonialisms, empires, and independence movements in the early Americas from 1492 through the eighteenth century. Writers typically include Christopher Columbus, John Smith, Anne Bradstreet, Jonathan Edwards, William Byrd, Olaudah Equiano, Phillis Wheatley, and Benjamin Franklin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL431 American Literature: Revolution to Civil War (3 Credits)
An examination of nationalism, sentimentalism, and romanticism, with writings focusing on such topics as slavery and democracy during the 1770s to 1860s. Authors typically include Ralph Waldo Emerson, Margaret Fuller, Emily Dickinson, Walt Whitman, Frederick Douglass, Harriet Beecher Stowe, Edgar Allan Poe, Nathaniel Hawthorne, and Herman Melville.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL432 American Literature: 1865 to 1914, Realism and Naturalism (3 Credits)
Reconstruction, Realism, Naturalism. Representative writers such as Dickinson, James, Dreiser.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL433 American Literature: 1914 to the Present, the Modern Period (3 Credits)
Modernism, Postmodernism. Writers such as Stevens, Stein, Ellison.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL435 American Poetry: Beginning to the Present (3 Credits)
Selections of American poetry, from Bradstreet to contemporary free verse. Authors such as Whitman, Dickinson, Bishop, Hughes, Rich, and Frost.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL437 Contemporary American Literature (3 Credits)
Prose, poetry, drama of living American writers. Current cultural and social issues.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL438 Selected Topics in Media Studies (3 Credits)
Advanced study of a topic pertinent to how the material production, technologies, and cultural practices of diverse types of media shape meaning.
Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.
Recommended: At least one prior course in Media Studies.
Repeatable to: 9 credits if content differs.

ENGL439 Spotlight on Major Writers (3 Credits)
An intensive study of a single writer, or a handful of writers, to understand the shifts in the writer's craft and cultural influence, both past and present.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL440 The Novel in America to 1914 (3 Credits)
Survey of the American novel to World War I. Cultural and philosophical contexts; technical developments in the genre. Authors such as Melville, Wells Brown, James, Sedgwick, Chopin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL441 The Novel in America Since 1914 (3 Credits)
Survey of the American novel since World War I. Cultural and philosophical contexts, technical developments in the genre. Authors such as Hemingway, Cather, Faulkner, Anne Tyler, Morrison.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL444 Feminist Critical Theory (3 Credits)
Issues in contemporary feminist thought that have particular relevance to textual studies, such as theories of language, literature, culture, interpretation, and identity.
Prerequisite: WMST200, WGSS200, WMST250, WGSS250, or ENGL250. Cross-listed with: WGSS444.
Credit Only Granted for: ENGL444, WMST444 or WGSS444.
Formerly: WMST444.

ENGL445 Modern British and American Poetry (3 Credits)
The formation of Modernism in British and American poetry before 1930. Such poets as Yeats, Pound, H.D., Eliot, Langston Hughes, Moore, Stevens, and Williams.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL446 Post-Modern British and American Poetry (3 Credits)
British and American poets from the 1930s to the present. Such poets as Auden, Williams, Plath, Brooks, Lowell, Wolcott, Ted Hughes, Bishop, Larkin, Jarrell, and Berryman.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL448 Literature by Women of Color (3 Credits)
Literature by women of color in the United States, Britain, and in colonial and post-colonial countries.
Prerequisite: Must complete two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS448.
Formerly: WMST448.

ENGL449 Selected Topics in U.S. Latinx Literature (3 Credits)
Advanced study of selected works by U.S. Latinx writers.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL450 Renaissance Drama I (3 Credits)
Drama of the sixteenth century, from Sir Thomas More's circle through Lyly, Greene, Marlowe, and their successors. Interludes, school drama, comedy and tragedy, professional theater. Influences of humanism, Protestantism, politics, and cultural change.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL451 Renaissance Drama II (3 Credits)
Drama in early decades of the seventeenth century. Playwrights include Jonson, Middleton, Marston, Webster, Beaumont and Fletcher. Tragedy, city comedy, tragicomedy, satire, masque. Pre-Civil War theatrical, political, and religious contexts.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL452 English Drama From 1660 to 1800 (3 Credits)
Restoration and eighteenth-century drama, with special attention to theater history, cultural influences, concepts of tragedy, comedy, farce, parody, and burlesque, as well as dramatic and verbal wit.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL453 Literary Theory (3 Credits)
An in-depth study of literary and critical theory.
Prerequisite: Two courses in literature; or permission of ARHU-English department.

ENGL454 Modern Drama (3 Credits)
The history of modern British drama, from its roots in Chekhov and Ibsen, through the modernisms of Samuel Beckett and Bertolt Brecht, through the Angry Young Men of the 1950s, and right up to the present. Most plays will be from the last 40 years, by writers such as David Hare, Tom Stoppard, Lucy Kirkwood, Caryl Churchill, Roy Williams, Lucy Prebble, Alan Bennett, Brian Friel, Terrence Rattigan, Kwame Kwei-Armah, Sarah Kane, and Alice Birch. We will also look at how class, money, immigration, and the end of the Empire changed British plays over time. And we will consider modern theater architecture and production design as well as the directing instincts of, for instance, Peter Brook, Katie Mitchell, Marianne Elliott, and Nicholas Hytner.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL455 The Eighteenth-Century English Novel (3 Credits)
The origins and development of the British novel, from the late seventeenth century until the beginning of the nineteenth. Questions about what novels were, who wrote them, and who read them. Authors such as Behn, Defoe, Richardson, Fielding, Sterne, Smollett, Burney, Radcliffe, and Austen.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL456 The Nineteenth-Century English Novel (3 Credits)
Surveys major novels of the period. Attention to narrative form and realism; representations of gender and class; social contexts for reading, writing and publishing. Authors such as Austen, Bronte, Dickens, George Eliot, Trollope.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL457 The Modern Novel (3 Credits)
Modernism in the novel of the twentieth century. Such writers as Joyce, Lawrence, Murdoch, James, Forster, Faulkner, Hemingway, Fitzgerald, Ellison, Welty, Nabokov and Malamud.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL458 Literature by Women After 1800 (3 Credits)
Selected writings by women after 1800.
Prerequisite: Must have completed two English courses in literature; or permission of Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS458.
Formerly: WMST458.

ENGL459 Selected Topics in LGBTQ+ Literatures and Media (3 Credits)
Advanced study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL460 Archival Research Methods in English Studies (3 Credits)
Introduces approaches for doing archival research in English studies, exploring how researchers develop their scope and practices of study and how they access and use archival materials electronically and on site to further their research questions. Investigates a historical period, genre, or theme through the lens of manuscripts, ephemera, and other artifacts. Case studies vary by semester.
Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.

ENGL461 Qualitative Research Methods in English Studies (3 Credits)
Introduces approaches to qualitative research in English studies, exploring how researchers build knowledge about writing and literacy. Explores qualitative methodologies such as ethnography, case study, and grounded theory. Introduces principles of ethical and responsible research practices. Engages students in practices of data collection (such as interview, observation, and survey), as well as practices of data analysis and reporting.
Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.
Credit Only Granted for: ENGL488R or ENGL461.
Formerly: ENGL488R.

ENGL462 Folksong and Ballad (3 Credits)
A cross-section of American folk and popular songs in their cultural contexts; artists from Bill Monroe to Robert Johnson.

ENGL463 Narrative Analysis Methods in English Studies (3 Credits)
Approaches to literary narrative analysis. Explores narrative theory as a research method for studying the fundamental categories of literary narrative--such as the narrator, character, plot, closure, and frames, as well as the nature of fictionality and the role of the reader--and for interpreting their deployment in individual literary works. We will use this method to examine particularly unusual and even radical fiction, so we can understand the meaning-making work accomplished by narrative form.
Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.

ENGL466 Arthurian Legend (3 Credits)
Development of Arthurian legend in English and continental literature from Middle Ages to twentieth century. All readings in modern English.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL467 Critical and Creative Approaches to Digital Textuality (3 Credits)
Examines electronic literature and other aspects of the literary world online with a focus on experimental writing with computers. Topics may include digital fiction and storytelling, analysis of literary texts using digital tools, bots, book hacking, flash fiction, narrative in games, and the history of computer-generated writing. No programming experience required.
Prerequisite: One English course in literature; or permission of ARHU-English department.

ENGL468 Selected Topics in Film Studies (3-9 Credits)
Advanced studies in various periods and genres of film.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of ARHU-English department.
Recommended: ENGL329, CMLT280, and ENGL245.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: ENGL468, ENGL479E-Spr 2008, ENGL479F-Spr 2009, ENGL479G-Fall 2008, or ENGL479M-Fall 2009/Fall 2010.

ENGL469 The Craft of Literature: Creative Form and Theory (3 Credits)
Examines various forms of poetry and/or fiction, emphasizing the practice of making literary art and the aesthetic and theoretical approaches that define it. Students will practice the elements of literary craft, producing and experimenting with a wide range of forms and conventions in poetry and/or fiction. They will also produce critical work that articulates and contextualizes theoretical approaches to the making of literary art.
Prerequisite: 2 ENGL courses in literature or creative writing; and have completed a 200-level creative writing workshop in ENGL. Or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL470 African-American Literature: From Slavery to Freedom (3 Credits)
Examines African-American literature from its beginnings to the early twentieth century, including genres ranging from slave narratives, pamphlets, essays, and oratory, to poetry and fiction. Our emphasis is on the interaction between literature and literary forms, on the one hand, and historical and political developments in the push toward emancipation, on the other.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL471 African-American Literature: 1910-1945 (3 Credits)
Emergence of modernism in African-American writing including debates over the definition of unique African-American aesthetics, with emphasis on conditions surrounding the production of African-American literatures.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL472 African-American Literature: 1945 to Present (3 Credits)
Transformation of African-American literatures into modern and postmodern forms. Influenced by World War II and the Civil Rights and Black Power movements, this literature is characterized by conscious attempts to reconnect literary and folk forms, the emergence of women writers, and highly experimental fiction.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL475 Postmodern Literature (3 Credits)
The origins and ongoing development of postmodern literature. Aspects of the "postmodern condition," such as the collapse of identity, the erasure of cultural and aesthetic boundaries, and the dissolution of life into textuality. The novel and other genres and media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL477 BookLab (3 Credits)
Historical, imaginative, and experiential introduction to different elements of books and bookmaking, including letterpress printing with traditional lead and wood (movable) type, different techniques for bindings, 3D printing, zines, making altered and treated books, and so on. Class-time will be a mix of discussion and hands-on activity. The course will culminate in each student designing and creating their own book object, which might take the form of an artist's book, chapbook, zine, an altered or treated book, or something else entirely. Taught with the resources and facilities available in the English department's BookLab.
Prerequisite: Two English courses; or permission of ARHU-English department.
Credit Only Granted for: ENGL428M, ENGL438P, ENGL479P, or ENGL477.
Formerly: ENGL428M, ENGL438P, ENGL479P.

ENGL478 Selected Topics in Literature before 1800 (3 Credits)
Advanced study of key topics in literary works from earlier historical periods.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL479 Selected Topics in Literature after 1800 (3 Credits)
Advanced study of key topics in literary works from later historical periods.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL482 History of the English Language (3 Credits)
Examines the origins and development of the English language.
Prerequisite: ENGL280, LING200, or HESP120; or permission of ARHU-English department.

ENGL483 American English(es) (3 Credits)
Examines the diversity of dialects, registers, and jargons of English found in the United States, as well as their origins, structures, and functions in society.
Prerequisite: LING200, ENGL280, or HESP120; or permission of ARHU-English department.

ENGL484 Style and Grammar in Written English (3 Credits)
The linguistic analysis of written texts. Examines grammatical and discursive constructions above the level of the sentence and their functions in literary and non-literary texts. We will study narrative structure, authorial voice, genre, register, stance, viewpoint, empathy, surprise, and humor in language.
Credit Only Granted for: ENGL484 or LING402.

ENGL487 Principles and Practices of Rhetoric (3 Credits)
A seminar examining foundational concepts and approaches in the theory and practice of rhetoric in civic, professional, academic, and interpersonal settings; focusing on key issues in persuasion, argumentation, and eloquence in historical and contemporary contexts.

ENGL488 Topics in Advanced Writing (3 Credits)
Different genres of technical and professional writing including proposal writing, computer documentation, technical report writing, instruction manuals, etc. Students will analyze models of a genre, produce their own versions, test, edit and revise them.
Repeatable to: 9 credits if content differs.

ENGL489 Special Topics in Language and Rhetoric (3 Credits)
Special topics in language and rhetoric, such as discourse analysis, semantics, or cognitive linguistics; comparative rhetoric and rhetorical theory, digital rhetorics, women's and minority rhetorics, or the history of rhetoric.
Repeatable to: 9 credits if content differs.

ENGL491 Digital Rhetoric (3 Credits)
Examines the social significance of the ways digital texts are composed and circulated. Explores why it matters how the web is written and who does the writing, understanding the Internet as rhetorical from its content and communities to the code, protocols, and policies that control digital distribution. Includes active experimentation with digital tools so students can expand their theoretical understanding through critical making.
Prerequisite: Students must have satisfied the Fundamental Studies Academic Writing requirement.
Credit Only Granted for: ENGL489J, or ENGL491.
Formerly: ENGL489J.

ENGL492 Graphic Design and Rhetoric (3 Credits)
An exploration of the visual dimensions of texts and the skills involved in designing them well. Considers graphic design theory and history from a rhetorical perspective, working to understand and practice the use of symbol systems to express, inform, and advocate. Includes direct experimentation with the principles and techniques of graphic design.
Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL493 Writing Genres as Social Action (3 Credits)
A rhetorical genre studies approach to understanding the work that texts do in the world. Examines issues of identity, power, and medium as they relate to writing in various contexts. Students analyze the texts, context(s), and social significance of a public, professional, digital, and/or advanced academic genre and produce writing that meets, modifies, and subverts expectations.
Recommended: Satisfactory completion of the professional writing requirement (FSPW).
Restriction: Must have earned a minimum of 60 credits.

ENGL494 Editing and Document Design (3 Credits)
Principles of general editing for clarity, precision and correctness. Applications of the conventions of grammar, spelling, punctuation and usage, and organization for logic and accuracy. Working knowledge of the professional vocabulary of editing applied throughout the course.
Prerequisite: ENGL393 or ENGL391; or students who have taken courses with comparable content may contact the department.

ENGL495 Independent Study in Honors (1-3 Credits)
Completion and presentation of the senior honors project.
Prerequisite: ENGL373 and ENGL370.
Restriction: Must be in English Language and Literature program; and candidacy for honors in English.

ENGL497 English at Work (3 Credits)
Examines how English majors put their academic knowledge and skills to work in professional workplaces after graduation. Students learn strategies to research careers, and they shadow a person in a career of interest for a day. Students learn to compose different professional genres to write and speak about and for professional development and advancement, including inquiry letters, technical descriptions, professional portfolios, and elevator pitches. Students will critically examine the learning they have done in their undergraduate coursework and compose a vision for bringing that learning to life in their future work.
Prerequisite: ENGL301; and an ENGL course at the 300-level or higher.
Restriction: Must have earned a minimum of 60 credits.

ENGL498 Advanced Fiction Workshop (3 Credits)
An advanced class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and to colleagues' fiction, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.
Prerequisite: ENGL352; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.
Formerly: ENGL496.

ENGL499 Advanced Poetry Workshop (3 Credits)
An advanced class in the making of poetry. Intensive discussion of students' own poems. Readings include both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, and attendance at poetry readings.
Prerequisite: ENGL353; or permission of ARHU-English department.
Repeatable to: 9 credits.
Formerly: ENGL497.

ENGX - English Education Abroad

ENGX200 Writing From Research (3 Credits)
Prepares students to plan, research, and write academic-level research papers autonomously. Students are guided through all writing stages, from preparing an articulated research proposal, to collecting sources and arranging them in an annotated bibliography, to outlining, drafting, and, finally, completing the paper in accordance with current MLA guidelines.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX202 Fiction: Genre, Techniques, and Structure (3 Credits)
Designed to help students acquire the skills for reading, appreciating, writing, and critically analyzing fiction. This course intends to introduce the students to basic concepts about literary technique, elements of fiction, and innovation while honing their critical thinking skills.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX204 Writing Rome (3 Credits)
Explores the city of Rome through writing. On-site classes provide an interdisciplinary, studio-art approach to the generation of written work. Through the studied practice of descriptive writing and the examination of setting as a vital literary component, students will create their own textual map of the Eternal City.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX205 Creative Writing: Prose Fiction (3 Credits)
Introduces students to writing prose fiction through practice-based workshops and seminars. Students will explore the methodologies of writing fiction from a writer's perspective, and focus on form, structure, and narrative technique.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX206 Travel Writing (3 Credits)
Explores the genre of travel writing through the analysis of a wide range of works, including articles about food, art, nature, and culture. Takes students outside of the classroom and into the city of Florence and considers the principles of concise, clear, and entertaining prose that make travel writing worth reading.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX207 Creative Writing (3 Credits)
Examines and explores the different genres of creative writing through the study of prose and poetry by British, American, French and Russian authors from the Romantics to the present. Introduces the various elements of creative writing including plot, point of view, character, dialogue, voice and theme.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX210 Writing Italian Food (3 Credits)
Explores the history and customs of food, olive oil, and wine in Perugia and the surrounding region through food writing and visits to local restaurants, cheese makers, vineyards, and olive groves. Examines combinations of historical moment and type of food, such as the question of pizza, the origin of the aperitivo, and the arrival of coffee in Italy, while focusing on what makes a compelling article, techniques and skills related to food writing, and approaches to publication in online and print platforms.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11294. Education Abroad processes registrations for this course on behalf of students.

ENGX300 The Image of Barcelona in Literature (3 Credits)
After the Olympic Games of 1992, Barcelona became an international tourist destination; but a short visit cannot account for the cultural complexities of the Catalan capital. In order to know any city, to "dwell" in it, we need to become familiar with its oral history, paintings, architecture, sculpture, and literary texts.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ENGX302 From Literature to Social Media: Reading and Writing Italian Food (3 Credits)
Focuses on one important aspect (present in both fiction and nonfiction writing): the expression and description of sensory experiences through words. Examining literature as well as nonfictional food writings, students will discover that the art of writing about food and drink involves not only an interest in the gustatory experience, but also an ability to translate sensory experiences into words.
Formerly: ENGL379I.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG325. More information at ter.ps/UMPerugia.

ENGX303 Italian Tales and Stories: Creative Writing Through Literary Models (3 Credits)
Explores the process of transforming sensory impressions, individual feelings, personal experiences, and factual information into engaging and effective works of creative fiction and non-fiction. Students will read from a cross-section of Italian authors dealing with a wide range of topics and issues. They will also generate their own writing through a series of exercises designed to help the writer tap into new levels of awareness and creative energy. Students will also be involved in a series of 'literary walks' aimed at enhancing their ability to gather information from the exploration of Italian natural and urban landscapes.
Formerly: ENGL379W.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG 340. More information at ter.ps/UMPerugia.

ENGX305 Scandinavian Crime Fiction (3 Credits)
In Scandinavian crime fiction, the most fantastic murders take place, families fall apart, their dark secrets are exposed, and the validity of the Scandinavian countries' welfare system is questioned - all of this described in a distinctly Scandinavian tone and style.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ENGX306 Creative Writing (3 Credits)
Explores the creative process, giving students concrete ways to enhance their creative thought and writing. Through writing assignments and numerous inventive classroom exercises, students learn how to write more interesting characters, fascinating plots and colorful stories.
Credit Only Granted for: ENGX203 or ENGX306.
Formerly: ENGX203.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX307 Advanced Video Production and Post-Production (3 Credits)
Brings students' fluency of cinematic language to a more advanced stage by expanding upon and synthesizing the shooting and editing techniques. The class introduces the conceptual and technical framework necessary to shoot and edit dual-system sound films, block and shoot dialogue scenes, perform dramatic analysis to scripts, and apply that analysis to a more sophisticated use of camera work and complex editing strategies.
Additional Information: This course is offered as part of the Maryland-in-Romestudy abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX310 Mafia, Murder, and Mystery: Crime in Italian and American Cinema (3 Credits)
Studies how mafia and organized crime are presented in Italian and American cinematic texts. The course will examine the different expressions of the crime film genre, which dates back to the beginnings of filmmaking, focusing on the technical, visual, and aesthetic aspects of crime films.Cross-listed with: CINX310.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

ENGX311 European Storytelling: From Homer to Harry Potter (3 Credits)
An introduction to European oral tradition, as expressed in European myth-cycles, legends and fairytales, from the earliest known sources up to and including modern uses of this tradition.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX312 Live, Love or Die in Italy: Major Italian Writers in English Translation II (3 Credits)
As a sequel to Major Italian Writers I, this course explores modern and contemporary Italian literature through the reading, analysis, and discussion of late eighteenth, nineteenth, and twentieth century Italian novels in translation, by authors such as Foscolo, Verga, Camillo Boito, D'Annunzio, Svevo, Carlo Levi, and Morante. Students are encouraged to compare and contrast authors and books and to identify and discuss major literary periods and genres (such as Romanticism, Realism, Modernism and Neo-realism).
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX313 Creative Non-Fiction Writing (3 Credits)
Nonfiction is a genre that has grown more diverse and creative than ever, embracing all styles from serious to whimsical and encompassing every topic imaginable. This course will focus on the creative process and the generation of several different forms of writing within the nonfiction genre, including the personal essay, the memoir, biography, and the journalistic or magazine profile. Through the examination of professional examples of creative nonfiction, discussion, and critiques, students will become acquainted with the techniques and tools used to build a strong portfolio of literary and journalistic pieces.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX314 The Mafia in Italian Society, Literature and Film (3 Credits)
Explores representations of the Italian Mafia in literature and cinema, with reference also to the Italian-American context. Students will be introduced to the history of the mafia, starting from its beginnings in Sicily, and follow its historical and geographical evolution within, and also outside, Italy. The course will make reference to Italian literary texts as well as Italian and Italian-American cinematic representations of the phenomenon.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX400 Fashion, Media and Communication (3 Credits)
Fashion Writing is an extremely important aspect of cultural and creative nonfiction prose. With the rise of internet and mass journalism worldwide, the fashion and accessories industry has become increasingly focused on getting across the messages to audiences of all ages and backgrounds.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX401 Shakespeare's Italian Plays (3 Credits)
The intensive study of five or six of Shakespeare's comedies and tragedies set in Italy, ancient and early modern, with attention to English attitudes toward Italy and Shakespeare's use of Italy, the nature of comedy and tragedy, and the shape of Shakespeare's career.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. American University of Rome Course code: ENG 301 / ENG 309. More information at ter.ps/UMRome.

ENGX404 Travel Writing (3 Credits)
The world is full of fascinating people and places - and stories waiting to be told. Travel writers capture these stories and pass them on to their readers. Good travel writers make us care. In this class, you will learn how to identify relevant stories, how to gather material and how to release all of this in well-written pieces. Our main focus is narrative journalism - the kind of stories you would normally see as features in travel magazines.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX405 Hans Christian Andersen and the Danish Golden Age (3 Credits)
Hans Christian Andersen (1805-1875) is internationally known as the writer of fairy tales. Children all over the world know The Ugly Duckling, The Emperor's New Clothes, The Little Mermaid, The Princess and the Pea and other tales. But Andersen also wrote plays, novels, poems, travelogues and songs. This course will be a study of approximately 30 fairy tales by Hans Christian Andersen (1805-75) as well as extracts from his travelogues, poems, diaries and his autobiography, The Fairy Tale of My Life.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX406 The Literature of War - Europe and WWI (3 Credits)
Examines the various literary responses to war and the ways in which artists and writers have negotiated power, violence, and resistance within the context of military conflict.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX407 Italian Women Writers (3 Credits)
This course presents an overview of women's fiction in Italy from the turn-of-the-century context, with writers such as Neera and Sibilla Aleramo, to the present day, with Elena Ferrante and Dacia Maraini. The course will examine women's changing role within Italian society and issues such as sexual violence, motherhood, the search for self-determination and autonomy and paths to political awareness.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX410 Literary Editing and Publishing (3 Credits)
Designed to be an overview in literary editing for publication and will explore in-depth the publishing industry--the history, current trends, future possibilities--for both writers and editors. Students will develop many skills related to the publishing industry, such as copyediting, revision, query letters, literary critique and analysis, and submitting and reviewing work.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX411 Major American Authors: Hemingway (3 Credits)
Examines the life and expatriate writings of Ernest Hemingway, exploring his themes, style, and narrative technique. We will examine not only issues of style and technique but also how Hemingway's expatriate experience influenced his writing. Our major objective in this class will be to acquaint ourselves with the contributions of Hemingway to American literature through close reading and careful discussion of much of his works.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX412 Sense of Place in European Literature (3 Credits)
Explores and identifies the interrelation between place and text. We discover comparative perspectives on European literature through in-depth analysis and close readings of texts written by modern and classical European writers. Our geographic focus is primarily Denmark, Germany, the Baltic region, and Russia. The European Humanities core course includes a total of 18 classes, a core course week with a short study tour to the island of Fano, and a six day long study tour to Berlin, Germany.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX413 Colonial Literatures, Postcolonial Perspectives (3 Credits)
Introduces students to a selection of novels and short fiction written within the context of the European colonization of South Asia, South East Asia, Africa, the Middle East and the Americas. Focuses on non-European authors and the experience of colonialism from a non-European perspective. Explores postcolonial theory and its relevance to the discipline of Comparative Literature.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX414 Presentations of London in Modern European Literature and Film (3 Credits)
London has been the largest European city for the last two-and-a-half centuries and has played a dominant role in European culture since that time. This course explores the ways in which this idea is presented in examples of literature and film from the late nineteenth century to the present day.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX415 Terror, Transgression and Astonishment: the Gothic in the Long Nineteenth Century (3 Credits)
Explores why writers seem compelled to write about the gruesome, sordid, creepy, or just terrifying aspects of humanity through analyzing Gothic fiction in the late eighteenth century to the nineteenth century. Students will explore genres such as ghost stories or the supernatural, while also looking at a few texts that are considered "unclassifiably weird," to see how the Gothic and related genres emerge in relation to cultural and social trends.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX416 James Baldwin and American Civil Rights (3 Credits)
The movement for Civil Rights and Black Power in the US marked a decisive phase in the making of our contemporary world. This course uses the novels, short stories, and autobiographical reportage of James Baldwin as a framework for exploring the Civil Rights movement and Black Power, the relationship of race and sexuality, the "Americanness" of American literature, and Baldwin's own relationship with the Civil Rights movement as an openly homosexual man.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX417 Time, Narrative and Culture (3 Credits)
Examines how an understanding of narrative informs a wider concept of culture with a focus on strange temporal structures and time-experiments in contemporary fiction and their effect on how we experience time. Students will analyze texts that exhibit a variety of temporal structures including backwards narration, flashforward, trans-historical jumps, and fuzzy temporality, as well as explore philosophical and social theories of time.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX421 In an Ideal World: Utopias from Plato to the Present (3 Credits)
Delves into the idea of the Utopia as both its own literary genre and as a means of thinking about political ideals and practice. This course will look at the development of the Utopia genre across time, ways in which fiction serves as a way to debate and comment on political practice and how political arguments are portrayed through fictional and metaphorical devices.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX422 American Money: Novels 1793-1930 (3 Credits)
Explores the great American subject of money from the foundations of the Republic to the Jazz Age. Students will study works of fiction that focus on capital, thrift, production, high finance, self-sufficiency, and fraud, and consider the effects of the recent banking crisis and history and psychology of financial behavior, and of money itself.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX423 After Postcolonialism (3 Credits)
Explores the limits and boundaries of postcolonial literature. Offers a contemporary focus (including the War on Terror and Islamophobia) and takes into account regions that are not strictly postcolonial (including China and the U.S.) Uses critical theory to extend the idea of the "postcolonial" and study how we conceptualize the present moment.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX425 How Are We Feeling?: Affect and/in Contemporary Literature and Culture (3 Credits)
Explores how the social, psychological, and philosophical understandings of the way we feel, and represent or evoke feeling, influence how authors use aesthetics, audience, and ethics in relation to affective states such as remorse, boredom, nostalgia, fascination, rebellion, and expectation. This course examines a selection of fiction, poetry, creative nonfiction, life writing, television, and film to understand how cultural texts represent the affective experiences of contemporary life.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENGX426 The Politics of Irish Literature, from the Eighteenth to the Twentieth Century (3 Credits)
Irish writing in the English language has re-shaped cultural history through the interventions of great originals such as Yeats, Joyce, and Beckett. This course looks at Irish literature through a political lens through the study of texts by a variety of authors and relates these works to historical contexts such as the Union with Britain, the Famine of the 1840s, the cultural revival at the turn of the twentieth century, the Irish revolution, and the Northern Irish crisis.
Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at https://globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ENMA - Engineering, Materials

ENMA150 Materials of Civilization (3 Credits)
The discovery of new materials has shaped history and built civilizations. The utilization, properties and production techniques of materials from the Bronze Age up through modern times and into the future will be traced. These materials are explained by considering their atomic structure, the binding forces between atoms and their arrangement, and how controlling the structure controls the materials properties.

ENMA165 Introduction to Programming with Python (3 Credits)
Introduces concepts of computer programming using Python from the point-of-view of engineers and scientists (as opposed to computer science). Students will learn the fundamentals of writing and implementing code, and exposed to practical aspects of programming as may be relevant to their studies and careers in the materials field. Topics/activities of note include data management and analysis, laboratory-related scripting, simple automation, and introduction to computational materials concepts.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENEE140 or ENMA165.

ENMA180 Materials Science and Engineering: The Field and the Future (1 Credit)
Overview of the profession and the components of the Materials Science and Engineering program. Students will become familiar with the departmental faculty, areas of specialization within MSE, professional society student chapter, research opportunities and other resources available to students.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENMA201 Bigger, Faster, Better: The Quest for Absolute Technology (3 Credits)
Can one prevent the transformation of technology from a friend to foe? Constant technological change characterizes our current lives and future, but ambivalence marks our relationships with technology. Students will be introduced to concepts necessary to understand scientific, engineering and societal driving forces of selected technological transformations, and the conflicts inherent in introduction of new technologies. We investigate approaches to judicious implementation of technology to prevent it changing from friend to foe.
Credit Only Granted for: ENMA201 or ENMA289A.
Formerly: ENMA289A.

ENMA289A Bigger, Faster, Better: The Quest for Absolute Technology (3 Credits)
Can one prevent the transformation of technology from a friend to foe? Constant technological change characterizes our current lives and future, but ambivalence marks our relationships with technology. Students will be introduced to concepts necessary to understand scientific, engineering and societal driving forces of selected technological transformations, and the conflicts inherent in introduction of new technologies. We investigate approaches to judicious implementation of technology to prevent it changing from friend to foe.
Credit Only Granted for: ENMA201 or ENMA289A.
Formerly: ENMA289A.

ENMA300 Introduction to Materials Engineering (3 Credits)
Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.
Prerequisite: ENES100; and permission of ENGR-Materials Science & Engineering department.
Corequisite: MATH241.
Recommended: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Mechanical Engineering department. Cross-listed with ENME382.
Credit Only Granted for: ENMA300 or ENME382.

ENMA301 Modern Materials Engineering (3 Credits)
Five topical areas will be presented, each leading up to specific applications that have recently come to market or are currently experiencing heavy research and development. The goal of each module will be to introduce the basic materials science principles necessary to understand these new areas.
Prerequisite: ENMA180; or students who have taken courses with comparable content may contact the department. And ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA312 Experimental Methods in Materials Science (3 Credits)
Introduction to experimental methods in materials characterization; synthesis of colloidal nanoparticles; X-ray diffraction and light scattering; optical microscopy; thermal conductivity and expansion; electrical measurements; heat capacity; computational materials design.
Prerequisite: ENMA300.
Corequisite: ENMA460.
Restriction: Junior standing or higher.

ENMA315 Archeology meets Technology: Introduction to Archeometry (3 Credits)
Focuses on the application of scientific methods of analysis to archaeological materials including bone, stone, pottery, and metal. Methods include absolute dating, remote sensing, optical and SEM microscopy, elemental and isotopic analysis. Laboratory sections provide hands-on experience with a variety of archaeological materials and analytical methods.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Recommended: Some knowledge of archaeology and archaeological methods, geology or chemistry is useful, but not required.

ENMA362 Mechanical Properties (3 Credits)
Overview of Mechanical Behavior, Elastic Behavior, Dislocations, Plastic Deformation, Strengthening of Crystalline Materials, Composite Materials, High Temperature Deformation of Crystalline Materials, Permanent Deformation of Noncrystalline Materials, Tensile Fracture at Low Temperatures, Engineering Aspects of Fracture, High Temperature Fracture, Fatigue, and Experimental determination of Mechanical Properties including Hardness of Metals and Strength of Metals, Polymers, Ceramics and Composites.
Prerequisite: ENMA300.
Restriction: Junior standing or higher; and permission of ENGR-Materials Science & Engineering department.

ENMA386 Experiential Learning (3-6 Credits)
Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENMA400 Introduction to Atomistic Modeling in Materials (3 Credits)
This is an introductory course designed to study atomistic modeling and simulation techniques used in materials research. This course covers the theories, methods, and applications of atomistic-scale modeling techniques in simulating, understanding, and predicting the properties of materials. Specific topics include: molecular statics using empirical force fields; quantum mechanical methods including density functional theory; molecular dynamics simulations; and Monte Carlo and kinetic Monte Carlo modeling.
Prerequisite: ENMA300, MATH206, and ENMA460.
Recommended: Basic knowledge in quantum mechanics (preferred but not required); basic knowledge in statistical mechanics (preferred but not required). Also offered as: ENMA600.
Credit Only Granted for: ENMA489A, ENMA400, ENMA698A, or ENMA600.
Formerly: ENMA489A.

ENMA410 Materials for Energy I (3 Credits)
The goal is to demonstrate the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. There will be a discussion of U.S. and global energy and related environmental issues. Topics covered include: fuel cells and batteries (electrochemical energy conversion and storage); catalysts and membrane separations (fossil fuel and biomass energy conversion); and nuclear fuels.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA410 or ENMA489H.
Formerly: ENMA489H.

ENMA411 Materials for Energy II (3 Credits)
Demonstrates the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. Materials for Energy is a two-part course based on material functionality; however, they are independent and neither is a prerequisite for the other. Materials for Energy II will focus on electrical, optical, thermal, and mechanically functional materials for energy devices. Solar cells, solar fuel, solar thermal, energy efficient lighting, building energy, thermoelectric and wind energy will be covered.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA411 or ENMA489I.
Formerly: ENMA489I.

ENMA412 Fundamentals of Photovoltaics (3 Credits)
Overview of the fundamentals of photovoltaic devices, including principles of operation, with emphasis on the materials science aspects of the different technologies available.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA414 Introduction to Solid State Ionics (3 Credits)
Solid State Ionics is the study of point defects in crystalline and non-crystalline solids; defect equilibria and transport; the influence of chemical and electric potentials, interfaces, and association; and the application of ionically conducting solids in solid-state electrochemical transducer systems and devices.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA414 or ENMA489W.
Formerly: ENMA489W.

ENMA421 Design of Composites (3 Credits)
Fundamentals of design, processing and selection composite materials for structural applications will be covered. The topics include a review of all classes of materials, an in-depth analysis of micro and macro mechanical behavior including interactions at the two-phase interfaces, modeling of composite morphologies for optimal microstructures, material aspects, cost considerations, processing methods including consideration of chemical reactions and stability of the interfaces, and materials selection considerations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA421 or ENMA489A.
Formerly: ENMA489A.

ENMA422 Radiation Effects of Materials (3 Credits)
Ionizing radiation, radiation dosimetry and sensors, radiation processing, radiation effects on: polymers, metals, semiconductors, liquids, and gases. Radiation in advanced manufacturing, radiation-physical technology.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA422 or ENMA489E.
Formerly: ENMA489E.

ENMA425 Introduction to Biomaterials (3 Credits)
Examination of materials used in humans and other biological systems in terms of the relationships between structure, fundamental properties and functional behavior. Replacement materials such as implants, assistive devices such as insulin pumps and pacemakers, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds, and biocompatibility will be covered.
Recommended: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

ENMA426 Reliability of Materials (3 Credits)
Students are taught the basic degradation mechanisms of materials, through the understanding of the physics, chemistry, mechanics of such mechanisms. Mechanical failure mechanisms concentrate on fatigue, and creep. Chemical failure mechanisms emphasize corrosion and oxidation. Physical mechanisms such as diffusion, electromigration, defects and defect migration, surface trapping mechanisms, charge creation and migration are also included.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA426 or ENMA489R.
Formerly: ENMA489R.

ENMA430 Quantum Size Effects in Nanomaterials (3 Credits)
Surveys materials systems whose properties are governed by quantum mechanical phenomena. The time-independent Schrodinger equation is employed to relate materials structure and size to their electrical, thermal and optical properties. Integrated throughout the course are (1) surveys of approaches for the synthesis of the nanoscale structures (nanoparticles, nanowires, nanotubes, etc.), (2) computer-based exercises, (3) review of influential articles from the scientific literature, and (4) in-depth analysis of devices and applications that utilize the quantum materials.
Prerequisite: PHYS431 or ENMA460; and (CHEM231 or CHEM481).

ENMA431 Nanomechanics of Biomaterials (3 Credits)
Focuses on the latest scientific developments and discoveries in the nanoscale structure and properties of biological materials. The course begins with introductory lectures on the various nanostructures of biomaterials, and their physiological roles under mechanical forces. General aspects of biopolymers, protein folding, and self-assembly are also covered. Next, a series of in-depth lectures are presented on the characterization methods of nanomechanical properties using single molecule techniques. Finally, current applications of nanobiomaterials in the area of molecular machines, molecular self-assembly, and nanoscaffold are discussed.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA431 or ENMA489B.
Formerly: ENMA489B.

ENMA435 Wide Bandgap Materials and Devices (3 Credits)
Presents the materials science of wide bandgap materials and analyzes the defects present in such materials from a device performance point of view.
Prerequisite: ENMA300 and ENMA465.
Corequisite: ENMA460.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA635.
Credit Only Granted for: ENMA435 or ENMA635.

ENMA436 Introduction to Quantum Materials and Devices (3 Credits)
Quantum materials and devices are an emerging field in materials engineering and physics which offer new approaches to electronics and photonics. This course serves as an introduction to quantum materials and their applications in quantum technologies. It will teach concepts needed to understand the quantum mechanical properties of materials and connect their fundamental properties to quantum device applications. Topics will include low-dimensional materials, strongly correlated electron systems, topology in solids, and light-matter interactions
Prerequisite: ENMA460 and ENMA461 .
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA636.
Credit Only Granted for: ENMA436 or ENMA636.

ENMA437 Machine Learning for Materials Science (3 Credits)
Familiarizes students with basic as well as state of the art knowledge of machine learning and its applications to materials science and engineering. Covers the range of machine learning topics with applications including feature identification and extraction, determining predictive descriptors, uncertainty analysis, and identifying the most informative experiment to perform next. One focus of the class is to build the skills necessary for developing an autonomous materials research system, where machine learning controls experiment design, execution, and analysis in a closed-loop.
Prerequisite: MATH206, ENMA300, and MATH461.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA637.
Credit Only Granted for: ENMA489L, ENMA437 or ENMA637.
Formerly: ENMA489L.

ENMA440 Nano Plasma Processing of Materials (3 Credits)
Sustaining mechanisms of plasmas are covered, especially low-pressure electrical gas discharges, fundamental plasma physics, sheath formation, electric and magnetic field effects, plasma-surface interactions in chemically reactive systems, plasma diagnostic techniques and selected industrial applications of low pressure plasmas.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA440, ENMA489P, ENMA640, or ENMA698P.
Formerly: ENMA489P.

ENMA441 Characterization of Materials (3 Credits)
Techniques to characterize the properties of materials whose characteristic dimensions range from nanometers to macroscopic. These include conventional crystalline and noncrystalline materials, with a special attention to materials of current technological interest. The course will include recent results from the scientific literature.
Prerequisite: ENMA300 and MATH206.
Restriction: Permission of ENGR-Materials Science & Engineering department; and senior standing.
Credit Only Granted for: ENMA489T or ENMA441.
Formerly: ENMA489T.

ENMA442 Nanomaterials (3 Credits)
An exploration of materials whose structure places them at the boundary between small objects and large molecules. Having characteristic dimensions in the range of 1-100 nanometers, these materials are difficult to synthesize and characterize but are nevertheless at the forefront of science and technology in many fields. Also, the methods for creating, manipulating and measuring these materials with an emphasis on the current scientific literature will be covered. The novel properties and potential applications will also be addressed.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA442 or ENMA489N.
Formerly: ENMA489N.

ENMA443 Phontonic Materials, Devices and Reliability (3 Credits)
The course focuses on the understanding of the basic optical processes in semiconductors, dielectrics and organic materials. The application of such materials in systems composed of waveguides, light emitting diodes and lasers, as well as modulators is developed.
Restriction: Permission of ENGR-Materials Science & Engineering department; and junior standing or higher.
Credit Only Granted for: ENMA443 or ENMA489Z.
Formerly: ENMA489Z.

ENMA445 Liquid Crystals and Structured Soft Materials (3 Credits)
Elective course on the properties and behavior of liquid crystals and related soft materials, and their relationship to biomaterials and to applications.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA445 or ENMA489L.
Formerly: ENMA489L.

ENMA460 Introduction to Solid State Physics (3 Credits)
Classes of materials; introduction to basic ideal and real materials' behavior including mechanical, electrical, thermal, magnetic and optical responses of materials; importance of microstructure in behavior. One application of each property will be discussed in detail.
Prerequisite: PHYS271, PHYS270, and MATH241.
Restriction: Junior standing or higher; and must be in the Engineering: Materials Science program or Physics program. Cross-listed with: PHYS431.
Credit Only Granted for: ENMA460 or PHYS431.
Additional Information: Materials Engineering students take ENMA460 and Physics students take PHYS431.

ENMA461 Thermodynamics of Materials (3 Credits)
Thermodynamic aspects of materials; basic concepts and their application in design and processing of materials and systems. Topics include: energy, entropy, adiabatic and isothermal processes, internal and free energy, heat capacity, phase equilibria and surfaces and interfaces.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA462 Smart Materials (3 Credits)
A fundamental understanding will be provided as it relates to the following topics: ferroic materials, ferromagnets, ferroelectric materials, shape memory alloys and multiferroic materials that are simultaneously ferromagnetic and ferroelectric. The ferroic properties will be discussed on an atomic, nano- and micro-scales so that actual and potential applications on those scales become clear. Examples of those applications will be presented.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA462 or ENMA489B.
Formerly: ENMA489B.

ENMA463 Macroprocessing of Materials (3 Credits)
Processing of modern, bulk engineering materials. Raw materials, forming, firing, finishing and joining. More emphasis on metals and ceramics than polymers.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA464 Environmental Effects on Engineering Materials (3 Credits)
Introduction to the phenomena associated with the resistance of materials to damage under severe environmental conditions. Oxidation, corrosion, stress corrosion, corrosion fatigue and radiation damage are examined from the point of view of mechanism and influence on the properties of materials. Methods of corrosion protection and criteria for selection of materials for use in radiation environments.
Prerequisite: ENMA300. Or permission of ENGR-Materials Science & Engineering department; and permission of instructor.

ENMA465 Microprocessing Materials (3 Credits)
Micro and nanoscale processing of materials. Emphasis on thin film processing for advanced technologies.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA363, ENMA489B, or ENMA465.
Formerly: ENMA363.

ENMA466 Advanced Materials Fabrication Laboratory (3 Credits)
This course allows students an opportunity to study advanced materials systems in depth through a combination of lectures and hands-on laboratory experiments. Students will be trained in materials processing and characterization techniques. Each student will fabricate materials and devices in our state-of-the-art nanofabrication clean room facility (Fablab), as well as evaluate them using a variety of characterization techniques.
Prerequisite: ENMA465; and permission of ENGR-Materials Science & Engineering department.

ENMA470 Materials Selection for Engineering Design (3 Credits)
Students will learn about materials classes, properties, limitations and applications and the methodology of materials selection in engineering design.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Restriction: Junior standing or higher.
Credit Only Granted for: ENMA 470 or ENMA 489O.
Formerly: ENMA 489O.

ENMA471 Kinetics, Diffusion and Phase Transformations (3 Credits)
Fundamentals of diffusion, the kinetics of reactions including nucleation and growth and phase transformations in materials.
Prerequisite: Must have completed or be concurrently enrolled in ENMA461.
Restriction: Junior standing or higher; or permission of ENGR-Materials Science & Engineering department.

ENMA472 Additive Manufacturing of Materials (3 Credits)
Additive manufacturing approaches for metals, ceramics and polymers will be explored in terms of manufacturability and how processing parameters affect microstructure and properties. The course will include projects, including a Terrapin Works project to design and build a part, to develop an understanding of the current state of additive manufacturing, its future promise and its limitations.
Prerequisite: ENMA300.
Restriction: Must be in Engineering: Materials Science program.
Credit Only Granted for: ENMA472 or ENMA672.

ENMA473 Engineering Using High Strength Metals and Alloys (3 Credits)
This is a class focused on the materials engineering challenges of applying high strength metals and alloys to solutions. The extraordinary properties of these alloys derive from (1) highly metastable microstructures, (2) high strengths and melting points of the base metals, (3) complicated processing and fabrication procedures, and (4) their resulting complex behavior in extreme environments. This course will give you the knowledge base you need to select, apply and troubleshoot the performance of high strength metals and alloys in a variety of applications.
Prerequisite: ENMA300, ENMA362, and ENMA461; and permission of ENGR-Materials Science & Engineering department.

ENMA474 Introduction to Computational Materials Science (3 Credits)
This is an introductory course aiming for junior and senior undergraduate students to study atomistic modeling and simulation techniques that are used in materials science. This course covers the theories and applications of atomistic scale modeling techniques to simulate, understand, and predict the properties of materials. Topics include: molecular statics, quantum mechanical methods, molecular dynamics simulations and Monte Carlo simulations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA474 or ENMA489A.
Formerly: ENMA489A.

ENMA475 Fundamentals of Diffraction Techniques in Materials Science (3 Credits)
This course looks at the advanced methods of x-ray scattering/diffraction available thanks to the more powerful sources available to us. The availability of these sources enables us to study liquid crystals, polymers, nanomaterials, quasiorganized materials (including nano) and disordered materials.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA475 or ENMA489M.
Formerly: ENMA489M.

ENMA476 NanoManufacturing: Materials Design and Systems Integration (3 Credits)
The fundamentals of nanomanufacturing based on state-of-the-art and future prospects in materials design and systems integration. The course examines functional nanomaterials design and synthesis, structural assembly from nanoscale to macroscale, and device fabrication. Distinct from the current curricular paradigm in many nanotechnology programs that focus on underlying science, this course emphasizes the immediate need for scale-up, process robustness, and system integration issues. Featuring case studies from industry, end of chapter problems, and study questions, the course is for upper-level undergraduate and graduate students, who are interested in the future of manufacturing innovation and technology.
Restriction: Must be in Engineering: Materials Science program.

ENMA481 Introduction to Electronic and Optical Materials (3 Credits)
Electronic, optical and magnetic properties of materials. Emphasis on materials for advanced optoelectronic and magnetic devices and the relationship between properties and the processing/fabrication conditions.
Prerequisite: ENMA300; or students who have taken courses with comparable content may contact the department.

ENMA482 Introduction to Electron Microscopy (3 Credits)
An introduction of the basic principles of operation for modern electron microscopes. Details will be given on the construction of microscopes, their basic operation, and the types of questions that can be addressed with an electron microscope. Emphasis will be placed on a conceptual understanding of the underlying theories. Where appropriate, mathematical descriptions will be utilized. Upon completion of this course, students will be excepted to have a basic understanding sufficient to give interpretations of microscopy images and to suggest the correct tool or approach for certain research studies.
Prerequisite: PHYS142, PHYS122, or PHYS260.
Credit Only Granted for: ENMA482 or ENMA489J.
Formerly: ENMA489J.

ENMA484 Fundamentals of Finite Element Modeling (3 Credits)
A brief review of mechanical behavior of materials, introduction to Finite Element Modeling (FEM), and procedures for predicting mechanical behavior of materials by FEM using computer software (at present ANSYS). The FEM procedures include, setting up the model, mesh generation, data input and interpretation of the results.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA484 or ENMA489F.
Formerly: ENMA489F.

ENMA486 Seminar in Materials Science and Engineering (1 Credit)
Current research in materials science and engineering and related fields. The lectures are presented by scientists and engineers from academia, national laboratory, US government, etc., in the format of seminars.
Restriction: Must be in Engineering: Materials Science program.

ENMA487 Capstone Preparation (1 Credit)
In preparation for the senior level design course, students will do background research and develop white papers from which teams will form around short listed design projects. The projects should focus on a society, industry, military or technological based problem in Materials Science and Engineering leading to a design and strategy to address the problem in the following course, ENMA 490. The course will include written and oral presentations of the white papers and team proposals.
Restriction: Must be in Engineering: Materials Science program; and senior standing; and permission of ENGR-Materials Science & Engineering department.

ENMA489 Selected Topics in Engineering Materials (3 Credits)
Selected topics of current importance in materials science and engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 12 credits if content differs.

ENMA490 Materials Design (3 Credits)
Capstone design course. Students work in teams on projects evaluating a society or industry based materials problem and then design and evaluate a strategy to minimize or eliminate the problem; includes written and oral presentations.
Prerequisite: Minimum grade of C- in ENMA487.
Restriction: Senior standing.

ENMA495 Polymeric Engineering Materials I (3 Credits)
Study of polymeric engineering materials and the relationship to structural type. Elasticity, viscoelasticity, anelasticity and plasticity of single and multiphase materials. Emphasis is on polymetric materials.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA496 Processing and Engineering of Polymers (3 Credits)
A comprehensive analysis of processing and engineering techniques for the conversion of polymeric materials into useful products. Evaluation of the performance of polymer processes, design of polymer processing equipment, effect of processing on the structure and properties of polymeric materials.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA499 Senior Laboratory Project (1-3 Credits)
Students work with a faculty member on an individual laboratory project in one or more of the areas of engineering materials. Students will design and carry out experiments, interpret data and prepare a comprehensive laboratory report.
Restriction: Senior standing.

ENME - Engineering, Mechanical

ENME201 Careers in Mechanical Engineering (1 Credit)
The Mechanical Engineering Curriculum, Career Paths. Research areas in the Mechanical Engineering Department. The Mechanical Engineering Profession.

ENME202 Computing Fundamentals for Engineers (3 Credits)
Introduction to computational tools for the solution of engineering problems. C++ & MATLAB programming including branching and loops, functions, file handling, arrays, and data structures. Students will be introduced to object-oriented programming, basic computing, algorithms, and principles of software engineering.
Corequisite: Must be concurrently enrolled in MATH141.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENAE202 or ENME202.

ENME207 Fabrication and Machine Tool Practices for Engineering (2 Credits)
In order to make the best decisions in product design and development, it is important to understand the capabilities and limitations of different fabrication techniques. Students will learn to identify machine parts and functions, define machine shop terminology, calculate shop formulas and theories, execute machine operations, and apply proper measuring tools.
Prerequisite: PHYS161. And ENME272; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME208 Introduction to Automotive Engineering and Design (2 Credits)
Selected concepts in automotive engineering and design at the introductory level utilizing the Terps Racing Baja SAE student project as a learning instrument. This class compliments ENME408, Automotive Design, which focuses on the Terps Racing Formula SAE car.
Prerequisite: ENES100.
Recommended: ENES220; and ENES221.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 4 credits if content differs.

ENME272 Introduction to Computer Aided Design (2 Credits)
Fundamentals of CAD, using solid modeling packages (Pro/E, SolidWorks, and Autodesk Inventor). Two and three dimensional drawing. Dimensioning and specifications. Introduction of CAD based analysis tools. Students will complete a design project.
Prerequisite: Must have completed or be concurrently enrolled in MATH141.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME414 or ENME272.

ENME289 Exploring Topics in Mechanical Engineering (2 Credits)
Introductory Design Topics in the Field of Mechanical Engineering.
Repeatable to: 4 credits if content differs.

ENME331 Fluid Mechanics (3 Credits)
Principles of fluid mechanics. Mass, momentum and energy conservation. Hydrostatics. Control volume analysis. Internal and external flow. Boundary layers. Modern measurement techniques. Computer analysis. Laboratory experiments.
Prerequisite: ENES232 and ENES221.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENME332 Transfer Processes (3 Credits)
The principles of heat transfer. Conduction in solids. Convection. Radiation. Modern measurement techniques. Computer analysis.
Prerequisite: ENME331.
Credit Only Granted for: ENME332 or ENFP312.

ENME350 Electronics and Instrumentation I (3 Credits)
Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.
Prerequisite: PHYS271 and PHYS270.

ENME351 Electronics and Instrumentation II (3 Credits)
Continuation of ENME 350. Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.
Prerequisite: PHYS271, ENME350, and PHYS270.

ENME361 Vibration, Controls and Optimization I (3 Credits)
Fundamentals of vibration, controls and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical description of system response, system stability, control and optimization. Optimal design of mechanical systems.
Prerequisite: ENES220, ENES221, and MATH246; and (MATH206 or ENME202).
Restriction: Must be in Engineering: Mechanical program.

ENME371 Product Engineering and Manufacturing (3 Credits)
Business aspects of engineering product development. Relationship of design and manufacturing. Product specification. Statistical process control. Design team development. The development process.
Prerequisite: ENES221; and (ENME392 or STAT400).
Restriction: Must be in Engineering: Mechanical program.

ENME382 Introduction to Materials Engineering (3 Credits)
Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.
Prerequisite: ENES100; and permission of ENGR-Mechanical Engineering department.
Corequisite: MATH241.
Recommended: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Mechanical Engineering department.
Cross-listed with ENMA300.
Credit Only Granted for: ENMA300 or ENME382.

ENME386 Experiential Learning (3-6 Credits)
Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENME392 Statistical Methods for Product and Processes Development (3 Credits)
Integrated statistical methodology for the improvement of products and processes in terms of performance, quality and cost. Designed experimentation. Statistical process control. Software application. Laboratory activities.
Prerequisite: MATH241.

ENME398 Honors Research Project (1-3 Credits)

ENME400 Machine Design (3 Credits)
Design of mechanical elements and planar machines. Failure theories. Design of pressure vessels, joints, rotating elements, and transmission elements. Kinematic structures, graphical, analytical, and numerical analysis and synthesis of linkages, gear trains, and flywheels are covered.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME406 Roller Coaster Engineering (3 Credits)
Engineering of roller coasters including: specifications, concept creation, structural design, car design, and safety. Course covers biomechanics and rider kinematics as well as manufacturing aspects.
Prerequisite: ENES220, ENES221, and ENME272. And ENME202; or MATH206.
Corequisite: ENME400.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME407 Sustainability, Climate Change and Renewable Energy Systems (3 Credits)
Countries around the world are developing innovative and sustainable solutions that not only help to protect the environment from the threats of global climate change, but that also can improve human health and quality of life. In this course students will explore solutions to climate change, as well as geothermal and hydroelectric energy systems and their applications.
Prerequisite: PHYS260; or permission of ENGR-Mechanical Engineering department.
Restriction: Students must have completed a minimum of 60 credits by the time they will enroll in this course.

ENME408 Selected Topics in Engineering Design (3 Credits)
Creativity and innovation in design. Generalized performance analysis, reliability and optimization as applied to the design of components and engineering systems. Use of computers in design of multivariable systems.
Restriction: Must be in Engineering: Mechanical program; and senior standing. Or permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENME410 Design Optimization (3 Credits)
Introduction to the formal process of design optimization, including analytical and computational methods. Step by step design optimization techniques. Design optimization concepts, necessary and sufficient optimality conditions and solution techniques. Solution evaluation and tradeoff exploration.
Prerequisite: ENME271; or MATH206.
Restriction: Permission of ENGR-Mechanical Engineering department; and junior or senior standing.

ENME413 Bio-Inspired Robotics (3 Credits)
Fundamentals and applications of biologically inspired robots, traditional robots, and design and fabrication of biologically inspired robots.
Prerequisite: Must have completed or be concurrently enrolled in ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME413 or ENME489L.
Formerly: ENME489L.

ENME414 Computer-Aided Design (3 Credits)
Introduction to computer graphics. Plotting and drawing with computer software. Principles of writing interactive software. The applications of computer graphics in computer-aided design. Computer-aided design project.
Prerequisite: MATH241; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENME 414 or ENME272.

ENME416 Additive Manufacturing (3 Credits)
Develop a comprehensive understanding of fundamental additive manufacturing, 3D printing approaches, including: extrusion-based deposition, stereolithography, powder bed-based melting, and inkjet-based deposition. Cultivate a design for-additive manufacturing skillset for CAD and CAM methodologies to produce successful 3D prints. Fabricate 3D mechanical objects using a variety of 3D printing technologies on campus. Execute a design project that demonstrates how additive manufacturing technologies can overcome critical limitations of traditional manufacturing processes.
Prerequisite: ENME331. And ENME272; or ENME414.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME417 Numerical Methods in Engineering (3 Credits)
Covers the fundamental aspects of how to apply analytical mathematical concepts to discrete data. The course is aimed at graduate students and senior undergraduate students in any area of engineering, and treats the material in a general manner that is not specific to any application or field of specialization.
Recommended: Senior standing.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with: ENME745.
Credit Only Granted for: ENME745, ENME808B, ENME417 or ENME489J.
Formerly: ENME489J.

ENME421 Engineering Design Ideation (3 Credits)
Engineering Design Methods is a technical elective for engineering students who wish to improve their ability to produce design ideas (i.e., the ideation process) for further development into conceptual ideas. Ideation is the creative, idea generation activity that happens at the beginning of the conceptual design process. Ideation methods are often built around creativity improving strategies and are often designed for individual use prior to presenting the results in a team setting.
Prerequisite: Must have completed or be concurrently enrolled in ENME371.
Restriction: Junior standing or higher.
Additional Information: Ideally, this course should be taken prior to capstone design.

ENME422 Indoor Environment and Mechanical Systems (3 Credits)
Fundamentals of indoor air quality and its measurements. Exploration of air cleaning technologies for gaseous, particulate and infectious agent contaminants. Simulations of air flow and contaminants with multi-zone models to allow testing of both contaminant dispersion in buildings and effectiveness of air cleaning technologies.
Prerequisite: ENES232 and ENME332. Jointly offered with: ENME753.
Credit Only Granted for: ENME422 or ENME753.

ENME423 Modern Climate Control and Building Energy Design/Analysis (3 Credits)
Fundamentals and design calculations of heat and moisture transfer in buildings; evaluation of cooling, heating and power requirements of buildings; building energy consumption simulations, use of alternative energy and energy conservation measures in buildings; fundamentals of fans/pumps and air/water distribution in buildings; introduction to refrigeration and energy systems for data centers and other mission-critical facilities.
Prerequisite: ENES232.
Corequisite: ENME332.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME424 Urban Microclimate and Energy (3 Credits)
Urban microclimate from the perspective of transient heat and mass transfer using building energy simulations for building clusters as well as LEED building certification criteria. The focus is on understanding building energy consumption and environmental impacts from the individual building scale to a neighborhood scale.
Prerequisite: Must have completed or be concurrently enrolled in ENME332.
Recommended: ENME423.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME424 or ENME808I.

ENME426 Production Management (3 Credits)
The basic concepts and models needed to understand and design manufacturing systems, including the history of manufacturing, performance measures, queuing systems, variability, production planning and scheduling, lean manufacturing, and pull production control.
Credit Only Granted for: BMGT385 or ENME426.

ENME427 CSI Mechanical: Finding Reasons for Compromised Structural Integity (3 Credits)
Understanding the causes of product failures including the political, societal, economic, environmental, and ethical impact of these failures, and the strategies to avoid, postpone, or mitigate them. Students will be encouraged to combine concepts from engineering, natural sciences, social sciences, and the humanities to address these complex issues. Basics of failure analysis, forensics, and reliability engineering and the scientific fundamentals underlying the most common types of failure. Issues of legal liability. Methods for monitoring the existing condition of a structure.
Prerequisite: ENES220 and ENME382.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME430 Fundamentals of Nuclear Reactor Engineering (3 Credits)
Fundamental aspects of nuclear physics and nuclear engineering, including nuclear interactions; various types of radiation and their effects on materials and humans; and basic reactor physics topics, including simplified theory of reactor critically.
Prerequisite: MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME431 Nuclear Reactor Systems and Safety (3 Credits)
Engineering, material and thermal aspects of light water reactors, fast reactors, high temperature gas reactors, heavy water moderated reactors, breeder reactors, advanced reactors including GEN IV designs. Evolution of light water reactor safety and regulation in the US that has culminated in the current body of regulations.
Prerequisite: MATH246.
Recommended: ENME430.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME432 Reactor and Radiation Measurements Laboratory (3 Credits)
Basics concepts of nuclear radiation and radiation detectors including types of radiation, radioactive decay, and interactions of radiation with matter.
Prerequisite: ENME430 and MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME433 Nuclear Reactor Design (3 Credits)
Principles of nuclear reactor engineering including nuclear reactor system design, materials, thermal-hydraulics, shielding, mechanical design, and safety analysis.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME433 or ENME489T.
Formerly: ENME489T.

ENME435 Remote Sensing Instrumentation (3 Credits)
Explores the fundamentals of remote sensing techniques including light detection and ranging (lidar), radar, and computer vision in the context of emerging technologies such as autonomous navigation, terrain modeling, and embedded smart devices.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME435 or ENME489Y.
Formerly: ENME489Y.

ENME436 Renewable Energy (3 Credits)
Fundamentals, design/analysis tools, and state of the art renewable energy technologies. Energy resources and global perspectives of current and future energy demand/consumption trends, followed by prime renewable energy technologies, including wind, solar, hydro, geothermal, and ocean thermal energy conversion. Economics of renewable energy, energy conservation opportunities, CO2 capture and storage, and thermal energy storage.
Prerequisite: ENME331.
Restriction: Must be in a major within the ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489K or ENME436.
Formerly: ENME489K.

ENME440 Applied Machine Learning for Engineering and Design (3 Credits)
Learn how to apply techniques from Artificial Intelligence and Machine Learning to solve engineering problems and design new products or systems. Design and build a personal or research project that demonstrates how computational learning algorithms can solve difficult tasks in areas you are interested in. Master how to interpret and transfer state-of-the-art techniques from computer science to practical engineering situations and make smart implementation decisions.
Prerequisite: ENME392; or permission of instructor.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME440, ENME808E, or ENME743.

ENME441 Mechatronics and the Internet of Things (3 Credits)
Mechatronics integrates dynamical systems, transducers, computation, control and design. Students will gain experience with digital circuit development, mechatronics design and participate in labs and projects culminating in the development of a mobile robotic platform. Course aims to reveal the dynamic nature of mechanical components where the domains of mechanics, electronics and software converge. Project driven, hands-on course in which student will learn about the Raspberry Pi platform, wireless communication using Pi and Python code development among other skills.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489B or ENME441.
Formerly: ENME489B.

ENME442 Information Security (3 Credits)
The materials presented are divided into three major components: overview, detailed concepts and implementation techniques. The topics to be covered are: general security concerns and concepts from both a technical and management point of view, principles of security, architectures, access control and multi-level security, trojan horses, covert channels, trap doors, hardware security mechanism, security models, security kernels, formal specifications and verification, networks and distribution systems and risk analysis.
Restriction: Must have Senior standing in engineering; and permission of ENGR-Mechanical Engineering department. Jointly offered with ENRE684 .
Credit Only Granted for: ENRE648J, ENME442, ENRE684, or ENPM808E.

ENME444 Assistive Robotics (3 Credits)
Fundamentals of assistive robots used in a wide varietyof ways to help humans with disabilities. Three application areas will be covered: (1) Rehabilitation robotics to recover motor function from neurologic injuries such as stroke, (2) Prosthetics to enable mobility function in amputees, and (3) Social robotics for cognitive impairment and developmental disorders such as autism. Theory behind different control systems employed by assistive robotics, as well as the mechanical design, sensors & actuators, and user interfaces behind representative robots in the respective areas. Guidelines for designing assistive robots. Ethical and regulatory considerations in the design of assistive robots.
Prerequisite: ENME351; and must have completed or be concurrently enrolled in ENME462.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME445 Design for Reliability (3 Credits)
Failure prevention, accident prevention, design requirements analysis, designing right the first time, high system reliability, software reliability, manufacturing defect prevention, life cycle costs reduction, design reviews, managing the design for reliability, design trustworthiness, product durability, and writing good specifications are covered.
Restriction: Junior standing or higher.

ENME446 Medical Robotics (3 Credits)
The fundamentals of robot design, control and different areas of research regarding development are explored. Student will engage in a course project where they will learn to develop, build, and control a medical robot. Surgical robotics development and modeling of robotic systems, safety in medical robotics, haptics, ergonomics and surgery. Fundamentals of robot design and control. Kinematics. This proposal was approved through the Testudo Curriculum Management system.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489C, ENME808M or ENME446.
Formerly: ENME489C.

ENME454 Vehicle Dynamics (3 Credits)
The fundamentals of passenger vehicle and light truck design and vehicle dynamics are covered. The engineering principles associated with acceleration, braking, handling, ride quality, aerodynamics, and tire mechanics are discussed, as well as suspension and steering design.
Corequisite: ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control familiarize them with the characteristics and limitations of real control devices. Students will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: ENME351 and ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENEE461 or ENME461.

ENME462 Vibrations, Controls, and Optimization II (3 Credits)
Continuation of ENME361. Fundamentals of vibration, controls, and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical descriptions of system response, system stability, control and optimization. Optimal design of mechanical systems.
Prerequisite: ENME361.
Restriction: Permission of the Mechanical Engineering Department.

ENME464 Cost Analysis for Engineers (3 Credits)
An introduction to the financial and cost analysis aspects of product engineering. Introduces key elements of traditional engineering economics including interest, present worth, depreciation, taxes, inflation, financial statement analysis, and return on investment. Provides an introduction to cost modeling as it applies to product manufacturing and support. Cost modeling topics will include: manufacturing cost analysis, life-cycle cost modeling (reliability and warranty), and cost of ownership.
Prerequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME465 Probability-Based Design (3 Credits)
Review of probabilistic distributions, introduction to pseudo-random number generation, and algorithms to produce probability distributions using Monte Carlo simulation via Matlab and other approaches to best design probabilistic engineering problems.
Prerequisite: MATH206 and ENME392.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME466 Lean Six Sigma (3 Credits)
This course intends to provide in-depth understanding of Lean Six Sigma and its Define - Mearsure - Analyze - Improve - Control (DMAIC) Breakthrough Improvement Strategy. The emphasis is placed on the DMAIC process which is reinforced via application of semester long corporate projects and case study analysis.
Corequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with: ENES467.
Credit Only Granted for: ENES467 or ENME467.

ENME470 Finite Element Analysis (3 Credits)
Basic concepts of the theory of the finite element method. Applications in solid mechanics and heat transfer.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME472 Integrated Product and Process Development (3 Credits)
Integration of product development with the development process. Design strategies. Product architecture. Design for manufacturing. Selection of materials. Design for assembly.
Prerequisite: ENME331, ENME361, ENME351, and ENME371; and must have completed or be concurrently enrolled in ENME332.
Restriction: Permission of the Department of Mechanical Engineering.

ENME473 Mechanical Design of Electronic Systems (3 Credits)
Design considerations in the packaging of electronic systems. Production of circuit boards and design of electronic assemblies. Vibration, shock, fatigue and thermal considerations.

ENME476 Mircoelectromechanical Systems (MEMS) I (3 Credits)
Fundamentals of microelectromechanical systems (MEMS). Introduction to transducers and markets. MEMS fabrication processes and materials, including bulk micromachining, wet etching, dry etching, surface micromachining, sacrificial layers, film deposition, bonding, and non-traditional micromachining. Introduction to the relevant solid state physics, including crystal lattices, band structure, semiconductors, and doping. The laboratory covers safety, photolithography, profilometry, wet etching.
Restriction: Senior standing.
Credit Only Granted for: ENME476 or ENME489F.
Formerly: ENME489F.

ENME477 Microelectromechanical Systems (MEMS) II (3 Credits)
Fabrication of devices designed in MEMS I, including everything from mask printing through training on state-of-the-art fabrication equipment through device testing. In-depth understanding of MEMS devices and technologies, such as mechanical and electromagnetic transducers, microfluidics, and chemical sensors.
Prerequisite: ENME476.

ENME480 Introduction to Robotics (3 Credits)
An introductory course in robotics that will educate students in the elementary concepts of robotics. The course will encompass both theory and experiments.
Prerequisite: MATH246 or ENES221; and (CMSC131, ENME202, ENAE202 or ENEE150).
Restriction: Must be in the Robotics and Autonomous Systems minor; or Permission of ENGR-Mechanical Engineering department.

ENME483 Physics of Turbulent Flow (3 Credits)
Specific problems of turbulent flow including automobile and truck aerodynamics and canonical flows including pipes, jets and boundary layers that are measured and simulated to gain basic understanding of turbulence. A goal of the course is to impart the necessary background for students to be able to critically assess and most effectively employ the turbulent flow prediction codes (e.g. Fluent) that are a mainstay of how turbulence is analyzed in modern industries.
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with ENME656. Credit only gran ted for: ENME483 or ENME656.

ENME484 Analysis of Turbulent Flow (3 Credits)
Relentless growth in the speed and size of supercomputers has encouraged the ever expanding use of numerical simulation in the practice of fluids engineering. For the flow past ground vehicles, in the urban grid, re-entering rockets, helicopters landing on ships at sea and countless other examples, the flow is turbulent, and simulation is becoming or will one day become the methodology of choice in analyzing and designing such technologies. The goal of this course is to give an introduction to the analysis of turbulent flow via simulation and the modeling that is used in its development. Among the questions to be considered: What can one hope to learn from flow simulation? What are the strengths of the approach and what obstacles inhibit its application? What kind of physical considerations are required in setting up simulations? How does one analyze the results of a simulation?
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with: ENME657.
Credit Only Granted for: ENME484 or ENME657.

ENME486 Computational Modeling, Simulation, and Interactive Visualization (3 Credits)
Creation of interactive graphic displays from the numerical simulation of mechanical engineering models. Brief description of each model provided, along with varied parameters to explore models' characteristics. Conclusions drawn from use of each interactive graphic. Mathematica language introduced and interwoven with the numerical simulation of the models, which will include: robotics and mechanisms, static response of beams, control systems, measurement systems, fluid flow, vibrations, geometric modeling, finite element analysis, and nonlinear phenomena.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME488 Special Problems (3 Credits)
Advanced problems in mechanical engineering with special emphasis on mathematical and experimental methods.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENME489 Special Topics in Mechanical Engineering (3 Credits)
Selected topics of current importance in mechanical engineering.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits.

ENNU - Engineering, Nuclear

ENNU386 Experiential Learning (3-6 Credits)
Restriction: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

ENNU398 Honors Research Project (1-3 Credits)

ENNU468 Research (2-3 Credits)
Investigation of a research project under the direction of one of the staff members. Comprehensive reports are required.
Restriction: Permission of instructor; and permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits.

ENNU489 Special Topics in Nuclear Engineering (3 Credits)
Selected topics of current importance in nuclear engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENRE - Reliability Engineering

ENRE447 Fundamentals of Reliability Engineering (3 Credits)
This course provides a general survey of the techniques of reliability engineering with a focus on quantitative methods. Topics covered include: failure modes and effects analysis, mathematical definition of reliability, probabilistic models to represent failure phenomena, statistical life models for non-repairable components, reliability data analysis, and system reliability models including fault trees, event trees. Students will learn how to apply these techniques to problems related to engineering systems, with example cases for process plants, energy systems and infrastructure.
Prerequisite: MATH141.

ENRE489 Special Topics in Reliability Engineering (3 Credits)
Selected topics of current importance in reliability engineering.
Prerequisite: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENSP - Environmental Science and Policy

ENSP101 Introduction to Environmental Science (3 Credits)
One of two required courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on scientific ways of knowing; the systems, cycles, flows, and interfaces that characterize the atmosphere, lithosphere, hydrosphere, and biosphere; the analysis of human impacts on these systems; and the nature of scientific uncertainty and methods of quantifying environmental processes.

ENSP102 Introduction to Environmental Policy (3 Credits)
Second of two courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on the process of formulating, implementing, and evaluating policy responses to environmental problems, with particular attention to policy controversies related to scientific uncertainty, risk assessment, the valuation of nature, and distributional equity. May be taken before or after ENSP101.
Additional Information: May be taken before or after ENSP101.

ENSP250 Lawns in the Landscape: Environmental Hero or Villain? (3 Credits)
Examination of the lawn as an element in the anthropogenic landscape and its influence on global warming, regional air and water quality, ecological diversity, mammalian pesticide exposure and consumptive water use. Demographic and socioeconomic factors are examined in the context of being predictors of landscape aesthetic desires and lawn management behaviors. Policies that incentivize lawn alternatives or changes in lawn management behavior are discussed.Cross-listed with PLSC250.
Credit Only Granted for: ENSP250 or PLSC250.

ENSP305 Applied Spatial Analysis in Environmental Science and Policy (3 Credits)
Intended for students interested in pursuing career or graduate research opportunities that will include identifying/querying/processing environmental datasets, detailed spatial analysis of environmental data, and applications of predictive environmental modeling. Students will learn necessary skills to analyze and process environmental data through hands-on training in commonly used software and a series of topical case studies. Data analysis and data processing will be taught using publicly available real-world environmental data sets.
Prerequisite: GEOG373; or permission of Environmental Science and Policy Program.
Recommended: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits; and permission of Environmental Science and Policy program.

ENSP306 Fundamentals of Qualitative Research Methods for Environmental Studies (3 Credits)
An introduction to research design and methods, with an in-depth focus on qualitative research methods and application to environmental studies. Topics include: writing an appropriate research question, identifying relevant methods, submitting a proposal to the Institutional Review Board, choosing appropriate sampling approaches, conducting interviews, focus groups, ethnographies, analyzing textual data, and presenting qualitative results.

ENSP330 Introduction to Environmental Law (3 Credits)
An overview of environmental law, from its common law roots to its role in the modern regulatory state, including an examination of major federal environment statutes and the policy debates inherent in them. Other areas covered include civil and criminal enforcement, standing to sue, land use control, and regulatory takings.
Recommended: ENSP101 and ENSP102.
Restriction: Junior standing or higher. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP340 Water: Science, Ethics, and Policy (3 Credits)
Exploration of the science, policy, and ethical aspects of water resource protection and management. Focus on water pollution, water availability, ecosystems, and sustainability
Recommended: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP342 Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response (3 Credits)
An interdisciplinary study of the challenges of maintaining the health and vitality of oceans and coasts in the face of climate change, extreme weather, and other threats including pollution, and oil and gas development. Exploration of four broad themes: resource management, conservation and stewardship, pollution, and coastal zone management. Also, an analysis of current efforts to integrate these themes through ecosystem-based management; marine spatial planning; and related policy responses.
Recommended: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP350 Energy Resources: Science and Policy in the 21st Century (3 Credits)
Energy resource production and consumption, including historical context, current trends in the U.S. and globally, and social and environmental implications. Includes fuel-source formation, history of use, modern trends in consumption, production, pricing and trade, reserves and resources, environmental and social impacts, future outlook and potential new technologies related to energy efficiency and conservation.
Prerequisite: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits; and permission of AGNR-Dean-Environmental Science & Policy Program.
Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENSP370 Principles of Environmental Justice: Theory and Practice (3 Credits)
Explores the issue of environmental justice from the social science, policy, and legal perspectives. The course will begin with a theoretical foundation of environmental justice, and the historical, social and economic roots of environmental injustices and environmental racism. We will explore the different contexts within which environmental injustice manifests itself including domestic and international examples such as injustices in the food system, climate justice, environmental privilege, and urban environmental justice and pollution. We will study the ways in which people and communities have combated environmental injustices by looking at the history of the environmental justice movement, which was created to address the increasingly disproportionate impacts of environmental harms on low income populations and communities of color.
Recommended: ENSP101 and ENSP102.
Restriction: Junior standing or higher. Must be a major in the Environmental Science and Policy program; permission of Environmental Science and Policy program.

ENSP386 Internship (3-6 Credits)
Restriction: Must have internship proposal approved by the concentration advisor, the director of ENSP and the student's internship sponsor.

ENSP399 Special Topics in Environmental Science and Policy (1-3 Credits)
A substantive and specialized examination of contemporary issues in environmental science or policy.
Restriction: Must be in Environmental Science and Policy program; or permission of AGNR-Dean-Environmental Science & Policy Program.
Repeatable to: 12 credits if content differs.

ENSP400 Capstone in Environmental Science and Policy (3 Credits)
Integration of physical, biological, and social sciences with applications to environmental science and policy. Problem-solving and multi-disciplinary case study evaluations pertinent to contemporary and future issues related to the environment.
Prerequisite: ENSP101; and ENSP102.
Restriction: Must be in Environmental Science and Policy program; and senior standing; and permission of the Environmental Science and Policy Program.

ENSP489 Special Topics in Environmental Science and Policy (1-3 Credits)
A lecture and or laboratory series organized to study a selected phase of Environmental Science and Policy not covered by existing courses. Credit according to time scheduled and organization of the course.
Repeatable to: 6 credits if content differs.

ENSP499 Honors Thesis Research (1-6 Credits)
Individual research, thesis, and oral defense. The research project will be conducted under the supervision of a faculty member.
Restriction: Must be in the ENSP Honors program; and permission of AGNR-Dean-Environmental Science & Policy Program.
Repeatable to: 6 credits.

ENST - Environmental Science and Technology

ENST100 International Crop Production-Issues and Challenges in the 21st Century (3 Credits)
Examines the role of crop production in elevating humans out of poverty in developing countries. It will introduce students to the basic principles of plant and soil science underlying the international production of food crops and world food security. The role of multinational agencies such as the World Bank in the promotion of sustainable crop production using environmentally-sound technologies will also be discussed.
Credit Only Granted for: ENST100 or NRSC100.
Formerly: NRSC100.

ENST140 Sustainability and History: The Maryland Experience (3 Credits)
Examines the changing nature of concern over sustainability through the environmental history of the state of Maryland. The historical approach, supplemented by discussion of the basic scientific processes underlying ecosystem functions and human impacts on the environment, reveals both enduring and changing qualities of the search for sustainable patterns of living, beginning before 17th century European contact and continuing on into the environmental concerns of our own time.

ENST200 Fundamentals of Soil Science (4 Credits)
Study and management of soils as natural bodies, media for plant growth, and ecosystem components. Morphology, composition, formation, and conservation of soils. Chemical, biological, and physical properties are discussed in relation to the production of plants, the functioning of hydrologic and nutrient cycles, the protection of environmental quality, and engineering uses of soils.
Corequisite: CHEM131 and CHEM132; or permission of AGNR-Environmental Science & Technology department.
Credit Only Granted for: ENST200 or NRSC200.
Formerly: NRSC200.

ENST214 Introduction to Fish and Wildlife Sciences (3 Credits)
Lectures, discussion, and readings in social, biological, and human dimension issues facing fisheries and wildlife biologists and natural resource managers in the United States. Coverage will include history and philosophical discussions of fish and wildlife sciences; conservation and management; principles of community, habitat, and animal ecology and management; and interrelations of wildlife, fish, and forestry.
Prerequisite: BSCI160 and BSCI161; or permission of instructor.
Restriction: Must be in the ENST Natural Resources Management or ENSP Wildlife Ecology & Management programs; and must have completed less than 90 credits; or permission of instructor.

ENST233 Introduction to Environmental Health (4 Credits)
Examines how humans are affected by the quality of our air, water, soil and food supply as well as how human activities alter these survival necessities. Students will learn how the evolution and prosperity of human populations have resulted in degradation of our environment and the impact of environmental degradation on the health of people. The implications of individual and collective choices for sustainable food production, population management, and resource utilization will be explored.

ENST281 Computer Aided Design in Ecology (2 Credits)
Basics of Computer Aided Drawing (CAD) applied to design of constructed ecosystems. Use of campus stormwater wetland as case study.
Restriction: Must be in Environmental Sci & Tech program.

ENST282 Ecological Innovation and Entrepreneurship (3 Credits)
Ecotechnology innovation is taught with design thinking, which uses an iterative cycle of developing customer empathy, learning ecological technology, appreciating environmental stewardship, brainstorming, rapid prototyping, user experience, testing and redesign. Environment entrepreneurship is based on the Lean Startup process, which uses customer discovery, encourages quick product development, reduces start-up costs, tests ideas quickly, and employs designed experiments. A multidisciplinary academic setting embraces designing, building, testing and marketing novel technologies that enhance the environmental needs of humans. Students will learn in an active environment that requires working creatively, collaboratively, diligently, and precisely to create a business model and tangible prototype for a new commercial product.
Credit Only Granted for: ENST282 or ENST499K.
Formerly: ENST499K.

ENST301 Field Soil Morphology I (1 Credit)
This is a field-oriented course that introduces students to the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST302 Field Soil Morphology II (1 Credit)
This is the second field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Prerequisite: ENST301.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST303 Field Soil Morphology III (1 Credit)
This is the third field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Prerequisite: ENST302.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST309 Advanced Field Soil Morphology (1 Credit)
This is a field-oriented course that provides advanced training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the National Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field. Students will be exposed to a variety of soil landscapes and geology from outside of the northeastern U.S.
Prerequisite: ENST301.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 3 credits if content differs.

ENST314 Fisheries Management and Sustainability (3 Credits)
A detailed look at the ecology, management, and sustainability of fisheries resources. Concepts on human and ecological dimensions are emphasized.
Prerequisite: BSCI160 and BSCI161; or BSCI106. Or ENST214; and 1 course from MATH113-499 course range. Or permission of AGNR-Environmental Science & Technology department.

ENST333 Ecosystem Health and Protection (3 Credits)
Discussion of the philosophies, principles, and practices for assessing ecosystem health with emphasis on an ecosystem perspective rather than a human health perspective. Degradation associated with human activities will be emphasized. Topics will range from local to regional to global issues, including a discussion on global warming and its possible impacts on ecosystems. Concepts will be clarified using case histories from the Chesapeake Bay watershed.
Prerequisite: ENST233.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech: Environmental Health; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech).
Credit Only Granted for: ENST499A or ENST333.
Formerly: ENST499A.

ENST334 Environmental Toxicology (3 Credits)
Concepts and case histories in ecotoxicology. Emphasis on origin and variety of environmental pollutants, routes of biological exposure, modes of toxicological action and effects on individual organisms, populations and ecosystems. Ecotoxicological issues in the Chesapeake Bay will be used as examples.
Prerequisite: CHEM131, CHEM132, and BSCI207; or permission of AGNR-Environmental Science & Technology department.

ENST360 Ecosystem Ecology (4 Credits)
The study of ecology has a long and interesting history, from early society's efforts to understand and alter their environment as a matter of survival to the challenges the modern world is facing that are global in scale. Through the course text, distributed supplemental chapter readings and an understanding of the scientific literature, this course will cover the essential concepts and principles of ecosystem ecology as well as its history and past and present controversies. Several of the basic methods and tools of field research and the applied management of ecosystems will be discussed and demonstrated with several field excursions in the natural environs of the DC area. Central to this course will be the understanding that modern human society is an integral part of nature, with the power to impact and influence elements of the natural world at multiple scales. An analysis of policy implications for the biosphere will be discussed.
Prerequisite: BSCI160 and BSCI161; or BSCI106.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech: Environmental Health; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech).

ENST373 Natural History of the Chesapeake Bay (3 Credits)
Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.Cross-listed with: BSCI373.
Credit Only Granted for: BSCI373 or ENST373.

ENST388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 6 credits if content differs.

ENST389 Internship (3 Credits)
Credit will be granted for practical work carried out by students placed in work environment related to their stated career goals. Students must do an in-depth study in some portion of the work experience and produce a special project or report related to this study. A student work log is also recommended. An evaluation from the external supervisor of the project will be required. Credit arranged with supervising faculty member.
Restriction: Must be in Environmental Sci & Tech program.
Repeatable to: 6 credits if content differs.

ENST403 Invasive Species Ecology (3 Credits)
We will examine ecological, evolutionary, and anthropogenic processes facilitating or resisting biological invasions, and consider their environmental, economic, and human health impacts. We will consider various management strategies to mitigate invasions and identify areas of future research. Field trips and detailed discussion of recent findings and controversies in the literature will help illustrate fundamental concepts of invasions among various ecosystems.
Credit Only Granted for: ENST403, ENST603, or ENST689R.

ENST404 Ecological and Natural Resources Ethics (3 Credits)
Bridges science and management with ethical theory and concepts to help scientists, regulators, and managers understand how to deal with potential ethical dilemmas that arise in natural resource and environmental management implementation and policy development.
Prerequisite: ENST214 and ENST360.
Recommended: ENST314, ENST410, and ENST460.
Restriction: Senior standing or higher. Jointly offered with ENST604.
Credit Only Granted for: ENST604 or ENST404.

ENST405 Energy and Environment (3 Credits)
Introduction to the role of energy in environmental and human-dominated systems. Discussion of the historical and modern production and consumption of energy. Introduction to energy systems computer simulation and energy auditing.
Prerequisite: MATH140 or MATH120; or must have completed MATH220.
Restriction: Junior standing or higher. And must be in Environmental Sci & Tech program; or must be in Environmental Sci & Tech: Ecological Tech Design program; or must be in Environmental Sci & Tech: Environmental Health program; or must be in Environmental Sci & Tech: Soil & Watershed Science program; or must be in Environmental Sci & Tech: Natural Resources Mgmt program. Jointly offered with ENST605.
Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENST406 Applied Forestry Practices (3 Credits)
Focuses on the applied dynamics of a set of forest practices such as management, silviculture, measurement and inventory, preparation of a management plan, etc, within the urban/rural interface. Several field trips are included to gain hands-on experience.
Prerequisite: ENST200. And ENST360; or PLSC471. Cross-listed with PLSC475.
Credit Only Granted for: ENST406 or PLSC475.

ENST410 Ecosystem Services: An Integrated Analysis (3 Credits)
The importance of our ecosystems and the services they provide will be discussed. Basic principles used to analyze ecosystem services will be discussed and applied using case studies & field exercises. Forestland, wetlands and our marine resources are increasingly recognized for their ecosystem services provided to society, to include clean air and water, wildlife habitat, biodiversity, carbon storage and pollination services. This course will prepare students to deal with the complex issues involved in understanding those and other ecosystem services and their importance to society and environmental sustainability. Slowly, new markets are emerging for these services. Students will analyze the ecological, policy and financial dimensions of enhancing, restoring, and sustaining ecosystem services. New and on-going government programs and private business ventures will be discussed.
Prerequisite: ENST360 or BSCI361; or permission of instructor.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Environmental Health).

ENST411 Principles of Soil Fertility (3 Credits)
Soil factors affecting plant growth and quality with emphasis on the bio-availability of mineral nutrients. The management of soil systems to enhance plant growth by means of crop rotations, microbial activities, and use of organic and inorganic amendments.
Prerequisite: ENST200; or students who have taken courses with comparable content may contact the department. Jointly offered with ENS T611.
Credit Only Granted for: ENST411 or NRSC411.
Formerly: NRS C411.

ENST414 Soil Morphology, Genesis and Classification (4 Credits)
Processes and factors of soil genesis. Taxonomy of soils of the world by U.S. System. Soil morphological characteristics, composition, classification, survey and field trips to examine and describe soils.
Prerequisite: ENST200.
Credit Only Granted for: ENST414 or NRSC414.
Formerly: NRSC414.

ENST415 Renewable Energy (3 Credits)
An overview of renewable energy technologies and their current applications. Emphasis will be placed on technological readiness, efficiency and sustainability of renewable energy alternatives. Technologies include solar thermal, photovoltaics, biodiesel, ethanol, anaerobic digestion, wind, hydroelectric, and microbial fuel cells.
Prerequisite: CHEM131, PHYS121, and MATH113; or permission of AGNR-Environmental Science & Technology department.
Restriction: Must be in a major within AGNR-Environmental Science & Technology department.

ENST417 Soil Physics and Hydrology (3 Credits)
A study of soil water interactions: the hydrologic cycle; the unique properties of water and soil; the soil components and their interactions; the field water cycle; transport processes involving water, heat and solutes; human effects on soil and groundwater; as well as the measurement, prediction, and control of the physical processes taking place in and through the soil.
Prerequisite: ENST200; and (MATH113 or MATH115). Or permission of instructor.
Credit Only Granted for: ENST417 or NRSC417.
Formerly: NRSC417.

ENST421 Soil Chemistry (4 Credits)
The chemistry and composition of mineral and organic colloids in soils, including ion exchange, oxidation-reduction, acidity, surface charge, and solution chemistry. Lectures and readings pertain to plant nutrition, waste disposal, and groundwater quality.
Prerequisite: ENST200.
Credit Only Granted for: ENST421 or NRSC421.
Formerly: NRSC421.

ENST422 Soil Microbial Ecology (3 Credits)
The interdisciplinary study of soil microorganisms and their interactions with the mineral matrix; resulting in processes such as nutrient cycling, decontamination, and natural product production. We will focus on the diversity of soil communities, their survival strategies, and the new strategies used to study these communities.
Prerequisite: ENST200; or 1 course in BCHM; or must have completed a course in microbiology; or students who have taken courses with comparable content may contact the department. Jointly offered with ENS T622.
Credit Only Granted for: ENST422 or NRSC422.
Formerly: NRS C422.

ENST423 Soil-Water Pollution (3 Credits)
Reaction and fate of pesticides, agricultural fertilizers, industrial and animal wastes in soil and water with emphasis on their relation to the environment.
Prerequisite: CHEM104 and ENST200.
Credit Only Granted for: ENST423 or NRSC423.

ENST424 Field Study in Soil Morphology (4 Credits)
The fundamentals of making morphological descriptions of soils, using standard techniques, terminology, and abbreviations of the National Cooperative Soil Survey. Given a regional perspective and reasonable assumptions regarding soil properties, students should become competent to classify soils which they have described in the field and also make interpretations concerning the suitability of soils for various potential uses.
Prerequisite: ENST200.
Credit Only Granted for: ENST424 or NRSC424.
Formerly: NRSC424.
Additional Information: Students must pay a $300 course activities fee.

ENST430 Wetland Soils (3 Credits)
The soils of wetlands including hydrology, chemistry, and genesis are discussed. Federal and regional guidelines for wetland soils are covered with an emphasis on validating interpretations through field observations.
Prerequisite: ENST200.
Credit Only Granted for: ENST430, ENST630, or NRSC461.
Formerly: NRSC461.

ENST432 Environmental Microbiology (3 Credits)
Microorganisms are everywhere and mediate many of the processes that we observe everyday. These organisms are the unseen catalysts for numerous industrial processes and are critical to many emerging technologies and novel products. Environmental microbiologists ask: How do microorganisms in the environment benefit society? This course will answer this question by examining microbes in bioremediation, food safety, climate change, and biotechnology.
Prerequisite: CHEM131 and CHEM132. And BSCI170 and BSCI171; or BSCI105.
Credit Only Granted for: ENST432 or ENST499M.
Formerly: ENST499M.

ENST434 Toxic Contaminants: Sources, Fate, and Effects (3 Credits)
Study of the release to the environment, transport through natural compartments, persistence and ultimate fate of various classes of contaminants produced as a result of human activities. Topics will culminate in discussions of impacts to wildlife and human health. Students should emerge with a practical appreciation of the actual risks from exposure to a variety of environmental contaminants and an understanding of the environmental and human health implications of continuing the contaminating activities.
Prerequisite: ENST333 and ENST334.

ENST436 Emerging Environmental Threats (3 Credits)
Examine new and potential environmental concerns in the air, water, soil, space, and the built environment. Emphasis on studying the intrinsic links between ecosystem and human health. Topics will include climate change, resource consumption, biodiversity change, infectious disease, non-traditional pollutants, and other complex and significant environmental concerns.
Prerequisite: ENST233; or permission of AGNR-Environmental Science & Technology department.

ENST440 Crops, Soils and Civilization (3 Credits)
Role and importance of crop and soil resources in the development of human civilization. History of crop and soil use and management as they relate to the persistence of ancient and modern cultures.
Credit Only Granted for: ENST440 or NRSC440.
Formerly: NRSC440.

ENST441 Sustainable Agriculture (3 Credits)
Environmental, social and economic needs for alternatives to the conventional, high-input farming systems which currently predominate in industrial countries. Strategies and practices that minimize the use of non-renewable resources.
Credit Only Granted for: ENST441 or NRSC441.
Formerly: NRSC441.

ENST443 Industrial Ecology (3 Credits)
Problems of waste management and recycling in human societies are covered. The industrial ecology approach to design is contrasted with analogous patterns and processes from natural ecosystems.
Prerequisite: (MATH140 or MATH120; or must have completed MATH220); and BSCI361. Or permission of AGNR-Environmental Science & Technology department. Jointly offered with ENST643.
Credit Only Granted for: ENST443, ENST643, or MEES698J.

ENST445 Ecological Risk Assessment (3 Credits)
Assessment of ecological impacts of perturbations on natural systems. Course will describe methods for estimating environmental impacts including extrapolating from laboratory and field data. The role of regulatory agencies and implications of scientific uncertainty on risk management will be covered.
Prerequisite: ENST360 or BSCI361; and (BIOM301 and ENST334). Or permission of AGNR-Environmental Science & Technology department.

ENST450 Wetland Ecology (3 Credits)
Plant and animal communities, biogeochemistry, and ecosystem properties of wetlands. Lectures are supplemented by field trips (normally 2 days total during the semester) and in-class labs. Hands-on activities and exercises include identification of wetland plant species, wetland mapping and delineation, and collection and analysis of field data on wetland vegetation, soil, and hydrology. Wading boots (at least hip length) are strongly recommended.
Prerequisite: BIOM301 and ENST360; or permission of AGNR-Environmental Science & Technology department.
Restriction: Permission of AGNR-Environmental Science & Technology department. Jointly offered with: ENST650.
Credit Only Granted for: ENST450, ENST650, or MEES650.

ENST452 Wetland Restoration (3 Credits)
Design, construction, and evaluation of wetlands restored or created to provide ecosystem services or to mitigate losses due to development. Topics include fundamental properties of wetlands, ecological restoration theory, site selection and goal-setting, design plans, practices for establishing wetland hydrology, substrate, and vegetation, and restored ecosystem monitoring.
Prerequisite: (BSCI160 and BSCI161; or BSCI106); and (BSCI362, ENST450, ENST360, or BSCI361).

ENST453 Watershed Science: Water Balance, Open Channel Flow, and Near Surface Hydrology (3 Credits)
Concepts of surface water balance, surface radiative flux, precipitation and evaporation measurements.
Credit Only Granted for: ENST453 or ENST653.

ENST456 Spatial Analysis and Ecological Sampling (3 Credits)
Teaches ENST students ecological sampling methods and applied spatial analysis skills. Students will work in small groups on research projects they develop and test during the semester. Students will develop a research hypothesis, test their hypothesis, display it visually in QGIS, and analyze it with appropriate statistical methods in QGIS and R Studio culminating in a final presentation.
Recommended: GEOG306 and GEOG373.
Restriction: Senior standing or higher; and permission of instructor.
Credit Only Granted for: ENST456 or ENST499T.
Formerly: ENST499T.
Additional Information: Students will need to provide an 8GB (or larger) thumb drive for data storage.

ENST460 Principles of Wildlife Management (3 Credits)
Ecological principles and requirements of wildlife as basis for management, and introduction to the scientific literature. Conflicts in wildlife management, government administration of wildlife resources, legislation, and history of the wildlife management profession.
Prerequisite: Must have completed two semesters of biology laboratory; and (ENST360; or BSCI361). Or permission of AGNR-Environmental Science & Technology department.

ENST461 Urban Wildlife Management (3 Credits)
Ecology and management of wildlife in urban areas. For students in biological sciences, geography, landscape design, natural resources management, recreation and urban studies. Planning, design, and wildlife conservation in landscape ecology. Public attitudes, preferences, and values, review of private conservation organizations.

ENST462 Field Techniques in Wildlife Management (3 Credits)
Hands-on experience with field techniques in wildlife management focusing on various methods of conducting indices, estimates, and censuses of wildlife populations. Includes capture and handling of amphibians, reptiles, birds, and mammals by use of drift fences, cover boards, mist nets, box traps, and dart guns.
Prerequisite: ENST460. And BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105.
Recommended: ENST461.
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

ENST463 Wildlife Habitat and Population Modeling (3 Credits)
Students will gain basic tools for the analysis and modeling of wildlife population demographics and wildlife habitat. This class will be broken into two components: 1) will teach students techniques of modeling wildlife field data for the purpose of estimation of key parameters such as population size, viability, and other demographic rates using programs such as Riskman, Vortex, and Mark; 2) will teach students real world techniques used to determine and model habitat use on multiple scales using statistical analyses, GIS, and stand-alone programs such as Home Ranger and Biomapper. This class is designed for wildlife and natural resources majors.
Prerequisite: ENST460 and GEOG373; and (MATH120; or must have completed MATH220). Or permission of AGNR-Environmental Science & Technology department.
Restriction: Must be in Environmental Sci & Tech program; and must be in Environmental Science and Policy program.

ENST466 Ecology and Management of Wildlife Habitats (3 Credits)
Introduction to general concepts of wildlife habitat ecology and management. Specifically,land use practices on public and private lands and how these practices influence wildlife production. Conduct wildlife habitat evaluations and options for alterations/manipulations to achieve specific management goals. The class will culminate with the creation and planning of a wildlife management plan.
Recommended: ENST460.

ENST467 Ecology and Management of Wildlife Habitats Lab (2 Credits)
An introduction to the principles of wildlife habitat data analysis applied at the population level. This class will teach students real world techniques used to determine and model habitat use on multiple scales. This lab course complements the material covered in ENST 466.
Corequisite: ENST466.

ENST470 Ideas into Impact (3 Credits)
This will be a capstone-type course based around developing proposals for projects emphasizing research, monitoring, design, restoration, managament, entrepreneurship, or other approaches to ecological or environmental questions, issues, or problems.
Restriction: Junior or Senior standing only; Permission of AGNR-Environmental Science & Technology department.

ENST471 Captsone I (2 Credits)
This course will be conducted in a group discussion format that will focus on professional project proposal preparation and presentation, critical evaluation of environmental science research, professional development, and career planning. Students will develop and present original project proposals and critique project proposals presented by others.

ENST472 Capstone (3 Credits)
This capstone course focuses on professional project preparation, presentation, and critical evaluation on environmental science research. Students will develop and present original projects and critique projects presented by others.
Restriction: Must be in a major within AGNR-Environmental Science & Technology department; and permission of AGNR-Environmental Science & Technology department.
Additional Information: This is the pinnacle course for students majoring in ENST and is therefore recommended in one of the students' final semesters.

ENST479 Tropical Ecology and Resource Management (1-6 Credits)
Tropical ecosystems and issues of human use and impact. Includes lectures which lead up to an off-campus trip in a tropical environment.
Prerequisite: Must have completed an introductory economics course. And BSCI160 and BSCI161; or BSCI106.
Restriction: Permission of instructor.
Repeatable to: 10 credits if content differs.

ENST481 Ecological Design (4 Credits)
An advanced survey course on the field of ecological design. Principles of design are illustrated with case studies from biologically-based waste treatment systems, ecosystem management and sustainable development. Concepts covered include ecology, ecological engineering, nutrient cycling, emergy, lifecycle analysis, and design process. Technologies include treatment wetlands, living machines, anaerobic digestion, rain gardens, bioswales, bioremediation, algal turf scrubbers, and green building design.
Prerequisite: (MATH120 or MATH140; or must have completed MATH220); and (PHYS121 and CHEM131); and (BSCI361; or students who have taken courses with comparable content may contact the department). Or permission of instructor.
Restriction: Permission of AGNR-Environmental Science & Technology department. Jointly offered with: MEES681.
Credit Only Granted for: ENST481, ENST681, or MEES681.

ENST485 Water Management in Urban Environment (3 Credits)
Historically, with the exception of certain locations, water has been available in sufficient quantities, and providing supporting infrastructure has been relatively straightforward. In urban areas, the concentration of people and the drastic changes in land use, have altered the fluxes of water, sediments, chemicals, and microorganisms. As the population increases and the number of large urban areas keeps growing (both in U.S. and internationally), managing water in urban areas is becoming more challenging. Water must be supplied for domestic, commercial, and industrial use, as well as irrigation and maintaining and enhancing local environments (e.g., urban streams). In addition, stormwater must be managed to prevent flooding and environmental damage, and used water, which contains organic matter, nutrients, and other constituents that can be extracted and reused, must be collected and managed. In this course we take a systems approach to urban water hydrology, engineering, planning and management. We will explore urban water cycle, urban runoff and drainage characteristics, urban water supply and demand, stormwater collection and treatment and designing best management practices. Additionally, we look at the climate impacts on the urban water cycle.
Prerequisite: MATH120, MATH130, MATH136, or MATH140.
Credit Only Granted for: ENST485 OR ENST489Z.
Formerly: ENST489Z.

ENST486 Senior Professional Experience (3 Credits)
Students will arrange an off-campus professional-level work experience related to Environmental Science and Technology (ENST) to develop expertise in a specific area of their ENST concentration curriculum. Classroom sessions will frame student experiences within the broader discipline of Environmental Science and Technology. This course will tie together current practices in the ENST career industry, proposal writing, critical analysis, and culminate in a final paper and presentation.
Prerequisite: ENST389.
Restriction: Must be in the Environmental Science and Technology program; and permission of AGNR-Environmental Science & Technology department.
Additional Information: The course has two types of activities: lecture and experiential learning. Students are expected to work on their professional-level experience for 90 hours and participate in a 2-hour lecture every other week, during the semester to develop their Senior Integrative Experience (SIE) project. Each student's research question, proposal methodology, analysis, paper, and presentation will follow learning outcomes of all ENST SIE course options.

ENST487 Environmental Conflicts and Decision Making (2 Credits)
Study major cases which focus on environmental science with concentration on the role and techniques of negotiation, collaborative decision making, and adaptive resource management as an environmental conflict resolution process.
Restriction: Senior standing. And must be in one of the following programs (Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci&Pol-Wildlife Ecology & Mgmt) ; or permission of AGNR-Environmental Science & Technology department.

ENST489 Research Experience (3 Credits)
An advanced research-based course in the field of environmental science and technology.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 6 credits.

ENST499 Special Topics in Environmental Science and Technology (1-4 Credits)
An independent study, and/or lecture, and/or laboratory series organized to study a selected phase of Environmental Science and Technology not covered by existing courses. Credit arranged with supervising faculty member.
Restriction: Permission of AGNR-Environmental Science & Technology department.

EPIB - Epidemiology and Biostatistics

EPIB300 Biostatistics for Public Health Practice (3 Credits)
An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.
Prerequisite: Minimum grade of C- in CHEM131 and CHEM132.
Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.
Credit Only Granted for: EPIB300, EPIB315 or HLTH300.

EPIB301 Epidemiology for Public Health Practice (3 Credits)
An examination of the discipline of epidemiology and its application to public health issues and practices, covering current epidemiological concepts and methods.
Restriction: Must be in Public Health Science program; or must be in Community Health program. And must have earned a minimum of 45 credits. Cross-listed with: HLTH301.
Credit Only Granted for: EPIB301 or HLTH301.

EPIB315 Biostatistics for Public Health Practice (3 Credits)
An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.
Prerequisite: Minimum grade of C- in EPIB301; or must have completed or be concurrently enrolled in HLTH200.
Restriction: Must be in one of the following programs (Public Health Science; Community Health). Cross-listed with: HLTH300.
Credit Only Granted for: EPIB300, EPIB315 or HLTH300.
Formerly: EPIB300.
Additional Information: Course is cross-listed; students should check program advising information to determine which counts for their major. Note that EPIB300 (old number) is still offered for students under previous curriculum.

EPIB330 Introduction to Infectious Disease Epidemiology (3 Credits)
Introduces students to the study of infectious disease through the application of epidemiologic methods. Students will review how infectious diseases impact global health, and examine epidemiological concepts related to infectious disease. These concepts include infectious disease transmission, prevention and control; study design; and outbreak and epidemic investigations. Infectious disease topics of concern to public health professionals will be covered including the COVID-19 pandemic, sexually transmitted infections, foodborne infections, healthcare-acquired infections and neglected tropical diseases, and future trends in the field of infectious diseases.
Prerequisite: EPIB301.

EPIB399 Epidemiology and Biostatistics Independent Study (1-3 Credits)
The EPIB undergraduate independent study is an opportunity for undergraduates from other departments in the SPH or the university to work with an Epidemiology and Biostatistics faculty member on research or special projects that are based out of EPIB.
Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 3.0.
Repeatable to: 6 credits if content differs.

EPIB400 Obesity: An Epidemiologic Perspective (3 Credits)
The epidemic of obesity, its causes and consequences, and issues related to energy balance will be covered. Students will characterize the obesity epidemic both nationally and internationally, compare and contrast the metrics of obesity, understand the biological consequences of different obesity phenotypes, and describe characteristics of the obesogenic environment. Throughout the course students will be introduced to the application of epidemiological methods to studies of obesity.
Prerequisite: 1 course with a minimum grade of C- from (EPIB301, HLTH301).

EPIB463 Introduction to Biostatistical Programming (3 Credits)
An introduction to basic programming principles; data analysis tasks such as the calculation of summary statistics and the creation of graphs; and the implementation of statistical analysis concepts such as T-tests, ANOVA and correlation. Querying and managing data sets using SQL in SAS will also be covered.

EPIB489 Special Topics in Epidemiology or Biostatistics (1-6 Credits)
Special topics in epidemiology or biostatistics.
Repeatable to: 6 credits if content differs.

FGSM - Federal and Global Fellows

FGSM310 Political Engagement and Advocacy (3 Credits)
An examination of questions and issues in the practice of political engagement and advocacy. Guest lecturers drawn from political, civic engagement, and advocacy arenas will visit class and participate in discussions.
Restriction: Must be in the Federal Fellows Program; and permission of instructor. Cross-listed with: HNUH318T.
Credit Only Granted for: HNUH318T or FGSM310.

FGSM320 Public Health Policy (3 Credits)
An exploration of the major questions and issues facing the U.S. health care system as well as the formulation and implementation of health policy.
Restriction: Must be in the Federal Fellows Program; and permission of instructor. Cross-listed with: HNUH328T.
Credit Only Granted for: UNIV348P, HNUH328T or FGSM320.
Formerly: UNIV348P.

FGSM330 Homeland and National Security Policy (3 Credits)
An examination of the concept of U.S. homeland and national security, threats, and major vulnerabilities in the context of recent history.
Restriction: Must be in the Federal Fellows Program; and permission of instructor. Cross-listed with: HNUH338T.
Credit Only Granted for: UNIV348T, HNUH338T or FGSM330.
Formerly: UNIV348T.

FGSM340 Energy and Environmental Policy (3 Credits)
An examination of issues of energy and environmental sustainability through an investigation of policy-making in energy, climate change, and sustainable development.
Restriction: Must be in the Federal Fellows Program; and permission of instructor. Cross-listed with: HNUH348T.
Credit Only Granted for: UNIV348E, HNUH348T or FGSM340.
Formerly: UNIV348E.

FGSM350 Critical Regions and International Relations (3 Credits)
An examination of international relations and foreign policy challenges in critical regions.
Restriction: Must be in the Global Fellows Program; and permission of instructor. Cross-listed with: HNUH358T.
Credit Only Granted for: HNUH358T or FGSM350.

FGSM360 U.S. Diplomacy and Policymaking (3 Credits)
An examination of questions and issues in the practice of contemporary diplomacy and policy-making. Guest lecturers drawn from Washington policy-making and foreign service communities will visit class and participate in discussion.
Restriction: Must be in the Global Fellows Program; and permission of instructor. Cross-listed with: HNUH368T.
Credit Only Granted for: HNIUH368T or FGSM360.

FGSM370 Science Diplomacy: Foreign Policy & Science, Technology, and Innovation (3 Credits)
An exploration of the critical roles scientific knowledge and technological innovation play in the formation and implementation of foreign policy issues, including energy and climate change, public health, space and innovation, and economic development.
Restriction: Must be in the Global Fellows Program; and permission of instructor. Cross-listed with: HNUH378T.
Credit Only Granted for: UNIV389F, HNUH378T or FGSM370.
Formerly: UNIV389F.

FGSM380 Responses to Global Challenges (3 Credits)
An examination of global issues and responses primarily from the perspective of the practitioner. The focus will be on social, humanitarian, and human rights issues in different global contexts.
Restriction: Must be in the Global Fellows Program; and permission of instructor. Cross-listed with: HNUH388T.
Credit Only Granted for: UNIV389B, HNUH388T or FGSM380.
Formerly: UNIV389B.

FGSM398 Federal and Global Experiential Learning (3-9 Credits)
This is the experiential course component of the Federal Fellows Program and Global Fellows Program.
Restriction: Permission of instructor.
Repeatable to: 9 credits if content differs. Cross-listed with: HNUH398P.
Credit Only Granted for: FGSM398 or HNUH398P.

FIRE - First-Year Innovation & Research Experience

FIRE120 FIRE SEMESTER 1 (3 Credits)
Engages the research process through the design, research, collaborative authorship and iterative review-based refinement of research proposals. Students find and analyze primary literature, think creatively, author and communicate research proposals in a scholarly fashion and work collaboratively to solve scientific and societal problems using technology, delegation and productive team communication.
Additional Information: This is the first course in the FIRE (First-Year Innovation & Research Experience) program sequence.

FIRE198 FIRE SEMESTER 2 (2 Credits)
This is the second course in the FIRE (First-Year Innovation & Research Experience) program sequence.Students in this course join a research stream and gain discipline-specific training in that lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.
Recommended: FIRE120.
Repeatable to: 2.0 credits.

FIRE298 FIRE Semester 3 (3 Credits)
Capstone course in the FIRE (First-Year Innovation & Research Experience) program sequence. Students in this course transition from trainee to practitioner in their lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.
Prerequisite: FIRE198.
Repeatable to: 3 credits.

FIRE398 FIRE Research Leadership (1-3 Credits)
Earn academic credit for the time spent supporting, mentoring, and leading students in FIRE Research streams.
Prerequisite: FIRE298.
Repeatable to: 12 credits.

FMSC - Family Science

FMSC110 Families and Global Health (3 Credits)
Students will explore, define, and study global health, social determinants of health, health inequalities, gender inequality, family violence, and maternal and child health using a global perspective.

FMSC111 Credit Cards and College Students (1 Credit)
Provides college students with factual information about basic money management skills, emphasizing the responsible use of credit, specifically credit cards. Topics will include financial goals, spending plan, wise use of credit, debt management, consumer credit protection, and ID Theft. Online lessons will include video clips and interactive class activities. Students will learn the basics to build a strong financial future.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC111, FMSC341 or FMSC498D.
Formerly: FMSC498D.

FMSC123 Personal Financial Literacy: From Distress to Success (3 Credits)
Exploring strategic thinking, career, education, financial planning during college years as the foundation for success in living a meaningful life. While introducing relevant institutions and tools techniques that are critical for financial planning, this course applies value-based goal setting and strategic planning that inform individuals' paths for a successful career, educational attainment, and optimum (mental, physical and financial) wellbeing throughout their life cycle. The course particularly emphasizes the individual's responsibility of living in an institution rich society, where, continuous learning, understanding institutions, rational decision-making, valuing relationships and networking, early career development, record keeping, budgeting, generating income and wealth, purposeful spending, saving and investing, tax planning, appropriate use of loans, risk taking and insurance, and retirement planning are well rewarded and ensure the optimum use of college years and the rest of life-course.

FMSC170 Modern Families (3 Credits)
Examination of current trends and controversial issues in family life, including issues of marriage, reproductive technologies, adoption, child custody, remarriage, and marital violence.
Credit Only Granted for: FMSC170 or FMSC298F.
Formerly: FMSC298F.

FMSC186 Family Law and Ethics in Assisted Reproduction (1 Credit)
For students interested in studying the law, public health and/or family science, this course examines the cutting-edge law and ethics of assisted reproduction including the technologies of sperm and egg donation, in vitro fertilization, surrogacy, and reproductive organ transplants, and the impact on families.

FMSC190 Man Up! Where Are The Fathers? (3 Credits)
An examination of changing fatherhood roles, health, and inequality in diverse families. Focus will be on masculinities and disparities among men by race and class; provider role expectations; and trauma and violence faced by men in contemporary society.

FMSC260 Couples, Marriage, and Families: Intimate Relationship Across the Life Course (3 Credits)
Covers the different aspects of couple relationships and family life. This includes common problems in couple relationships, and resources to strengthen couple and family relationships. You will also learn about stages of relationships, theories of love and family, policy related to couples and family formation, and how research is conducted with couples and families. Together, we will discuss and explore issues that couples and families face in modern times and will consider how many of these issues have changed due to policy, technology, attitudes, and a variety of other societal factors that impact relationships in the 21st century. You will also learn important methods of strengthening current and future relationships.

FMSC265 Teaching Menstrual Health: Dispelling Myths and Misconceptions (3 Credits)
Provides a platform to teach UMD undergraduate students and BHU Bachelor of Education students about the intersections of gender, culture, and health. We will explore how menstruation is addressed in different cultures and uncover myths and misconceptions that impact individuals, their families and communities. Furthermore, the course emphasizes the health cost (physical and mental) of not educating youth about this vital process and discusses the need for an intervention. The course provides essential skills to participating students for the development of an intervention. Key concepts include: theoretical understanding of menstrual health and its impact on girls and women's lives from cross cultural perspectives, the importance of deconstructing myths and misconceptions and the importance of educating both girls and boys; cultural taboos and patriarchal power relations that contribute to myths, misconceptions and practices; public health interventions addressing the cost of ignoring adolescent health issues including menstrual health; the impact of providing agency to young girls and boys to challenge the status-quo; and links between knowledge about menstruation, human rights, gender equality and the SDGs.

FMSC270 Sex, Drugs, and Social Media: Adolescent Health and Development (3 Credits)
This course will ask: How can families, schools, communities, and society help adolescents to navigate contemporary stressors and develop into physically and mentally healthy adults? To do this, we will use research, and an understanding of adolescent development, to explore and analyze issues affecting the health and behavior of American adolescents. Such issues include (but are not limited to) sex education, the role of social media in mental health, substance use, policing in schools, dating violence, suicide prevention, access to sexual and reproductive health care, and school start times. We will consider how adolescent well-being is shaped by social contexts, including the role of parents and family members, peers, schools, communities, social media, and culture. We will examine policies and programs that affect adolescents, how effective they are at promoting adolescent health, and how they might be improved to better support healthy adolescent development.

FMSC280 Global, Child & Family Health: Getting There Via E-Communications (3 Credits)
Students will learn about global maternal, child and family health issues and how these issues may affect their lives. Interdisciplinary teams of students will collaborate to develop programs aimed at improving global family health through the use of information and communications technologies.
Credit Only Granted for: FMSC280 or FMSC289G.
Formerly: FMSC289G.

FMSC286 Assisted Reproduction Law and Policy in the US and Brazil (3 Credits)
In this Global Classroom, U.S. students will work synchronously online with their international partners in Brazil to critically think about cutting-edge ethical, legal, policy and scientific issues in the field of Assisted Reproduction Technologies (ART) in the two countries. This course looks at conventional families created in unconventional ways to examine such topics as sperm and egg donation, in vitro fertilization, surrogacy, reproductive organ transplants and more - while considering the social, cultural, racial, religious, economic, or socioeconomic contexts that influence each. Students will work with their foreign peers in small groups to compare ART in each country and then create proposed legislation for either the U.S. or Brazil which their international group will present online to their colleges and submit to the country's legislators. In so doing, students will be challenged to think critically and see their place in creating actionable change in a global society.
Credit Only Granted for: FMSC186 or FMSC286.
Additional Information: This is a global classroom course where students will learn online, meet once a week in a synchronous class on Webex with their Brazilian classmates, and work individually via Webex in small international groups.

FMSC289 Special Topics in Family Science (3 Credits)
Topics of special interest under the general guidance of the Department of Family Science.
Repeatable to: 9 credits if content differs.

FMSC290 Family Economics (3 Credits)
Application of economic methodology to study families under various economic situations. Examination of how decisions about marriage, divorce, fertility, consumption and time use are influenced by labor/housing markets, tax structure, social welfare benefits and other economic considerations.
Credit Only Granted for: FMSC290 or FMST290.
Formerly: FMST290.

FMSC298 Special Topics in Family Science (1-3 Credits)
Topics of special interest under the general guidance of the Department of Family Studies.
Repeatable to: 12 credits if content differs.
Formerly: FMST298.

FMSC302 Research Methods in Family Science (3 Credits)
Introduction to the methods of the social and behavioral sciences employed in family science. The role of theory, the development of hypotheses, measurement, design, and data analysis.
Prerequisite: Must have completed an introductory statistics course.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC302 or FMST302.
Formerly: FMST302.

FMSC310 Maternal, Child and Family Health (3 Credits)
Overview of the major issues in Maternal, Child, and Family Health in the U.S. and the world. The course will cover the social, political, environmental, and economic factors that shape the health of women, children, and families throughout the life course. It will employ the core disciplines of public health -- 1) epidemiology/biostatistics, 2) environmental health, 3) health policy and administration, and 4) social and behavioral health -- to examine these factors. The course introduces specific issues and interventions and places these issues and interventions within their broad sociohistorical context.
Credit Only Granted for: FMSC310, FMSC410 or FMSC498A.
Formerly: FMSC498A and FMSC410.
Additional Information: A comprehensive understanding of maternal, child, and family health, with additional emphasis on environmental health, needs assessment and evaluation, enabling students to more effectively address issues in the workplace.

FMSC330 Family Health: Health Happens in Families (3 Credits)
The objective of this gateway course is to help you understand and apply basic theories and empirical data on family health. The course is designed to provide you with skills to think critically about theories including: Life Course Theory, the Bio-Ecological and Social-Ecological Models, and Systems Theory. We will ask questions about the distinct qualities and intersections of contexts and characteristics that impact the functioning of families. We will apply theory and research to topical issues in family health that are impacted by social structures such as conflict, crisis, migration, incarceration and inequalities.
Restriction: Junior standing or higher.

FMSC332 Children in Families (3 Credits)
A family life education approach to the study of children and families. Emphasis on the interaction of children with parents, siblings, extended kin, and the community.
Prerequisite: PSYC100 or FMSC105.
Credit Only Granted for: FMSC332 or FMST332.
Formerly: FMST332.

FMSC340 Mental Health and Healing in Families (3 Credits)
Using an interdisciplinary approach to study mental health, mental wellness, and substance use, we will answer questions such as: How has our understanding and treatment of mental health changed throughout history? What are the current prevalence patterns and risk factors associated with mental health conditions? What is the prevention to postvention continuum? What is the role of relationships, families, and communities in addressing mental health? How do we diagnose and treat various mental health disorders using the best available research? And, what are the various mental health disciplines and how do they differ? This course is designed to examine mental health issues across the life course. We will explore the influence of social contexts, including racism and additional forms of othering, on mental health and wellness, and introduce the health systems that support mental health prevention and treatment.

FMSC341 Personal and Family Finance (3 Credits)
Individual and family financial strategies with emphasis on financial planning, savings, investments, insurance, income taxes, housing, and use of credit. Planning, analyzing, and controlling financial resources to resolve personal/family financial problems and to attain financial security.
Credit Only Granted for: FMSC341 or FMST341.
Formerly: FMST341.

FMSC374 Working with Diverse Families in Public Health Services (3 Credits)
Focuses on the "doing" and modeling of skills required in navigating diverse social environments with families. These skills are necessary to engage in authentic work as family scientists, public health professionals, and family health practitioners. Using an intersectional framework, we will examine cultural, ethnic, and linguistic diversity for families impacted by challenges to equity and privilege. The course material emphasizes deep knowledge and skill building towards cultural sensitivity, including history, values, language, religion, and communication with families across multiple racial and ethnic backgrounds. Students will also explore differences emerging from experiences of poverty, sexual orientation and gender identity, and disability. The goal of the course is to support students in developing a family/professional alliance for health and well-being.
Prerequisite: FMSC110.

FMSC381 Family Inequality (3 Credits)
Social, political, cultural and economic factors influencing income and wealth in American families.
Prerequisite: SOCY100 or SOCY105.
Restriction: Must be in a major within SPHL-Family Science department.

FMSC382 Family Mediation and Negotiation (3 Credits)
Investigates mediation as a forum of peaceful intervention. It is designed to provide students with an introduction and basic understanding of the essential principles of mediation and opportunities to put those principles to work. In so doing, students will obtain an in-depth knowledge of a practical "hands on" approach to divorce mediation as the conduct mediation skill builders and facilitate a successful mediation. Students will learn major mediation interventions and how such interventions may help establish a new dynamic among family members in their communications and relationships. To assist in understanding, we will discuss family law issues and ethics. The course also includes a focus on negotiation theory and skills and students will conduct a negotiation. We will use multi-media presentations, real life mediation observation, lecture and class discussion, role-play, and academic review and critic to reach the course goals and objectives.
Recommended: FMSC487 and FMSC341.
Credit Only Granted for: FMSC498M or FMSC382.
Formerly: FMSC498M.

FMSC383 Health and Human Services Delivery and Evaluation (3 Credits)
Processes of service delivery with special emphasis upon relationships among managers, service providers and clients. The impact of human service systems on families.
Prerequisite: FMSC330.
Restriction: Must be in a major within SPHL-Family Science department.

FMSC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of SPHL-Family Science department.
Restriction: Junior standing or higher.
Credit Only Granted for: FMSC386 or FMST386.
Formerly: FMST386.

FMSC399 Independent Study (1-6 Credits)
Prerequisite: Permission of SPHL-Family Science department.
Repeatable to: 12 credits.
Formerly: FMST399.

FMSC420 African American Families (3 Credits)
Examination of the history, structure, cultural foundation, and diversity of African American family life is the focus of this class. Presentations and discussions enable students to identify, analyze, and assess: (1) the major theoretical perspectives used in the study of African American families; (2) the impact of social policy on African American families; and (3) specific areas of family life (e.g., marriage and divorce, parenting, child development, health disparities).
Recommended: FMSC330.
Credit Only Granted for: FMSC420 or FMSC498F.
Formerly: FMSC498F.

FMSC425 Military and Veteran Family Services (3 Credits)
Overview of issues impacting contemporary military families including during times of war. Identification of challenges faced by military families related to deployment/reunion and mental and physical health, as well as support systems available. Examination of skills and strategies for working with service members, veterans, and military families.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC425 or FMSC498W.
Formerly: FMSC498W.

FMSC430 Gender Issues in Families (3 Credits)
The development of historical, cultural, developmental, and psychosocial aspects of masculinity and femininity within the context of contemporary families and the implications for interpersonal relations.
Prerequisite: SOCY100, SOCY105, or PSYC100.

FMSC431 Family Crises, Emergencies and Interventions (3 Credits)
Examines the stressors in life that may lead families into a state of crisis or emergency and what can be done to help families when the need arises. Both internal stressors, such as substance abuse, finances, divorce, illness or parent-child conflict, and external stressors, such as community violence and natural disasters, are examined. Using theories and techniques for intervention and enhancement, the course examines factors involved in stressors turning into a family crisis and how factors such as emergency preparedness, social support and public policy can be a source of family resilience or protect families from negative outcomes.
Prerequisite: PSYC100.

FMSC432 Adult Development and Aging in Families (3 Credits)
Theory, research, history, and programming related to adult development and aging in the intergenerational context of family.
Prerequisite: PSYC100; and (SOCY100 or SOCY105). And FMSC332; or must have completed a comparable development course.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC432 or FMST432.
Formerly: FMST432.

FMSC440 Death and Loss in Family Life (3 Credits)
Examination of how families experience grief and loss resulting from the death of a family member, including health and financial consequences. Overview of historical, social, psychological, cultural, medical, and legal dimensions of death in families from diverse backgrounds. Exploration of how the health care system and funeral home industry assist families in managing death and loss.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC440 or FMSC498B.
Formerly: FMSC498B.

FMSC445 Sexuality: Issues in Family Therapy and Service Delivery (3 Credits)
Typical, dysfunctional, and pathological sexual functioning, including effects on individuals, couples, and family systems. Sensitizes students to sexual issues, explores how perceptions of such issues affect work with people, and emphasizes implications for marriage and family therapy.
Prerequisite: A basic course in human sexuality; and permission of instructor. Jointly offered with FMSC645.
Credit Only Granted for: FMSC445 or FMSC645.

FMSC460 Violence in Families (3 Credits)
Theories of child, spouse, and elder abuse in the family setting. Emphasis on historical, psychological, sociological and legal trends relating to physical, emotional, and sexual abuse. Introduction to methods for prevention and remediation.
Prerequisite: SOCY100, SOCY105, or PSYC100.
Credit Only Granted for: FMSC460 or FMST460.
Formerly: FMST460.

FMSC477 Internship and Analysis in Family Science (3 Credits)
A supervised internship and a seminar requiring analysis. Opportunities to integrate theory and practice including 120 hours of contracted field experience. Summer or fall internship contracts due May 1; Spring contracts due December 1. See department for application procedures.
Prerequisite: FMSC383; and 9 credits in FMSC courses; and permission of SPHL-Family Science department.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC477, FMST347, or FMST477.
Formerly: FMST477.

FMSC485 Introduction to Family Therapy (3 Credits)
The fundamental theoretical concepts and clinical procedures of marital and family therapy including premarital and divorce therapy issues.
Prerequisite: FMSC330; or 1 course from PSYC300-499 course range.
Credit Only Granted for: FMSC485 or FMST485.
Formerly: FMST485.

FMSC486 Law, Public Health and the Cuban Family (4 Credits)
A short-term summer study abroad course that is a comparative law and public health course. Students travel to Havana, Cuba to compare family problems in a capitalist versus socialist society within the context of legal, public health, social, cultural and economic changes.
Recommended: FMSC487. Jointly offered with: FMSC686.
Credit Only Granted for: FMSC486, FMSC686 or MIEH698B.
Additional Information: This is a study abroad course which will primarily occur in Cuba. Additionally, the course involves an online component prior to and following the trip.

FMSC487 Family Law (3 Credits)
Designed for students interested in studying the law, public health, and family science, this course provides students with a general overview of family law and the impact on healthy families. The course also includes the study of cutting-edge issues such as marriage equality, assisted reproduction and ethical issues that may arise.

FMSC498 Special Topics: Family Science (1-3 Credits)
Special course topics in family studies.
Prerequisite: Permission of SPHL-Family Science department.
Repeatable to: 6 credits if content differs.
Formerly: FMST498.

FOLA - Foreign Language

FOLA386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

FREN - French

FREN101 Elementary French I (4 Credits)
Introduction to basic structures and pronunciation with emphasis on the four skills: listening, speaking, reading and writing.
Restriction: Must not have 2 or more years of high school level French; and must not be a native/fluent speaker of French.

FREN103 Intensive Elementary French (4 Credits)
Covers speaking, reading, writing, listening, and culture of French-speaking world.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed FREN102; and must not be a native/fluent speaker of French.
Credit Only Granted for: FREN102 or FREN103.

FREN169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN203 Intensive Intermediate French (4 Credits)
Covers speaking, reading, writing, listening, and culture of French-speaking world.
Prerequisite: FREN103; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a native/fluent speaker of French.
Credit Only Granted for: FREN201 or FREN203.

FREN204 French Grammar and Composition (3 Credits)
Intensive study of French grammar and composition.
Prerequisite: FREN201 or FREN203; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Not open to native/fluent speakers of French.

FREN211 French Reading and Conversation (3 Credits)
Practice in spoken French at intermediate level based on readings in a variety of genres. Written homework and exams.
Prerequisite: FREN201 or FREN203.
Restriction: Must not be a native/fluent speaker of French.

FREN240 Masterworks of French Literature in Translation (3 Credits)
Major works of French literature from pre-revolutionary France to the present. Emphasis on the individual in a social context. Taught in English.

FREN241 Women Writers of French Expression in Translation (3 Credits)
Works and ideas of 20th century women writers of French in Canada, Africa, the Caribbean and France. Taught in English.

FREN242 Francophone Writers of Africa and the African Diaspora (3 Credits)
An analysis of the works and ideas of 20th and 21st century Francophone writers (Africa, the Caribbeans, France). Taught in English.

FREN243 Masterpieces in French and Francophone Cinemas (3 Credits)
This course, taught in English, will present a large array of films directed by famous French directors (Jean Renoir, Robert Bresson, Jean-Luc Godard, Agnes Varda, etc..) and Francophone filmmakers (Arcand, Sembene) who were internationally known in their time and have had a considerable influence on today's filmmakers in the U.S. (Tarantino, Lynch, Lee, etc..) and abroad (Sissoko, Angelopoulos, VonTrier, ect..).

FREN250 Introduction to Cultural and Textual Analysis (3 Credits)
Introduction to cultural and textual analysis of selected readings from various genres in French literature. Taught in French.
Prerequisite: FREN204; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.
Credit Only Granted for: FREN250 or FREN250H.

FREN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN298 Aspects of French Civilization (3 Credits)
Topic to be determined each semester. Historical or thematic approaches to French art, literature, and culture. Taught in English.
Repeatable to: 6 credits if content differs.
Additional Information: Credit may not be applied to French major.

FREN301 Composition and Style (3 Credits)
Grammatical analysis, elements of style; range of written genres.
Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN302 Introduction to Translation (3 Credits)
Hands-on practice in translation to include a variety of formats and texts (for example, advertising, legal, technical, literary, journalistic, media...) into French and/or English. Includes an extensive overview of translation techniques, theories and approaches. Taught mainly in French.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN303 Translation: English to French (3 Credits)
Practicum in translation primarily from English to French; contrastive analysis.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN306 Commercial French I (3 Credits)
Introduction to commercial French including correspondence and business terminology. Emphasis on cross-cultural concepts needed for successful interaction within business settings. Taught in French.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN311 Advanced Oral Expression (3 Credits)
Linguistic and thematic analysis of written, audio, and visual texts. Focus on aural and oral skills. Some written assignments and evaluation.
Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN312 France Today (3 Credits)
Analysis and discussion of current events and institutions using various French media resources.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN351 From Romanticism to the Age of Modernism and Beyond (3 Credits)
A survey of the chief authors and major movements of French literature from Pre-Romanticism to the present.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN352 From the Age of Epic and Romance to the Enlightenment (3 Credits)
A survey of the chief authors and major movements of French literature from the Middle Ages to the end of the 18th century.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

FREN387 Critical Writing on France and the French-Speaking World (3 Credits)
Intensive writing course based on focused study of issues and concerns drawn from French and Francophone literatures, films, and cultures. Elements of style, review of grammar. Taught in French.
Prerequisite: FREN301.
Restriction: Not open to Native speakers.

FREN388 Language House Colloquium (1 Credit)
The Language House Colloquium is a one-credit course for students residing in the Language House Immersion Program. The course focuses on the further development of skills in the target language and the acquiring of cultural knowledge of the countries that speak the target language. The course is designed to supplement the learning that takes place on a daily basis in the Language House program.
Restriction: Must be a resident of Language House.
Repeatable to: 4 credits.

FREN399 Directed Study in French (1-3 Credits)
Advanced undergraduates develop syllabus, reading list, and course requirements with interested faculty member. Designed for in-depth study of material not offered in regular courses or as expansion of course material. To be planned during semester preceding registration.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 3 credits.

FREN400 Applied Linguistics (3 Credits)
The nature of applied linguistics and its contribution to the effective teaching of foreign languages. Comparative study of English and French, with emphasis upon points of divergence. Taught in French.
Prerequisite: FREN301; or permission of ARHU-French & Italian Languages & Literatures department.

FREN407 History of the French Language (3 Credits)
Evolution of the French language from Latin to modern French. Taught in French.
Prerequisite: FREN351 or FREN352; or permission of ARHU-French & Italian Languages & Literatures department.

FREN421 Francophone African Film (3 Credits)
Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.Cross-listed with: CINE421.
Credit Only Granted for: FREN421, CINE421 or FILM421.
Formerly: FILM421.

FREN423 Women and French Cinema (3 Credits)
Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in French.Cross-listed with: CINE423.
Credit Only Granted for: FREN423, CINE423 or FILM423.
Formerly: FILM423.

FREN429 Studies in French Literature and Culture of the Renaissance (3 Credits)
Selected topics in French literature of the Renaissance.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN439 Studies in 17th Century French Literature and Culture (3 Credits)
Selected topics in seventeenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN449 Studies in 18th Century French Literature and Culture (3 Credits)
Selected topics in eighteenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN459 Studies in 19th Century French Literature and Culture (3 Credits)
Selected topics in nineteenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN469 Studies in 20th Century French Literature and Culture (3 Credits)
Selected topics in twentieth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN471 The Construction of French Identity I: From the Origins to the Age of Versailles (3 Credits)
French life, customs, culture, traditions (800-1750).
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN472 The Construction of French Identity II: From the Revolution to the Early Twentieth Century (3 Credits)
French life, customs, culture, traditions (1750 to the early twentieth century).
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN473 The Construction of French Identity III: Cross-Cultural Approaches to the Study of Contemporary French Society (3 Credits)
Patterns of communication, mythology, and ideology in modern France, from the Third Republic to the present, through historical and cross-cultural approaches, with reference to the Francophone world.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN474 Contemporary France: A Sociocritical Approach (3 Credits)
A sociocritical approach to understanding modern French society through the study of print and non-print media documents (autobiography, film, and paraliterature), with reference to the Francophone world. Taught in French.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.
Recommended: FREN473.

FREN478 Themes and Movements of French Literature in Translation (3 Credits)
Studies treatments of thematic problems or literary or historical movements in French literature. Topic to be determined each semester. Taught in English.

FREN479 Masterworks of French Literature in Translation (3 Credits)
Treats the works of one or more major French writers. Topic to be determined each semester. Taught in English.

FREN480 French Cinema: A Cultural Approach (in Translation) (3 Credits)
A study of French culture, civilization, and literature through the medium of film. Taught in English.Cross-listed with: CINE420.
Credit Only Granted for: FREN480, CINE420 or FILM420.
Formerly: FILM420.

FREN482 Gender and Ethnicity in Modern French Literature (3 Credits)
Literature by women writers of France and other French speaking areas with a focus on the relationship between gender, ethnicity and writing. Taught in English.

FREN488 Special Topics in Francophone Studies (3 Credits)
Topic and language of instruction to be announced when offered.
Repeatable to: 9 credits if content differs.

FREN489 Seminar in Themes or Movements of French Literature (3 Credits)
Seminar on selected themes or movements of French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN495 Honors Thesis Research (3 Credits)
The writing of a paper under the direction of a professor in this department and an oral examination. Required to fulfill the departmental honors requirement.
Restriction: Must be admitted to the departmental honors program.

FREN498 Special Topics in French Literature (3 Credits)
Selected topics in French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN499 Special Topics in French Studies (3 Credits)
An aspect of French studies, the specific topic to be announced each time the course is offered.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

GEMS - Gemstone

GEMS100 Freshman Honors Colloquium: Introduction to Gemstone (1 Credit)
Orienting new Gemstone students to the university and to the program through a variety of team building activities, resources, and skill exploration exercises. Students will also examine and discuss areas such as liberal education, diversity, service, arts, current events, academic integrity, and leadership style.
Restriction: Freshman standing; and must be in the Gemstone program.

GEMS102 Research Topic Exploration and Team Formation (1 Credit)
Under the guidance of staff and visiting speakers, students will develop research topics that they will pursue for the remainder of their participation in the Gemstone program, and form into interdisciplinary teams around these topics.
Restriction: Must be in the Gemstone program.

GEMS104 Topics in Science, Technology and Society (STS) (3 Credits)
An examination of how cultural, economic, political and social forces shape scientific and technological systems and, conversely, how scientific and technological systems have affected the culture, economies, organization and politics of societies. Students in the course will form small teams to carry out semester-long research on socio/technical topics related to the course theme chosen for that specific semester.
Prerequisite: GEMS100.
Restriction: Must be in the Gemstone program.

GEMS202 Team Dynamics and Research Methodology (2 Credits)
This experiential course is designed to foster an understanding of effective team dynamics and basic research methodology. It will teach skills applicable to Gemstone team research and the writing of a team thesis. Upperclass Gemstone students serve as discussion facilitators. Students participate in their Gemstone teams and develop a draft of their team thesis proposal.
Prerequisite: GEMS100, GEMS102, and GEMS104.
Corequisite: GEMS296.
Restriction: Must be in the Gemstone program; and sophomore standing or higher.

GEMS208 Special Topics in Leadership and Team Development (1-3 Credits)
Principles, methods and types of leadership and team development with an emphasis on group discussion and decision making. Reading, discussion and exploration of the basic team concept, communications for winning scenarios, goal setting, problem solving, conflict resolution and research methods.
Restriction: Must be in the Gemstone program.

GEMS296 Team Project Seminar I (1 Credit)
This is the first of six seminars during which Gemstone students carry out multidisciplinary research with the guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long term goals.
Prerequisite: GEMS100, GEMS102, and GEMS104.
Corequisite: GEMS202.
Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS297 Team Project Seminar II (2 Credits)
This is the second of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team develops its website, prepares and presents its research proposal and begins its research project.
Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS396 Team Project Seminar III (2 Credits)
This is the third of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team presents its progress at the Gemstone Colloquia.
Prerequisite: GEMS297.
Restriction: Must be in the Gemstone program with junior standing in a research team.

GEMS397 Team Project Seminar IV (2 Credits)
This is the fourth of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team further develops its website. Also they will prepare and present the team project in the poster session of Undergraduate Research Day.
Prerequisite: GEMS396.
Restriction: Must be in the Gemstone program with junior standing in a research team.

GEOG - Geographical Sciences

GEOG100 Introduction to Geography (3 Credits)
An introduction to the broad field of geography as it is applicable to the general education student. The course presents the basic rationale of variations in human occupancy of the earth and stresses geographic concepts relevant to understanding world, regional and local issues.

GEOG110 The World Today: Global Perspectives (3 Credits)
The most critical issue facing the world today is the sustainability of both human and physical systems in the 21st century. This class uses the context of regions of the world to explore the 21st century issues of climate change, development, politics, economy, and demography. Each region will be used to highlight aspects of sustainability.

GEOG130 Development Geography: Environmental & Social Justice (3 Credits)
The geography of economic, social, and environmental well-being and inequality. The course will provide an integrated perspective on the causes, interconnections, and consequences across time and space of, among others, globalization, climate change, poverty, employment, migration and urban growth, agricultural productivity, rural development, policies and international trade. Portraits of selected countries and regions will be developed.

GEOG140 Natural Disasters: Earthquakes, Floods, and Fires (3 Credits)
Catastrophic Environmental Events (CCE) that are becoming more common in this time of global environmental change and it is essential that today's students be equipped with the knowledge and skills to be leaders as we, as a society, understand the upheaval that these CCEs are causing. Students will examine how CEEs shape human society and ecosystem from the interdisciplinary perspective afforded by the field of Geography. Students will use the latest geographic science concepts and techniques in exploring these events. Using satellite imagery they will gain a multi-scale perspective of the ecological and societal aspects of the events.

GEOG158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG170 Mapping our Digital World (3 Credits)
Introduction to technical methods used in gathering, analyzing, and mapping geospatial information for applications such as urban mobility, environmental monitoring, situational awareness, and disaster management. Topics include Geographic Information Systems (GIS), cartography, map projections, satellite and airborne remote sensing, the global positioning system (GPS), and introductory statistics and probability. The course is a gateway to more advanced technical classes in geospatial science.

GEOG172 Earth From Space (3 Credits)
Earth observations from space enable the mapping and monitoring of our changing planet. This survey course reviews current observational capabilities and examines scientific applications in quantifying global environmental change. Drivers and outcomes of key dynamics will be illustrated and discussed, including sea and continental ice loss, deforestation, ocean warming, urbanization, agricultural expansion and intensification, and vegetation response to climate change.

GEOG198 Selected Topics in Geography (1-3 Credits)
Readings and discussion on selected topics in the field of geography or GIS
Repeatable to: 12 credits if content differs.

GEOG201 Geography of Environmental Systems (3 Credits)
A systematic introduction to the processes and associated forms of the atmosphere and earth's surfaces emphasizing the interaction between climatology, hydrology and geomorphology.

GEOG202 Introduction to Human Geography (3 Credits)
Introduction to what geographers do and how they do it. Systematic study of issues regarding social and cultural systems from a global to a local scale. Looks at the distribution of these variables and answers the question "Why here, and not there"?

GEOG211 Geography of Environmental Systems Laboratory (1 Credit)
A laboratory course to accompany GEOG 201. Analysis of the components of the earth's energy balance using basic instrumentation; weather map interpretation; soil analysis; the application of map and air photo interpretation techniques to landform analysis.
Prerequisite: Must have completed or be concurrently enrolled in GEOL120, GEOL100, or GEOG201.

GEOG212 Career Planning for Geographical Sciences, GIS, and ENSP Majors (1 Credit)
Increase student knowledge of professional development opportunities in Geographical Sciences through classroom activities and invited speakers, and to build awareness of career development tools and strategies.
Restriction: Must be in one of the following programs (Geography; GEOG-GIS & Computer Cartography).

GEOG258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG272 Introduction to Earth Observation Science (3 Credits)
Concepts and principles of Earth observation and remote sensing in relation to photographic, thermal infrared and radar imaging. Methods of obtaining quantitative information from remotely-sensed images. Interpretation of remotely-sensed images emphasizing the study of spatial and environmental relationships.
Credit Only Granted for: GEOG272 or GEOG372.
Formerly: GEOG372.

GEOG276 Principles of Python Programming and Geocomputing (3 Credits)
Introduces conceptual and practical aspects of scientific computing using the Python programming language. The main focus is on developing proficiency for the basic elements of the development environment, foundational syntax including variables, logical operators, looping, conditional statements, nesting, and common programming patterns for mathematical and textual computing. In addition, essential data structures and functionality for scientific computing, such as arrays, dataframes, and data visualization will be introduced. Throughout the course, students will also become exposed to various applications in the domain of the social and environmental sciences.

GEOG298 Special Topics in Geography (3 Credits)
An introductory course dealing with special topics in geography.
Repeatable to: 6 credits if content differs.

GEOG301 Advanced Geographical Environmental Systems (3 Credits)
This course will provide the students with an overview of the key elements of physical geography, including biogeography (factors and processes that control the geographical distributions of plants and animals, climatology (processes associated with controlling variations in weather and climate), and geomorphology (factors and processes that control changes to the physical structure of the earth surface in relation to geological structures).
Prerequisite: GEOG201 and GEOG211.
Credit Only Granted for: GEOG398B or GEOG301.
Formerly: GEOG398B.

GEOG306 Introduction to Quantitative Methods for the Geographical Environmental Sciences (3 Credits)
Essentials in the quantitative analysis of spatial and other data, with a particular emphasis on statistics and programming. Topics include data display, data description and summary, statistical inference and significance tests, analysis of variance, correlation, regression, and some advanced concepts, such as matrix methods, principal component analysis, and spatial statistics. Students will develop expertise in data analysis using advanced statistical software.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

GEOG310 Maryland and Adjacent Areas (3 Credits)
The physical environment, natural resources, and population in relation to agriculture, industry, transport, and trade in the State of Maryland and adjacent areas.
Credit Only Granted for: GEOG310 or GEOG321.
Formerly: GEOG321.

GEOG312 The United States and Canada (3 Credits)
The two countries as functioning geographic systems with important differences and key linkages. An examination of the cultural, environmental, and economic components and their spatial variation. Attention to the role of regions in national economies.
Credit Only Granted for: GEOG312 or GEOG320.
Formerly: GEOG320.

GEOG328 Topics in Regional Geography (3 Credits)
Selected topics in regional geography.
Repeatable to: 6 credits if content differs.

GEOG330 As the World Turns: Society and Sustainability in a Time of Great Change (3 Credits)
Cultural geography course on society and sustainability. Culture is the basic building block that is key to sustainability of societies. Course will cover sustainability of societies on different scales, examining local, regional, and worldwide issues. Sustainability will be examined as a key element of environmental sustainability. How societies adjust to rapid world change will be examined as a positive and/or negative factor in sustainability.
Credit Only Granted for: GEOG330, GEOG360, or GEOG362.
Formerly: GEOG362.

GEOG331 Introduction to Human Dimensions of Global Change (3 Credits)
Introduction to global-scale interrelationship between human beings and the environment. The development of global issues including but not limited to the environment, food, energy, technology, population, and policy.
Prerequisite: ANTH220, ANTH260, GEOG202, or GEOG201; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG331 or GEOG361.
Formerly: GEOG361.

GEOG332 Economic Geography (3 Credits)
Principles of managing scarce resources in a world where everyone faces tradeoffs across both time and space. Focuses on the relationship between globalization processes and changing patterns of locational advantages, production, trade, population, socioeconomic and environmental grace and sustainability.
Credit Only Granted for: GEOG203, GEOG303, or GEOG332.
Formerly: GEOG303.

GEOG333 The Social Geography of Metropolitan Areas in Global Perspective (3 Credits)
A socio-spatial approach to human interaction within the urban environments: ways people perceive, define, behave in, and structure world cities and metropolitan areas. Cultural and social differences define spatial patterns of social activities which further define distinctions in distribution and interaction of people and their social institutions.
Prerequisite: GEOG201 and GEOG202; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG456 or GEOG333.
Formerly: GEOG456.

GEOG335 Population Geography (3 Credits)
The spatial characteristics of population distribution and growth, migration, fertility and mortality from a global perspective. Basic population-environmental relationships; carrying capacity, density, and relationships to national development.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202.
Credit Only Granted for: GEOG435 or GEOG335.
Formerly: GEOG435.

GEOG340 Geomorphology (3 Credits)
Survey of landform types and role of processes in their generation. Frequency of occurrence and implications for land utilization. Emphasis on coastal, fluvial, and glacial landforms in different environmental settings. Landform regions of Maryland.

GEOG342 Introduction to Biogeography (3 Credits)
The principles of biogeography, including the patterns, processes and distributions of living organisms from local to global scales, aspects of ecophysiology, population and community ecology and evolutionary biology. Spatial processes in the biosphere will be covered.
Prerequisite: GEOG201.
Recommended: GEOG211.
Credit Only Granted for: GEOG342 or GEOG347.
Formerly: GEOG347.

GEOG345 Introduction to Climatology (3 Credits)
The geographic aspects of climate with emphasis on energy-moisture budgets, steady-state and non steady-state climatology, and climatic variations at both macro-and micro-scales.

GEOG346 Cycles in the Earth System (3 Credits)
The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.
Prerequisite: GEOG123, AOSC123, GEOL123, or MATH140; or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, PHYS161, or MATH141. Cross-listed with GEOL346.
Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOG358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG371 Programming for Image Analysis (3 Credits)
Introduces application programing interface (API) functions and image processing techniques for efficient processing of satellite images. The main programing language of the course is Python. The course will use a Geospatial Data Abstraction Library (GDAL) which provides a unified way of manipulating images incorporating geospatial information. For image processing, the course will use Python-based libraries such as scikit-image and OpenCV.
Prerequisite: GEOG276, GEOG306, and GEOG272.

GEOG373 Geographic Information Systems (3 Credits)
Characteristics and organization of geographic data; creation and use of digital geospatial databases; metadata; spatial data models for thematic mapping and map analysis; use of geographic information system in society, government, and business. Practical training with use of advanced software and geographic databases.

GEOG376 Programming for Geospatial Analysis (3 Credits)
Covers conceptual and practical aspects of geospatial data modeling and analysis techniques using the Python programming language. The main focus is on developing a solid understanding of the programmatic conventions needed to create, manipulate, and process geospatial data types, such as point, line, & polygon vectors, networks, trajectories, and space-time extensions. In addition, students will develop a proficiency in applying these data structures to perform automated geospatial analysis, such as GIS operations, agent-based models, and spatial statistics.
Prerequisite: GEOG276 and GEOG373; Must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140; or must have completed MATH220.
Recommended: GEOG306.

GEOG384 Internship in Geography I (3 Credits)
Supervised field training to provide career experience. Introduction to professional level activities, demands, opportunities. Placement at a public agency, non-profit organization, or private firm. Participation requires application to the internship advisor in preceding semester.
Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and (ENGL393 or ENGL390).
Restriction: Must be in Geography program.

GEOG385 Internship in Geography II (3 Credits)
Supervised field training to provide career experience. Introduction to professional-level activities, demands, opportunities. Placement at a public agency, nonprofit organization, or private firm. Participation requires application to the internship advisor in preceding semester.
Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and must have completed a Junior (Professional) English course.
Restriction: Must be in Geography program.

GEOG396 Honors Research (3 Credits)
First course in the departmental honors sequence. Student development of a potential research topic under the guidance of a faculty advisor, culminating in a written and oral presentation of a research proposal.
Restriction: Permission of BSOS-Geography department; and senior standing or higher; and must be in Geography program.
Formerly: GEOG397.

GEOG397 Honors Thesis (3 Credits)
Second course in the departmental honors sequence. Student research under the auspices of a faculty advisor, culminating in a research paper to be defended orally before the geography honors committee.
Prerequisite: GEOG396.
Restriction: Must be in Geography program; and senior standing or higher.
Formerly: GEOG399.

GEOG398 Special Topics in Geography (1-3 Credits)
An introductory course dealing with special topics in geography.
Restriction: Permission of BSOS-Geography department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: GEOG298 or GEOG398.
Formerly: GEOG298.

GEOG413 Migration: Latin America and the United States (3 Credits)
Develops an understanding of the push and pull factors that have contributed to human mobility (migration) that has transformed the Americas. The class is divided in two parts: immigration and emigration from Latin American and Latin America migration to the United States. We will be interested in studying the migration shifts that have occurred in Latin America and the theories that help explain them. The themes that will be addressed are the history of migration with Latin America and to North America, the impact of this migration on both sending and receiving countries, and the various policy strategies and issues concerning migration.
Prerequisite: GEOG313; or permission of BSOS-Geography department.
Recommended: HIST250; or USLT201; or LASC234.
Credit Only Granted for: GEOG413, or GEOG498M.
Formerly: GEOG498M.

GEOG415 Land Use, Climate Change, and Sustainability (3 Credits)
The issues of climate change and land use change as two interlinked global and regional environmental issues and their implications for society and resource use are explored.
Prerequisite: GEOG123 or GEOG306; or permission of BSOS-Geography department.
Recommended: GEOG340; or GEOG342; or GEOG331. Or GEOG201; and GEOG211.
Credit Only Granted for: GEOG415 or GEOG498D.
Formerly: GEOG498D.

GEOG416 Conceptualizing and Modeling Human-Environmental Interactions (3 Credits)
Develops skills to carry out research that integrates environmental and economic aspects of sustainability by introducing extensively used quantitative tools for analyzing human-environmental interactions in the field of ecological economics. These include, e.g., index number calculations and decomposition analysis, Environmental Kuznets Curve (EKC), environmental input-output analysis and life-cycle analysis, and multi-criteria decisions aid (MCDA). Students will need laptops to run models during class.
Prerequisite: Permission of BSOS-Geography department.
Corequisite: MATH130, MATH140, or MATH120; or MATH220.

GEOG417 Land Cover Characterization Using Multi-Spectral Remotely Sensed Data Sets (3 Credits)
Students will be introduced to the image processing steps required for characterizing land cover extent and change. Key components of land cover characterization, including image interpretation, algorithm implementation, feature space selection, thematic output definition, and scripting will be discussed and implemented.
Prerequisite: GEOG272 and GEOG306; or permission of BSOS-Geography department. Jointly offered with: GEOG617.
Credit Only Granted for: GEOG417 or GEOG617.

GEOG418 Field and Laboratory Techniques in Environmental Science (1-3 Credits)
Lecture and laboratory learning each week. A variable credit course that introduces field and laboratory analyses in environmental science. Individual learning contract are developed with instructor.
Restriction: Permission of BSOS-Geography department.
Credit Only Granted for: GEOG418 or GEOG448.
Formerly: GEOG448.

GEOG421 Changing Geographies of China (3 Credits)
Covers physical geography, history, and economic and political systems of the world's most populous country. The major focus will be on geographical issues in China's contemporary development: agriculture, population, urbanization, resource and energy, and environment.
Prerequisite: Permission of BSOS-Geography department. Or GEOG202; and GEOG201; and (GEOG435, GEOG333, or GEOG332).
Recommended: GEOG130; or GEOG140.
Credit Only Granted for: GEOG328B or GEOG421.
Formerly: GEOG328B.

GEOG422 Changing Geographies of Sub-Saharan Africa (3 Credits)
Students will develop an understanding of the geographic contexts of SubSaharan Africa, including an overview of the physical, bioclimatic, historical, cultural, political, demographic, health and economic geographies of Sub-Saharan Africa. Students will fill in the map of Africa by studying the spatial distribution within each of these geographic domains. In addition to an overview of geography South of the Sahara, the Congo will be taken as a more intensive case study through additional readings, lectures and discussions.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202; and (GEOG335 or GEOG333).
Recommended: GEOG130 or GEOG110.
Credit Only Granted for: GEOG328C, GEOG422.
Formerly: GEOG328C.

GEOG423 Latin America (3 Credits)
A geography of Latin America and the Caribbean in the contemporary world: political and cultural regions, population and natural resource distribution, economic and social development, poverty, crime, urbanization, migration trends, and natural disasters.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201 and GEOG202; and (GEOG332, GEOG435, or GEOG333).
Recommended: GEOG130 and GEOG110.
Credit Only Granted for: GEOG313 or GEOG423.
Formerly: GEOG313.

GEOG431 Culture and Natural Resource Management (3 Credits)
Basic issues concerning the natural history of humans from the perspective of the geographer. Basic components of selected behavioral and natural systems, their evolution and adaptation, and survival strategies.
Credit Only Granted for: GEOG421 or GEOG431.
Formerly: GEOG421.

GEOG432 Spatial Econometrics (3 Credits)
An introduction to modern econometric techniques in general and spatial econometrics in particular, using the popular open source statistical computer language R. A focus on using statistical computing to produce analytical reports for real-world applications, research papers, and dissertations.
Prerequisite: Permission of BSOS-Geography department. Jointly offered with: GEOG732.
Credit Only Granted for: GEOG432 or GEOG732.

GEOG433 Land Use and Urban Economics (3 Credits)
While populations in developed countries have already concentrated in cities, recent estimates suggest that there will be several billion new urban dwellers mainly in developing countries during the first three decades of this century. This class will equip you to answer the following questions by introducing space into economic models and studying the location of economic activities: Why are cities so attractive to majority of population and industrial/commercial activities? What determines the land-use intensity and patterns of a city? Which policies can modify the shape of a city?
Prerequisite: Permission of BSOS-Geography department. Or GEOG201 and GEOG202; and (GEOG333 or GEOG332).

GEOG437 Political Geography (3 Credits)
Geographical factors in the national power and international relations; an analysis of the role of geopolitics and geostrategy, with special reference to the current world scene.
Credit Only Granted for: GEOG423 or GEOG437.
Formerly: GEOG423.

GEOG438 Seminar in Human Geography (3 Credits)
Selected topics in human geography.
Recommended: GEOG201; or GEOG211.
Restriction: Permission of BSOS-Geography department.
Repeatable to: 6 credits if content differs.

GEOG441 The Coastal Ocean (3 Credits)
Introduction to coastal oceanography, focusing on the physical, biological, and geological aspects of ocean areqs on the inner continental shelves. Wave, currents, and tidal dynamics of bays, open coast, estuaries, and deltas. Sedimentary environments of major coastal types. Ecology and biogeochemical relationships, including benthic and planktonic characteristics. Coastal evolution with sea level rise. Human impacts: eutrophication, modification of sedimentation. The coastal future: rising sea level, hypoxia, and increased storminess.
Prerequisite: GEOG140; or students who have taken courses with comparable content may contact the department; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG441 or GEOG498C.
Formerly: GEOG498C.

GEOG442 Biogeography and Environmental Change (3 Credits)
Biogeographical topics of global significance, including a consideration of measurement techniques, and both descriptive and mechanistic modeling. Topics may include: scale in biogeography, biodiversity, carbon geography, climate and vegetation, interannual variability in the biosphere, land cover, global biospheric responses to climate change, NASA's Mission to Planet Earth and Earth Observation System. The class focuses on both natural and athropogenic controls, impacts of biography on climate and ecosystem services and different methods in biogeography.
Prerequisite: GEOG301. And GEOG201 and GEOG211; or permission of BSOS-Geography department. Jointly offered with GEOG642.
Credit Only Granted for: GEOG642, GEOG442, GEOG447, or GEOG484.
Formerly: GEOG4 47.

GEOG458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG461 Machine Learning for Computational Earth Observation Science (CEOS) (3 Credits)
Provides an introduction to machine learning methods and models with an emphasis on Earth observation. Topics will include supervised (decision trees, random forest, neural networks, support vector machine, Gaussian process and ensemble techniques), and unsupervised techniques (clustering/segmentation, dimension reduction, multi-dimensional data visualization). The course will highlight the state-of-the-art deep learning models; object-based versus pixel-based image classification; how to deal with missing data and non-uniform coverage of data; and large scale land cover land use mapping from heterogenous satellite data. Practical part will include satellite image classification by applying classification models and biophysical parameters retrieval by applying regression models.
Prerequisite: GEOG371.

GEOG470 Algorithms for Geospatial Computing (3 Credits)
An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.
Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor. Cross-listed with: CMSC401. Jointly offered with: GEOG770.
Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.
Formerly: GEOG498I.

GEOG472 Remote Sensing: Digital Processing and Analysis (3 Credits)
Digital image processing and analysis applied to satellite and aircraft land remote sensing data. Consideration is given to image preprocessing techniques including radiometric calibration, geometric registration as well as atmospheric correction. Analysis methods include digital image exploration, feature extraction, thematic classification, change detection, and biophysical characterization. An application-oriented course project will be completed through the self-guided computer labs.
Prerequisite: GEOG272 and GEOG306; or students who have taken courses with comparable content may contact the department.

GEOG473 Geographic Information Systems and Spatial Analysis (3 Credits)
Analytical uses of geographic information systems; data models for building geographic data bases; types of geographic data and spatial problems; practical experience using advanced software for thematic domains such as terrain analysis, land suitability modeling, demographic analysis, and transportation studies.
Prerequisite: GEOG306 and GEOG373; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: GEOG473 or GEOG482.
Formerly: GEOG482.

GEOG475 Computer Cartography (3 Credits)
An overview of the basic concepts and techniques that underlie digital map making and the broader field of geographic visualization for intermediate GIS users. This includes the use of color, map symbolization, map layout, and also the contribution to geographic visualization from the fields of scientific visualization, information visualization, and cognition. Fundamentals of dynamic map design and web mapping will be introduced through the use of animated and interactive maps.
Prerequisite: GEOG373 and GEOG306.
Credit Only Granted for: GEOG471 or GEOG475.
Formerly: GEOG471.

GEOG476 Object-Oriented Computer Programming for GIS (3 Credits)
Expands on conceptual and practical aspects of programming for geographic applications. The main focus of this course is to provide students more advanced programming in object oriented programming languages (i.e. Python). In addition, students will develop a proficiency in applying these advanced programming principles to manipulating spatial data sources within the Geographic Information Systems (GIS).
Prerequisite: GEOG373 and GEOG376; or permission of BSOS-Geography department. And must have completed MATH220; or must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140.
Restriction: Must be in Geography program; or must be in GIS minor.

GEOG477 Mobile GIS Development (3 Credits)
Designed as an introduction to mobile GIS, to the programming concepts underlying mobile GIS development, and more importantly, to the design and implement of a mobile GIS application. Covers how to develop, test, and publish mobile GIS native apps working across two mobile platforms: Android and iOS. This course will also try to leverage the capabilities of JavaScript, Swift, Google maps, ArcGIS Server and runtime SDK to developing and publishing mobile GIS web apps.
Prerequisite: GEOG306, GEOG373, and GEOG376; and (GEOG473, GEOG475, or GEOG476). And MATH140 or MATH120; or must have completed MATH220.
Restriction: Must be in a major within the BSOS-Geography department; or permission of BSOS-Geography department.
Credit Only Granted for: Geog477 or Geog498V.
Formerly: Geog498V.

GEOG498 Topical Investigations (1-3 Credits)
Independent study under individual guidance.
Prerequisite: Restricted to advanced undergraduate students; and 24 credits in GEOG courses. Or restricted to graduate students.
Repeatable to: 6 credits if content differs.

GEOL - Geology

GEOL100 Physical Geology (3 Credits)
A general survey of the rocks and minerals composing the earth, its surface features and the agents that form them, and the dynamic forces of plate tectonics.
Credit Only Granted for: GEOL100 or GEOL120.
Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 110.

GEOL102 Historical Geology (4 Credits)
Earth's history as revealed through the principles of stratigraphy and the processes of physical geology. Emphasis on formations and geologic development of the North American continent.
Prerequisite: GEOL120 or GEOL100; and GEOL110. Or permission of CMNS-Geology department.

GEOL104 Dinosaurs: A Natural History (3 Credits)
Dinosaurs, their evolution, and our understanding of their fossil record. Students will examine the geologic record and the tools used by paleontologists to determine: geologic ages and ancient environments; evolutionary history and extinctions; dinosaurian biology and behavior; and their survival as birds. Mechanisms of global change ranging from plate tectonics to asteroid impact will be discussed.

GEOL110 Physical Geology Laboratory (1 Credit)
The basic materials and tools of physical geology stressing familiarization with rocks and minerals and the use of maps in geologic interpretations.
Prerequisite: Must have completed or be concurrently enrolled in GEOL120 or GEOL100.
Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 100.

GEOL120 Environmental Geology (3 Credits)
A review of geologic factors underlying many environmental problems and the interactions between population and physical environment: geologic hazards, land-use planning, conservation, mineral resources, waste disposal, land reclamation, and the geologic aspects of health and disease. The course is aimed at lower division students in education and liberal arts, and should be useful to any student concerned with geologic perspectives of environmental problems.
Credit Only Granted for: GEOL100 or GEOL120.

GEOL123 Causes and Consequences of Global Change (3 Credits)
Study of the major components of Earth's climate system and climate change history. Discussion of 21st century climate change prediction, mitigation and adaptation efforts.Cross-listed with: AOSC123.
Credit Only Granted for: AOSC123, GEOG123, GEOL123, or METO123.

GEOL124 Evolution of Life and Environment on Planet Earth (3 Credits)
An exploration of how life has shaped Earth's physical environments, both in the contemporary Earth and over the long course of Earth history. Topics range from evidence for the origin and diversification of life and its impact on Earth environments to the mind-set and methods of the scientists who interpret it, and what those methods tell us about future interactions between life and the environment, both on Earth and in the Solar System.

GEOL200 Earth's Fury: Earthquakes, Volcanoes, and Tsunami (3 Credits)
Earthquakes, volcanic eruptions, and tsunami frequently remind us of the dangers associated with living on a constantly changing planet. How do people prepare for these rare but dramatic events? Student will study the science behind earthquakes and volcanoes, how it guides monitoring, forecasting, prevention, and response, and the cultural and ethical aspects of these events.

GEOL204 Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past (3 Credits)
Examination of evidence used to reconstruct critical events in the history of life by looking at case studies of significant evolutionary origins, transitions, and extinctions; addressing the role of paleontology in human society, including science education, conservation, and the media.

GEOL212 Planetary Geology (3 Credits)
An examination of the geologic and geochemical processes at work in the solar system from the perspectives supplied by space age exploration of the planets and other solar system bodies.
Credit Only Granted for: ASTR330 or GEOL212.

GEOL224 Observations and Measurements of the Natural World (3 Credits)
A scientific research team experience focused on evaluating environmental controls on water quality in urbanized streams of College Park. Training in field, laboratory, and digital visualization techniques to gain hands on knowledge of the scientific method through detailed observations, measurements, manipulations, and interpretations of data gathered during the course.

GEOL288 Field Studies I (1 Credit)
Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves fieldwork of one week or longer duration, which work normally includes both observation and data collection. Particular programs may require certain prerequisites. Permission of Instructor is required. Special fees may be necessary.
Repeatable to: 3 credits if content differs.

GEOL310 Forensic Geology and Homeland Security (3 Credits)
An introduction to the fundamentals of forensic science with special reference to the application of geological techniques, and to the applications of Earth science in understanding problems in homeland security and hazardous materials response.
Prerequisite: CHEM131 and GEOL100; and (MATH107 or MATH110). Or permission of CMNS-Geology department; or permission of instructor is required of non-degree seeking students.

GEOL322 Mineralogy (4 Credits)
Basic mineralogy for geology majors. The principles of morphologic crystallography, crystal chemistry, and determinative mineralogy.
Prerequisite: GEOL120 or GEOL100; and GEOL110. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Permission of instructor is required for non-degree seeking students.

GEOL329 Instructional Assistance Practicum (1-2 Credits)
Undergraduate teaching assistantship in Geosciences. Individual instruction course. Contact department or instructor to obtain section number.

GEOL331 Principles of Paleontology (4 Credits)
A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.
Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department.
Restriction: Permission of instructor is required of non-degree seeking students. Cross-listed with: BSCI333.
Credit Only Granted for: GEOL331 or BSCI333.

GEOL340 Geomorphology (4 Credits)
Analysis of landforms, organized on the basis of the geologic processes that have operated during the late Cenozoic. Constructional and erosional landforms related to physical systems operating on geologic structures through time.
Prerequisite: GEOL120 or GEOL100.
Restriction: Permission of instructor is required of non-degree seeking students.

GEOL341 Structural Geology (4 Credits)
Study of the deformation of Earth's lithosphere, especially stress, rheology, strain, and the origin and significance of structural features. Development of 3-dimensional thinking through drafting and drawing of structures, construction of geologic maps and cross-sections, and stereographic and orthographic representation of structures. Improvement of scientific writing. Two weekend field trips.
Prerequisite: GEOL120 or GEOL100; and GEOL102; and GEOL110. Or permission of CMNS-Geology department.
Restriction: Permission of instructor is required of non-degree seeking students.

GEOL342 Sedimentation and Stratigraphy (4 Credits)
Description, origin, and distribution of sediments and sedimentary rocks.
Prerequisite: GEOL120 or GEOL100; and GEOL110; and GEOL322. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).
Restriction: Permission of instructor is required of non-degree-seeking students.

GEOL346 Cycles in the Earth System (3 Credits)
The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.
Prerequisite: MATH140; and (GEOG123, AOSC123, or GEOL123). Or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, PHYS161, or MATH141.
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with GEOG346.
Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOL351 Statistics for Geoscientists (3 Credits)
Practical approach to basic statistics applied in the geosciences. Experimental design, elementary statistics and probability, sequence analysis, spatial analysis, linear regression, nonparametric statistics, bivariate, multivariate and principal components analysis of variance, hypothesis testing. Problem sets and participatory discussion of statistical applications in the current literature.
Prerequisite: MATH115.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

GEOL375 Introduction to the Blue Ocean (3 Credits)
The global ocean is a major component of the Earth System that shapes life on earth, including our weather and climate. We explore the observation-based interdisciplinary science of oceanography, identifying its strong connections to related sciences like meteorology, and geography. We apply this developing understanding to environmental issues such as marine pollution, fish and fisheries, as well as to climate variability and to the changes to the marine environment that are resulting from steadily rising levels of atmospheric greenhouse gasses. Focusses include the biogeochemical and physical changes we can observe in the nearby Chesapeake Bay and the coastal waters of Eastern Shore, Maryland.
Prerequisite: MATH120 or higher.
Recommended: MATH121, MATH141, PHYS161, or PHYS171. Cross-listed with: AOSC375.
Credit Only Granted for: AOSC375, GEOL375 or METO375.

GEOL386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of CMNS-Geology department.
Restriction: Junior standing or higher.

GEOL388 Field Studies II (3 Credits)
Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves field work of one week or a longer duration, which would normally involve both observations and data collection, with associated classroom lectures and/or laboratory study, normally including additional analysis of collected observations and data. Particular programs may require certain prerequisites. Permission of instructor required. Special fees may be necessary.
Restriction: Non-degree-seeking students require the permission of the instructor.
Repeatable to: 6 credits if content differs.

GEOL391 Biology of Extinct Animals (3 Credits)
A survey of extinct animals that have few, if any, direct living descendants. The principles governing the functional design of animals will be used to infer life styles for extinct, and frequently bizarre, organisms.
Prerequisite: BSCI160 and BSCI161; or BSCI106. Cross-listed with: BSCI392.
Credit Only Granted for: GEOL391 or BSCI392.

GEOL392 Biology of Extinct Animals Laboratory (1 Credit)
An overview of the techniques used in paleobiological reconstructions of extinct animals.
Prerequisite: Must have completed or be concurrently enrolled in BSCI392. Cross-listed with: BSCI393.
Credit Only Granted for: GEOL392 or BSCI393.

GEOL393 Geology Senior Thesis I: Proposal (3 Credits)
The first semester of the two-semester Geology Senior Thesis. Emphasis is on developing a plan for original research in the geosciences and presenting that plan both in writing and in public presentations that adhere to geosciences professional standards.
Prerequisite: PHYS141 or (PHYS161 and PHYS174); and MATH141; and (CHEM131 and CHEM132) or (CHEM135 and CHEM136); and must have completed at least two upper-level geology courses and be concurrently enrolled in a third.
Restriction: Junior standing or higher; and must be in Geology program.

GEOL394 Geology Senior Thesis II: Research (3 Credits)
The second semester of the two-semester Geology Senior Thesis. Investigation of specific original research question in geosciences. Emphasis is on completion of original research proposed in GEOL393 and presentation of results both in writing and in public presentations that adhere to geosciences professional standards.
Prerequisite: GEOL393; and must have completed at least three upper level GEOL courses.
Restriction: Must be in Geology program; and junior standing or higher.

GEOL412 Geology of the Terrestrial Planets (3 Credits)
Geological features of Mercury, Venus, Mars and the Moon with an emphasis on results from recent NASA planetary mission. Topics include interior structure, impact cratering, tectonic and volcanic history, surface conditions, climate change, and habitability.
Prerequisite: GEOL341 or GEOL340.
Credit Only Granted for: GEOL489A or GEOL412.
Formerly: GEOL489A.

GEOL413 Geoscientific Modeling (3 Credits)
A model is a simplified representation of reality. Modeling is implicit or explicit in almost everything we do as geoscientists. Model construction, coding, and the concepts of parsimony vs complexity, robustness, validation, uncertainty, and the scientific interpretation of simulation results. Problem sets, independent study and participatory discussion of modeling applications in the current literature.
Prerequisite: MATH115; and two 400-level GEOL courses.
Recommended: Some experience in computer programming.
Restriction: Non-degree-seeking students require the permission of the instructor. Jointly offered with: GEOL613.
Credit Only Granted for: GEOL413, GEOL489G, GEOL613 or GEOL789G.
Formerly: GEOL489G.

GEOL423 Optical Mineralogy (4 Credits)
The optical behavior of crystals with emphasis on the theory and application of the petrographic microscope.
Prerequisite: GEOL100 or GEOL120; and GEOL110; and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL431 Vertebrate Paleobiology (4 Credits)
A survey of the evolution of the vertebrates, encompassing information from the diversity of living members, but concentrating on the contribution of the fossil record. Emphasis is on the phylogenetic systematics, comparative and functional anatomy, developmental biology, and stratigraphic distribution of major extinct and extant groups.
Prerequisite: BSCI207, BSCI392, GEOL104, GEOL204, or GEOL331; or permission of CMNS-Geology department.

GEOL435 Environmental Geochemistry (3 Credits)
An understanding of geochemical cycles of Earth's surface systems including soils, rivers, lakes, and estuaries and causes and implications of alteration of geochemical cycles. Topics include chemical weathering, soils, chemical composition of inland waters, hydrologic tracers, salinization, eutrophication, nutrient and metal pollution, and global geochemical cycles.
Prerequisite: MATH115; and (GEOL100 or GEOL120); and (GEOL436 or GEOL444). And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Nondegree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL489W or GEOL435.
Formerly: GEOL489W.

GEOL436 Principles of Biogeochemistry (3 Credits)
An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with: AOSC436.
Credit Only Granted for: GEOL436 or AOSC436.

GEOL437 Global Climate Change: Past and Present (3 Credits)
Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.
Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).

GEOL443 Petrology (4 Credits)
Study of igneous and metamorphic rocks: petrogenesis, distributions, chemical and mineralogical relations, macroscopic and microscopic descriptions, geologic significance.
Prerequisite: GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103. And must have completed or be concurrently enrolled in GEOL423; and (GEOL100 or GEOL120); and GEOL110.
Corequisite: Permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL444 Low Temperature Geochemistry (4 Credits)
Basic chemical principles, thermodynamics, and kinetics of low-temperature inorganic and organic geochemical reactions in a wide range of surface environments. These geochemical tools will be used to provide a context for understanding elemental cycling and climate change. Laboratories will include problem sets as well as wet chemical and mass spectrometric techniques used in low temperature geochemistry.
Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL445 High Temperature Geochemistry (4 Credits)
Review of chemical principles and their use in understanding processes of Earth, and solar system formation and differentiation. Topics include nucleosynthesis and cosmochemical abundances of elements, bonding and element partitioning, equilibrium thermodynamics and phase stabilities, radiogenic isotopes and geochronology, kinetics, and diffusion.
Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL446 Geophysics (3 Credits)
An introduction to modern geophysics. Topics include: global plate tectonics, plate motion, triple junctions, geomagnetism, earthquakes and faulting, reflection and refraction seismology, gravity and isostasy, heat flow and mantle dynamics, deep interior of the Earth, geophysical observations and measurements.
Prerequisite: PHYS141, MATH141, and MATH140; and (GEOL100 or GEOL120).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL447 Observational Geophysics (3 Credits)
An introduction to practical signal processing, data analysis, and inverse theory in geophysics.
Prerequisite: MATH140 and MATH141; and (PHYS141, PHYS161, or PHYS171).

GEOL451 Groundwater (3 Credits)
An introduction to the basic geologic parameters associated with the hydrologic cycle. Problems in the accumulation, distribution, and movement of groundwater will be analyzed.
Prerequisite: GEOL110 and MATH140; and (GEOL120 or GEOL100); and (CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor; and junior standing or higher.

GEOL452 Watershed and Wetland Hydrology (3 Credits)
Physical processes by which water moves in watershed and wetland systems. Topics include: precipitation, infiltration, flow in the unsaturated zone, streamflow generation processes, and groundwater flow.
Restriction: Junior standing or higher; and all other students require the permission of the instructor.

GEOL453 Ecosystem Restoration (3 Credits)
Overview of ecosystem functions across biomes/geologic settings, and considerations and tradeoffs in ecosystem restoration strategies. Specific case studies and discussions will be aimed at understanding how structure can influence biophysical and biogeochemical processes supporting ecosystems, and then describes how rates, timing, and location of physical, chemical, and ecosystem processes can be altered by different restoration strategies to enhance ecosystem services.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (CHEM131 or CHEM135); and (CHEM132 or CHEM136); and (GEOL100, GEOL120, or ENST200).
Restriction: Junior standing or higher; and permission of instructor is required of non-degree-seeking students.
Credit Only Granted for: GEOL453 or GEOL489L.
Formerly: GEOL489L.

GEOL455 Marine Geophysics (3 Credits)
Plate tectonics, earthquakes and faulting, isostasy and gravity, heat and mantle dynamics, ocean ridges and transform faults, hydrothermal vents, trenches and oceanic islands, subduction zones, accretionary and erosion wedges, sedimentary basins and continental rifts. Exploration of the oceans using geophysical methods.
Prerequisite: MATH141 and MATH140; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL455 or GEOL489E.
Formerly: GEOL489E.

GEOL456 Engineering Geology (3 Credits)
An overview of engineering geology with an emphasis on physical understanding of natural hazards and natural resources. General theories of stress and strain, failure criteria, frictional stability, fluid flow in porous media and poroelasticity are introduced. Quantitative approaches on earthquakes, landslides, land subsidence, and geotechnical aspects of oil/gas exploration are discussed.
Prerequisite: PHYS141 and MATH141; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL456 or GEOL489Z.
Formerly: GEOL489Z.

GEOL457 Seismology (3 Credits)
General overview of the basics of seismology, starting with wave propagation, seismic reflection and refraction. Applications to the determination of the seismic velocity and anisotropy structure of the Earth. Earthquake generation, postseismic deformation and creep events, relation to faulting and plate tectonics.
Prerequisite: GEOL120 or GEOL100; and (MATH141, GEOL110, and MATH140). Or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, or PHYS161.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL457 or GEOL489A.
Formerly: GEOL489A.

GEOL460 Field Geophysics (4 Credits)
Students will become familiar with geophysical instrumentation used for both scientific and industrial applications. Students will be given an introduction to the use of geophysical instrumentation for data collection, processing, and analysis, design of field experiments for investigating field geophysical problems, and an introduction to the theory of instrument design and use. Instruments that will be covered include (but are not limited to): broadband seismometers, geophones, ground-penetrating radar, magnetotellurics, and Global Positioning Satellites.
Prerequisite: GEOL100 or GEOL120, MATH140, MATH141, and (PHYS141, PHYS161, or PHYS171).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL463 Economic Geology (3 Credits)
The geological setting, and mineralogy of ore bodies, as well as the chemical and physical factors affecting the source, transport and deposition of metallic ores, petroleum and natural gas will be covered. The economics of mineral resources will be discussed.
Prerequisite: GEOL322; and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL489Q or GEOL463.
Formerly: GEOL489Q.

GEOL471 Geochemical Methods of Analysis (3 Credits)
Principles and application of geochemical analysis as applied to a variety of geological problems. X-ray and optical spectroscopy, X-ray diffraction, atomic absorption, electron microprobe, and electron microscopy.
Prerequisite: CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL473 Origin and Evolution of the Continents (3 Credits)
Introduction to current theories regarding the origin and evolution of the continents. Emphasis on development of critical reading and reasoning skills, and improvement of verbal and written communication.
Prerequisite: GEOL445 and GEOL443; or permission of instructor.
Restriction: Non-degree-seeking students require the permission of the instructor.
Formerly: GEOL489I.

GEOL488 Geology Colloquium (1 Credit)
Contemporary research topics and issues in geosciences are explored through the weekly Geology departmental colloquium and discussion of its contents.
Prerequisite: At least one 300 or 400-level Geology course of at least 3 credits.
Restriction: May not be taken concurrently with GEOL497 or GEOL497H.
Repeatable to: 4 credits.

GEOL489 Special Topics (3 Credits)
Recent advances in geology.
Prerequisite: Must have completed at least 2 upper-level GEOL courses plus one additional GEOL course.
Corequisite: GEOL393.
Restriction: Must be in Geology program; and junior standing or higher.

GEOL490 Geology Field Camp (6 Credits)
Intense field geology course taught off campus during the summer. Students describe and compile maps of formations and structures from outcrops, subsurface, and remotely sensed data. Special fees required.
Prerequisite: GEOL341 and GEOL443.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL491 Environmental Geology Field Camp (3-6 Credits)
Intensive field course designed for students of environmental geology. Students will learn to make maps, to describe soil profiles and site characteristics, to monitor hydrologic and groundwater conditions, and to measure geologic structures and stratigraphic sections.
Prerequisite: GEOL341, GEOL342, and GEOL451; or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL490 or GEOL491.

GEOL497 Recent Advances: Geology (3 Credits)
A survey of important recent advances in geological sciences in the context of the methods and practices of scientific research.
Prerequisite: Must have completed at least 2 upper-level GEOL courses.
Corequisite: GEOL393; and a third upper-level geology course.
Restriction: Must be in Geology program; and GPA of 3.0 or better in both overall and in all courses required for the major; and senior standing; and to be taken as late as possible in the program.
Credit Only Granted for: GEOL497 or GEOL489H.
Formerly: GEOL489H.

GEOL499 Special Problems in Geology (1-3 Credits)
Intensive study of a special geologic subject or technique selected after consultation with instructor. Intended to provide training or instruction not available in other courses which will aid the student's development in his or her field of major interest.
Prerequisite: (GEOL120 or GEOL100; and (GEOL102 and GEOL110)); or students who have taken courses with comparable content may contact the department. And permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.

GERM - Germanic Studies

GERM101 Elementary German I (4 Credits)
Introduction to basic structures and pronunciation by emphasis on the four skills: listening, speaking, reading and writing. Readings concern the current lifestyle and civilization of the German-speaking world.

GERM103 Intensive Elementary German (4 Credits)
Covers speaking, reading, writing, listening, and culture of German-speaking world.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed GERM102; and must not be a fluent/native speaker of German.
Credit Only Granted for: GERM102 or GERM103.

GERM148 Germanic Languages - Elementary I (3 Credits)
Basic instruction in a Germanic language other than German; Yiddish and Swedish are offered regularly, Danish, Netherlandic, and Norwegian when demand is sufficient. Subtitle will reflect the language. May be repeated in a different language.
Repeatable to: 6 credits if content differs.

GERM149 Germanic Languages - Elementary II (3 Credits)
Continuation of GERM148. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM148.

GERM169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM203 Intensive Intermediate German (4 Credits)
Covers speaking, reading, writing, listening, and culture of German-speaking world.
Prerequisite: GERM103; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed GERM201; and must not have completed GERM202; and must not be a fluent/native speaker of German.
Credit Only Granted for: GERM202 or GERM203.

GERM204 German Grammar Review (3 Credits)
An in-depth study and analysis of selected grammatical topics in a contextualized framework.
Prerequisite: GERM203; or Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of German.

GERM248 Germanic Languages Intermediate - I (3 Credits)
Intermediate instruction in a Germanic language other than German. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM149.

GERM249 Germanic Languages - Intermediate II (3 Credits)
Continuation of GERM248. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM248.

GERM255 Once Upon a Time: Fairy Tales of the Brothers Grimm (3 Credits)
A critical examination of how fairy tales and folklore pervade and influence diverse facets of Western culture, ranging from issues of politics and national identity, ethics and morality, violence and fear, education and pedagogy, to gender and sexuality in the establishment and regulation of social norms. Taking the German tales collected by Jacob and Wilhelm Grimm as its focal point, the magical and often terrifying world of fairy tales within the German, European, and American cultural traditions from Romanticism to today will be explored.
Additional Information: Course is taught in English.

GERM269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM289 Selected Topics in the Cultures of the Germanic Speaking Countries (3 Credits)
Topics in the cultures of the Germanic speaking countries.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

GERM299 Special Topics in German Studies (3 Credits)
Selected topics on language, literature, or culture of the German-speaking world.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERM301 Conversation and Composition I: The German-Speaking World (3 Credits)
Practice in contemporary spoken and written German. Systematic review of grammar, and exercises in composition. Emphasis on cultural contrasts in the German-speaking world.
Prerequisite: GERM204; or students who have taken courses with comparable content may contact the department.

GERM302 Conversation and Composition II: Current Topics in German-Speaking Society (3 Credits)
Further practice in contemporary spoken and written German. Contemporary social, political, and cultural themes.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM315 Practicum in Translation I (3 Credits)
Problems and strategies of translation from German to English.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM319 Selected Topics in German Language Studies (1-3 Credits)
The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.
Prerequisite: GERS203; or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits if content differs.

GERM320 Survey of German Studies (3 Credits)
Approaches to analysis of German cultural products such as literature, film, poetry, architecture and works of art. Taught in German.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM322 Highlights of German Literature and Culture (3 Credits)
Selected literary masterworks, social and cultural issues, and historical events in German-speaking countries from the Enlightenment, Romanticism, Junges Deutschland, Realism, Naturalism and its counter currents, Expressionism to the present. Taught in German.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)
Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of The Trial, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's 'Kafka', 1991).Cross-listed with: CINE331.
Credit Only Granted for: GERM331, CINE331, FILM331, or HONR348K.
Formerly: FILM331.

GERM339 German Literature In Translation (3 Credits)
Selected movements, genres or other special topics in German literature. Readings and instruction in English. May not be counted in the fulfillment of German major requirements in German literature.
Repeatable to: 6 credits if content differs.

GERM349 Germanic Literatures in Translation (3 Credits)
Study of an important author, period or theme in a Germanic literature other than German: Yiddish, Netherlandic or Scandinavian. Taught in English.
Repeatable to: 6 credits if content differs.

GERM356 German for the Professions (3 Credits)
An examination of the structures and work conditions of various industries in the German-speaking world including understanding and navigating company culture, professional development, and preparation for an internship or job where German is spoken.
Prerequisite: GERM301.
Credit Only Granted for: GERM319B or GERM356.
Formerly: GERM319B.

GERM367 The Great Derangement: Climate, Art, and Literature (3 Credits)
An investigation of the relationship between climate and art & literature. Introduction to ecological thinking followed by study of artistic and literary works thematically grouped by the four elements: Earth, Water, Air, and Fire. Readings from the German literary tradition (Goethe, Tieck, Stifter, Kafka, Frisch, Wolf) and contemporary research in the environmental humanities, with additional readings and viewings from elsewhere on the planet. Taught in English.
Recommended: 200-level General Education and/or humanities course; and sophomore standing. Cross-listed with: CMLT399E.
Credit Only Granted for: GERM399E, CMLT399E or GERM367.
Formerly: GERM399E.
Additional Information: Priority in enrollment will be given to German majors.

GERM369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM383 The 'Warrior' in German Culture: From Valiant Knights to Brazen Terrorists (3 Credits)
Acknowledging the nexus between acts of military aggression and political apparatuses, this course examines the semiotic significance of literary and cinematic manifestations of the warrior at critical junctures in German history. Taking the warrior as its focal point, this course explores the intricate web connecting various forms of military conflict, political systems of power, and social conventions within Western civilization from Antiquity to today. Taught in English.

GERM385 German Cinema (3 Credits)
A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.Cross-listed with: CINE385.
Credit Only Granted for: GERM385, CINE385 or FILM385.
Formerly: FILM385.

GERM386 Experiential Learning (1-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

GERM388 Language House Spring Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident of Language House.
Repeatable to: 8 credits.

GERM389 Topics in German Culture (3 Credits)
Topics in the cultures of the German-speaking peoples. Taught in English.
Repeatable to: 6 credits if content differs.

GERM397 Honors Reading (Independent Study) (3 Credits)
Supervised reading to be taken normally only by students admitted into honors program.

GERM398 Honors Research (3 Credits)
Prepares students to write an honors thesis. Under the direction of a German department faculty member, the student will select a thesis topic and conduct the necessary research.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM399 Selected Topics in German Studies (3 Credits)
Selected topics on the language, literature, and culture of the German-speaking world.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERM401 Advanced Conversation (3 Credits)
Development of fluency in spoken German to achieve advanced level.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM402 Advanced Conversation and Composition (3 Credits)
Advanced instruction in and acquisition of written and oral communication skills in German
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.
Restriction: Must not have completed GERM401 or GERM403.
Credit Only Granted for: (GERM401 and GERM403) or GERM402.

GERM403 Advanced Composition (3 Credits)
Advanced instruction in and acquisition of German writing skills.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM415 German/English Translation I (3 Credits)
An intensive presentation of German grammar limited exclusively to reading skill; graded readings in the arts and sciences. Instruction in English; cannot be used to satisfy the arts and humanities foreign language requirement.
Restriction: Must not have completed GERM101, GERM102, GERM103, GERM201, GERM202, GERM203, GERM204, GERM301, or GERM302.

GERM419 Selected Topics in German Language Studies (3 Credits)
The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.
Prerequisite: GERM302; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM436 The Usual Suspects: Criminals in German Literature and Film (3 Credits)
An examination of how historical, cultural and political discourses in German-speaking countries influence social norms and criteria for judging what is considered socially acceptable or "deviant". Texts and films span from the 18th to 21st centuries. Taught in German.
Prerequisite: GERM320 or GERM322; or permission of instructor.

GERM439 Selected Topics in German Literature (3 Credits)
Special study of an author, school, genre, or theme. Taught in German.
Prerequisite: GERM320, GERM321, or GERM322; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM441 Border Crossings and Cultural Transfers (3 Credits)
Border Crossings and Cultural Transfers emphasizes the transnational and global dimensions of German culture, analyzing the interrelationship of dominant and minority cultures within Germany and/or the impact of German cultures abroad. Topics include migration, exile, (post)colonialism, and globalization. Taught in German.
Prerequisite: GERM320 or GERM322.

GERM442 Gender and Sexuality in German Literature and Society (3 Credits)
Gender and Sexuality in German Literature and Society analyzes gender and sexuality as key discourses for understanding German-speaking literatures, cultures, and societies. Topics include the history of sexuality; death and desire; and representations of gender in German literature. Taught in German.
Prerequisite: GERM320 or GERM322.

GERM443 Literature as Cultural Discourse (3 Credits)
Investigates literature as cultural discourse in the construction of knowledge, emphasizing a discursive approach to analyzing a range of literary texts. Taught in German.
Prerequisite: GERM320 or GERM322.

GERM444 The German-Jewish Experience (3 Credits)
Focuses on the German-Jewish experience as a key dimension of European history, literature, and culture. Topics include Heinrich Heine, German-Jewish authors and texts, and the Holocaust in literature and film.
Prerequisite: GERM320 or GERM322.
Additional Information: Taught in German.

GERM449 Selected Topics in Germanic Studies (3 Credits)
Study of a linguistic, literary or cultural topic in Yiddish, Netherlandic, or Scandinavian studies.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM457 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)
Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.Cross-listed with: GERS457.
Credit Only Granted for: AREC357, GERM457, or GERS457.

GERM458 Literary or Media Genres (3 Credits)
Literary or Media Genres studies the formal and stylistic dimensions of specific genres, emphasizing genre as a social, political, and aesthetic category. Topics include pop literature; the history of German drama; and German film genres among others.
Prerequisite: GERM320 or GERM322.
Repeatable to: 6 credits if content differs.
Additional Information: Taught in German.

GERM473 Variation in Contemporary German Language (3 Credits)
Examines the unique, multilingual society that is modern Germany, exploring issues such as regional varieties, gendered language, language reform (and resistance to it), public and media speech, the influence of American English on colloquial speech and in specific fields, and the problems of immigrant communities acquiring both dialect and standard German.
Prerequisite: GERM302; or permission of instructor.
Credit Only Granted for: GERM473 or GERM673.

GERM488 Capstone Seminar (3 Credits)
Provides an opportunity for German majors (usually in their senior year) to demonstrate that they have achieved the goals for learning established and approved by the department. Students analyze in depth a research topic and apply their accumulated learning. Requirements include engaging in an in-depth research project (research paper or media project) and an in-class presentation of their research to faculty and student peers. Taught in German.
Prerequisite: Students must have completed two 400-level courses taught in German.

GERM489 Social Issues in German Culture (1-3 Credits)
Special topics course examining the cultural constructions and representations of important social, political, and linguistic issues, investigating their connection to German values and institutions. Taught in German.
Prerequisite: GERM320 or GERM322.
Repeatable to: 6 credits if content differs.

GERM498 Honors Thesis Writing (3 Credits)
Required for students pursuing departmental honors in Germanic languages and literatures. Under the direction of a German department faculty member, students write their honors theses.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM499 Directed Study (1-3 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERS - German Studies

GERS141 Yiddish I (3 Credits)
Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.Cross-listed with: JWST281.
Credit Only Granted for: JWST281, GERM148Y or GERS141.

GERS142 Elementary Yiddish II (3 Credits)
Continuation of JWST281.
Prerequisite: JWST281; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies. Cross-listed with: JWST282.
Credit Only Granted for: GERM149Z, GERS142 or JWST282.

GERS299 Special Topics in German Studies (3 Credits)
Selected topics on language, literature, or culture of the German-speaking world.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERS319 Selected Topics in German Language Studies (1-3 Credits)
The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.
Prerequisite: GERS203; or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits if content differs.

GERS389 Topics in German Culture (3 Credits)
Topics in the cultures of the German-speaking peoples. Taught in English.
Repeatable to: 6 credits if content differs.

GERS399 Selected Topics in German Studies (3 Credits)
Selected topics on the language, literature, and culture of the German-speaking world.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERS457 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)
Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.Cross-listed with: AREC357.
Credit Only Granted for: AREC357, GERM457, or GERS457.

GREK - Greek

GREK101 Elementary Ancient Greek I (4 Credits)
Study of basic grammar, development of reading facility, and introduction to Athenian life and culture in the fifth century B.C.
Restriction: A student who has had two units of Greek in high school may register for GREK101 for purposes of review but not for credit.

GREK102 Elementary Ancient Greek II (4 Credits)
Continuing development of basic grammar and reading skills; study and discussion of central aspects of Greek culture.
Prerequisite: GREK101; or students who have taken courses with comparable content may contact the department.

GREK111 Elementary Modern Greek I (3 Credits)
An introduction to the language and culture of modern Greece. Students begin to acquire the basic tools of the language and to communicate, in simple everyday situations. This is the first of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Restriction: Must not be a native speaker of Greek.
Credit Only Granted for: FOLA108G or GREK111.
Formerly: FOLA108G.

GREK112 Elementary Modern Greek II (3 Credits)
It is designed for students who have already completed the first semester course (GREK111) and/or those whose level of proficiency in Greek is not advanced enough for the intermediate level. Like GREK111, an introduction is provided to the language and culture of modern Greece. Students acquire the basic tools of the language and learn to communicate in simple, everyday situations. This is the second of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK111; or permission of instructor.
Credit Only Granted for: FOLA109G or GREK112.
Formerly: FOLA109G.

GREK201 Intermediate Ancient Greek (4 Credits)
Advancing beyond the basic skills developed in GREK 101 and GREK 102; review of selected grammatical concepts; continuous reading of passages from Greek literature.
Prerequisite: GREK102; or students who have taken courses with comparable content may contact the department.

GREK211 Intermediate Modern Greek I (3 Credits)
A continuation of the study of basic structures and the development of fluency in functional, spoken and written communication. This is the first of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK112; or permission of instructor.
Credit Only Granted for: FOLA118G or GREK211.
Formerly: FOLA118G.

GREK212 Intermediate Modern Greek II (3 Credits)
A continuation in the development of fluency in spoken and written communication along with the exploration of syntactic and grammatical structures. Comprehension and vocabulary enrichment are further developed through selected readings from Modern Greek prose and poetry. This is the second of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK211; or permission of instructor.
Credit Only Granted for: FOLA119G or GREK212.
Formerly: FOLA119G.

GREK269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GREK301 Scenes from Athenian Life (3 Credits)
Makes the transition from study of Greek grammar to reading. Focus on selected aspects of life in Athens: marriage, friendship, the courts, festival, theatre. Reading short works by three authors: Lysias, Plato, and a playwright (e.g., Menander). Readings are in ancient Greek.
Credit Only Granted for: GREK301 or GREK351.
Formerly: GREK351.

GREK369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GREK386 Experiential Learning (3-6 Credits)
Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

GREK388 Intermediate Ancient Greek Readings (3 Credits)
The reading of one or more selected Greek authors from the archaic period through late antiquity. Appropriate for those at an intermediate level in the study of ancient Greek.
Prerequisite: GREK201; or students who have taken courses with comparable content may contact the department.

GREK398 Advanced Modern Greek (3 Credits)
Develops advanced communication skills in the modern Greek language: speaking, listening, reading, and writing.
Prerequisite: GREK212; or permission of ARHU-Classics department.
Repeatable to: 6 credits.

GREK399 Topics in Advanced Modern Greek Language & Culture (3 Credits)
Development of communicative skills in advanced Modern Greek. Topics will be drawn from the social and folk life of modern Greece.
Prerequisite: GREK212; or permission of ARHU-Classics department.
Repeatable to: 6 credits.

GREK403 Greek Tragedy (3 Credits)
Additional Information: Readings are in ancient Greek.

GREK411 Modern Greek Literature and History (3 Credits)
Students will study historical and political events in Greece during the 19th and 20th centuries through the viewpoint of the man of letters. Poetry, prose, plays, and essays reflect national emancipation, social reconstruction, and political struggles. Readings and discussion are in Modern Greek.
Prerequisite: Students must have earned a grade of C- or better in a 300-level Modern Greek course.
Restriction: Permission of instructor.
Credit Only Granted for: GREK311 or GREK411.
Formerly: GREK311.

GREK415 Homer (3 Credits)
Extensive readings in Greek from the Iliad or the Odyssey, with special attention to the features of Homeric style and the relationship between the two epics.
Prerequisite: Permission of ARHU-Classics department.

GREK472 History and Development of the Greek Language (3 Credits)
Mastery of ancient Greek through grammar review, prose composition, and analysis of historical developments in Greek writers' modes of expression.
Restriction: Permission of instructor.

GREK488 Greek Readings (3 Credits)
The reading of one or more selected Greek authors. Reports.
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.
Additional Information: Readings are in ancient Greek.

GREK499 Independent Study in Greek Language and Literature (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

GVPT - Government and Politics

GVPT101 Introduction to Political Science (3 Credits)
A study of the basic principles and concepts of political science.

GVPT105 Introduction to Political Ethics (3 Credits)
An examination of major theories of political life and politics as they pertain to international politics, conflict, and culture. Emphasis will be given to theories of ethics and morality that pertain to international studies, such as human rights.
Restriction: Must be in the College Park Scholars program; and must be in International Studies program or Public Leadership program.

GVPT158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GVPT170 American Government (3 Credits)
A comprehensive study of national government in the United States.

GVPT200 International Political Relations (3 Credits)
A study of the major factors underlying international relations, the causes of conflict and cooperation among international actors, the role of international institutions, the interactions of domestic and foreign policies, and major issues in security, economy and the environment.

GVPT201 Scope and Methods for Political Science Research (3 Credits)
An introduction to empirical research in political science.
Credit Only Granted for: GVPT100 or GVPT201.
Formerly: GVPT100.

GVPT202 Politics, Constitutional Policy, and the Institution of the U.S. Supreme Court (3 Credits)
A thorough examination of the U.S. Supreme Court in the American political system. Focusing on the Court as an institution-the set of norms, rules, and policymaking processes that lead to the Supreme Court's decisions-and how justices' decision-making processes critically determine substantive legal policy and the meaning of the U.S. Constitution.

GVPT203 The Challenge of Authoritarianism (3 Credits)
An introduction to the persistent challenge of authoritarianism. The course explores the nature of authoritarianism and its evolution from ancient through modern times. Students will study how authoritarian regimes vary, why citizens sometimes comply with them, and when and how citizens rebel. The course concludes with a review of contemporary authoritarianism, focusing on its resilience in the Middle East and East Asia and its potential for a resurgence in the US and Europe.

GVPT204 Uncertain Partners: US and China in a Changing World (3 Credits)
The rapid ascent of the People's Republic of China (PRC) as a major political and economic power has meant that its relationship with the United States has become central in contemporary international politics. To an increasing extent, some of the biggest global challenges--ranging from nuclear proliferation, to climate change, to economic growth--require U.S.-China cooperation if they are to be managed effectively. Yet the U.S.-China relationship is at times turbulent, and its future remains highly uncertain. Will the U.S. and China be able to forge a closer partnership that will enable them to cooperate in dealing with some of the vexing challenges facing the international community? Or are they more likely to drift toward a more adversarial relationship, as China's growing power--and the US reaction--generate a vicious cycle of mutual mistrust? In this class, students will grapple with these questions as they learn about the history of U.S.-China relations, and about many of the current issues facing the relationship.
Credit Only Granted for: GVPT204 or GVPT289J.
Formerly: GVPT289J.

GVPT205 Special Topics in International Ethics, Conflict, and Immigration (3 Credits)
An examination of issues in international ethics, conflict generated at the international level, and problems in immigration policy and law, including theories of rights and immigration, and ideological sources of international violence.
Prerequisite: GVPT105.
Recommended: GVPT241.
Restriction: Must be in College Park Scholars program; and must be in GVPT international Studies program.

GVPT206 Appetite for Change: Politics and the Globalization of Food (3 Credits)
An overview of the major forces transforming the food system--political, economic, technological, environmental--and the political debates surrounding them.
Credit Only Granted for: GVPT206 or GVPT289A.
Formerly: GVPT289A.

GVPT207 Racial and Ethnic Politics in the Obama Era (3 Credits)
This course seeks to understand the meaning and significance of Barack Obama as the first African American president. The course examines the extent to which the United States of America has entered into a post-racial society. We also examine the policy challenges Obama has faced as the first African American president. One example is the passing of comprehensive health care reform. We discuss whether opposition to health care is driven by people's racial attitudes or their different views about the role of government. Others topics that the course will examine are: how Obama became the first African American president; the strategies his campaign used to motivate citizens to the voting booth; the public's reaction to Obama's election; racial group identity during the Obama era; Trump's victory as a response to Obama.
Credit Only Granted for: GVPT207 or GVPT289O.
Formerly: GVPT289O.

GVPT208 Political Science Topics in Study Abroad (3 Credits)
The study of topics in political science taken as part of an approved study abroad program.
Repeatable to: 9 credits if content differs.

GVPT210 Religions, Beliefs, and World Affairs (3 Credits)
Introduces students to an increasingly important question: what is the relationship between religion and politics around the world? For a long period in the 20th Century, religion seemed to be decreasing in importance. Eventually, it was thought, religion would simply go away and secularism, development, and rationality would rule the day. In the last generation, however, events like the Iranian Revolution, the rise of the Christian Right, 9/11, the Tibetan monks protest, the spread of Truth and Reconciliation Commissions, and numerous wars fought in the name of God have brought religion back to prominence in world affairs. In this course, we will explore the contemporary impact of religions on politics around the world, through four broad themes: how to understand religion in politics , the relationship between religion and the state, religious groups as sources of conflict and peace, and contemporary religio-political challenges.
Credit Only Granted for: GVPT210 or GVPT289L.
Formerly: GVPT289L.

GVPT217 Mock Trial (3 Credits)
Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theoryCross-listed with MLAW217.
Credit Only Granted for: MLAW217, GVPT217, or GVPT319A.
Formerly: GVPT319A.

GVPT221 Introduction to Formal Theories of Political Behavior and Politics (3 Credits)
An introduction to the theories of rational choice including theories of negotiation and bargaining, elections and voting in democracies, community organizing and the contrast between the roles and performances of government and market.
Prerequisite: GVPT170.

GVPT228 The Craft of Political Science Research (4 Credits)
An introduction to research design and statistics applicable to political science.
Prerequisite: GVPT100 and GVPT170.
Restriction: Must be in a major in BSOS-College of Behavioral & Social Sciences; and sophomore standing or higher.
Repeatable to: 8 credits if content differs.
Formerly: GVPT227.

GVPT241 The Study of Political Philosophy: Ancient and Modern (3 Credits)
Examines some of the salient continuities and breaks between the ancient and modern traditions in Western political philosophy.

GVPT258 Introduction to Political Science Topics in Study Abroad (3 Credits)
The study of topics in political science taken as part of an approve study abroad program.
Repeatable to: 9 credits if content differs.

GVPT260 State and Local Government (3 Credits)
A study of the functioning and problems of state and local government in the United States, with illustrations from Maryland jurisdictions.
Prerequisite: GVPT170.

GVPT273 Introduction to Environmental Politics (3 Credits)
An overview of modern environmental philosophy, politics, and policy, exploring environmental politics in the US by way of comparison with other developed and developing countries.

GVPT280 The Study of Comparative Politics (3 Credits)
An introduction to the comparative study of politics and governance, including the analytical concepts for studies of politics and a survey of the major types of regimes, including democratic and authoritarian/communist regimes.

GVPT282 Politics and the Developing World (3 Credits)
A study of the domestic governmental institutions; processes and problems such as conflict and economic development; and the socio-economic environments that are common to developing countries of Africa, the Middle East, Asia, and Latin America.

GVPT289 Special Topics in Government and Politics (1-6 Credits)
Substantive issues of and theoretical approaches to political phenomenon. Topics and credit vary.
Repeatable to: 6 credits if content differs.

GVPT301 Identity and Conflict (3 Credits)
An examination of identity as a source of civil conflict. The course explores how identity is embedded in context, how identity is manipulated for political ends, and how identity conflict may be resolved.

GVPT306 Global Environmental Politics (3 Credits)
Focus on three processes of international environmental policy development- identifying problems, negotiating solutions, and implementing agreements- through a range of case studies, including global climate change.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; or permission of BSOS-Government & Politics department.

GVPT308 Political Science Topics in Study Abroad II (3 Credits)
The study of topics in political science taken as part of an approved study abroad program.
Repeatable to: 9 credits if content differs.

GVPT309 Topics in International Relations (3 Credits)
The study of topics in international relations.
Repeatable to: 6 credits if content differs.

GVPT317 Mock Trial II: Advanced Trial Advocacy (3 Credits)
Development of trial advocacy skills through participation in practice trials and intercollegiate mock trial competitions. Student may have an opportunity to represent the university in intercollegiate mock trial tournaments, including the National Mock Trial Championships.
Prerequisite: GVPT217.
Credit Only Granted for: GVPT317 or GVPT319B.
Formerly: GVPT319B.

GVPT319 Topics in Social Advocacy (1-3 Credits)
Reading, research and discussion of variety of topics related to social advocacy.
Repeatable to: 6 credits if content differs.

GVPT320 Advanced Empirical Research (3 Credits)
Allows students to build on the knowledge of statistical inference they gained from GVPT201. Topics include data collection, data cleaning, data analysis, and data visualization. By the time students complete this class, they will be able to do basic statistical modeling using OLS regression independently.
Prerequisite: GVPT201.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

GVPT331 Courts, Law and Justice (3 Credits)
An introductory course to the study of law with emphasis on how lawyers and judges think and argue. Topics include, contract law, property, family law, torts, and criminal procedure.
Prerequisite: GVPT170.

GVPT339 Topics in Public Law (3 Credits)
The study of topics in public law.
Repeatable to: 6 credits if content differs.

GVPT349 Topics in Political Philosophy (3 Credits)
The study of topics in political philosophy.
Repeatable to: 6 credits if content differs.

GVPT351 Model United Nations (3 Credits)
Students are prepared for the model United Nations Conference.
Restriction: Must be in College Park Scholars program; and must be in GVPT International Studies program.
Formerly: GVPT388S.

GVPT354 International Development and Conflict Management (3 Credits)
Serves as the gateway course for the Minor in International Development and Conflict Management. Provides an introductory foundation in the theory and practice of international development and conflict management. Introduces the structures, key players, intersections, and main trends in the evolution of the fields. Explores causal factors that drive economic growth, poverty, inequality, and conflict, as well as the resources, methods, and tools available to track and address these issues.
Restriction: Sophomore standing or higher; and must be in one of the following minor programs (International Development and Conflict Management; Global Engineering Leadership; Global Poverty, Global Terrorism Studies) and have permission of the Center for International Development, or must be in the Government and Politics major with permission of the Government and Politics department.
Additional Information: Students enrolled in MIDCM are expected to take the course during the Fall semester after admission to the program.

GVPT355 Capstone in International Conflict Management (3 Credits)
Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international conflict management and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.
Prerequisite: GVPT354.
Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT356 Capstone in International Development (3 Credits)
Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international development and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.
Prerequisite: GVPT354.
Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT358 Study Abroad Seminar in Political Science (3 Credits)
The study of topics in political science.
Repeatable to: 9 credits if content differs.

GVPT359 Topics in Comparative Politics (3 Credits)
The study of topics in comparative politics.
Repeatable to: 6 credits if content differs.

GVPT360 International Negotiations (3 Credits)
A study of the complexities of international negotiation and cross-cultural decision-making. Students will apply advanced computer technology in an interactive simulation involving actual negotiations.
Prerequisite: GVPT200.

GVPT368 Special Topics in Government and Politics (3 Credits)
The study of topics in government and politics.
Repeatable to: 6 credits if content differs.

GVPT373 Geographic Information Systems for Redistricting (3 Credits)
Local, state and federal governments must periodically draw and redraw political boundaries to account for shifts in the population. This course will be an introduction and overview of district drawing and redistricting as an important application of GIS research in political science and public policy. This class will equip students to use convenient GIS tools to create and consider alternative district scenarios to find the best possible solution. After finishing this class students will be able to draw districts to define police beats, sales territories, congressional and state legislative districts, school and fire protection districts, and numerous other boundaries.Recommended: at least one course in statistics.
Prerequisite: GVPT392.
Recommended: at least one course in statistics.

GVPT376 Applied Field Research in Government and Politics (3-6 Credits)
Students in this course participate as interns in an agency of government or in some other appropriate political organization. Assignments are arranged to provide students with insights into both theoretical and practical aspects of politics. Under the tutelage of the host agency and an academic advisor, students conduct a major research project of mutual interest to the student and his or her host agency in the field of government and politics.
Prerequisite: GVPT170.
Corequisite: GVPT377.

GVPT377 Experiential Learning: Government and Politics Internship Program (3 Credits)
The application of major concepts of political science to the realities of the political process. The course connects internship experiences with larger themes of political science. Students must be admitted to the GVPT Internship Program.
Prerequisite: GVPT170.
Credit Only Granted for: GVPT377 or GVPT388W.
Formerly: GVPT388W.

GVPT379 Topics in American Politics (3 Credits)
The study of topics in American politics.
Repeatable to: 6 credits if content differs.

GVPT386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.

GVPT388 Topical Investigations (1-3 Credits)
Independent research and writing on selected topics in government and politics.
Prerequisite: 1 course from GVPT200-299 course range.
Repeatable to: 6 credits if content differs.

GVPT389 Experiential Learning II (3-6 Credits)
Experiential credit for working in government & politics related internships, research, and teaching opportunities.
Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.
Repeatable to: 6 credits.

GVPT390 Game Theory (3 Credits)
Introduction to game theory with applications to political science, economics and sociology. Topics include preference theory, expected utility theory, Nash equilibria, subgame perfection, repeated games, folk theorems, and evolutionary stability.
Restriction: Must not have completed ECON414.
Credit Only Granted for: GVPT399A, GVPT390, CMSC474 or ECON414.
Formerly: GVPT399A.

GVPT392 Introduction to Geographic Information Systems for Social Science Research (3 Credits)
Introduction to the use of Geographic Information Systems for conducting research in the social sciences. Overview of spatially embedded nature of many social science phenomena and content of theories common to spatial thinking. Students will obtain hands-on experience with various GIS tools and methods most frequently employed by social scientists.
Credit Only Granted for: GVPT392, GVPT429A, or GVPT729D.
Formerly: GVPT429A, GVPT729D.

GVPT393 Intermediate Geographic Information Systems (3 Credits)
Part II of a two-semester course that integrates Geographic Information Systems with social science research. Lectures and readings will motivate the use of GIS by exposure to research applications in international relations; political and non-profit fundraising; environmental justice; public health; race relations; business and economics.
Prerequisite: Must have completed one GIS course and at least one course in statistics.
Credit Only Granted for: GVPT368I, GVPT393 or GEOG498W.
Formerly: GVPT368I.

GVPT396 Introduction to Honors Research (3 Credits)
A required course for all honors students designed to emphasize library research, methodology, and writing skills in political science and political philosophy. A written proposal, bibliography and research design for an honors paper required of all students as a final project.
Restriction: Must be in Government & Politics Honors Program; and must have permission of the Government & Politics Honors Program.

GVPT397 Honors Research (3 Credits)
Individual reading and research. Preparation of an original paper.
Prerequisite: GVPT396.
Restriction: Must be in Government & Politics Honors Program.

GVPT399 Seminar in Government and Politics (3 Credits)
Reading, research, discussion, analysis, and writing in the area of politics. Both substantive issues and methodological approaches will be considered. Primarily for government and politics undergraduate majors.
Prerequisite: 1 course from GVPT200-299 course range.

GVPT402 International Law (3 Credits)
A study of the basic character, general principles and specific rules of international law, with emphasis on recent and contemporary trends in the field and its relation to other aspects of international affairs.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT404 Political Economy of Foreign Aid (3 Credits)
The world spends hundreds of billions of dollars on foreign aid every year. The effects of this aid spending are controversial. Research supports both pessimistic and optimistic views of foreign aid's effectiveness, with little consensus. Where does aid money go? What are the motivations of aid donors? Is foreign aid effective at achieving its goals? Why or why not? This course is designed to survey the promise and the challenges of foreign aid as a policy tool. The first half of the course will focus on the motivations and goals of foreign aid. We will consider various foreign aid donors, such as countries, institutions, and individuals, to understand the motivations behind and effects of foreign aid. We will create a typology of foreign aid agendas, motivations, and donors. The second half of the course will consider the challenges specific to foreign aid. This includes both technical challenges and political challenges. We will consider the strategies that aid donors and organizations have taken to try to overcome these challenges.
Recommended: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409R or GVPT404.
Formerly: GVPT409R.

GVPT406 International Organizations (3 Credits)
A basic introduction to the full range of international organizations that have come into being over the past century and one-half, including those that aspire to be universal or global, those with a geopolitical or regional focus, and those that address specific structural or functional areas of human endeavor or issue areas.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT409 Seminar in International Relations and World Politics (3 Credits)
Reading, writing, and research on topics in international relations and world politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.
Repeatable to: 9 credits if content differs.

GVPT410 Politics of Nationalist and Ethnic Conflict (3 Credits)
An examination of the major causes and consequences of ethnic, nationalist, and separatist conflict. The course will focus on both theories of ethnicity and nationalism, as well as theories of conflict related to these issues. The course will also explore empirical trends in ethnic and nationalist politics.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).
Credit Only Granted for: GVPT409M or GVPT410.
Formerly: GVPT409M.

GVPT411 Conflict in the International System (3 Credits)
In this course, we will examine conflict, peace, and conflict resolution in contemporary international politics. We will interrogate what we mean by concepts such as peace, conflict, and violence, the different forms that these phenomena can take, and how we can measure their occurrence. We will discuss theoretical explanations for why individuals and groups have disputes, why these actors choose to use violence (or not) in these disputes, and ways in which violent disputes can be resolved peacefully. We will examine these arguments in a detailed study of conflicts in the Middle East, as well as by evaluating published articles that examine the effectiveness of conflict management strategies such as peacekeeping.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409P or GVPT411.
Formerly: GVPT409P.

GVPT413 Peace, Justice, and Conflict Resolution (3 Credits)
An examination of classic and contemporary perspectives on peace, justice, and conflict resolution after armed conflict. The goal of this course is to expose students to the advantages, risks, and challenges of the most prominent methods of conflict mitigation and resolution, including mediation and arbitration; peacekeeping, peacemaking, and peacebuilding; the protection of civilians, Responsibility to Protect, and humanitarian assistance; elections, democratization, and power-sharing; and transitional reconciliation and justice. We will do this by reading, discussing, and synthesizing classic and cutting-edge Political Science research on these topics.
Recommended: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409A or GVPT413.
Formerly: GVPT409A.

GVPT414 International Relations of East Asia (3 Credits)
An examination of international relations in East Asia, focusing mostly on Northeast Asia. The course will provide some background on the evolution of international politics in the region over the past several decades, and will examine several contemporary issues--including the North Korean nuclear issue, the relationship across the Taiwan Strait, and maritime disputes in the East and South China Seas--in depth.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409E or GVPT414.
Formerly: GVPT409E.

GVPT417 Seminar in Advanced Topics in Environmental Policy Analysis (3 Credits)
A series of critical tools and methods used to analyze environmental policy. This class should be of interest to students who are either considering a career or graduate studies in environmental protection.
Prerequisite: GVPT273.
Restriction: Must be in one of the following programs (Government & Politics; Environmental Sci&Policy-Env Politics & Policy).
Credit Only Granted for: GVPT419B or GVPT417.
Formerly: GVPT419B.

GVPT419 Seminar in Public Policy (3 Credits)
Reading, writing, and research on topics in public policy. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT270.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT420 The Logic and Practice of Measuring Political Behavior (3 Credits)
Introduction to concepts and practices used for measuring political behavior. Political analysis is an increasingly quantitative field. It is crucial for students of political behavior to learn how to define concepts in concrete ways, examine different methods of measuring concepts, learn how to test the quality of chosen measures, learn how to construct richer measures out of multiple questions, and finally how to examine the relationship between multiple measures of similar concepts. Common pitfalls, errors, bias, and ethics will be examined along the way.
Prerequisite: GVPT201.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT421 Advanced Quantitative Methods (3 Credits)
Advanced quantitative methods for political science research.
Prerequisite: GVPT201.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT422 Quantitative Political Analysis (3 Credits)
Introduction to quantitative methods of data analysis, including selected statistical methods, block analysis, content analysis, and scale construction.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT220.
Restriction: Must be in Government & Politics program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

GVPT423 Elections and Electoral Behavior (3 Credits)
An examination of various topics relating to elections; the focus includes the legal structure under which elections are conducted, the selection and nomination process, the conduct of election campaigns, and patterns of political participation and voting choice in different types of elections.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program.

GVPT424 Quantitative Study of International Relations (3 Credits)
A comprehensive introduction to the quantitative study of international conflict. Students will perform statistical analysis of international conflict data using the R software platform.
Prerequisite: GVPT201.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).
Credit Only Granted for: GVPT409H (Fall 2015 and Fall 2016) or GVPT424.
Formerly: GVPT409H (Fall 2015 and Fall 2016).

GVPT428 Topics in Formal Theories of Political Behavior and Politics (3 Credits)
An evaluation of theories of political behavior such as game, social choice and voting theory, and their applications to problems of distribution and social justice, community organizing, responsive public policy, institutional design, and alliance and coalition formation.
Prerequisite: GVPT241 and GVPT221.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT429 Problems in Political Behavior (3 Credits)
The problem approach to political behavior with emphasis on theoretical and empirical studies on selected aspects of the political process.
Prerequisite: GVPT241.
Recommended: GVPT220.
Restriction: Must be in Government & Politics program.

GVPT431 Introduction to Constitutional Law (3 Credits)
A systematic inquiry into the general principles of the American constitutional system, with special reference to the role of the judiciary in the interpretation and enforcement of the federal constitution.
Prerequisite: GVPT170 and GVPT331.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.

GVPT432 Civil Rights and the Constitution (3 Credits)
A study of civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and the rights of defendants.
Prerequisite: GVPT170 and GVPT331.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT433 The Judicial Process (3 Credits)
An examination of judicial organization in the United States at all levels of government, with some emphasis on legal reasoning, legal research, and court procedures.
Prerequisite: GVPT241 and GVPT331.
Restriction: Must be in Government & Politics program.

GVPT439 Seminar in Public Law (3 Credits)
Reading, writing, and research on topics in public law. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT331.
Restriction: Must be in Government & Politics program; and junior standing or higher.
Repeatable to: 6 credits if content differs.

GVPT441 History of Political Theory: Ancient and Medieval (3 Credits)
A survey of the principal political theories set forth in the works of writers before Machiavelli.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT442 History of Political Theory--Medieval to Recent (3 Credits)
A survey of the principal theories set forth in the works of writers from Machiavelli to Nietzsche.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.

GVPT443 Contemporary Political Theory (3 Credits)
A survey of the principal political theories and ideologies set forth in the works of writers from Karl Marx to the present.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.

GVPT445 Marxism and Postmarxism (3 Credits)
The study of Marxist thought and an assessment of the critical transformations and reassessments of the theory and practice of Marxism.
Restriction: Must be in a major within BSOS-Government & Politics department.

GVPT448 Non-Western Political Thought (3 Credits)
Examination of works by major authors and general themes of political thought originating in Asia, the Middle East, and Africa. This is not a survey of all non-Western political thought, but a course to be limited by the professor with each offering.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.
Additional Information: Permission of department required for repeat.

GVPT449 Seminar in Political Philosophy (3 Credits)
Reading, writing, and research on topics in political philosophy. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT454 Seminar in the International Relations of China (3 Credits)
Explores the foreign relations behavior of the People's Republic of China, with focus on the contemporary era.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT456 The Politics of Terrorism (3 Credits)
Examination of the definition, causes and organization of terrorist activity, along with key domestic and international counter- and anti-terrorism responses. Special emphasis on challanges and opportunities to the scientific study of terrorism.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Credit Only Granted for: GVPT456 or GVPT459T.
Formerly: GVPT459T.

GVPT457 American Foreign Relations (3 Credits)
The principles and machinery of the conduct of American foreign relations and an analysis of the major foreign policies of the United States.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GVPT459 Seminar in Comparative Politics (3 Credits)
Reading, writing, and research on topics in comparative politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Repeatable to: 6 credits if content differs.

GVPT460 State Politics and Government (3 Credits)
A study of the structure, procedures and policies of state governments with special emphasis on intergovernmental relationships, and with illustrations from Maryland governmental arrangements.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT260.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT461 Local Politics and Government (3 Credits)
An introduction to local government and politics in the U.S. context. The course explores the evolution of local jurisdictions, particularly cities, and the politics of local level decision making.
Prerequisite: GVPT170.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Credit Only Granted for: GVPT461 or GVPT479L.
Formerly: GVPT479L.

GVPT473 The U.S. Congress (3 Credits)
A detailed survey of lawmaking and the legislative process, emphasizing the U.S. Congress, and its members.
Prerequisite: GVPT241 and GVPT170.
Restriction: Junior standing or higher. And must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT474 Political Parties (3 Credits)
A descriptive and analytical examination of American political parties, nominations, elections, and political leadership.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program.

GVPT475 The Presidency and the Executive Branch (3 Credits)
An examination of the U.S. presidency in historical and contemporary perspective: nomination and electoral politics and the president's place in policy-making, administration, and public opinion.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT476 The Business Government Relationship (3 Credits)
Examines the structures, process, and outcomes of business and government and the politics and products of their cooperative-adversarial relationships in the United States. The design integrates interest group and administrative politics and the public policy process.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT270.
Restriction: Must be in Government & Politics program.

GVPT477 Voting and Participation (3 Credits)
A study of the factors that influence individual vote choice and voter participation in the U.S. The course will introduce political science research pertaining to both topics and will engage current controversies over such things as political campaign laws and the various state and federal rules that govern election administration.
Prerequisite: GVPT170 and GVPT241.
Restriction: Must be in Government & Politics program.

GVPT479 Seminar in American Politics (3 Credits)
Reading, writing, and research on topics in American politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program; and junior standing or higher.
Repeatable to: 6 credits if content differs.

GVPT481 Government and Administration of Russia and the States of the Former Soviet Union (3 Credits)
A comparative study of the governmental systems and political processes of the states of the former Soviet Union.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program.

GVPT482 Government and Politics of Latin America (3 Credits)
A comparative study of the governmental systems and political processes of the Latin American countries.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT484 Government and Politics of Africa (3 Credits)
A comparative study of the governmental systems and political processes of the African countries, with special emphasis on the problems of nation-building in emergent countries.
Prerequisite: GVPT282 or GVPT280.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT485 Government and Politics of the Middle East (3 Credits)
A comparative study of the governmental systems and political processes of Middle Eastern countries, with special emphasis on the problems of nation-building in emergent countries.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program.
Credit Only Granted for: GVPT485 or GVPT459E.
Formerly: GVPT459E.

GVPT487 Government and Politics of China (3 Credits)
Discussion of major issues in the study of the domestic politics of the People's Republic of China.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.
Credit Only Granted for: GVPT359A or GVPT487.
Formerly: GVPT359A.

HACS - ACES-Cybersecurity

HACS100 Foundations in Cybersecurity I (2 Credits)
Interdisciplinary foundational course of the ACES program. Through lectures, lab activities, and discussions, students will learn and practice various aspects of cybersecurity. Weekly technical lectures will introduce students to the operating system UNIX. Students will partner with the Division of Information Technology in a project to engage the University of Maryland community in a cyber- hygiene and cyber-ethics campaign based on the concepts learned in class.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS101 Applied Cybersecurity Foundations (2 Credits)
Prepares students for team research that will be conducted in HACS 200. Students gain an understanding across the breadth of cybersecurity including system monitoring, networking basics and penetration testing. An applied approach to statistics is also included to prepare students to assess the data collected for their research projects. The course is conducted with a hands-on approach applying virtual environments to practice the concepts learned in the technical lectures each week.
Prerequisite: Minimum grade of C- in HACS100.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS102 Foundations in Cybersecurity II (3 Credits)
Second interdisciplinary foundational course of the ACES program. Through lectures and project work, students will learn and practice cybersecurity. Students will work in teams to develop a honeypot project, and work on this project throughout the course. Weekly lectures will supplement project work, focusing on types of computer attacks and protections, data collection and analysis, and other foundational cybersecurity concepts.
Prerequisite: HACS100.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS200 Applied Cybersecurity Foundations II (2 Credits)
Students will apply the skills learned in HACS 100 and 101 to practice cybersecurity research through team led projects employing honeypots, carrying that project through all stages - proposal, implementation, and analysis. Weekly lectures will supplement project work by addressing trends observed in honeypot attacks and protections needed, along with data collection and analysis tools, and other foundational cybersecurity concepts.
Prerequisite: Minimum grade of C- in HACS101.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS201 Introduction to UNIX (1 Credit)
Introduction to the operating system UNIX through lectures and hands-on assignments.
Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Credit Only Granted for: HACS201 or CMSC216.
Additional Information: Required course for students who have not completed the ACES Living-Learning Program or taken CMSC216.

HACS202 Group Project in Cybersecurity (3 Credits)
The group project in this course will combine technical, analytical, and communication skills, further engaging students in the practice of cybersecurity. Students will learn about design concepts and data analysis as they engage in a team project designing, deploying, and collecting and analyzing data from a honeypot. The hands-on nature of the course will give students experiential insight about how and why attackers attack and how to engage in protective measures to prevent attacks.
Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and cannot have been an ACES Living-Learning Program student (i.e., have taken HACS100, HACS101 and HACS200).

HACS208 Seminar in Cybersecurity (3 Credits)
Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.
Repeatable to: 6 credits if content differs.

HACS208A Accounting and Economic Aspects of Cybersecurity (3 Credits)
In today's interconnected digital world, cybersecurity has become one of the most important issues confronting organizations in both the private and public sectors of an economy. Indeed, cybersecurity is a national and economic security priority in countries throughout the world. This is an interdisciplinary Honors Seminar offered as part of UMD's ACES program. The primary objective of this course is to discuss the relationships among accounting, economics and cybersecurity, with a focus on the important roles of accounting and economics in understanding the issues related to cybersecurity. A basic framework for assessing the interactions among accounting, economics, and cybersecurity will be developed and discussed. A secondary objective of the course is to assist ACES students in developing their ability to conduct original and applied research on topics related to "accounting and economic aspects of cybersecurity."
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208E Introduction to Reverse Engineering (3 Credits)
An introduction to software reverse engineering tools and methodologies. Fundamental topics will be introduced: compilers, linkers, loaders, assembly language, as well as static and dynamic analysis tools. We will motivate some reasons for software reverse engineering and examine the background material necessary for an understanding of the subject. This will include computer architecture and low-level systems programming, as well as an introduction to x86_64 assembly language. We will apply this newly acquired knowledge while learning about static and dynamic analysis tools used by practitioners of software reverse engineering.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208I Security Incident Handling and Management (3 Credits)
Examines the many roles, capabilities, organizations, and objectives involved in security incident handling and management. Core course content includes three major components: learning about the skill sets that people use, participating in role playing exercises that increasingly build upon this knowledge, and finally conducting exercises in a lab environment simulating security incident discovery, handling, and management.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208M Project Management Techniques for IT Professionals (3 Credits)
This course aims to build an in-depth understanding of project management methodologies for IT professionals. The course explores the application of Project Management Institute (PMI) guidelines for managing projects and PMP certification. Topics include an overview of PMI standards and project management, various roles in managing technical projects, work breakdown structures, security considerations, risk assessment, testing, and implementation. The students will have an opportunity to learn how to apply PMI guidelines in a real world software development project.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208N Digital Forensics (3 Credits)
Explores the various fields of digital forensics, such as memory, hard drive, and network traffic analysis. This course covers the legalities involved with forensic investigations and the wide variety of digital forensics tools, including both open source and proprietary. This course includes the different types of forensic artifacts that can be acquired and analyzed and review the careers and certifications relevant to the field.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208P Beyond Technology, the Policy Implications of Cyberspace (3 Credits)
Explores the key issues facing policy makers attempting to manage the problem of cybersecurity from its technical foundations to the domestic and international policy considerations surrounding governance, response, and critical infrastructure risk management. The course is designed for students with little to no background in information technology, and will provide the principles to understand the current debates shaping a rapidly evolving security landscape.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208Z Methods for Solving (And not Solving) Puzzles (3 Credits)
Surveys modern problems from different domains in computer science and cybersecurity to train our minds to appropriately approach puzzles we encounter in the future. This course covers graph theory, including what a graph is and the kinds of objects it can model, connectivity types, and vertex/edge covers algorithms. This course covers computer networks, including the models used for network stacks and what algorithms are used to solve difficult problems present in our current networks. This course covers algorithm analysis, including greedy algorithms, big O complexity, and how to analyze the capabilities and limitations of an algorithm. This course introduces cryptography, including the difference between public-key and symmetric-key cryptography, how RSA works, and the cryptanalysis of well-known cryptosystems.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS279 Undergraduate Research in Cybersecurity (1-3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits if content differs.

HACS287 Undergraduate Research in Cybersecurity (3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS297 Cybersecurity Experience Reflection (3 Credits)
Cybersecurity experience is defined as an experiential learning activity either with a University of Maryland entity (such as the Division of Information Technology, the ACES competition team or in an ACES outreach program), or with an external organization that will provide valuable, hands-on experience to supplement the knowledge learned in the other ACES coursework.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS318 Cybersecurity Professionals Colloquium Series (1 Credit)
The Cybersecurity Professionals Colloquium Series explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. The colloquium series consists of guest lectures of cybersecurity professionals. In written assignments, students will not only summarize the lecture content but also reflect on the significance of the lecture content for the field of cybersecurity.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Repeatable to: 2 credits.

HACS402 Applied Security Analysis and Visualization (3 Credits)
Focuses on exploratory and statistical data analysis, data and information visualization, and the presentation and communication of analysis results. These topics will be presented and explored in the context of and with applications to cybersecurity related data.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408 Advanced Seminar in Cybersecurity (3 Credits)
Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Repeatable to: 9 credits if content differs.

HACS408C Interpersonal Cyber Communications (3 Credits)
Designed to prepare students to participate in culturally responsible and environmentally appropriate communication in the workforce. Students will explore the industry standards for writing technical reports, as well as the variances between persuasive, team, written, and oral communication styles.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408L Analytical and Forensic Techniques for Cybersecurity (3 Credits)
Explores forensic artifacts contained in digital devices, security mechanisms available to protect digital devices and mechanisms available to cybersecurity professionals for analysis of digital devices. Topics include file structure and recovery of IoT and cell phone forensic data, network data capture and analysis, enterprise mobile device management analysis and forensic investigation of digital devices (IoT, telematics systems, etc.) that interact with cell phone and other devices. Incident response, timeline analysis, and detection and analysis of artifacts will be explored in a hands-on and lab-centric course using a variety of open-source tools and commercial cloud services.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408M Introduction to Cyber Threats and Risk Management (3 Credits)
Provides an exploration of cyber risk management and present-day cyber threats, their impacts, and their mitigations. Students will take a multi-disciplinary approach to understanding threats and risks including the technical, policy, and social aspects. This course is guided by real-world cyber threats and examples.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408O Internet of Things Security (3 Credits)
This increasingly interconnected world brings a need for understanding cybersecurity challenges associated with embedded devices and systems. This course will expose students to topics in Internet of Things (IoT) and Cyber Physical System (CPS) device types, IoT/CPS threat categories, security services, distributed networking, activity privacy, and intrusion detection for embedded environments. In addition to individual homework assignments, students will participate in a semester long group project involving research, design, and implementation.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408T Penetration Testing (3 Credits)
A hands-on, technically rigorous experience that prepares students for real-world work in penetration testing and offensive security. This course will allow students to gain proficiency and become comfortable using the tools, techniques, and methodologies that represent the state of the art in penetration testing today. Students should be comfortable on the command line, and a technical exposure to networking and basic proficiency in some scripting language (Bash, Ruby, or Python) is expected.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408V Data Analysis and Visualization for Cybersecurity (3 Credits)
Focuses on exploratory and statistical data analysis, data and information visualization, and the presentation and communication of analysis results. These topics will be presented and explored in the context of and with applications to cyber security related data. Examples and illustrations will often involve the R programming language, but prior experience with R is not required and submitted work may involve the use of other languages and tools at times.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS479 Undergraduate Research in Cybersecurity (1-3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits if content differs.

HACS487 Undergraduate Research in Cybersecurity (3 Credits)
A semester-long, individualized academic research project. Students work with a faculty supervisor to design and research an original topic. Students engage in research to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and prepare for graduate school and/or the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS497 Cybersecurity Experience Reflection (3 Credits)
Cybersecurity experience is defined as an experiential learning activity either with a University of Maryland entity or with an external organization that will provide valuable, hands-on experience to supplement the knowledge learned in other ACES coursework. This course is intended to help students reflect on their cybersecurity experience and to learn from others' cybersecurity experiences. It is also intended to help students gain professional skills that will aid in their future career.
Prerequisite: Students may enroll concurrently with or after completing a cybersecurity related internship experience of at least 135 hours.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and must not have taken HACS297.
Credit Only Granted for: HACS297 or HACS497.

HACS498 Cybersecurity Group Problem Solving (3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in team problem solving activities in order to gain greater insight into a specific area within cybersecurity and to obtain an appreciation for the subtleties and difficulties associated with these activities in order to prepare students for graduate school and the workforce. Students engage in a semester long problem solving or development project under the mentorship of a industry specialist and with the guidance of university faculty. Through the exercise the students will develop teamwork experience and professional communication skills in addition to experience of the project itself. The project might be evaluation, creation, testing or analysis of some area of cybersecurity as needed by the mentor-sponsor. A contract of what will be accomplished is required must be agreed upon by the mentor, the student and the ACES leadership before the project can begin.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits.

HDCC - Design Cultures and Creativity

HDCC105 Introduction to Design Cultures and Creativity I (3 Credits)
History, concepts, and technologies of creative design expression, coupled with an introduction to development for particular platforms and devices.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC106 Seminar in Design Cultures & Creativity (3 Credits)
Introduction to the methods and theory of design production, with emphasis on creative and expressive platforms.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC201 Capstone Proposal Through Design Thinking (1 Credit)
Engages principles of design thinking to prepare second-year students in the Design Cultures and Creativity (DCC) program to create a proposal for their spring Capstone Project.
Prerequisite: HDCC105 and HDCC106.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC208 Seminar in Digital Cultures and Creativity (3 Credits)
An advanced seminar in specific aspects of digital culture and creativity, designed to keep students abreast of the latest developments in new media and the online world. Possible topics include mobile gaming, digital storytelling, and electronic music.
Prerequisite: HDCC106 and HDCC105.
Restriction: Must be in the Digital Cultures and Creativity Honors College Living/Learning program.
Repeatable to: 6 credits if content differs.

HDCC209 Capstone in Design Cultures and Creativity (3 Credits)
Capstone for Design Cultures and Creativity in which students will develop their program capstone projects under the supervision of a faculty mentor, with regular checkpoints and presentations to track progress.
Prerequisite: HDCC208.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.
Repeatable to: 6 credits if content differs.

HDCC379 Design Cultures and Creativity Independent Study (1-3 Credits)
Involves research and/or creative scholarship directed by individual DCC faculty outside of the formal classroom structure.
Prerequisite: HDCC105.
Restriction: Must be enrolled in the Design Cultures and Creativity Honors College living-learning program; and permission of UGST-HCOL-Design Cultures & Creativity Program.
Repeatable to: 6 credits if content differs.

HEBR - Hebrew

HEBR102 Elementary Hebrew I-B (3 Credits)
Continues HEBR101. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing and reading ability. Corresponds to the second half of HEBR111.
Prerequisite: HEBR101; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR111.
Credit Only Granted for: (HEBR101 and HEBR102) or HEBR111.

HEBR103 Elementary Hebrew II-A (3 Credits)
Continuation of HEBR102 and HEBR111. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the first half of HEBR112.
Prerequisite: HEBR111 or HEBR102; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR112.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR104 Elementary Hebrew II-B (3 Credits)
Continuation of HEBR103. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the second half of HEBR112.
Prerequisite: HEBR103; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR112.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR106 Intensive Elementary Hebrew I (4 Credits)
An intensive study of fundamentals of Hebrew reading, writing, listening and Israeli culture. Covers present tense in all verb categories, basic syntax and builds vocabulary.
Prerequisite: Must have appropriate Foreign Language Placement Assessment (FLPA) score.
Credit Only Granted for: HEBR111 or HEBR106.

HEBR107 Intensive Elementary Hebrew II (4 Credits)
A continuation of intensive study of fundamentals of Hebrew reading, writing, listening, speaking and Israeli culture. Covers past tense in all verb categories, basic syntax and builds vocabulary.
Prerequisite: HEBR106 or HEBR111; or must have appropriate score on Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: HEBR107 or HEBR112.

HEBR111 Elementary Hebrew I (6 Credits)
Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing and reading ability.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR101; and must not have completed HEBR102.
Credit Only Granted for: (HEBR101 and HEBR102) or HEBR111.

HEBR112 Elementary Hebrew II (6 Credits)
Continuation of HEBR 111.
Prerequisite: HEBR111; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR103; and must not have completed HEBR104.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR199 Special Topics in Hebrew (3 Credits)
Topics in language, literature, and culture. Varies by semester and instructor.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

HEBR203 Intermediate Hebrew II-A (3 Credits)
Continuation of HEBR211 or HEBR202. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the first half of HEBR212.
Prerequisite: HEBR212 or HEBR202; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR212.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR204 Intermediate Hebrew II-B (3 Credits)
Continuation of HEBR203. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the second half of HEBR212.
Prerequisite: HEBR203; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR212.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR206 Intermediate Intensive Hebrew I (4 Credits)
Provides a comprehensive review of the fundamentals of Hebrew grammar and oral skills, and introduces new skills in future tense verb conjugation, and communication in reading, writing, listening and speaking.
Prerequisite: Must have completed HEBR107 OR HEBR112; or must have appropriate Foreign Language Placement Assessment(FLPA) score.
Restriction: Must not be a fluent/native speaker of Hebrew.
Credit Only Granted for: HEBR206 or HEBR211.

HEBR207 Intensive Intermediate Hebrew II (4 Credits)
A review of the fundamentals of Hebrew grammar, reading, writing, listening and speaking.
Prerequisite: Must have completed HEBR206 OR HEBR211; or have the appropriate Score on the Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: HEBR207 or HEBR212.

HEBR211 Intermediate Hebrew I (6 Credits)
Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture.
Prerequisite: HEBR112; or Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR201; and must not have completed HEBR202.
Credit Only Granted for: (HEBR201 and HEBR202) or HEBR211.

HEBR212 Intermediate Hebrew II (6 Credits)
Continuation of HEBR211.
Prerequisite: HEBR211; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed HEBR203; and must not have completed HEBR204.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR249 Special Topics in Hebrew Studies (1-3 Credits)
A broad range of cultural and societal topics pertaining to the communication of Hebrew.
Prerequisite: Must have completed HEBR206; or HEBR211; or must have appropriate score on Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Repeatable to: 9 credits if content differs.

HEBR269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HEBR298 Special Topics in Jewish Studies (3 Credits)
Repeatable to: 6 credits if content differs.

HEBR298B Introduction to the Hebrew Bible/Old Testament (3 Credits)
Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.Cross-listed with: JWST262, ENGL262.
Credit Only Granted for: JWST262, HEBR293B, or ENGL262.

HEBR313 Conversation and Composition I (3 Credits)
A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.
Prerequisite: HEBR212; or students who have taken courses with comparable content may contact the department.

HEBR314 Conversation and Composition II (3 Credits)
A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.
Prerequisite: HEBR313; or students who have taken courses with comparable content may contact the department.

HEBR369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HEBR381 Introduction to Hebrew Cultural Studies (3 Credits)
Critical study of Israeli culture with emphasis on literature, film, and art as sites of struggle over political and social meaning during times of cultural transformation. Focus on the historical development of Israeli identity and gender, in particular within the military and Zionist youth movements. Taught in Hebrew.
Prerequisite: HEBR314; or permission of instructor.

HEBR386 Experiential Learning (3-6 Credits)
Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

HEBR388 Language House Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident in the Language House Immersion program.
Repeatable to: 8 credits.

HEBR430 Critical Issues in Israeli Cinema (3 Credits)
Critical investigation of Zionist and Israeli culture and politics through film.Cross-listed with: CINE430.
Credit Only Granted for: HEBR430, CINE430 or FILM430.
Formerly: FILM430.

HEBR498 Special Topics in Hebrew (3 Credits)
Repeatable to: 6 credits if content differs.

HEBR499 Independent Study in Hebrew (1-3 Credits)
Independent study under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

HEIP - Entrepreneurship and Innovation

HEIP143 Foundations of Entrepreneurship and Innovation (1 Credit)
Foundational ideas and terms in entrepreneurship and innovation are introduced, with attention to developing students understanding of cultivating a business in diverse, global environments; leading and collaborating in a competitive world; developing an entrepreneurial mind for an entrepreneurial world; and industry dynamics of technological innovation.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP144 Contemporary Issues in Entrepreneurship and Innovation (3 Credits)
Inspires entrepreneurial innovation and creativity through interactive lectures, workshops, and case studies on contemporary issues to include energy, life sciences, healthcare, and technology. Explores entrepreneurial innovation sources, structures and dynamics. Helps students develop skills for generating ideas and addressing current issues and problems.
Prerequisite: HEIP143.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP240 Exploring International Entrepreneurship and Innovation (3 Credits)
An introduction to the opportunities and challenges of entrepreneurship and innovation from an international perspective.
Restriction: Must be an EIP student in good-standing.

HEIP241 EIP Capstone: Creating Enterprise with Social Impact (2 Credits)
Addresses the global necessity to develop and implement solutions to critical social and environmental concerns in ways that are both technologically viable and economically sustainable. Through group exercises, guest speakers, discussions, and experiential learning activities, students will develop the skills to create businesses that achieve the double bottom line of both profitability and social benefit.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HESI - Higher Ed, Student Affairs, and International Ed Policy

HESI202 Race and Diversity in Higher Education (3 Credits)
Will discuss contemporary and controversial issues on race and diversity in higher education. Addresses the question: How should race influence college admissions and campus climate? Will expose students to different viewpoints on the role of race in higher education settings.

HESI217 Introduction to Student Leadership (3 Credits)
Introduction to leadership theories, concepts, and skills. Completion of personal and leadership self-assessments, values exploration, and small group application.
Restriction: Freshman standing; or sophomore standing.

HESI220 Adaptive Strategies for Multicultural Leadership and Dialogue (3 Credits)
As U.S. society becomes increasingly complex along multiple and continually evolving dimensions of individual and group identities, successful leaders will benefit from learning adaptive strategies and practices that will help them to navigate this complexity and adapt effectively in a climate of constant change. This class will focus on specific strategies, concepts, and insights for successful leadership and dialogue in twenty-first century U.S. multicultural society.
Restriction: Must not have completed BSCV301; and junior standing or lower.
Credit Only Granted for: EDCP318L or HESI220.
Formerly: EDCP318L.

HESI221 Leadership, Power and Privilege (3 Credits)
Critical analysis of social issues, contemplative practice, and dialogue are used to examine how power and privilege operate at individual, institutional, and societal levels to impact leadership perceptions and behaviors.

HESI298 Special Problems in Higher Education, Student Affairs, and International Education Policy (1-6 Credits)
Individual instruction in special problems related to higher education, student affairs and international education policy.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI310 Transfer2Terp Learning Community: Applying Your Strengths at the University of Maryland and Beyond (3 Credits)
Students will identify their strengths and learn how to apply them both in and outside of the classroom. Students will work side by side with the faculty and staff in the Adele H. Stamp Student Union to learn about their strengths while applying them to leadership positions.
Restriction: Priority will be given to students transferring from Maryland Community Colleges; or permission of EDUC-Counseling, Higher Education and Special Education department.

HESI315 Student Leadership in Groups and Organizations (3 Credits)
Acquiring and integrating leadership knowledge within group and organizational contexts so that students can navigate organizational environments and apply leadership in diverse communities of practice and career contexts.
Prerequisite: HESI217.
Credit Only Granted for: HESI315 or EDCP315.
Formerly: EDCP315.

HESI318 Applied Contextual Leadership (3 Credits)
